NEW ROSES

KILLARNEY BRILLIANT This rose will replace Killarney as surely as Killarney replaced Bridesmaid. We ordered 30,000 grafting eyes. We have increased this order to 40,000, To give early delivery we must have the order early. Others are ordering. Get your order in and get delivery when you want it. Grafted plants only at the introducers' price.

HADLEY Deep rich crimson in color with an unequalled fragrance. An average producer of bloom that bring the top price of the market. A rose that will make money and a rose you need. If you want better roses and increased business, plant Hadley. It is a variety that a real rose grower will delight in growing. Our trade list for prices.

NOTES ON CULTURE OF FLORISTS' STOCK

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Asparagus plumosus and Sprengeri

It is always better to sow this seed as soon after the new year as possible so as to produce fine plants by next June. It seems as every year goes past that we have to grow better plants to keep up to our brother grower. Use a compost of loam three parts, leaf mold two parts and enough sand to make it porous. Fill the pans within an inch of the top and then press the material moderately firm and on this sow the seed. Cover the seed about an eighth of an inch deep. Place in a temperature of about 70 degrees at night and keep them shaded until they come up when they can have all the light agoing. When they show up well stand them near the glass and keep them moist and in the same temperature that they were started in. When they are big enough to handle they can be potted into 2-inch pots, using a mixture of fresh loam three parts, cow manure one part and a little sand. When they have filled these pots with roots move into 3-inch and again into 4-inch.

Care of Geraniums

One of the heavy jobs just now is shifting geraniums from 2 to 3-inch pots. It is always better to do this as soon as possible, so as to give the plants a long season in which to grow. It is better to give two shifts than one. They can be moved successively to 3-inch and 4-inch pots. For a compost use two-thirds of soil that has been stacked up in a compost pile and mix with one-third of very well rotted manure and give the geraniums a light, sunny bench. After potting they enjoy a little bottom heat; so, if you have any heating pipes under any of the benches, these would provide the necessary warmth. A temperature of 65 degrees in the day and 45 to 50 degrees at night is sufficient. A little more warmth is desirable for young stock, until it gets established. Add a 4-inch pot of fine bone to each bushel of soil. This tends to make the growths harder and more floriferous. I must say that if you want good bedding plants in May, bushy plants with one or two good trusses of flowers, this midwinter shift is necessary and will pay well. Water with care until they are well rooted.

Sowing Gloxinias

Time to make a sowing of gloxinias. Use a light compost of one-half of loam, one-half leaf mold, with some sand. Sow the seed on this and first press in firmly on the moist surface. Cover with a square of glass and place near the light in a temperature of from 60 to 65 degrees. When the seedlings begin to come up they should have more light and air. When fit to handle they can be pricked into other pans or flats. Later they can be potted into small pots. The soil for the first shift should be very sandy and pliable—a compost of fresh loam and partly decomposed leaf mold in equal parts with a dash of clean sharp sand added. Make provision for ample drainage. Raise them up into full light near the glass, in order to prevent them from becoming drawn and weak, and keep the atmosphere moderately moist. Good judgment must be exercised in ventilation according to the condition of the weather out of doors. On all bright mornings they should be lightly syringed. To keep free of insects fumigate regularly once a week.

Seed Sowing

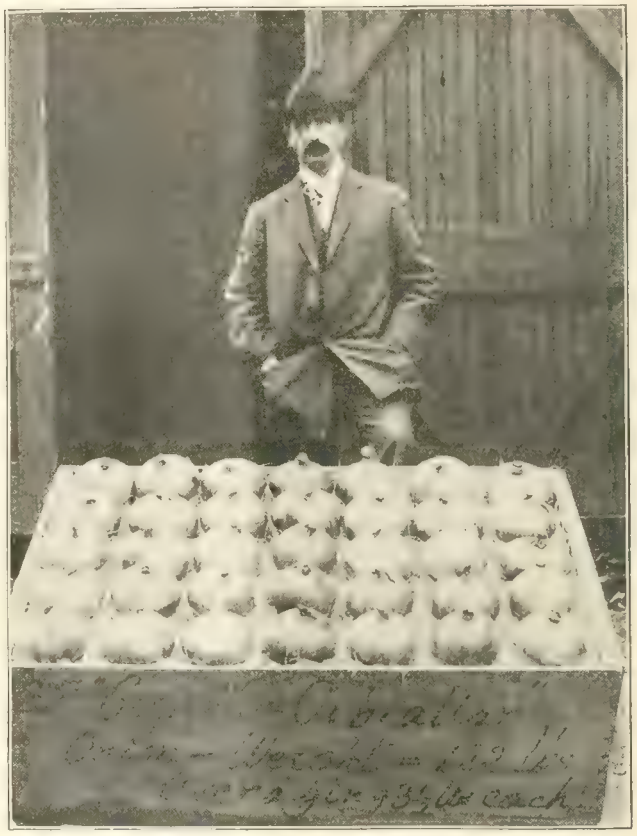
January is a good month in which to sow many flower seeds. It is an advantage to start many varieties before the solar heat gets stronger. In a uniform temperature, such as we usually get in January, germination is more likely to be good than later in the season. In each case we prefer to use sterilized soil and to water the soil before sowing the seeds, dusting a little fine sand over them after watering, then covering with sheets of glass and paper until germination takes place. All such seeds as verbenas, Vinca rosea, V. alba, heliotropes, browallias, cannas, asparagus in variety, Lobelia Emperor William, L. gracilis, torenias and petunias and many perennials can advantageously be started now.

Tuberous Begonias

These begonias make most useful plants for the retail florists. They can be used in a good many ways for outdoor embellishment, such as for filling vases, window boxes that have a partially shaded position, and also for beds and borders where the sun does not strike too strong. Sow now some of the best strains in pans in loam two parts, leaf mold and sand one part each. Fill the pans to within half an inch of the top. Sprinkle on some finely sifted compost and press firmly and even all over and on this sow the seed. Keep the pans covered with a piece of glass until the seeds have germinated. To do well they should have a temperature from 65 to 70 degrees during the night. Keep well up to the glass so they will not draw. In five or six weeks they should be large enough to prick out into flats. Some time in March they will be ready for two-inch pots. For a potting compost use soil two-thirds, old manure and leaf mold one-third each with some sand. At this stage give a night temperature of 60 degrees.

Start Making Flats

It will only be a very short time before we will need lots of flats to hold our young stock. Now before the rush starts get some light lumber or boxes and make up into flats. Every florist should make use of any spare time in getting up a good supply of these very useful boxes. Flats can be made into a handy size of 14 by 20 inches which makes about the best size for all general use. So get busy now on this work.



Mr. Farrell's next notes will be on the following: Chrysanthemums; Fibrous-Rooted Begonias; Orchids; Primulas; Rambler Roses; Value of Records.

A GRAND ONION (Gigantic Gibraltar)

While this onion is by no means new it is comparatively unknown to the majority of gardeners. But among onions grown for exhibition it ranks very high—in fact almost stands alone. Ailsa Craig, Cranston Excelsior and Prize-Taker are known to and have been grown by most of us, but Gigantic Gibraltar is something in the nature of a "bolt from the blue,"—albeit a very welcome one as it has proven itself to be superior to all the rest. A deeper green than any of the other onions, it is quite distinct in foliage and almost free from that glaucous tint which characterizes most of the onion family. Its size and its high average of first-class bulbs never fail to command our notice. Whereas, in growing Ailsa Claig we are fortunate if we secure from fifteen to twenty per cent. of exhibition bulbs, we can depend on forty per cent. from Gigantic Gibraltar—with its far better keeping qualities.

As the time rapidly approaches when next year's show onions must be sown, a few words on their culture will not be out of place. Growing a few of these large onions affords a peculiar pleasure to the enthusiastic gardener; for what plant responds so generously to liberal feeding and general good culture? Besides this is one of the few vegetables that loses none of its finer qualities when grown to the limit, and after maturity keeps for many months—a monument to the skill of the grower; so unlike the large chrysanthemum bloom whose glory is so evanescent, its reign never exceeding a few brief days.

Secure good seed from a reliable firm and sow—either singly in small pots or scattered very thinly over a flat or pan—about the last week in January. Allow the seed to germinate in a temperature of about 60 degrees and, if sown otherwise than in the small pots, prick out singly as soon as the seedlings are large enough

to handle. Except for purposes of germination always use a soil that is fairly rich in manure; a small addition of bone meal is generally beneficial. I prefer pot culture to flat culture because it presents better possibilities for individual treatment, and the condition of the roots may be examined with greater ease. It should be needless to tell the ambitious grower to anticipate sudden changes in temperature, to keep the soil from becoming too dry, and to attend to the repotting before the soil in the pots becomes impoverished. A temperature ranging from 55 degrees to 60 degrees nights and 60 degrees to 65 degrees days—with all the air and sunshine the weather conditions will permit—is best calculated to aid them on the "even tenor of their way." Inure them gradually to outside conditions by removing to cold-frames about the end of April—removing the sashes entirely on the fine days. By the 15th to the 20th of May the plants (if well grown) should have attained a four to five inch pot size and should be planted out. Manure the soil heavily with a good grade of farm-yard manure, a light dressing of bone and a little lime. In planting see that every root system is opened out, carefully and gently *but firmly* pressed into intimate contact with the soil. If the soil is on the dry side give a good watering at once, scuffle the surface over the next day and keep it loosened up at all times until about the middle of June when the soil will be sufficiently warmed up to warrant a mulch. This mulch may be some spent mushroom bed material, partially decayed leaves, or any other suitable material; taking care that the mulch is not too gross. Daily syringings with the hose during bright hot weather will encourage rapid growth and aid in keeping thrips off the plants.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

1914

It seems but yesterday that we began to get used to writing 1913 and here it is 1-9-1-4. May the new year bring all the readers of HORTICULTURE all those desirable things that we all dream about. And in business let us profit by our mistakes in the year just passed, and resolve to make less in the coming year.

Cold Weather and Shipping

It is best not to take any chances with Jack Frost, on these cold sharp mornings, when the mercury hovers around ten or even lower. Use plenty of paper in the boxes, and better still wrap the boxes on the outside with paper. This will be better than paper inside, but do not omit the inside newspapers for that reason. In tying up the boxes use good strong rope that will not break, and thus insure safe arrival of the flowers in the market. Cracked ice can now be omitted.

The Icebox

Just because the weather is very cold that is no reason why the icebox should be allowed to run too warm. Many places will experience difficulty in getting good ice, and often have to go to great expense to store it. For the small grower whose wants are limited it is very simple to make the required amount by getting some cheap pans and filling them up with water for the night and letting them freeze outside. Be sure, however, to put a stick or a block of nice soft wood into each, or the frost will tear the pans to pieces. The wood in the water will take all the expansion, and there will be no tearing as the water freezes. Keep the icebox about 48 or 50 degrees which will harden the roses very well, without causing them to open too much.

Benches for Young Stock

Now that you will be selecting a bench or a house for the young plants, remember that next year's success largely depends on these plants so they'd better have the best of everything, especially sunlight, which is very essential. If you grow only a few plants, select a bench in the front where the sun will reach the plants for the longest time possible. If the bench is too low, raise it by putting boards across on some 2 x 4's, thus making it wider as well. Then use a little sand or screened ashes to put over the boards, and it is then ready to receive the plants. To keep the ashes from sifting through the cracks between the boards, put some newspapers on the bench before the ashes or the sand is put on. This layer of paper may seem pretty thin, but it will hold all the ashes or sand as long as it is not disturbed.

Watering During Cold Weather

When the weather is very cold making it necessary to fire very heavy, watch the benches very carefully, as they are very likely to dry out here and there, especially if all the benches are raised, and there is heat underneath. Look for the dry spots in the bottom of the bench, as well as the surface for often the bottom will dry out more rapidly, and it is there where most of the roots will be found. Water as often as necessary, and water thoroughly when you do water. Never leave any dry spots in the benches behind you. There is no use wasting a good deal of water, but be sure that you give the plants enough to make it drip lightly through the benches.

Bending Beauties When Tying

It will be necessary to bend some of the long Beauty shoots that have been growing and not setting. We find it best to bend them towards the west, as that seems to make a little difference in their growth. At any rate get them all bent the same way or you will have a good deal of trouble if you have to bend them down again. In tying them after bending be sure to tie them well at the bottom, or you will have a little trouble with them when you syringe.

Feeding the Plants

Mulch the plants where they need it, and do not use any very rich fertilizers, especially those that are very rich in nitrogen. We do not like to use anything too strong, especially on Beauties. Cow manure is about the best that can be used as it is an all-around plant food, and not a stimulant. A little liquid manure applied once or twice a week will be very good, especially if the plants are making plenty of new growth.

Light sprinklings of lime and soot seem to be very much to the liking of the onion if applied about fortnightly, and sometimes a good soaking of weak liquid manure might be advantageously given.

Exhibition onions should have finished their growth early in August and the ripening process will be assisted by withholding water, and accelerated by lifting the onion slightly with a fork. Should ripening be deferred too long and the fall rains commence before the bulbs are harvested much damage by rotting may ensue. As soon as the shrinking foliage indicates that the bulbs are ripening, remove them from the open ground to some airy loft; or put some boards in the bottom of the frame and partially cover with the sash during good weather, and completely protect them from rain. Remember that these large onions are easily bruised and once bruised will soon rot;—"handle with care" should be our motto at all times.

Edwin Jenkins

Undesirable

Repeated mention has been made by our correspondents in describing Christmas conditions, of the insatiable demand for dried and dyed and imitation flowers which has been developed this year. We are sorry that it is so. It is nothing to the credit of the public that they are disposed to accept this stuff as a substitute for fresh flowers and growing plants nor to the retail flower trade that they should encourage it. The hopeful side of it is the probability that the craze will be short-lived. Some thirty years ago there was a similar outbreak, when bleached, dyed and painted grasses were sold in enormous quantities. But there was more justification for it in those days of fluctuating supply and frequent famine in the cut flower market than there is now.

Bon voyage

Our columns this week contain notes of the remarkable contribution to our botanical, arboreal and floral knowledge of the richest temperate flora in the world, from the pen of E. H. Wilson, and next week we shall tell of the notable farewell dinner given to that gentleman by the Horticultural Club of Boston on the eve of his departure for Japan where he is to carry on some important research work in behalf of the Arnold Arboretum. Entirely apart from the eminent position which Mr. Wilson has won for himself in the horticultural and scientific world by his work on the Chinese flora, he has, in his sojourn in Boston, notably endeared himself to the fraternity here by his kindly companionable traits and cheery good-fellowship. The attachments thus cemented will hold secure during his absence, with hearty good wishes for the success of his expedition and his safe return to our midst.

Local publicity

It is encouraging to know that the retail florists all over the country are actually waking up to a realization of the necessity of local newspaper advertising. Other lines of business catering to the public direct have been doing it right along for years and the florists have been almost the only exception of late. If there is any one thing which should have the retailers' careful attention today it is the development of community interest. It is essential under present conditions that he should follow the approved methods of getting in close, neighborly touch with his home public, acquainting them with the goods he carries, the facilities he offers and his willingness to meet their every requirement and to co-operate with them in all movements for the betterment of the community. In this laudable ambition he can find no better co-worker than the local newspaper. And as to advertising, we should all remember that it is not what we advertise but what the people find behind the advertising that counts.

The Gladiolus Situation

Editor HORTICULTURE:

Dear Sir:—I note with interest your editorial on "The Gladiolus Problem" and I note with pleasure your remarks concerning American grown bulbs, and naturally my hope is that American buyers and planters will come to the same conclusion, for it does seem a pity that the one bulb that can be grown so successfully in America and has really come to be a distinctly American industry should now be threatened with an unfair competition. I say unfair because I do not think that we are receiving a fair treatment from the Government when it places only 50c. a thousand duty on a bulb that can be grown so successfully in America and places higher duties on bulbs that cannot be increased with any degree of success in America.

I would like to see some concerted effort made by the American growers, backed by the trade papers to secure a just adjustment of the tariff on these bulbs.

I. S. Hendrickson

Flowerfield, N. Y.

In editorial note on "A Gladiolus Problem," "tariff framers" was incorrectly printed "tariff farmers," in last week's issue.

A REMARKABLE NEW BOOK.

A Naturalist in Western China, with Vasculum, Camera and Gun. Being some account of eleven years' travel, exploration and observation in the more remote parts of the Flowery Kingdom. By Ernest Henry Wilson, V. M. H. With an introduction by Charles Sprague Sargent. L. L. D. Two volumes, with 101 full page illustrations and a map. The American edition published by Doubleday, Page & Co., New York.

Before reviewing this book a few words about its author and his work will be fitting. Mr. Wilson is a graduate of Kew Gardens. His travels in Western China began early in 1899, and had for their object the collecting of botanical specimens and the introducing of new plants into the gardens of Europe and America. There were four expeditions in all, the first two in the interest of the Veitch Nurseries and the last two on behalf of the Arnold Arboretum of Harvard University. During the

E. H. Wilson.

eleven years spent in the unexplored and uncharted wilderness of central Asia he collected no less than sixty-five thousand specimens and sent home seeds of over fifteen hundred plants. Mr. Wilson thus has the distinction of having discovered and introduced into cultivation more valuable trees and shrubs than any one in the whole history of plant discovery and introduction. He has added inestimably to the list of garden plants hardy as far north as Massachusetts, notably Buddleia, Berberis, Cotoneaster, Spiraea, Clematis, Rubus, etc. Possibly more important than these are the trees, especially the conifers, which he has discovered, although it is rather too soon to form an opinion of their future value, at least in New England. That they will succeed in most parts of Europe there is no doubt. While many of Wilson's rhododendrons may not flourish here in Boston, they are destined to be very valuable on the Pacific Coast and the Arnold Arboretum is already testing them at several important stations. It is not possible to say too much of E. H. Wilson's intelligence, resourcefulness and pluck. No one but a man possessed of indefatiguable industry, intrepid courage and having a rich store of scientific knowledge could have accomplished what he has done, although not yet 40 years of age. His book is what might be expected from such a man—indeed it is much more and the reader is amazed at the myriad of remarkable facts here for the first time recorded with such sincerity and wonderful exactness. It is from first to last the straightforward graphic story of a man who knows his subject and it will be prized as an unique addition to botanical and horticultural literature.

Flora, topography, geography, zoology, geology, agricultural and mineral resources, products, history, methods of travel, customs, language and religion are entertainingly treated in the various chapters and those portions describing the author's wanderings and observations through forest solitudes, mountain fastnesses and wild gorges never before penetrated by a foreigner and the hardships and privations entailed are of absorbing interest. Every chapter teems with interesting flower lore, but particularly charming are those devoted to the flora of Ichang, the journey in quest of flowers in northwest Hupeh and the tour across the little known Chino-Thibetan borderland. The concluding chapter of Vol. II is devoted to a thoughtful commentary on the race inhabiting this vast country and its future possibilities and influence on human destiny. The author speaks feelingly of the uniform courtesy and kindness of the natives even during such periods as the Boxer outbreak and the Russo-Japanese war, and generously attributes a large part of his success to the devoted loyalty of his Chinese collectors. The illustrations are very fine throughout, all but six being reproductions from original negatives taken by Mr. Wilson in the course of his journeyings.

Prof. C. S. Sargent's introduction is a very thorough presentation of cognate facts as demonstrated by the researches conducted by the Arnold Arboretum, with exhaustive comparisons between the forest flora of Eastern North America and Eastern Asia and showing that the two regions have much in common. The connection of the Arboretum with this Chinese work has given it an international reputation which it could never have obtained if it had confined its explorations to North America. It is a matter of no small gratification to the friends of the Arnold Arboretum that it has been, through the enterprise and sagacity of Prof. Sargent and the invaluable aid of Wilson, supplemented by the cultural skill of Jackson Dawson, able to bring to the gardens of the United States and Europe such a large number of new, useful and beautiful plants.

Brooklyn, N. Y.—Richard Shannon, florist, and five others who were with him in an auto, were severely hurt in collision with a milk wagon when returning from Coney Island early on the morning of December 23. Shannon was taken to the Coney Island Hospital with a fractured shoulder blade and lacerations.

COVER ILLUSTRATION.

Aquilegias or Columbines have been so greatly improved during the last decade or two by hybridization that the long-spurred varieties of today are among the most beautiful and useful of our garden perennials. When planted in groups in the garden, either in separate or mixed colors, they make a charming display throughout the middle of the summer and for all cut purposes they are of exceptional value. Although of perennial character they can be very successfully treated as annuals, by sowing the seed early in the new year.

W. F. KASTING, P. M.

Congratulations are certainly in order. W. F. Kasting has been appointed and confirmed as postmaster of the great city of Buffalo. All who know the hustling wholesale florist and zealous treasurer of the S. A. F. will applaud this appointment as an ideal one with the certainty that W. F. Kasting will make a faithful and in every respect efficient official in the

W. F. Kasting.

public trust thus placed in his keeping. And the florist trade is a joint participant in the honor bestowed on popular "Billy" Kasting.

PERSONAL.

Tom Windram, of Cincinnati, Ohio, left the first of this week for the Lake Shore Ferneries at Leesburg, Fla.

Edwin Saunders, fromerly of Lenox, has been appointed superintendent of the greenhouses of A. N. Cooley, Pittsfield, Mass.

Boston visitors: James H. Morton, Huntington, N. Y.; Mr. and Mrs. H. Bayersdorfer, Philadelphia, Pa.; Robert Greenlaw, representing S. S. Pennock-Meehan Co., Philadelphia, Pa.

W. Langhout, traveling representative of Van Zonneveld Bros. and Philipps, of Sassenheim, Holland, is at St. Mary's Hospital in Rochester, Minn., recovering from a serious operation.

The foreign journals are featuring a new double-flowered form of Primula malacoides.

ROSE "MRS. GEO. SHAWYER"

North! East! South and West! the word comes back to us—"Finest Rose we ever handled!" The color holds in winter when the Killarneys bleach almost to white. We have five thousand plants that have been carried over and are now starting off splendidly. Why not remove those poor plants and replant with Shawyer, which we guarantee will give you a wonderful spring and summer crop.

Immediate Delivery, 2 1-2 in. plants, $20.00 hundred; $150.00 thousand

CHARLES H. TOTTY, MADISON, N. J.

SOCIETY OF AMERICAN FLORISTS

To the Officers and Fellow-Members of the Society of American Florists and Ornamental Horticulturists, Greetings! and the best compliments of the season.

May I ask for a moment of your kind attention in the midst of your busy life?

I believe that the thirtieth year of the existence of our National Association can easily be made the most conspicuous, progressive and fruitful one in the history of our Society, if we only, all of us, do our modest share towards that end. I wish to thank you for the confidence you have shown me in entrusting a part of that work and responsibility into my hands, and I wish to ask you now for the support and help which is due our organization.

In selecting and appointing the men to the different offices of responsibility, which it has been my duty, right and privilege to bestow, I have tried honestly and believe have succeeded to find the right men for those positions of trust and honor. While I am glad to have had the opportunity to so honor them, my main object was to secure their efficient and loyal help for the progressive and important work which our National Association has set out to accomplish. The honor of those offices demands and is sustained only by the faithful and efficient performance of duty. He who would accept such distinction without earnest intention and endeavor to perform his duty cannot disguise under this mantle of trust and honor his lack of appreciation and worthiness for a common cause. But there are none such amongst the officers of the S. A. F. & O. H.

The aims and interests of our organization are many, and yet they affect us all alike and are, therefore, worthy of the careful consideration and attention of every follower of our trade in all its many branches. Do not let us ask the question, "What good will it do me?" but rather let us consider, "What good can I do?" We cannot do good to others and a common cause without benefiting thereby ourselves.

Our Association meets once a year in annual convention for three or four days, and transacts its business along a well prepared program, pertaining to the most pressing needs of our common interests. The Executive Committee, consisting of the officers and the Board of Directors, is entrusted with the conduct of the business affairs of the society. The best support that can be given those officers by the members of the Association is by keeping in close touch with them through correspondence or through the medium of our trade papers, which are so closely interwoven with our interests, and whose columns are always so generously opened for the expressions of opinions of all, be it pro or con on any deserving subject. The officers will be enabled to work in your interests if you will confide in them and make them acquainted with your needs, desires and objects. It is also one of your duties to give your close attention and thought to all matters that the Executive Committee submits for your consideration and action. Be a live member and show your interest and work through true co-operation and not by kicking and often unjustified criticism.

The prompt payment of dues and the loyal attendance of conventions alone does not cover anywhere near all we owe the Association. We owe it our moral and active support. Our Association is on a sound financial basis and is strong enough to accomplish almost anything worthy it may undertake. Yet less than 10 per cent. of the 20,000 florists of our great country are enrolled on our membership list. There is no good reason why every gardener and florist should not be a member of the S. A. F. & O. H., and not only every state vice-president, but every individual member should set out to bring in his share of the strays within the com-

J. J. Hess
S. A. F. Director for Three Years.

J. A. Peterson
S. A. F. Director for Three Years.

mon fold, and if the affiliation program, as planned by our sturdy Farenwald and in part already inaugurated by the Florists' Telegraph Delivery Association, is receiving the deserved support, the year 1914 should mark a great increase in our numerical strength and united influence. That in union there is strength is a byword of long and true standing, and that the National Society has been of inestimable value in the development of the florists' trade and the protection of its interests no one well informed on trade matters will attempt to deny.

A large amount of important work is continually before the society and the present year is no exception. While all the many projects and interests are in good hands through the different committees, officers and representatives, let me ask once more of each loyal member of our great Association his active moral support in all of our undertakings. Let us all put our shoulder to the wheel. Let us give some of our time, our thought, our efforts and our strength to the upbuilding and strengthening of our National Association so that we may enter and capture with merit that horticultural stronghold, our next Convention City, "dear old Boston," as she has never been captured since the days of "Bunker Hill."

Yours very truly,
THEODORE WIRTH,
President.

List of Appointments, January 1, 1914.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

Provision to Admit Foreign Potatoes From Disease-Free Districts.

The Secretary of Agriculture has issued two orders relating to the admission of foreign potatoes into the United States. One of these orders provides for the admission of disease-free potatoes from uninfected foreign districts under proper regulation and inspection. The other order, to protect American potatoes from the powdery scab and other diseases, temporarily extends the quarantine effective since September 20, 1912, against the importation of potatoes from Newfoundland; the islands of St. Pierre and Miquelon; Great Britain, including England, Scotland, Wales and Ireland; Germany and Austria-Hungary, to include also the rest of continental Europe and the Dominion of Canada. This quarantine became effective on December 24, 1913, except that shipments covered by consular invoices issued on or prior to December 24, 1913, will be admitted up to January 15, 1914.

As soon as any country or District can be shown to be free from potato diseases, the quarantine will be lifted, and potatoes will be admitted under proper regulation and inspection, as provided in the other order. It is possible that, in the case of certain provinces in Canada, and certain countries and districts in Europe, the absolute quarantine can be lifted in time to allow the later movement of the present year's crop under regulation and inspection.

Another "Simple Simon."

Our seed trade readers will be interested to learn that on December 22nd Congressman Wm. S. Howard of Georgia filed in the U. S. House of Representatives a bill (H. R. 11170) "to divest agricultural and garden seeds from their interstate character and that all persons shipping seeds directly to the consumer which are misbranded, adulterated, or in any way misrepresented shall be fined not more than $500.00 or imprisoned for not more than two years, or both."

Of course if intentional adulteration or misrepresentation was penalized, the bill would not meet such severe criticism, but as the bill now stands, it would, if enacted, stop all sales of seeds. This aspiring congressman evidently has not had the benefit of a study of the natural conditions affecting the growth, harvesting, and distribution of agricultural and garden seeds, or of the experience of other Congressmen in trying to legislate on this subject.

Notes.

The American Seed Trade Executive Committee will meet on January 9 at the La Salle Hotel, Chicago.

"Get them at Dreer's"

The Dreer Strain of Double Petunias

For nearly half a century the majority of the growers in the United States have been depending on the Dreer strain of Double Petunias, which this season compares favorably with stock we have heretofore supplied.

We offer for immediate delivery, good three inch pots, which will quickly furnish a good supply of cuttings, in fifteen varieties, 75 cents per dozen, $5.00 per 100, or the set of fifteen varieties, one of each, $1.00.

DOUBLE WHITE PETUNIA SNOW BALL

We have a large stock of this variety which is so useful for summer cutting, 3 inch pots, 75 cents per dozen; $5.00 per 100.

Seed of our **SUPERB STRAIN OF FRINGED PETUNIAS.** Double, 75 cents per 500 seeds; $1.50 per 1000 seeds. Single, 50 cents per trade pkt.; $1.00 per 1/16 oz.; $1.50 per 1/8 oz.

Our Quarterly Wholesale Price List, issued January 1st, offers a full line of seasonable Plants, Seeds and Bulbs. The above prices are for the Trade only.

HENRY A. DREER, Philadelphia, Pa.

Kansas City, Mo.—T. Lee Adams has established a branch store at 1320 Grand avenue. His main establishment is at 417 Walnut street.

On Christmas, Charles J. Bolgiano, of J. Bolgiano & Son, Baltimore was presented by his employees with a handsome automobile robe and also resolutions of esteem thanking him for the many acts of kindness bestowed upon them during the year. In accepting Mr. Bolgiano made a short talk, in which he thanked them for their past hearty co-operation and also wishing them all a Merry Christmas and a Happy New Year.

Egyptian onion growing for export has developed to considerable proportions. The exports for 1912 totaled $1,920,257, as against $992,820 for 1908. The declared exports to the United States amounted to $317,990 in 1912, the other large buyers being England, Austria, Germany, Italy and France. Owing to unfavorable market conditions in the United States and England, the exports for the first nine months of 1913 show a falling off of $548,875, as compared with the corresponding period of the previous year.

"THE RIGHT SEED IN THE RIGHT PLACE"

We furnish grass mixtures for dooryards, terraces, lawns, athletic and polo fields, cemeteries, parks, country clubs, country estates.

Repeated laboratory tests on individual mixtures assure superiority of quality and growth.

Experience of over fifty years of successful seed business assures you of correct proportions.

Experiment has shown us that a mixture of the proper grasses is more satisfactory than an individual grass. Why waste your time and money experimenting. Let us furnish what you need.

J. J. HESS.

John J. Hess is a native of Switzerland where he was born in 1863. He came to America in 1884 and entered the service of C. Rieman Company at Indianapolis. In 1886 he went to Omaha and after working for two years for different firms, he went into business for himself with George N. Swoboda as a business partner. Mr. Swoboda is in charge of the greenhouse plant. Mr. Hess attends to the store business and as general manager has proven his qualifications as a sound and successful business man, in building up the fine business of which he is the head. Mr. Hess has been president of the Omaha Florist Club at different times, is an active member of the Commercial Club and has played a prominent part in many progressive undertakings in his home city. He is very popular, a good worker and an earnest hustler in whatever he undertakes. His standing in the trade in that large section of the country well enables him to stimulate, create and advance the interest of the S. A. F., and the trade in general.

J. A. PETERSON.

J. A. Peterson is so well known to the florist trade of this country that introduction is almost superfluous. He is a German by birth but has been so long a leading business man in Cincinnati that he seems an integral part of the florist industry of that thriving centre. He has a large range of plant houses at Westwood, the product of which has taken high honors at various exhibitions and where originated the popular Begonia Glory of Cincinnati. Mr. Peterson has always been a faithful and enthusiastic worker for the S. A. F. During the convention at Cincinnati in 1909, as president of the Cincinnati Floral Society, he carried many responsibilities and was a leading factor in the success of that occasion and the pleasure of the visitors. President Wirth has selected in Mr. Peterson a worthy incumbent for the honor of directorship.

MASSACHUSETTS HORTICULTURAL SOCIETY.

A meeting of the Board of Trustees of the Massachusetts Horticultural Society was held December 27.

Standing committees of the Society for the year 1914 were appointed as follows:

Committee on Prizes and Exhibitions: James Wheeler, Natick (Chairman); Duncan Finlayson, S. J. Goddard, T. D. Hatfield, Dr. W. G. Kendall, Alexander Montgomery, Edward B. Wilder, Peter Fisher.

Committee on Plants and Flowers: T. D. Hatfield, Wellesley (Chairman); Arthur H. Fewkes, Donald McKenzie, James Marlborough, William Nicholson, William Sim.

Committee on Fruits: Edward B. Wilder, Dorchester (Chairman); William Downs, Harold L. Frost.

Committee on Vegetables: Duncan Finlayson, Jamaica Plain (Chairman); Wm. N. Craig, Henry M. Howard.

Committee on Gardens: John K. M. L. Farquhar, Boston (Chairman); David R. Craig, Jackson T. Dawson, Arthur H. Fewkes, T. D. Hatfield, Richard Hittinger, Dr. Harris Kennedy, William Nicholson, Thomas Roland, Charles Sander, Wilfrid Wheeler, Robert Cameron.

Committee on Children's Gardens: Henry S. Adams, Jamaica Plain (Chairman); Harry S. Rand, Miss Margaret A. Rand, Wm. P. Rich, James Wheeler, Mrs. Augustus Hemenway.

Finance Committee: Walter Hunnewell (Chairman); Arthur F. Estabrook, Stephen M. Weld

Committee on Library: Charles S. Sargent (Chairman); Ernest B. Dane, George B. Dorr, Charles S. Minot.

Committee on Lectures and Publications: Wilfrid Wheeler (Chairman); George B. Dorr, F. C. Sears.

Committee on Membership: John K. M. L. Farquhar, R. M. Saltonstall, Walter Hunnewell.

Superintendent of Exhibitions: James Wheeler.

The annual award of the George Robert White Medal of Honor was voted to the Park Commission of the City of Rochester, N. Y.

This is the fifth award of this medal which is given annually for eminent service in horticulture. It is given to the Park Commission of Rochester this year in recognition of its successful efforts in establishing one of the most important collections of trees in America, in increasing the love of plants and horticulture among the people of Rochester, and in exploring the flora of western New York and of adjacent regions. The previous recipients of the award are Prof. C. S. Sargent of the Arnold Arboretum, Jackson T. Dawson, also of the Arboretum, Victor Lemoine, the late eminent horticulturist of France, and M. H. Walsh, the noted rose grower of Woods Hole, Mass.

On the same date A. M. Davenport of Watertown exhibited his new begonia Florence Davenport and was awarded a silver medal. It is a sport from Gloire de Lorraine. F. J. Dolansky of Lynn showed a number of hybrid Cattleya Trianæ for which he was awarded honorable mention and a silver medal for the variety alba.

PUBLICATIONS RECEIVED.

Edward A. Stroud comes on the stage in the role of editor. The initial number of The Main Line Floral Guide is before us. It is meant as a stimulant to the retail department which is an important and growing end of his business at Overbrook and Strafford, Pa. An excellent and commendable publication and sure to bring good results. A good method to follow by any pushing and progressive retailer. Mr. Johnson is assistant editor and general manager.

A GLADIOLUS WORKER.

A. E. Kunderd of Goshen, Ind., who originated the first ruffled gladiolus (Kunderdi Glory) has just sold to a Chicago house his entire stock of Chicago White, a variety which has proven itself very valuable to florists, as it is one of the very best forcing sorts as well as being remarkably early outdoors. Mr. Kunderd has succeeded in raising some remarkably beautiful sorts, which have gained great favor with the public, notably Kunderdi Glory (the first ruffled sort) Mrs. Frank Pendleton, Jr., Ida Van, Gov. Hadley, Pride of Goshen, Amaryllis, El Captain, Myrtle, Mary Bancroft and others of equal merit. His strain is unlike Childsi or Groff's and has an individuality of its own. All things being favorable, Mr. Kunderd will bring next August to the annual show of the American Gladolus Society some of his newest seedlings.

GARDENIAS

Dozen $2.00—$4.00, 100 $15.00—$25.00

For the balance of the season you can depend on us for all the Gardenias you need. The quality is as fine as any grown and our prices are always right.

Flower Market Reports

BOSTON There is not much to add to the notes on Christmas trade which appeared last week. The retail stores had stocked up well on plants, and as usual, devoted their energies to disposing of them first, holding off their flower purchasing largely until the last day. A good many azaleas were left over in retailers' hands, but with this exception the plants moved off very clean. In the rose market it is to be noted that the ready sellers were the medium grades—a 15 to 18-inch stem class being generally acceptable. The high grades evidently cost too much for the average buyer, and the culls and low grade product were scorned as not fit to buy. Of course, the bright colors had the preference and white dragged badly, not in roses alone, but in every line. The carnation was all right in colors, but of the whites there was a heavy overstock and lots were sacrificed at unquotable figures. Even in the colored sorts they had to be fresh and bright to command respectable prices. To revert to the roses once more, it should be said that never before has Boston seen so many American Beauties for Christmas. The well-known shipping facilities of this market at steady Christmas prices and the slump in holiday values of this rose in other centres brought an influx from outside which bore heavily on those local dealers who sought to maintain the quoted rates and a break was inevitable. Richmond, Killarney and Sunburst sold quite well, but Maryland, Taft, Ward and Hillingdon moved disappointingly slow. Cattleyas were so poor in quality that many were lost and nobody cared. There was a surplus of lily of the valley, although the sales were lively. Single violets went off all right, but doubles were rather slow. Gardenias were miserable in quality. The quarantine laws made havoc with the greens business and the "dead line" on shipments from certain sections of New England was enforced rigidly both by this country and Canada.

The cut flower market has taken a big slump since Christmas. Carnations suffered the most and not only have prices gone down to an unprecedented level for this date, but the ice chests of the wholesale dealers are gorged with carnations as well as paper white narcissi, mignonette, lilies and other things. Roses, happily, are moving satisfactorily, American Beauty especially so. Killarney, white and pink, Taft, and Ward are selling all right in the medium grades. Lily of the valley is very abundant and of superb quality and is being moved off well on that account.

BUFFALO The Christmas week's business was such that it is not known as yet whether the volumn of trade exceeded previous years. The buying of holly began early and as the supply was shorter each day from Monday on, prices advanced slightly, but the quality was not up to previous years. Other decorating greens sold as well as other years. The retailers were prepared with enough artifical material to swing all orders and this season broke all records in the sale of this stuff. Plants went well and there was a good supply of all blooming and foliage stock. When a salesman cannot secure a cut flower order, a fine plant of some kind should be suggested. In the cut flower line there is much to be said. Quotations were high on everything although the highest mark was not reached except possibly on one or two items. There was

Flower Market Reports

(Continued from page 21)

sufficient stock on any line except medium priced Richmond and Pink Killarney. There were too many of the White Killarney of select grade to secure the high mark price. A fine lot of Bonsilene, Ward, Safrano, Milady and corsage flowers such as violets, lily of the valley, Roman hyacinths, daisies, sweet peas, etc., sold well. There was a slight shortage in colored carnations and an oversupply of white.

CHICAGO Christmas business generally was better than had been expected, especially in the city. The sunshine, early in the week, brought out more flowers than had seemed possible, and the city trade responded better, some report, than ever before. It was noticed, however, that prices on roses and carnations lowered from previous quotations and that stock, held back till the last did not sell so well. The amount of "pickled" stock was less than usual, or else was in the hands of fewer wholesalers, for it was not so much in evidence as heretofore. The long-stemmed American Beauties were mostly splendid stock and prices held up to the last, there being practically no medium lengths to draw from. Killarneys and Richmonds formed the bulk of the rose offerings, but there proved to be so many that prices, as quoted in advance, could not be maintained. As it is, the report still persists that many ice boxes contained quantities of roses after Christmas trade was over. Prices continued to decline till the end of the week, and the Monday after Christmas found the market very quiet. It is estimated that from two to three thousand American Beauties were shipped to this market from the east during Christmas week. Some arrived in good condition and were sold to advantage, while others were so bad as to be refused and returned to the shippers. One of the prominent retailers refused all of his, while another received Beauties which he says were the equal of the home-grown ones. On the whole, it is believed that there is considerable risk in handling eastern Beauties here.

NEW YORK QUOTATIONS PER 100. To Dealers Only

MISCELLANEOUS	Last Half of Week ending Dec. 27 1913	First Half of Week beginning Dec. 29 Xmas Prices
Cattleyas	20.00 to 60.00	30.00 to 60.00
Cypripediums	10.00 to 15.00	12.00 to 15.00
Lilies, Longiflorum	6.00 to 8.00	6.00 to 8.00
Callas	12.00 to 16.00	12.00 to 15.00
Lily of the Valley	3.00 to 4.00	3.00 to 4.00
Paper Whites, Roman Hyacinths	1.00 to 2.00	1.00 to 2.00
Freesias	..... to	..... to .....
Violets	.50 to 1.50	.50 to 1.25
Daises	1.00 to 2.00	1.00 to 2.00
Sweet Peas (per 100 bunches)	5.00 to 12.00	6.00 to 8.00
Gardenias	40.00 to 60.00	20.00 to 60.00
Adiantum	.75 to 1.00	.50 to .75
Smilax	6.00 to 8.00	6.00 to 8.00
Asparagus Plumosus, strings (per 100)	15.00 to 25.00	15.00 to 25.00
" " & Spren (100 bunches)	10.00 to 25.00	10.00 to 25.00

CINCINNATI Christmas business proved to be very good better than even the most optimistic had hoped for, when the business since Thanksgiving was taken into consideration. The local call was equal to that of last year, while shipping trade was very good. Everything in roses sold readily. Outside of Pink and White Killarney the offerings were very limited, both reds and American Beauties being away off crop. The cut of carnations was large and toward the close of Christmas business prices weakened considerably. The supply of white was more than equal to the demand. Narcissi were so plentiful that they yielded only a fair price. Their prices since Christmas have been better than at any time before or during the Christmas rush. Violets sold so well for Christmas that the supply ran short of the demand. Poinsettias sold well.

NEW YORK As we predicted two weeks ago, there was ample stock of all kinds at Christmas time to satisfy all demands—only more so. We will mention first the flowers that brought more than was expected. They were "Beauties," the best realizing $.75 and in a few isolated cases $1.00 each. Violets, which were in only a moderate supply, sold for $.75 and $1.00 per 100 and specials $1.25 and $1.50. Cattleyas went well with $.60 for the top with occasional sales at $.75, smaller and poorer grades selling at $.20 to $.35. Gardenias in sufficient supply to satisfy all demands, $.60 for the top grades down to $.20. The disappointment was in the decreased demand for red stock of any kind. Poinsettas were carried over everywhere and top notch on scarlet carnations was about $.10. Richmond roses of the smaller grades sold fairly well and the top grades would have gone better had the stock been good, but it was the old story of "pickling" and there were hundreds and hundreds of Richmonds carried over which were so soft and full blown that they were unsalable. This was the case with some of the top grades of the other varieties. When! oh when! will the grower learn the mistake of keeping up a practice that is proving so injurious to the florists' business at holiday time? Carnations were plentiful and other than red sold from $5.00 to $6.00 per hundred, but of course there were inferior grades that sold for much less. Lilies moved slowly; market overstocked. Lily of the valley did well. In roses, Killarneys, both white and pink, arrived in great quantities; smaller grades selling from $3 to $6, and special from $10 to $15. Sunburst, Aaron Ward and Hillingdon cleaned out nicely. French Trumpet narcissi, a limited supply. Daphne quite plentiful at $3.00 per dozen. Asparagus sold out well as there was very little Southern stock in evidence. The retailers all claim to have had a splendid business and to have sold out of plants of which they all had a big stock. Taken as a whole, the volume of business was very large with prices lower than previous years at the same time.

PHILADELPHIA The Christmas cut flower market in this city this year was all in favor of the retailer. The growers and their agents started out with a bold front and managed to get last year's prices in the early stages but later the situation changed and it was a hard fight for the growers to get anything like a decent price. The weather and all other conditions were such that the market was swamped with fine stock and the retailers took immediate advantage and beat down the prices. Top grade

Flower Market Reports

(Continued from page 32)

Beauties that started the game at $100 were being peddled in the street later at 15c apiece. Having a fine crop for Christmas is a splendid thing, provided all the other fellows don't have a fine crop also! Next to high grade Beauties the worst sufferers were probably white roses. Far too many of these. The price situation being thus it was fortunate that the volume of business held up as well as it did. There was not much but what found a market of some kind or other. So there is always something to be thankful for. The weather was especially favorable to the plant end of the business—stock getting to its destination safely in all cases, and orders being placed more freely than if weather had been severe. All the leading concerns report a clean sell-out and no kicks. In addition they did not suffer from any slump in prices like the cut flower growers. The greens market was very good also and a large amount of business was done. The scarcest item was good well-berried holly. The Christmas tree business has been dwindling for several years back and that condition was more pronounced than ever this year.

Summing it up as a whole it was a splendid Christmas—immense volume of business—and while cut flowers brought less, what they did bring was better distributed than usual. The trade in general has every reason to be thankful, all things considered.

ST. LOUIS The snow storm on Christmas morning hurt the local trade a great deal as far as the cut flower trade was concerned. The plant trade was fully up to expectations and at some of the places even more. Up to Christmas Eve trade was rushing and deliveries could be made without much wrapping, and it looked as though all records for Christmas business were to be broken, but the cold snow storm early Christmas morning killed that part of it. Plants of all kinds had a great sale, with poinsettias in pans as the leaders. These were quick sellers with fancy red sashes. Of other plants anything in bloom were good sellers. The cut flower demand was not so good as in former years and it looks as though year after year the plant trade for the holidays is getting the advantage on account for the enormously advanced prices charged for cut flowers. For New Year's there is not so much looked for in the plant line and cut flowers will sell better, prices being much cheaper. The market at the present time has enough for all demands—and with a little bright weather the market will be loaded with roses, carnations and bulbous stock. Violets are the one scarce item.

WASHINGTON The Christmas business proved very satisfactory, especially as but little was expected. Stock cleaned up well. It is said that the sale of potted azaleas, begonias and cyclamen exceeded that of last year and prices were good. There was somewhat of a scarcity of single violets, while the doubles were very plentiful. Those of the former that were to be had were of very good quality and were quickly bought up. As in previous years, the dealers ran short of red roses; the supply of red carnations was short, but in view of the prices asked they proved enough to supply the limited demand. Orchids were in larger supply than they have been and over 4,000 gardenias were sent into the market by a local grower. The call for American Beauty roses was very heavy and these cleaned up well. In view of the fact that immortelles have increased so in price, the marketmen offered red ruscus in their stead and with remarkably good results. The business for the year of 1913, taking it as a whole, was just as satisfactory as the Christmas trade. Looking forward to the next twelve months, the prospects appear good for a record-breaking period. What is needed is a settling of conditions, and now that Congress has disposed of so many important matters it is believed that the members and their families will have more time for entertaining and many belated affairs will take place.

MONTREAL Christmas business proved to be as good if not better than preceding years, notwithstanding the talk of a money stringency and the falling off of business generally the two weeks previous. All classes of stock cleaned up well and maintained good prices to the end. The retailers with few exceptions report "The best Christmas week ever."

The Gardeners' Chronicle, of London, for Dec. 13th shows illustrations of fourteen forms of Nephrolepis exaltata, eleven of which originated in America. The accompanying notes incorrectly state that the bi-pinnate form named N. e. Piersonii is known as the Boston Fern. Whatever may be the case in England the writer is mistaken as to the facts in this country where the original type has been known as the Boston fern, since long before Piersonii appeared, the latter being known as the Pierson fern.

27 & 29 OCEAN ST., ∴ BEVERLY, MASS.

WORTH READING

Arthur Ruzicka, writing on "Rose Growing Under Glass," in "Horticulture," November 15, 1913, says:

"We have found that a good spray of FUNGINE will do away with all traces of mildew, and if applied in time will kill it so that many leaves will be saved. This fact is mentioned only for the good of the growers, and not to advertise the article, for this is no place for advertisements. We have so far heard of nothing that can compare with FUNGINE and that is why no other preparation is mentioned.

75c. per quart. $2.00 per gallon.

Have you tried NIKOTIANA and compared it with other nicotines for fumigating? If not, it will prove worth your while doing so, both from the point of efficiency and cost.

$1.50 per quart. $4.50 per gallon.

There is nothing "just as good" as APHINE for greenhouse spraying for all sap sucking insects—VERMINE for the soil to destroy eel, wire and cut worms without injury to vegetation—SCALINE for spraying fruit and ornamental trees NOW against San Jose and other scale, red spider and aphis larva.

All up-to-date seed firms and florists' supply houses handle our products.

JANUARY MEETINGS IN ST. LOUIS.

The St. Louis Florist Club will meet Thursday afternoon, January 8th, in Odd Fellows' Building. The trustees have provided for an interesting afternoon.

The County Growers' Association, which is composed of all florists in St. Louis County, Mo., will take place Wednesday, January 7th, at Nieman's Hall.

The Retail Florists' Association, of St. Louis, will meet on Monday night, January 19, at Beers' Hotel. The committees on so-called "Union" florists and "crepe pullers" will make their report and final action will be taken to eliminate these excrescences if it can be done.

The St. Louis Lady Florists' Home Circle will meet at the home of Mrs. Fred C. Weber on Wednesday afternoon, January 14th.

The Engelmann Botanical Club will meet the latter part of this month at the Missouri Botanical Garden.

CLUB AND SOCIETY NOTES.

Antoine Leuthy of Roslindale, Mass., will lecture at the meeting of the North Shore Horticultural Society, at Manchester-by-the-Sea on January 16.

At the annual meeting of the Oyster Bay (N. Y.) Horticultural Society, John T. Ingram was elected president; Alfred Walker, vice-president; H. G. Vail, treasurer; F. Kirkham, secretary; John Devine, financial secretary. The annual dinner will be held on January 29.

At the last meeting of the North Shore (Mass.) Horticultural Society, Alex. Cumming, Jr., of Cromwell, Conn., was the speaker, his subject being "Outdoor Roses," which he treated quite fully. Wednesday evening, January 21, has been selected as the date of the annual banquet, entertainment and dance at the Manchester Town Hall.

The Inaugural Meeting of the Massachusetts Horticultural Society for the year 1914 will be held at eleven o'clock, A. M., on Saturday, January 10, 1914, at Horticultural Hall, Boston. The business of the meeting will be the hearing of an inaugural address by the President, the report of the Board of Trustees, the reports of officers, and the reports of the chairmen of the various committees.

WILLIAM P. RICH, Sec'y.

The December meeting of the Rhode Island Horticultural Society was something of an innovation. The address of the evening, after a report from Prof. J. Franklin Collins as delegate to the National Conservation Congress and the American Pomological Society, was by Dr. Harlan H. York, assistant professor of botany of Brown University, and was upon the subject of the American mistletoe. At the conclusion of the lecture each individual present was given a large sprig of mistletoe, Dr. York having had a large case shipped from Texas for this occasion.

WASHINGTON NOTES.

The marriage is reported of Miss Rose Ponnet, daughter of the late Constance Ponnet, to Mr. Otto Dissi, of Richmond, Va. The young couple visited Washington on their honeymoon.

S. Miyake, of Miyake & Company, London, was in town last week showing a line of Japanese lily bulbs. This firm is located in Japan and has offices in this country.

The Florists' Club of Washington will hold its first meeting of the new year at 1214 F street, Northwest, on Tuesday evening, January 6, when a number of very important business matters will come up for consideration.

C. L. Marlatt, chairman of the Federal Horticultural Board, has directed the attention of the House of Representatives to the need of continuing the $35,000 appropriation to put into effect measures to prevent the Mediterranean fruit fly from coming from the Hawaiian Islands and elsewhere to the mainland of the United States. An expert sent by Hawaii to Africa has found three or four important parasites of the fruit fly and two or three of these are now established in the islands.

There is a possibility that the Commissioners of the District of Columbia will provide regulations prohibiting the use of public space for the display of goods and materials. This announcement is being favorably received by the retailers here as such a regulation would prohibit the setting up of temporary stands for the display and sale of flowers as is now the practice on the part of some of the street men. A hearing was recently given those concerned. There is some little opposition to the proposition, but a large number of marketmen are for it and the possibility of its going into effect is good.

Obituary

A. G. Hanna.

Anthony G. Hanna, formerly in the shoe manufacturing business but for the past four years in the florist trade, died at Holbrook, Mass., on December 30, aged 72 years.

Martin J. Sutton.

Martin John Sutton, head of the firm of Sutton & Sons, Reading, England, died at the Piccadilly Hotel, London, on Sunday, December 14. He was undergoing a minor dental operation and died under the anaesthetic. He was 64 years of age.

BUSINESS TROUBLES.

Gutter, Plates and Roof Bar Clasps
Being a Plain Statement of Plain Facts

GUTTERS

Cast iron resists rust many times better than steel. No one contradicts that. Cast iron gutters then, are better than steel channel iron gutters. Better, simply because they have better stuff in them. Channel iron is rolled only in stock sizes by the mills. You have to take what sizes suits them; not what best suits your greenhouse requirements.

Our cast iron gutters are made to best meet greenhouse requirements in the best and most economical way. They do exactly what they were made to do.

EAVE PLATES

Our galvanized angle iron eave plate is the only plate that is light enough and still strong enough. It is the one that makes the neatest job and that effectually clears itself of ice.

If all this were not true, so many other concerns would not, in spite of our patent, be continually trying to use it. We keenly appreciate such hearty endorsement of our plate by them. It's just the best kind of advertising for it.

BAR CLASPS

The purpose of bar clasps is to securely and enduringly fasten the bar to the plate. It is plain to be seen that any form of clasp that can be pushed on the plate at any point, can be pushed off at any time. If it has no fixed position it's not a good fix. Any so-called clasp that simply forms a bracket or resting point and fails to come up it's side to form a clasp—is not a clasp at all. It's just a shelf. Any clasp then that is bolted to a certain fixed place on the plate and that forms both a rest and a clasp for the bar, is beyond all argument, the best.

Just such a clasp is our clasp. It's a guarantee against end bar rot. It has ample drop openings to prevent condensation clogging.

IN CONCLUSION

The courts have sustained our patents on an angle iron eave plate. No one else has a right to sell it. It has cost a lot of money to perfect and defend this article. If we hadn't had the endorsement of thousands who have used it, we should never have considered it worth while to defend. We have told you of its many good points. Try it along with some of our other materials. They are all shown and described in our Handy Hand Book.

LAWN GRASS

"The Right Seed in The Right Place"

We furnish grass mixtures for dooryards, terraces, lawns, athletic and polo fields, cemeteries, parks, country clubs, country estates.

Repeated laboratory tests on individual mixtures assure superiority of quality and growth.

Experience of over fifty years of successful seed business assures you of correct proportions.

Experiment has shown us that a mixture of the proper grasses is more satisfactory than an individual grass. Why waste your time and money experimenting? Let us furnish what you need.

NOTES ON CULTURE OF FLORISTS' STOCK

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Chrysanthemums

Good flowers depend on an early start, especially in the case of dwarf, slow growing varieties. It is not at all unusual for a new thing to be condemned the first year because the buyer has propagated it late and to the utmost limit, and the plants have not had a chance to prove themselves. Stock plants should be brought up to the light at once, even if you have to throw something else out to do so. Plants cannot be expected to throw healthy cuttings if they are hidden away from the sunlight. Select only the best cuttings for use. Any that have become too long and are throwing a bud should be discarded. As soon as the cuttings have roots half an inch or so in length get them out right away and pot into soil. Many cuttings are permanently weakened by being left in the sand and allowed to make a weak, attenuated growth and long, spindly roots. If you have a regular propagating house facing north the cuttings will need little attention at this season of the year, after being watered in, but if you are propagating in a corner of one of your cut flower houses provision must be made to keep sun and drafts away so that the cuttings will not wilt and lose their vitality.

Fibrous-rooted Begonias

It is always better to sow any of these fibrous-rooted begonias early as they take quite some time to grow into saleable plants. They can be sown in pans that have been well drained, in new loam and leaf mold in equal parts with a fair dash of sand. Fill the pans to within half an inch of the top and on this place a little finely sifted compost and press moderately firm and water. When they have drained, sow the seed evenly over the surface. They do not need to be covered. Place glass and sheets of paper over the pans until the seedlings germinate. Then the pans can be placed in a house where they can have a temperature of about 60 degrees at night and they will soon grow into a nice size to pot into 2 or 2½ inch pots. The following are all good varieties to grow, Erfordii, Vernon in its several colors, Snow Queen, and semperflorens rosea, Fairy Queen and others, which are becoming increasingly popular as bedding plants.

Orchids

Give care and attention to Cœlogyne cristata from this out. Do not keep it in a too warm house. A temperature of about 50 to 52 degrees at night will give flowers of a better substance than when they are forced by too much heat. Give ventilation as often as the outside condition will permit and keep the compost in a nice moist state by giving water whenever they show dryness. These orchids are very free flowering and make very popular pot plants. Grown cool they can be had in bloom for the Easter trade.

In order to have Cattleya Schroederae, which is deservedly called the Easter cattleya, in good flower for that date they will want a temperature of from 55 to 60 degrees during the night, with a rise to 65 to 70 degrees with sunshine. On cloudy days about 60 degrees will do. Keep the air pure by timely ventilation and use care in watering at all times.

Primulas

The present is a suitable time to make a sowing of primula seed. Of course it is possible to make sowing several months hence and have plants of flowering size for the holidays, but the seeds germinate decidedly better at this season, and really strong plants are only to be had by starting early. It is always good policy to purchase seeds of a first-class strain. There are now quite a variety of separate colors obtainable, but pink, bright rose and crimson sell the best. Use a light compost consisting chiefly of leaf-mold, with plenty of fine sand and powdered charcoal. Large shallow pans are the best to sow the seed in. Drain the pans well, cover the seeds lightly and keep protected from sun and air until they germinate. Careful watering is essential. Place a piece of glass over the pans as it helps to keep the moisture better, and shade from the sun until the young seedlings begin to appear when they should be placed well up to the glass in a house where the temperature runs from 45 to 50 degrees.

Rambler Roses

All Ramblers intended for Easter should be placed in a cool house; one that runs about 45 degrees at night will do fine. After about two weeks you can raise them to 60 degrees and higher with sunshine Every morning give a good syringing so as to thoroughly dampen the wood. When they are encouraged to break and make some top growth the temperature can be raised to 55 degrees and in two or three weeks more to 60 degrees. Give them a place where they can have full sun for it is necessary for the perfect development of these roses in every way. Let the plants stand so that they will not be crowded, and they will be much more saleable at Easter. When they have made good top-growth and root action they should have liquid stimulants once in three or four days until the flowers are opening, when feeding should be discontinued, as it only has a tendency to take the color out of the flowers. Great care in the matter of ventilation will be necessary so as to avoid mildew. Give careful attention to fumigation to keep down green fly which is bound to make its appearance if not looked out for.

Value of Records

In order to run an up-to-date establishment you should adopt a rigid system of record-keeping so as to know exactly where you stand at the end of each week, month or year. This work may take time, but it is time well spent and will amply repay any one by leaving no doubt as to the merits and demerits of each and every variety that you may grow. Keep a card in each house and every bloom cut can be entered under its own heading. All these records will be of great utility for future reference.

Mr. Farrell's next notes will be on the following: Bougainvilleas; Candytuft for Memorial Day; Easter Hydrangeas; Gladioli; Propagating; Salvias.

MONKSHOODS AND THEIR VALUE FOR THE GARDEN

Aconitums have long occupied a permanent place as tenants of our ancestors' gardens. By virtue of their ornamentality and their hardiness they claim equal consideration for the present and future. Associated with the yellow shades of helianthus and rudbeckias, the whites of Pyrethrum uliginosum, Shasta daisies, white varieties of Japanese anemones, the panicles of Artemisia lactiflora, Spiraea aruncus or white hardy phloxes their bright blue and deep purple spikes add to the beauty of August, September and October effects of our herbaceous plantations. Clumps of tall robust growing aconitums are extremely handsome when mixed into the shrub border. Here they contrast well with the white trusses of Hydrangea arborescens as well as Hydrangea paniculata grandiflora.

Most of the popular species of monkshoods belong to the tuberous rooted section. Their dark carrot-like roots are deadly poisonous and for this reason should be kept out of kitchen gardens. Best known is Aconitum napellus, dark purple, and A. napellus bicolor, blue and white. The latter is the best variety for cutting. The white of A. napellus album so far is lacking in purity. Aconitum napellus praecox produces long loosely built panicles of bright dark blue which appear during June and July. The darkest of all the blue monkshoods is Sparks' variety with stems 5 to 6 feet tall, flowering during July and August. The best yellow flowering sort is Aconitum Lycoctonum bearing dense spikes of a pale but clear tint. Aconitum Stroekianum, a tall growing type doing beautifully in New England states, is distinguished by densely set flowers of a rich deep blue. Of the late-flowering monkshoods well adapted for the Middle Atlantic States I mention Aconitum Fisheri, 1½ to 2 feet high, pale blue; Aconitum autumnale, deep bright blue and, last but not least, the strong growing light violet blue introduction from northern China, Aconitum Wilsoni.

Monkshoods thrive well in a rather light loam, richly manured. For the middle Atlantic and Central districts a half-shady position is a necessity, while for the North the open sunny exposure I deem more advisable. The result of transplanting is a lower growth the following season. For full development plantations should be left undisturbed for a number of years. To attain the stately height of from 6 to 8 feet requires a well established root system. The species of the genus Aconitum are numerous. There is a wide difference between the tall erect habit of A. exaltum and the climbing vines of A. Hemsleyanum. Many representatives are only of interest to the botanists and collectors. Others resemble each other very closely. The selection offered by the trade is a hardy plant material which, if skillfully employed and properly cared for, will prove invaluable for those of us aiming for both richness and beauty in floral garden effects. As mentioned in previous notes Aconitums merit more recognition and increased space in American gardens.

ACONITUM STROEKIANUM

Riverton, N. J.

Cover Illustration

Our cover illustration this week is a view in the rhododendron dell in Highland Park, Rochester, N. Y. The Rochester Park Commission has just been awarded the George Robert White Medal of Honor in recognition of its successful efforts in establishing one of the most important collections of trees in America, in increasing love of plants and horticulture among the people of Rochester, and in exploring the flora of western New York and of adjacent regions, as announced in our last week's issue. The picture was intended to accompany that announcement but was not ready in time.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Růžička

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Buying Some Novelties

If you have been shipping to one commission man for quite a long time he or his firm will be glad to advise you which of the novelties are very likely to take a hold in the market, the coming season. Few of the firms that distribute the new varieties would do so unless they were sure that they are all right, for, to take a chance at any thing that would sell, would soon put these firms out of business. Before buying any of the new roses, see them growing and study the conditions under which they are growing so well. Then go over your own place and see if your own houses could be made to give the same. If this is so there is no reason why you should not succeed. Now for the buying part. It will be better to buy the plants in small pots than to buy the wood or the rooted cuttings, especially if they have to be shipped a long distance. The express or parcels post degree will not be any too good for them, and the plants will stand it a great deal better. As soon as they arrive pot them up at once into nice clean pots, preferably the same size pots that they had been in, unless they are very well rooted, when they can receive a larger size. We find that the plants will start off much better if not put into pots that are too large for them. As soon as they start, and the roots work around so as to hold the ball firm, they can then be shifted into larger pots, and receive the same treatment that other plants would under like circumstances.

Winter Syringing

With cold weather here, syringing should be done as soon as the houses run up a little in the morning, and only on nice clear days, when the plants will have plenty of chance to dry before the night comes. Do not try to keep the houses warm by shutting down the ventilators and keeping them so all morning; ventilate as usual, and if it is necessary, keep a pipe of steam on all the time. If no steam is to be had, shut off all the hot water pipes, save one flow and return, and then keep the boiler on the move a little bit. The object of closing all the pipes is to get a better circulation with less fire, as it would require a good fire to circulate the water in all the pipes. Where the pipes are laid very good it will not be difficult to keep the water going without a strong fire.

Using Lime

Do not neglect to blow plenty of air-slacked lime underneath the plants as soon as the day draws to a close. This should be done after each syringing or after each watering. It will help dry out the air around the plants and by so doing will help prevent blackspot, also prove distasteful to many of the insects that inhabit the benches around the roots of the plants.

Soil for Potting

If this is exposed to the weather, it will be advisable to bring some of it under cover now so that it will have a chance to dry out before it will be used. Dry soil can be mixed very easily, and if it is then necessary it can easily be moistened to the proper degree. If time permits screen it as soon as it is dry enough, and it will then be ready to use at any time. A little bone meal is an excellent fertilizer to mix into the soil. A little soot is very good, too, but the quantity used should be very small especially if a considerable amount of bone is used. There is a reason for this in the fact that the lime in the bone would set the ammonia in the soot free, and it would be likely to do some damage to the roots of the plants.

Leaf Mold

Although it is not used as much as it used to be in the days gone by, there is still a large amount of it used here and there all through the country. We like to use a little leaf mold for the first potting, especially if the soil is rather heavy. It helps to open it and thus insures good drainage, and also gives the air a chance to get into the soil thus heating it to almost the same temperature as the air surrounding, which will greatly help to promote root growth.

The Cold Weather

Although the weather has been remarkably warm up to this time, there is no reason why you should allow your coal bin to get empty. There is nothing to promise us this weather in the future, and should it turn out to be the same as the winter of 1911-1912 then we would be up against it if we were not prepared. Better get your coal so as to have a cellar full all the time.

A word for New York

Only ten weeks until the New York International Flower Show will open its doors. Much must be done in the meantime if this important affair is to attain the proportions and the surpassing success which all are so anxious that it should attain. While this enterprise is, in a way, localized, and while its projectors have made no effort to extend the guarantee subscription beyond the immediate neighborhood of New York, yet the entire horticultural fraternity of the country have something at stake and will, directly or indirectly, gain or lose something according to whether it is or is not a success. So it behooves all who can to extend such support as is in their power to this supreme effort of their fellow-horticulturists in the great metropolis. Even if it does entail some sacrifice, make an exhibit in one or the other department, competitive or trade, and when it comes your turn to look for supporters and allies you will find that New York will not forget her friends.

The carnation meeting

The American Carnation Society showed wisdom in selecting Cleveland as the place for its mid-winter meeting and exhibition this year. It is very centrally located for a large territory in which carnation culture is carried on extensively and there can be no question of a splendid exhibition, with a good sprinkling of interesting novelties. We hope our readers will note what President Brown of the American Carnation Society has to say on another page of this paper. HORTICULTURE recognizes in the instituting of table decorations to demonstrate the decorative qualities of the new varieties and the abilities of the Cleveland retail florists, an innovation of double significance and far-reaching effect. It is in line with what HORTICULTURE has preached incessantly for years, as our readers know. As to Cleveland's part, otherwise, in the meeting, the florists of that city have on all such occasions shown fine proficiency in the preparatory arrangements and in the art of entertaining their visitors. We expect to see a large and enthusiastic meeting and a much needed liberal addition of new young blood to the membership list this year.

The gardener in the S. A. F.

F. E. Palmer's communication on the status of the so-called "private" gardener, which appears in this issue, brings to the front an old vexed question but, although quite in accord with Mr. Palmer's ideas on the subject, we doubt if much will be gained by its discussion now. As to the intent of the founders of the S. A. F. it will only be necessary to quote from the original prospectus the following:

"Who are eligible—All Florists—professional or amateur—Gardeners, Seedsmen, Nurserymen, Superintendents of Parks, Manufacturers of Heating Apparatus, Greenhouse Builders and Dealers in Florists' Supplies in the United States and Canada shall be eligible to membership in this Society."

Broad enough surely. As to how this principle has been carried out, a reference to the records will show that non-commercial gardeners have been, in proportion to their small representation on the membership list, repeatedly honored with positions of official responsibility and on the programs of speakers and one of their number is this year the honored president of the Society. As Mr. Palmer rightly claims, the influence of the S. A. F. has at all times been exerted on lines of usefulness to the common welfare and all the craft, whether commercial or non-commercial, are co-beneficiaries in whatever the national society has achieved for the advancement of horticulture in America.

PRIVATE, PROFESSIONAL OR COMMERCIAL—WHICH?

Editor of Horticulture:

Dear Sir:

In the course of conversation with a member of the G. & F. Club of Boston at its last meeting, some sentiments were expressed and assertions made by him which the writer feels are worthy of wider consideration and discussion. The subject naturally related to the forthcoming S. A. F. Convention and ramified into many side issues more or less pertinent to the question. In view of the fact that the member referred to is one of the most thoughtful and representative men in the Club and in the private gardener fraternity, it is fair to assume that he voices more or less accurately the sentiment of that branch of the profession. Furthermore, in justice to him as a critic, it may be said that through years of devoted service and liberal giving he has earned a right to the utmost freedom of expression.

His contention, briefly, is that the S. A. F. is essentially a commercial body, that it has never done anything for the private gardener as such and, consequently, that the latter should not be expected to bear the brunt of its entertainment. Aside from the question of fact, the subsidiary questions arose as to; What is a "private gardener?" Wherein does he differ from a "commercial gardener?" and if the S. A. F. has not been helpful to him, why not? In a mixed membership of "Privates" and "Commercials," such as exists in the G. & F. Club in Boston, one can readily observe the segregation into separate camps of the two branches and that the active agent in creating and maintaining this division is invariably the private gardener. It does not require a very astute observer to discover that one reason at least for this attitude of mind lies in the time-honored superstition that the private-gardener belongs in the amateur class and as such has a kind of superiority over his more "mercenary" brother. No doubt, the confusion of terms "private" and "amateur" has much to do with this quite unwarranted assumption. There is little hope that the proposed change from "private" to "professional" will help matters much, as the latter term will, no doubt, be used in its classic sense and still serve to differentiate the two branches.

To prove among other things that the S. A. F. was not intended as a benefit to the "private gardener," my friend pointed to the very name itself as evidence. The fatal word "Florist" had been installed and no private gardener need apply. Here, with regard to terms, again, while the word "commercial" is, in the mind of the private gardener, bad enough, "florist" is intolerable and so both in the S. A. F. and our own G. & F. Club of Boston, this poor, innocent, little word has set up an almost insuperable difficulty. As a matter of fact, there is no essential difference between the gardener who grows plants and flowers for one patron and he who caters in a similar way to many; certainly the under-men in both cases fill positions practically alike. The former is a professional gardener working for a living just as much as the latter and is in no sense an amateur. He places before his one patron the best and newest thing in horticulture, he studies landscape gardening, the arrangements of greenhouses, etc., just as his "commercial" brother does in serving his more numerous customers.

They both do it for profit; the fact that one has a fixed income and the other a variable one does not affect the question. In fact even in that respect, the "private gardener" is always aiming at increased income either through efficiency or opportunity, or both. Seeing then, that the "private gardener" is just as commercial both in instinct and endeavor as his "commercial" brother, the writer fails to see any reason why the S. A. F., if it is valuable to one, is not equally so to the other. If it has not proved so, it may be fairly suspected that the fault lies with the private gardener rather than the S. A. F.

There is no doubt that the name of the Society was unfortunately chosen and has militated against its growth and usefulness and will continue to do so. The fact remains, however, that it has been and is a splendid organization. It deserves the support of every one engaged in the profession of Horticulture and with this freely given and with possibly a new name and the inclusion of all subsidiary associations within its fold, there will be talent and material sufficient to make it the largest and finest Horticultural Society in the world.

Yours very truly,

F. E. Palmer

Brookline, Mass.

BOOMING THE PANAMA-PACIFIC.

George A. Dennison, Chief of the Department of Horticulture at the Panama-Pacific International Exposition, sends us a very sanguine communication concerning the outlook in his Department.

As an evidence of the zeal with which the advisory committee is going at the work, he gives the following brief quotations from their several letters in which they accepted the onerous and taxing duties of the position.

A. F. J. Baur, secretary of the American Carnation Society, writes:

"I shall be active in every way where I can [illegible] meeting place, etc., etc."

J. P. Brown, International Society of Arboriculture:

"I will assist in the management in any way that I can. [illegible] international juror by President Francis."

Harry A. Bunyard, secretary American Sweet Pea Society:

"I have brought the matter of having our society take part in the exposition before the convention in Boston. The question was laid over until 1914. It is quite probable, however, that we will [illegible] invitation at that time and accept the same."

M. C. Ebel, secretary National Association of Gardeners:

"I pledge myself to do what I can to further the interests of horticulture and floriculture and shall continue to try and further the interests of the Exposition among the gardening fraternity."

L. Merton Gage, American Gladiolus Society:

"I shall be active in every way where I [illegible] meeting place, etc., etc."

L. A. Goodman, President American Pomological Society, Kansas City:

"I will [illegible] the cause and will try to bring the meeting to your city."

Frank E. Gorrell, secretary National Canners' Association:

"I will make every possible effort in trying to make the Exposition a success."

Fred E. Grover, secretary National Association of Retail Nurserymen:

". . . I will use such influence as I [illegible] exhibit."

Benj. Hammond, secretary of the American Rose Society:

"I will come to San Francisco and do whatever I can in the meantime."

H. C. Irish, secretary National Council of Horticulture:

"I assure you of my earnest co-operation in furthering a great horticultural exhibit."

C. W. Johnson, secretary Chrysanthemum Society of America:

"I will do all in my power to further the interests of the Exposition and shall be pleased to serve you in any capacity."

C. E. Kendel, secretary American Seed Trade Association:

"Will assist in bringing the World's Seed Trade Convention to your city, and I regard the appointment on your advisory committee as not only an honor but a duty."

J. P. Pilkington, American Association of Nurserymen:

"I will be pleased to serve in any way [illegible]"

Charles H. Totty, chairman, New York Flower Show:

"I will serve you in any capacity that you may name, and will do all the publicity promoting within my power."

John Young, secretary American Florists and Ornamental Horticulturists:

"Please do not hesitate to call on me at any time, as I will always be ready to assist in bringing about a successful floricultural exhibit."

And from the following came formal replies of acceptance coupled with expressions of good will which have since been exhibited in vigorous, effective and enthusiastic support and achievement: C. P. Close, secretary Society for Horticultural Science; David Fairchild, president American Breeders' Association; J. B. Wight, secretary National Nut Growers' Association; Mrs. Charles H. Maynard, secretary Ladies' Society of American Florists; Dr. J. R. Wilson, ex-secretary National Nut Growers Association, and Bertrand H. Farr, president American Peony Society.

A NEW AZALEA.

A. Schultheis, of College Point, N. Y., is enthusiastic over the appearance in his place of a unique sport from Azalea Mme. Petrick. There is a European sport from Mme. Petrick on the market, but this is quite distinct from it, the color, resembling that of Vervaeneana, being much more vivid and pure in all lights—natural or artificial—and the habit equally desirable. In the myriads of azaleas handled by Mr. Schultheis during his long business career this is the first sport that has appeared and it certainly looks like a good one.

AMERICAN CARNATION SOCIETY.

ANNUAL MEETING AND EXHIBITION.

More than ordinary interest should attach to the Annual Meeting and Exhibition of the American Carnation Society to be held in the Hotel Statler, Cleveland, Ohio, on Wednesday and Thursday, January 28th and 29th next. The geographical location of Cleveland is central, suiting the florists of both East and West. Judging from the program now nearing completion, the business sessions will be productive of much information of value to carnation growers.

The Exhibition which is to be staged in the large ballroom of the hotel will, it is expected, be larger than any of its predecessors and will embody some new features. A distinctly new feature will be a series of table decorations, demonstrating the decorative qualities of the new varieties of carnations being disseminated this year. Each disseminator has been asked to furnish 150 to 200 flowers for this especial purpose, and the necessary greens, accessories and other material required will be furnished by local florists, who will also undertake the decorations.

The tables will not be in competition for any honors, being merely demonstrations of the artistic ability of the Cleveland retail florist. By using the new varieties of carnation in this way, it is hoped the public of Cleveland will become familiar with the names and qualities of the new introductions—a result that could not be other than to the advantage of the trade in general.

The Exhibition will be open to the public at certain hours, admission to be free and only by the official card of admission sent out for the occasion. As the display will be of particular interest to retail florists as well as growers, it is hoped that there will be a good attendance on the part of the trade within a convenient distance from Cleveland.

R. T. BROWN, Pres.

Queens, N. Y.

Premium List for Twenty-third Annual Exhibition to Be Held at Cleveland, Ohio, January 28-29, 1914.

SECTION A.

Open to All Varieties, Seedlings and Standard Sorts.

Class 1. Vase 100 blooms White, 1st, $10; 2nd, $6.

Class 2. Vase 100 blooms Flesh Pink, being those shades of flesh or salmon color, 1st, $10; 2nd, $6.

Class 3. Vase 100 blooms Light Pink, being those shades of pink verging on the true pink and not lighter than Gloriosa, nor darker than Mrs. C. W. Ward, 1st, $10; 2nd, $6.

Class 4. Vase 100 blooms Dark Pink, being darker than Mrs. C. W. Ward and including all so-called cerise not dark enough to be classed as red, 1st, $10; 2nd, $6.

Class 5. Vase 100 blooms Red or Scarlet, to include all shades generally included in those colors, 1st, $10; 2nd, $6.

Class 6. Vase 100 blooms Crimson, to cover those shades known as crimson or maroon, 1st, $10; 2nd, $6.

Class 7. Vase 100 blooms Yellow or Yellow Variegated, 1st, $10; 2nd, $6.

Class 8. Vase 100 blooms White Variegated, 1st, $10; 2nd, $6.

Class 9. Vase 100 blooms Any Other Color, to include any other color decidedly distinct from colors specified above, 1st, $10; 2nd, $6.

Sweepstakes.

For sweepstakes in Section A, see Section F for special premiums.

SECTION B.

Open to All Varieties Disseminated Prior to July, 1913. 50 Blooms to Each Vase.

Class 10. White Perfection, 1st, $5; 2nd, $3.

Class 11. White Enchantress, 1st, $5; 2nd, $3.

Class 12. White Wonder, 1st, $5; 2nd, $3.

Class 13. Any Other White, 1st, $5; 2nd, $3.

Class 14. Enchantress, 1st, $5; 2nd, $3.

Class 15. Pink Delight, 1st, $5; 2nd, $3.

Class 16. Any Other Flesh Pink, 1st, $5; 2nd, $3.

Class 17. Mrs. C. W. Ward, 1st, $5; 2nd, $3.

Class 18. Gloriosa, 1st, $5; 2nd, $3.

Class 19. Any Other Light Pink, 1st, $5; 2nd, $3.

Class 20. Rosette, 1st, $5; 2nd, $3.

Class 21. Any Other Dark Pink, 1st, $5; 2nd, $3.

Class 22. Beacon, 1st, $5; 2nd, $3.

Class 23. Victory, 1st, $5; 2nd, $3.

Class 24. Any Other Scarlet, 1st, $5; 2nd, $3.

Class 25. Harry Fenn, 1st, $5; 2nd, $3.

Class 26. Any Other Crimson, 1st, $5; 2nd, $3.

Class 27. Benora, 1st, $5; 2nd, $3.

Class 28. Any Other White, Variegated, 1st, $5; 2nd, $3.

Class 29. Any Yellow or Yellow Variegated, 1st, $5; 2nd, $3.

Class 30. Any other color, same as class 9, 1st, $5; 2nd, $3.

SECTION C.

For Varieties Disseminated in the Season of 1912-13 50 Blooms to Each Vase

Class 31. Enchantress Supreme, premium offered by Dailledouze Bros., 1st $6; 2nd $4.00.

Class 32. Wm. Eccles, premium offered by Scott Bros., 1st $6; 2nd $4.00.

Class 33. The Herald, premium offered by Chicago Carnation Co., 1st $6; 2nd $4.00.

Class 34. Yellow Prince, premium offered by F. Dorner & Sons' Co., 1st $6; 2nd $4.00.

Class 35. Yellowstone, premium offered by F. Dorner & Sons' Co., 1st $6; 2nd $4.00.

Class 36. Commodore, premium offered by the E. G. Hill Co., 1st $6; 2nd $4.00.

Class 37. Salmon Beauty, premium offered by F. B. Abrams, 1st $6; 2nd $4.00.

Class 38. Eureka, premium offered by L. C. Midgley, 1st $6; 2nd $4.00.

SECTION D.

The American Carnation Society Medals.

Class 39. A gold medal will be awarded to the best vase of 100 blooms of any variety. Must score not less than 90 points.

A silver medal will be awarded to the second best vase in this class. Must score not less than 88 points.

A bronze medal will be awarded to the third best vase in this class. Must score not less than 86 points.

Blooms must be staged in the society's vases until judging is finished. After the awards have been made, flowers may be changed to other vases if desired.

SPECIAL SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS MEDALS.

For Undisseminated Varieties of American Origin.

Class 40. A silver medal will be awarded to the best vase of 50 blooms, any color. Must score not less than 88 points.

A bronze medal will be awarded to the second best vase in this class. Must score not less than 86 points.

FRED DORNER MEMORIAL MEDAL.

This Medal is Offered Under the Following Conditions:

Class 41. A gold medal will be awarded to the best 100 blooms of any undisseminated seedling carnation (sports not admissible). The variety must have been in cultivation not less than three years and must score not less than 85 points, judged by the American Carnation Society's scale of points. The medal to be awarded to the originator, who need not necessarily be the exhibitor, and can be awarded to the same variety only once. To be eligible to compete for this medal, 50 blooms of the variety must have been shown at a previous exhibition of the American Carnation Society in a preliminary class and scored not less than 80 points. The following varieties have qualified and are eligible to compete for the medal this year: "Matchless," by Cottage Gardens Co., Queens, N. Y.; "Gorgeous," by Peter Fisher, Ellis, Mass.; "Princess Dagmar," by Patten & Co., Tewksbury, Mass.

Class 42. A preliminary competition will be conducted at this exhibition for eligibility to compete for the medal next year. Fifty blooms must be shown of any undisseminated seedling variety.

SECTION E.

Certificate of Merit.

Class 43. New, or undisseminated varieties may enter for this Certificate of Merit under the following conditions: A variety may be entered under a name or number, but a name must be furnished before a certificate will be issued. An entry fee of $5.00 will be charged for each variety entered when entry is made. Not less than 50 blooms must be shown and the variety must have been bloomed not less than three years. To receive a Certificate of Merit, a variety must score eighty-five or more points. Varieties may be staged and judged in this class at any time during the convention. A vase of a variety competing in an open class may also be entered for Certificate of Merit. In all other respects, except as stated above, the rules governing the general classes must be observed.

Preliminary Certificate.

Class 44. This may be competed for by a two-year-old variety. Twelve blooms must be shown, and a $2.00 entry fee will be charged for each variety entered. The variety must be properly labeled under name or number. It must score not less than 85 points and may be staged and judged at any time during the convention.

SECTION F.

Special Premiums.

Class 45. A silver cup, valued at $50.00, is offered by Thos. W. Lawson for the best vase arrangement of not less than 100 nor more than 200 blooms. Other foliage, cut or in pots, may be used.

Class 46. $10.00 in gold will be awarded to the vase of carnations which holds in best condition to the end of the exhibition. Premium contributed by F. Burki.

A silver cup, valued at $20.00, is offered by Hitchings & Co. as a sweepstakes prize in Section A. (No entry required for this.)

NON-COMPETITIVE EXHIBITS.

Space Will Be Provided for Non-competitive Exhibits.

Retailers are especially invited to avail themselves of this opportunity to show made-up work in various forms.

Where special location, or special arrangement of tables is desired, application must be made to the superintedent of the exhibition not later than two days before the opening of the exhibition.

A. F. J. BAUR, Secretary.

Indianapolis, Ind.

NEW YORK TO CLEVELAND.

The New York party for the American Carnation Society's meeting at Cleveland will leave the New York Central Station on the 6.45 P. M., train on Tuesday, January 27th, arriving at Cleveland, Wednesday morning at 7.35

Providence, R. I.—Announcement is made that Mrs. Elizabeth O'Connor has donated $5000 to St. Joseph's Hospital in memory of her husband, Timothy O'Connor. The donation carries the stipulation that it shall be used to establish a free bed in that institution. Mr. O'Connor for half a century was a leading florist of Providence.

ROSE "MRS. GEO. SHAWYER"

North! East! South and West! the word comes back to us—"Finest Rose we ever handled!" The color holds in winter when the Killarneys bleach almost to white. We have five thousand plants that have been carried over and are now starting off splendidly. Why not remove those poor plants and replant with Shawyer, which we guarantee will give you a wonderful spring and summer crop.

Immediate Delivery, 2 1-2 in. plants, $20.00 hundred; $150.00 thousand

THE BAY STATE NURSERIES, North Abington, Mass.

HORTICULTURAL SOCIETY OF NEW YORK.

The monthly exhibitions begin with that of Saturday, January 17th, which will be held at the American Museum of Natural History. Prizes are offered for orchids, carnations, and sweet peas. The exhibition committee has the power to award prizes for special exhibits not provided for in the schedule. All are therefore invited to exhibit what they may have of interest—a well-grown plant, a rare flower, or something unusual. Schedules are now ready and will be sent on application to the secretary, George V. Nash, New York Botanical Garden, Bronx Park, N. Y. City.

A meeting of the society will be held at the same place at 3.45 of the same afternoon, followed at 4 o'clock by a lecture by Edwin Jenkins of Lenox, Mass., on "Sweet Peas." The mere announcement of Mr. Jenkins as a lecturer on this subject should insure a good attendance, for he is an enthusiatic admirer of this popular flower, and can tell us many of the finer points involved in its successful cultivation.

GEORGE V. NASH, Secretary.

Boston, Mass.—Paul Brigham has recently leased the Westboro Greenhouses, formerly occupied by Midgeley & Draper. These houses have been devoted mostly to the culture of carnations.

H. HUEBNER, Groton, Mass.

Clubs and Societies

LENOX HORTICULTURAL SOCIETY.

The regular monthly meeting of the above Society was held in the town hall, Lenox, Mass., on Saturday evening, Jan. 3rd. The chief business was the altering of the by-laws to provide that the Society hold its annual meeting in November instead of December. Two exhibitions will be held this year, but the summer show will be held on July 22nd and 23rd instead of the same dates in August as has always been the custom in previous years. The reason for the alteration is to have more classes for sweet peas, as the other show was rather late for them. The dates for the fall show are Oct. 22nd and 23rd. The following prizes have been donated: C. H. Totty, $15 for new chrysanthemum James Frazer, J. M. Thorburn & Co., silver cup for collection of twelve varieties of vegetables; Knight & Struck, $10 for any class the Society likes to offer it for; Stumpp & Walter Co., $10 for same. The date for the annual ball is Feb. 6.

JOHN MAIR, Asst. Sec.

Inspector's Report on Lenox Show.

Athol, Mass., November 1, 1913.
Wilfrid Wheeler, Esq., Secretary State Board of Agriculture, Boston, Mass.

Dear Sir: It was my pleasure to visit the annual August exhibition of the Lenox Horticultural Society, but because of sickness was unable to be present in October I have nothing but good things to say of the summer show. Every courtesy was shown me by the officers, making the visit enjoyable. It was said the exhibit of flowers was not as large as in former years, owing, no doubt, to the drought of the season; while the quantity of flowers was small, the quality was high as the hall was well filled with vegetables and flowers.

In the vegetable classes there was a fine display. I have never seen better, and there was much higher interest in the awards by growers, than in the flower classes. There was a fine exhibit of hothouse grapes. The school exhibit of flowers and vegetables, although small, was very creditable and worthy of high compliments. Respectfully submitted,

(Signed) ALBERT ELLSWORTH,
Inspector

FLORISTS' CLUB OF PHILADELPHIA.

The meeting on Tuesday evening last was known as "Rose Night." The chief exhibitors at this meeting were as follows: A. Doemling, Lansdowne, Pa.; a very fine lot of roses, one vase each of Radiance, Milady, Queen and Mrs. Russell. The last named variety was exceptionally good in color and stem. A. N. Pierson Co., Cromwell, Conn.; new rose Hadley, which created a very good impression. Stephen Mortenson, Southampton, Pa.; double White Killarney, all very fine blooms. Joseph Heacock Co., Roelofs, Pa., Pink Killarney, White Killarney, Radiance and Richmond. George Burton, Wyndmoor, Pa., new sport from My Maryland, named "Aurora," a good light pink, and very fragrant. John Stephenson's Sons, Oak Lane, Phila., Sunburst; well grown. A. Farenwald, Roslyn, Pa., Mrs. George Shawyer, showing remarkable growth and good color. W. A. Leonard, Lansdowne, Pa., Double White Killarney. Robert Scott & Sons, Sharon Hill, Pa., Killarney Brilliant; good color and very good foliage.

Adolf Farenwald gave a talk on "Affiliation." There was quite a discussion following the reading of this paper, but the consensus of opinion seemed to be that affiliation between the S. A. F. and the Florists' Clubs would not get through as proposed, at present.

The February meeting will be "Carnation Night," at which time exhibits of new and choice carnations are invited. The essay committee announced that they will have a very prominent carnation man to talk to us on that evening.

SOCIETY OF AMERICAN FLORISTS

Department of Plant Registration.

Public notice is hereby given that as no objection has been received or filed to the registration of the chrysanthemum, "Mary Ellen," by Frederick Lagerstam, Belle Haven, Greenwich, Connecticut, and the Chrysanthemum, "Lena Baum," by Charles L. Baum of Knoxville, Tenn., and the Begonia, "Florence Davenport," by Alfred Davenport, Watertown, Mass., the same become complete.

JOHN YOUNG, Sec'y.
December 27, 1913.

"Get them at Dreer's"

The Dreer Strain of Double Petunias

For nearly half a century the majority of the growers in the United States have been depending on the Dreer strain of Double Petunias, which this season compares favorably with stock we have heretofore supplied.

We offer for immediate delivery, good three inch pots, which will quickly furnish a good supply of cuttings, in fifteen varieties, 75 cents per dozen; $6.00 per 100, or the set of fifteen varieties, one of each, $1.00.

DOUBLE WHITE PETUNIA SNOW BALL

We have a large stock of this variety which is so useful for summer cutting, 3 inch pots, 75 cents per dozen; $6.00 per 100.

Seed of our **SUPERB STRAIN OF FRINGED PETUNIAS.** Double, 75 cents per 500 seeds; $1.50 per 1000 seeds. Single, 50 cents per trade pkt.; $1.00 per 1-16 oz.; $1.50 per 1-8 oz.

Our Quarterly Wholesale Price List, issued January 1st, offers a full line of seasonable Plants, Seeds and Bulbs. The above prices are for the Trade only.

JOHN LEWIS CHILDS
Flowerfield, L. I., N. Y.

AMHERST SECURES A. H. NEHRLING AS HEAD OF FLORICULTURE.

Arno H. Nehrling has recently resigned his position as Associate in Floriculture in the College of Agriculture and in the Agricultural Experiment Station at the University of Illinois to become head of the department of Floriculture in the Massachusetts Agricultural College, at Amherst, Massachusetts.

Mr. Nehrling was born July 25, 1886 at Freistadt, Missouri. His preliminary education was received in Milwaukee, in the public schools and in Concordia College. His father at that time was curator of the Milwaukee Public Museum, and while there made frequent publications, both in this country and abroad, along lines connected with Natural History. In 1902 the family moved to Gotha, Florida, to take up the commercial culture of amaryllis, caladiums and crinums, his

ARNO H. NEHRLING

father meanwhile continuing his research. At the present time his father has the largest collection of caladiums in the world and his hybrid amaryllis are known the world over.

In the spring of 1905, Mr. Nehrling entered the Missouri Botanical Gardens and Shaw School of Botany at St. Louis, at that time the only school in the United States specializing along floricultural lines, where he had obtained a scholarship. He was graduated in 1909, his thesis, "The Fancy Leaved Caladiums," appearing in the American Florist the following year.

From March, 1909, until July, Mr. Nehrling taught nature study and school gardening in the public schools of South Chicago, after which he entered into his duties in the floricultural division of the Department of Horticulture, University of Illinois. He is a member of the Society of American Florists and Ornamental Horticulturists, the Illinois State Florists' Association, the Illinois Horticultural Society and a fellow in the Royal Horticultural Society.

His many friends among the faculty of the University, and his acquaintances in the towns of Urbana and Champaign wish him as great success in his new undertaking as he has had at Illinois.

CATALOGUES RECEIVED.

E. E. Stewart, Brooklyn, Mich.—Wholesale Price-List of Gladioli.

W. E. Marshall & Co., New York—Seed Catalogue for 1914. A very creditable publication.

Nungesser-Dickinson Seed Co., Hoboken, N. J.—Wholesale Price List of Grass and Clover Seeds.

Alfred Mitting, Holland, Mich.—Circular of Macatawa Everbearing Blackberry. With colored plate.

L. Daehnfeldt, Odense, Denmark.—Illustrated catalogue of Flower and Vegetable seeds for the Trade.

Wm. Henry Maule, Philadelphia.—Seed Book for 1914. Cover in colors and quite strong on vegetables.

Sluis & Groot, Enkhuizen, Holland.—General Price-List of Vegetable, Flower and Agricultural Seeds.

W. Atlee Burpee & Co., Philadelphia, Pa.—Wholesale Catalog for Seedsmen and Dealers only who buy to sell again. Vegatables and flower and grass seeds fully listed.

Anton Schultheis, College Point, N. Y.—Wholesale Fall Price-List of Flowering and Foliage Plants. A very attractive list from a wide-awake grower of good things for the florists' trade.

Watkins & Simpson, London, England.—Foreign and Colonial Wholesale Catalogue of Garden and Flower seeds, season 1914. Well printed and beautifully illustrated. Insert of "1914" novelties in colors.

Williams Seed Co., Norfolk, Va.—1914 Annual Catalogue of Vegetable, Farm and Flower Seeds. Farm and Garden Implements, Incubators and Poultry Supplies. "Ask the man who plants them," is a good slogan.

Burnett Bros., New York City.—1914 List of Reliable Seeds, Bulbs, Plants. Having graduated into a new and capacious establishment on Chambers street, Messrs. Burnett have duly signalized that event with a catalogue adequate to the occasion. Bound in dark forest green and gold embossed, it presents an attractive exterior. The pages are replete with interesting offers in seeds, poultry supplies, implements, etc., and abundantly illustrated.

A. T. Boddington, New York.—Garden Guide for Spring, 1914.—The first glance at this very inspiring catalogue discloses a cover illustration by Harry A. Bunyard in blue, green and gold which once more confirms us of that gentleman's talent as a decorative artist of no mean ability. Looking through the 175 pages of text we find a bountiful list of the good things a first-class seed house can offer for the year 1914, prefaced with a very attractive novelty list.

Peter Henderson & Co., New York—"Everything for the Garden." The 1914 edition of this always-welcome annual visitor is again an advance upon its predecessors. The illustrations which are numerous and of high quality, are well placed and each page is a well-balanced story by itself. The cover is exceedingly rich and attractive. A picture in natural colors of "Monticello," the home of Thomas Jefferson, set in an embossed panel of cream and gold, adorns the front and a similar design on the back encloses a brilliant rose garden scene. There are several full page inserts in colors, that of Henderson's New Red Sunflower being particularly pleasing.

R. & J. Farquhar & Co., Boston, Mass.—Garden Annual for 1914. Messrs. Farquhar have certainly outdone themselves in this handsome production which is unquestionably the best they have ever put out. The cover illustration of Hypericum patulum var. Henryi and Viola cornuta atropurpurea in colors is lovely and Oriental Poppy Mrs. Perry is equally glorious on the back cover. The book comprises 168 pages with cover and the illustrations are profuse and excellent. In the novelty section are listed thirty-six new and rare plants from the Wilson Chinese collections, with plates of Clematis Armandi, Buddleia variabilis Veitchiana, Exochorda grandiflora Wilsonii and Syringa Wilsonii.

Of Interest to Retail Florists

SOUNDS NATURAL!

The florist shops of Austin were stranded yesterday. All late orders for cut flowers were unfilled and many orders for plants and pot flowers were denied on account of the heavy business. The city, however, was not flowerless. Hundreds of orders for flowers received sevral days ago were filled with promptness. At 4 o'clock yesterday it was almost impossible to make a purchase of flowers from any of the shops. Not a single shop was stocked with sufficient cut flowers to supply the demand and the pot flowers offered were picked over carefully. One florist estimated that more cut flowers had been sold than any Christmas in the history of Austin. The prices were steep during the last few days before Christmas because the demand was too heavy to be supplied. The dealers complained that they were unable to get in shipments from other cities.

CHICAGO NOTES.

A Miller, of the A. Henderson Co., returned last week from a western trip and left again for a two months' trip. He reported business as very satisfactory.

Some of the growers are having trouble with their tulips as was anticipated when the bulbs arrived in a heated condition. It is too early to tell just how serious the trouble may be.

Mrs. M. Mailander, for many years connected with the trade and for the past five years at A. Lange's, will attend the marriage of her daughter, Emily Mailander, to Arthur A. Beeson at Kansas City, Mo., Jan. 10.

Chicago visitors—Miss Ethel Irby, Memphis, Tenn.; W. J. Pilcher, St. Louis, Mo.; J. J. Karins, representing H. A. Dreer, Phila.; I. M. Hoffman, La Porte, Ind.; C. H. Perkins, 2nd, of Jackson & Perkins, Newark, N. Y.; Mr. and Mrs. Leo Bather, Clinton, Ia.; Ralph Bather and Edith Bather, Clinton, Ia.; Victor Huot, Duluth, Minn.

The American Importing Co. has given up its rooms at 219 S. Dearborn street and turned its stock over to its creditors. F. Jerome, the head of the concern, who is leaving for France, says the financial embarrassment is caused by the death of his partner in Germany and that the business will be adjusted and a new start made about Feb. 15th, upon his return.

At Poehlmann Bros.' plant at Morton Grove, the carnation cut Christmas week averaged 16 blooms to the lineal foot in the greenhouses. Their carnation houses have a total of 6,450 lineal feet and the cut therefore was 103,200 blooms. The plant section was cleaned out of everything in bloom, but already the benches are filled with young stock, including 26,000 cyclamen plants.

The Chicago Tribune, in summing up the value of Chicago's wholesale trade for 1913 puts cut flowers at $2,750,000. This is much less than any of the other thirty-five products enumerated and is regarded by many of the wholesalers as much below the actual figures. E. E. Pieser, who has been in the wholesale cut flower business in Chicago for over thirty years thinks $4,000,000 would be a very conservative estimate. Others place the sum at five and six millions while but one wholesaler thought the Tribune's estimate too high.

Sam Pearse is now settled in his new place on Higgins Road. The place has seven acres, a fine brick dwelling house and a range of modern greenhouses. The new material and work was furnished by the J. C. Moninger Co. and the heating is with two of their hot water Sun Ray boilers, with which Mr. Pearse is more than pleased. There is a pump which returns 100 gallons a minute to the boiler when necessary. The service shed is 25 x 227 ft., with double doors at either end and on one side, and teams can pass in at one entrance, get the loads of plants and pass out at the other. This shed also contains the boilers, potting and packing benches, and the roof is supported by trusses and contains glass ventilators, affording both light and air. It speaks well for old-time cypress wood that a part of the range is made from the old houses built 22 years ago. The business is now wholesale only.

PHILADELPHIA NOTES.

Dennis T. Connor came back to work on the 6th inst., after an eight-weeks' illness from typhoid. The Lord & Burnham Co. are glad. So are all other friends of Dennis. "Is Corporal Casey here? He is! Thin lit the battle go on, sez Napoleon."

Fred J. Michell, Jr., has started on a three weeks' business tour south. This is his second trip. Last year he met all the old friends of his house and made many new ones. With his remarkable geniality and impressive personality he will surely do the same again this year—only more so.

William J. Sherry, late with the Johnson Seed Co., and Johnson & Stokes, is now with Henry A. Dreer as assistant superintendent in the vegetable seed department. Mr. Sherry has had over twenty-five years experience in the seed business and is well grounded in all departments. We feel sure he will make good under these new conditions of larger responsibility and opportunity.

Edward Campbell, landscape architect, Ardmore, reports that business has been very brisk in his line during the past year in this vicinity and the prospects for 1914 are also very good. Others in the same line also report favorably. Many old places are being improved and there are some new ones under way, also new golf courses and work of that character, all calling for nursery stock and other trade materials. 1914 looks like a good year for those who advertise.

M. Rice Co., florist supply house, 1220 Race street, gave its second annual banquet to its male employees on Monday evening, December 29th, at the Hotel Bingham. Bernard Eschner, president of the Company, delivered a short address thanking the employees for their faithful work during the last year, and stating that it was the most prosperous in the history of the concern. Some of the employees furnished the music and songs, and the party then adjourned to Keith's.

Visitors:—G. P. McBurney and wife, Atlanta, Ga.; H. M. Joy, Nashville, Tenn.; Stephen Mortensen, Southampton, Pa.; B. F. Barr and Albert M. Herr, Lancaster, Pa.

WASHINGTON NOTES.

William F. Gude has been nominated for the presidency of the Washington Chamber of Commerce, a position which he held several years ago. There are other nominees but it is generally conceeded that if Mr. Gude will allow his name to continue on the ballots, he will win easily. Mr. Gude is looked upon in this city as one of the most level headed of merchants.

Mr. George W. Hess, a native of the District of Columbia, but who has for some years been living in the South, has been appointed to the position of superintendent of the National Botanical Gardens made vacant by the death of the late C. Leslie Reynolds. Mr. Hess was born in this city forty-nine years ago. At the age of sixteen he started in the florist's business with John Saul, after which time he worked with a number of florists including Mr. Muir of Chicago, and Freeman's and was associated with the late Edward A. Mosely for a number of years in Kenilworth, D. C., where he specialized in carnations and violets. A disastrous fire put him out of business and he took the civil service examination for a position with Uncle Sam. Passing with a rating of 100 per cent as a specialist on the growing of foreign, economic and medicinal plants, and with an average of 98 per cent in gardening he was quickly given employment. He is receiving the congratulations of the local trade, he being very well known to many of the florists.

TESTIMONIAL TO E. H. WILSON.

On Thursday evening, January 1, a farewell dinner was tendered to E. H. Wilson, as he was about to depart for a year's sojourn in Japan, by the Horticultural Club of Boston at the Parker House. About thirty members and personal friends of Mr. Wilson, who is honorary secretary of the club, were present. Among those from a distance were F. R. Pierson, Tarrytown, N. Y.; Leonard Barron, Garden City, N. Y.; L. J. Reuter, Westerly, R. I., and Judge C. W. Hoitt, Nashua, N. H. The latter was entrusted with the pleasant duty of presenting to Mr. Wilson on behalf of the members a beautiful gold watch chain and locket and jewelled brooches for Mrs. Wilson and Miss Wilson. Judge Hoitt's effort was a masterpiece, as always, and Mr. Wilson's response was heartfelt and eloquent. Many words of kindly feeling were spoken at this memorable feast in honor of one whom the Boston fraternity have quickly learned to love because of his delightful personality, with wishes for a safe voyage, a successful outcome of his venture and a happy return to Boston a year hence.

The table was superbly decorated with the finest products of several of the club members. We only mention a vase of splendid blooms of Matchless carnation sent with the compliments of Cottage Gardens Company and a vase of Buddleia Asiatica, one of Mr. Wilson's Chinese introductions, which formed the central feature of the decoration and filled the banquet hall with its delicious aroma while every one was charmed with its graceful fountain-like effect.

BUSINESS EMBARRASSMENT.

A meeting of the creditors of Edward MacMulkin, florist, who assigned December 23, 1913, will be held in the rear of store 194 Boylston Street, Boston, (Park Square entrance) on Monday, January 12, 1914, at 10.30 o'clock in the forenoon at which meeting the assignee will present his report of the assets and liabilities, and the question of continuing the business at 194 Boylston Street will come up for discussion and determination. William D. Gooch is assignee.

The annual meeting of the American Forestry Association will be held at the New Willard Hotel, Washington, D. C., at 11.30 A. M., Wednesday, January 14, 1914. The meeting will be confined to a business session, the general discussions and papers on forestry having been disposed of at meetings presided over by President Henry Sturgis Drinker, and Vice-President Henry S. Graves at the time the National Conservation Congress met in November.

PERSONAL.

H. F. Littlefield of Worcester, Mass., is starting on a trip to Japan.

John Cook, the veteran rosarian, of Baltimore, starts January 9th for a winter sojourn in Florida.

John Allan, gardener for Mr. J. R. Drexel, Newport, R. I., was elected license commissioner for the city on Monday, Jan. 5th.

William M. Reid, salesman for W. W. Barnard Company, Chicago, sailed on January 1st on a two months' business and pleasure trip to Scotland.

Announcement is received of the engagement of Miss Geneveive Frances Roy, eldest daughter of D. F. Roy, superintendent of "The Moorings," Marion, Mass., to Dr. Rogers Humphries of Holyoke, Mass.

Charles H. Curtis, who has been assistant editor of The Gardeners' Magazine, London, Eng., succeeds George Gorden as editor-in-chief. Mr. Gordon will act as advisory editor. The price of the paper is to be reduced to one penny instead of two pence, as heretofore.

Cincinnati visitors.—William Rogers of the Miami Floral Co., Dayton, O.; R. M. Speer, Columbus, Ohio.

Boston visitors.—Harvey Geddes, Supt. of Portland Country Club, Falmouth Foreside, Me.; Hon. C. W. Hoitt, Nashua, N. H.; Louis J. Reuter, Westerly, R. I.; F. R. Pierson, Tarrytown, N. Y.; Leonard Barron, Garden City, N. Y.; A. E. Thatcher, Bar Harbor, Me.; D. F. Roy, Marion, Mass.; M. B. Faxon, New York; Mrs. Francis King, Alma, Mich.; William Judgens, Newport, R. I.; Arthur Griffin, E. Marion, Mass.

HENRY PENN'S ADVENTURE.

Whether or not the joke is on Henry Penn, the Bromfield street florist, or on his chauffeur, Mr. Penn's friends have not yet been able to decide, but the fact that they are all sure of is that there was a joke, and that it is too good to be kept.

It may have been the fault of the chauffeur, or of Mr. Penn or the limousine. This also has not been decided.

Mr. Penn came out of his Bromfield street store to his waiting car the other day and said to the chauffeur: "Drive to the Roland greenhouses at Nahant."

The chauffeur bent to crank his engine, and when Mr. Penn told him to "wait a minute," and went back in the store for something he had forgotten, the whirring engine drowned his words and the chauffeur climbed to the seat, thinking Mr. Penn was inside.

In a few moments the latter came out and looked around for his car.

There was no car and the bystanders were only lazily interested when he told them that a perfectly good limousine and chauffeur had disappeared off the face of the earth. It is told that a man once lost a bass drum, but that's no argument.

Mr. Penn took a train to Nahant and called up the Bromfield street store and asked if any word had been heard of the chauffeur. "He's just calling now," said the clerk, and over the other wire he listened to the frenzied tale the chauffeur told of starting for Nahant with Mr. Penn, of losing him somewhere on the road, and of his suspicions that a horrible murder had been done; that his employer's mangled body was even then lying on the road somewhere—who could say where?

When he and his employer finally got together he told that he had started with the firm belief that the latter was inside; that he had a puncture on the Lynn boulevard; had got out, jacked up the car and changed the shoe, still sure that Mr. Penn was inside. "I thought you were probably reading," he said, "and I never looked in.

"When I got to the greenhouses I found that you were not with me. Then I got busy on the telephone."

Mr. Penn is kept "busy on the telephone" these days himself, doing some explaining and quieting the vague rumors that he was a victim of thugs on the road from Boston to Nahant.—*Boston Advertiser.*

Flower Market Reports

BOSTON

Boston faces a dull market this week.. "General Apathy" is in control apparently. Stock is excellent in quality as a general thing and fortunately there is no excessive supply of anything. Roses are decidedly better in color than they were a week ago. Carnations are in fair supply and the white varieties now have the better hold on the market. White roses, however, are very abundant and act as a check on any upward tendency in price. Beauty roses are shy now and probably will be so for some weeks. A very insistent demand is experienced in the flower stores for uncommon things, such as calendulas, cornflowers, English primroses, etc. All violets are scarce but singles bring nearly twice the price that doubles attain.

BUFFALO

The balance of the old year ended quite satisfactorily to the trade though the volume of business was no larger than the year previous. The supply of stock was sufficient to fill the wants and there was no scarcity on any item except possibly some corsage material, such as daisies and good peas. Beauties were in good supply and the quality excellent, especially the top grades, and the sales were satisfactory. Two bank openings on Monday last helped to consume a good quantity of Beauties, plants and baskets, and together with other social functions kept the trade busy for at least a day. The carnation supply is increasing daily and no shortage exists. The quality is not as good as could be wished. Stems weak and too many split blooms; there are also too many whites. Roses, especially Killarney, Richmond and Sunburst, are fine, though there are not many shorts. All other varieties have sold well. There is a good supply of promiscuous stock of all kinds.

CHICAGO

Trade seems quiet and is generally reported so, but all first-class stock is moved off at good prices, so it would seem that the dullness is partly in comparison with the holiday rush. Carnations, always slower to show the effects of unfavorable weather conditions, are said by some of the large growers to be now suffering from the warm damp weather of November and early December, and the result is, there are many weak-stemmed and split canations on the market. With many, the crop of American Beauties is on the wane so a lessening of the demands for them is not serious. Roses are very scarce and those whose stock was not in crop at Christmas are getting their share of the returns now. The extreme scarcity of roses in general may be said to be the feature of the market condition of the first week of January. Single violets are almost an impossibility and the supply of doubles is not too large to meet the demand. Gardenias are also scarce and some of the retailers secure their supply from the East. Lily of the valley is coming steadily, but sweet peas are scarcely seen. A few Roman hyacinths and a fair supply of lilies, callas, stevia and paper white help out. All kinds of green are plentiful.

CINCINNATI

The post-holiday market is somewhat different this year from what is generally the rule. Usually as soon as the new year has begun there is a large influx of flowers that have cropped a little too late for the yuletide holidays. This year, however, the cloudy weather has kept the cut at a low point and with a good demand the market is cleaning up in a satisfactory manner each day. The call from out of town is good. Last week the taking of office by the incoming administration used very many flowers at the City Hall. Every office had its full share of flowers, tokens of esteem and congratulation from friends and constituents to the successful candidates for office. The rose supply is rather short. Only Pink and White Killarney are offered in anything like quantity. It will probably be two or three weeks before the supply of American Beauties will again be sufficient. Carnations are in a good supply. Lilies are plentiful and have helped nicely to take care of the general demand. The influx of narcissus has let up very considerably and the wholesalers are now able to obtain a fair price for this flower. Violets and lily of the valley are selling well. The weather is against sweet peas. They are rotting and dropping off by the thousands and there will be no relief for them until we have bright weather.

Flower Market Reports

(Continued from page 53)

NEW YORK The usual quiet following New Years is on this week and will probably continue for a week more, at least. That it is not accompanied by the customary market slump is due, in part, to weather vagaries and in part to the adroitness of the rose growers, who have acquired consummate skill in late years in timing their crops almost to a day. The advent of the Killarney type of roses was the death knell of the old-time uncertainty and scattered results of the holiday rose crop. Since Christmas the cut has fallen off sufficiently to save the market from rose chaos and all other crops are also beneficiaries. Our market quotations tell the rest of the story as to prices this week. But things are very, very dull on all sides.

PHILADELPHIA New Year's week was fully as good as other years, probably a shade better, although there did not seem to be much extra business around either. Stock generally is not quite so plentiful now except perhaps in carnations. Roses have fallen off in supply, especially American Beauty. These are back to normal figures after the Christmas slump. The usual dull weather of January will tend from now on for a while to scarcity and high prices. Russells are very scarce indeed and in some cases are bringing nearly as much as Beauties. Killarneys are improved as to color, although not quite at their best yet. Richmonds are not very plentiful; quality pretty good. Lily of the valley is very good stock, and none too plentiful—probably as scarce as they ever were for New Year's week. Violets also rather on the scarce side. Nearly all other items are in normal supply and fair demand. The early daffodils (French-grown Trumpet Majors) are the latest new arrivals among the minor subjects. Paper Whites are plentiful and good. Mignonette is also very fine.

ST. LOUIS The market since the holidays has been in fairly good shape. The crop has shortened up considerable but prices are not near so high as they were for the holidays. Violets have been exceptionally scarce this season. With a little clear weather no doubt they would be in plenty and just now they bring $1 per 100 for the best. Roses and carnations are about enough to go around. Sweet peas are fine but short for the demand. Of everything else there is a good supply.

WASHINGTON A large number of social events continues to keep the trade on the jump during business hours and for some time after the usual time of closing. The out-of-town trade is quite heavy. All flowers with the possible exception of Easter lilies and narcissi, are meeting with a ready sale. American Beauty roses are not as plentiful as they have been and are bought up as soon as they are offered for sale. Cattleyas are also scarce and are bringing from 60 to 75 cents each, while there are more cypripediums on the market than there have been for some time and these can be had at from $1.50 to $2 per dozen. Some exceptionally fine double stevia was seen in the stores. Sweet peas are moving well at about $1.25 per hundred; poinsettias are bringing 15 and 25 cents each, and carnations are bringing in the neighborhood of $4 per hundred. Pink, white and yellow snapdragon is proving quite popular this season and is to be had in good quality with extra long stems.

CLUB AND SOCIETY NOTES.

The next meeting of the Indiana State Florists' Society will be held in Indianapolis, Tuesday, Jan. 13th.

The regular meeting of The Cincinnati Florists' Society will be held on Monday evening, January 12 at the club rooms.

On January 17, George H. Peterson of Fairhaven, N. J., will deliver a lecture at Horticultural Hall, Boston, on The Hybrid Tea Rose of Today.

The Knoxville (Tenn.) Florists' Society has been organized with the following officers: President, C. L. Baum; vice-president, Mrs. Edith Crouch; secretary and treasurer, A. J. McNutt.

The next meeting of the New York Florists' Club, Monday, January 12, will be enlivened by a talk on Advertising by L. W. C. Tuthill. That it will be worth listening to is a safe prediction.

The regular meeting of the North Shore Horticultural Society, was held January 2, at Manchester, Mass., when the members listened to a very able address on Apple Culture by F. A. Smith of the Essex County Agricultural School who brought out some good points on up-to-date methods. At our next meeting January 16, A. Leuthy, the well-known plantsman, will talk on Plants. JAMES SALTER.

At the regular session of the Southampton, N. Y. Horticultural Society, Dec. 16th 1913, it was decided to give a dinner at the Commercial Hotel, Jan. 8th 1914, inviting the wives and lady friends of the members, and some of the seedsmen who have contributed largely toward the success of the summer exhibitions, (in lieu of the annual banquet). The meeting on Jan. 1st, 1914 being the night for the election of officers, Julius W. King was elected president; M. J. McLaughlin, vice-president; and Wm. McLoud, treasurer. Mr. Palmer who has faithfully performed the duties of secretary ever since the organization of the society, finding the duties getting too arduous for his advancing years, declined and Wm. Fitzpatrick was elected in his place. We also added an assistant secretary, Joseph G. Cassidy, who will perform the double duty of assistant and corresponding secretary.

D. T. WELLS, Cor. Sec'y.

Obituary

Sir Trevor Lawrence.

British horticulture suffered a severe loss on Dec. 23rd, by the death of Sir Trevor Lawrence, Bart., whose name will be indissolubly linked with the work of the Royal Horticultural Society in London. At the close of 1887 this Society, through various causes was in very low water. At that time the Society was in debt to the amount of 1,152 pounds, with a total expenditure of 3,500 pounds, and a fellowship numbering 1,329. Early in 1888 Sir Trevor became the President, and for 25 years he was associated with the Rev. W. W. Wilks, the Secretary,

Sir Trevor Lawrence, Bt., K. C. V. O., V. M. H.

in guiding the Society's destinies. As an ardent horticulturist the new President took the keenest interest in the work of re-organization; he was rewarded by seeing the organization put on a thoroughly sound basis.

At the end of 1912 the number of fellows had grown to 13,385, with an annual expenditure of 18,007 pounds, whilst there was a satisfactory financial surplus. In addition the Society has secured an extensive experimental garden and laboratory at Wisley, in Surrey, and a spacious hall, library, and offices in Vincent Square, Westminster. In the early part of this year, Sir Trevor, owing to impaired health, was compelled to resign his position as President, although retaining his membership of the Council. Sir Trevor had one of the finest orchid collections in England. W. H. A.

Regarding the foregoing it might be desirable to state here that the rehabilitation of the Royal Horticultural Society was also due in large measure to the generosity of Baron Shroeder. Sir Trevor Lawrence was a great collector of new plants and his orchid collection is famous the world over and containing not only good representative plants but a great variety, including a large number of the botanical species. The curious always interested him very much, and he was one of the first people to buy some of the new Wilson plants. On the occasion of the last International in 1912, Sir Trevor Lawrence entertained a great gathering of visitors at his place, Burford Lodge, Dorkins.

Sir Trevor's father was a well known and famous physician in London; one of the high society men who got tremendous fees and made himself a great reputation. He became famous, in fact, through his instituting a free clinic to people unable to pay his fees, whom he would see before eight o'clock in the morning.

Ralph G. Shrigley.

A well-known and well-liked personality in the wholesale cut flower trade of Philadelphia, passed away January 1st, aged about 30 years. He started as office boy with Samuel S. Pennock, with whom he remained some eight or nine years. After that he was employed by other commission houses for several years until his health broke down about six months ago. He was unmarried and resided with his mother in Darby, Pa.

Mrs. William Scott.

In Buffalo, N. Y., Jan. 2nd, Christina F., wife of the late Wm. Scott, and mother of Alex., Phil., Wm. B., David, Mrs. J. C. Kantrowitz, Robt., Alf., and Oliver. The funeral was held on Monday, Jan. 5th.

Mrs. Mellman.

We regret to announce the death of Mrs. Mellman, mother-in-law of A. C. Heckman, Jr., of the Cincinnati Cut Flower Exchange. Mr. and Mrs. Heckman have the sympathy of their many friends in their bereavement.

Mrs. Henry Engler.

Mrs. Henry Engler, wife of Henry Engler, 4651 Lancaster avenue, died on December 26th, after an illness of many years.

The Profits in Progress

Farmers are learning the profitable fertilizer—the one that gives the best profit consistent with maintaining soil productiveness.

Progressive farmers are increasing, for all crops, the

POTASH

in their goods. Results have shown there should be at least as much Potash as Phosphoric Acid, for ordinary farm crops take from the soil from 2 to 4 times as much Potash as Phosphoric Acid. For potatoes, truck and fruit the Potash should be double the Phosphoric Acid.

If your dealer insists on carrying only low grade, 2% Potash goods, we will sell you Potash in any amount from one 200-pound bag up.

WORTH READING

Arthur Ruzicka, writing on "Rose Growing Under Glass," in "Horticulture," November 15, 1913, says:

"We have found that a good spray of FUNG NE will do away with all traces of mildew, and if applied in time will kill it so that many leaves will be saved. This fact is mentioned only for the good of the growers, and not to advertise the article, for this is no place for advertisements. We have so far heard of nothing that can compare with FUNGINE and that is why no other preparation is mentioned.

75c. per quart. $2.00 per gallon.

Have you tried NIKOTIANA and compared it with other nicotines for fumigating? If not, it will prove worth your while doing so, both from the point of efficiency and cost.

$1.50 per quart. $4.50 per gallon.

There is nothing "just as good" as APHINE for greenhouse spraying for all sap sucking insects—VERMINE for the soil to destroy eel, wire and cut worms without injury to vegetation—SCALINE for spraying fruit and ornamental trees NOW against San Jose and other scale, red spider and aphis larva.

All up-to-date seed firms and florists' supply houses handle our products.

NEWS NOTES.

Grand Rapids, Mich.—Lewis Kunst has bought the greenhouse business of H. Danhoff.

Norfolk, Va.—The Blick Brunton Company has changed its name to the Old Dominion Plant Company.

Nashville, Tenn.—Geny Bros, have an interesting and very promising sport from the Mrs. Charles Russell rose.

Portland, Ore.—John Holden and Frank Chervenka have taken possession of the Sibson greenhouses at 1180 Milwaukee avenue.

Kansas City, Mo.—Patrick Larkin resigned as secretary of the Police Commission on January 1st and will hereafter give his entire attention to his flower business.

Orlando, Fla.—The finance committee of council reported in favor of settling with the Luther Floral company for the sum of $500. The company had sued the city for $2,000 damages alleged to have been done by the flooding of the premises occupied by the company due, it was claimed, to insufficient drains. The recommendations of the finance committee has been favorably acted upon by council.

A Growing Tendency

MORE and more owners are desirous of having their greenhouse garden either handyby the residence or attached directly to it.
Some gardeners discourage this—for purely personal reasons.
This has always seemed a mistake to us, because the more intimate interest an employer takes in the greenhouse, the more opportunity has the gardener to keep up the owner's interest in him and his work.
We say this by way of suggestion. In any event when it comes to greenhouses, come to Hitchings. Catalog yours for the asking.

"We are now mailing out a very attractive 1914 calendar. If you did not get one, let us know."

The Real Thing

TWO diamond rings, one looks real, the other is real—which one is the real one?

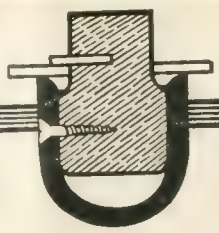
No one can tell without examining them.

Two greenhouses, both have curved eaves, one looks like a U-Bar curved eave — the other is the U-Bar,

You perhaps couldn't tell the difference between the one that is, and the one that isn't, when going spinning past in an automobile.

But what a difference when you examine and compare them!

The very strongest endorsement possible for the U-Bar curved eave house, is the endorsement given it by all our competitors in their continual efforts to make their houses look as near as possible like U-Bar houses.



Always bear in mind that the U-Bar is a complete galvanized steel framed construction, and that the U-Bars are rafter and roof bar combined in one. Also remember that this combined rafter and bar is no larger than the wooden roof bar used in the best standard iron frame constructions.

Another thing to remember is that the cypress part of the U-Bar is entirely protected from the inside moisture by the galvanized steel U-Bar.

Of course the U-Bar costs more than other constructions. Costs more because you get more for what it costs.

Erected for Alfred G. Vanderbilt at Newport, R. I.

LAWN GRASS

"The Right Seed in The Right Place"

We furnish grass mixtures for dooryards, terraces, lawns, athletic and polo fields, cemeteries, parks, country clubs, country estates.

Repeated laboratory tests on individual mixtures assure superiority of quality and growth.

Experience of over fifty years of successful seed business assures you of correct proportions.

Experiment has shown us that a mixture of the proper grasses is more satisfactory than an individual grass. Why waste your time and money experimenting? Let us furnish what you need.

NOTES ON CULTURE OF FLORISTS' STOCK

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Bougainvilleas

Bougainvilleas intended for Easter should now be given a place where they will be induced into action. A light bench, about 60 degrees at night, will do for the present. Keep them moist at the roots and syringe two or three times a day. When they show some advanced growth you can raise the temperature to 65 degrees, and as they become well furnished with foliage they can stand from 70 to 72 degrees at night, with from 10 to 15 degrees more with sun heat. Be very careful not to allow cold draughts to strike these plants. Just give ventilation enough on bright days to keep the temperature right. When started into full growth they will require a good supply of water at their roots, and as they become well matted with roots they can be liberally fed with liquid manure. Spread them apart and turn them around often to induce an even growth.

Candytuft for Memorial Day

This is a very good crop to grow for Memorial Day trade. Where it is wanted for that date it should be sown no later than the 20th of January. If vacant beds or benches are at disposal, sow it in rows 12 to 15 inches apart and rather thinly. Do not leave more than three or four good seedlings to the square foot, where fine stalks are wanted. If there are no empty benches in January, the best plan is to sow in 3-inch pots. Put half a dozen seeds in a pot and thin out to three. You can also sow in flats of light soil, but great care must be taken to pot off in good season, as candytuft seedlings do not transplant as easily as some other annuals. Place the pots or flats on a shelf or bench in a moderately cool and well aired house, with a temperature of not over 48 degrees at night. Water carefully. Do the necessary thinning in good season and spread out a little where the seedlings crowd. Use a generous soil such as would grow good chrysanthemums or roses in benches. Candytuft will not stand any coddling and does better in a night temperature of 45 degrees than 50. If your plants seem at all late you can run them a little warmer as the flowers open.

Easter Hydrangeas

If you have not already brought the hydrangeas into a cool house you should not lose any time in getting them in. These plants are always better when started cool until they have made some root action. A temperature of about 45 degrees at night will do for the start. In a couple of weeks they can have 50 degrees and about 60 to 65 degrees with sunshine. In order to make them break good give them a spraying overhead at least twice a day. These plants are lovers of sunshine, so see that they have a place where they can get it. In five or six weeks they should be standing a temperature of 70 to 72 degrees at night, which can continue until the trusses show color. After this the temperature should be gradually reduced until they stand at about 50 degrees at night. While making roots and top growth they will require plenty of water, as they are very thirsty plants. When they have a fair start they will stand manure water once or twice a week until they show color.

Gladioli

The market for gladiolus spikes is usually good in April and May, and fairly good in June, and there is not much likelihood of spikes being wasted even though a good many of them flower before and after Memorial Day. The first planting of the large-bulbed varieties, such as America, Augusta, etc., can now be done and do not omit a good number of that inexpensive, but excellent scarlet variety, Brenchleyensis, in addition to America, Augusta and Mrs. F. King. In order to have a good Memorial Day crop gladioli should be planted now in benches. Of course, so much depends on climatic conditions that it is not easy to hit the date just right with this crop. Again, the bulbs do not all flower at one time, which is, generally speaking, an advantage. Do not use any fresh manure which will come in contact with the bulbs. If you have no old manure, try fine bone and pulverized sheep manure, incorporating them well with the soil. To secure an early crop of such varieties as Colvillei The Bride, Peach Blossom and Blushing Bride, every week or ten days bring a few flats into a house kept at 48 to 50 degrees at night. A higher temperature will spoil them.

Propagating

From now on conditions are ideal for this purpose. Keep your bench full from now on, for all the advantages one could possibly wish for to be successful in getting cuttings rooted, are to be had right now. The fires are keeping a uniform heat in the sand; most of the stock plants are loaded from now on with cuttings, and there is but little sun to interfere with the unrooted stock. Every inch of space of the propagating bench, therefore, should be kept full of bedding stock in particular, practically every variety we make use of during the bedding season, and especially of the varieties of which we may be short. Cleanliness in and about the propagating bench is as important as anything. Don't overlook the fact that you should have clean sand. Old sand, or such as contains organic matter of any kind, is liable to cause trouble.

Salvias

Salvias will root in any moderately warm propagating bed. Be careful not to leave them too long in the sand after they are rooted. When potting use any good soil. In raising them from seed see that they are sown on new soil and pricked out just as soon as they are fit to handle, which will keep them from damping. They will do better if given a gentle bottom heat while they are young.

Mr. Farrell's next notes will be on the following: Care of Young Cyclamen; Carnations; Foliage Plants; Propagating Chrysanthemums; Swainsona; Pyrethrums.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ružička

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Making Beauty Cuttings

To begin the operation first make sure that the propagating house is in good working order, the sand in good shape and everything ready to receive the cuttings. Then for the wood; select wood that has nice live thorns on it if it is at all possible. Wood with dead thorns is quite hard, and will be more difficult to root than the former. As soon as enough is cut to keep one busy for a little while, stick the lower ends into a tub of water so that the wood will not wilt in the least. It is also necessary to have a pail of clean water ready to drop the cuttings into as soon as they are made. Do not allow these to remain in the water for any length of time, but insert them into sand as soon as enough are made to make it worth while. A very important factor is a good sharp knife that will cut very smoothly and without crushing. A dull knife will crush the delicate tissues of the wood far more than one would think, and as a result many of the cuttings will begin to turn black from the bottom after being in the sand a little while. Have a good steel knife, sharpened and edged so that it will shave. Then there will be no fear of any harm from this source.

Two or Three-Eye Cuttings

With the Beauties we like the two-eye cuttings the best—that is leaving only one leaf and eye above the sand. Where two eyes are left above the sand the cuttings crowd too much and are very likely to get some disease that will clean out most of the foliage. Here is another point to heed; never leave any more foliage on a cutting than will be absolutely necessary to keep it alive. With Beauty, usually the two lower leaflets of a leaf will suffice. Should these be very small, then half of the next two can be left, too, giving the cutting plenty of chance to secure the necessary air.

Separating the Cuttings

Many growers will sort out the cuttings usually into three grades—hard, medium, and soft. We find that it is just as well to watch the cuttings as they are inserted into sand, and then plunge the harder wood deeper than those that are of softer wood. Thus the cuttings deeper in sand will receive more heat and more moisture as well, and will root in the same time as the others that receive less.

Propagating Various Tea Roses

All these are more or less in one family and will thrive almost equally under one treatment. We prefer to make cuttings with two leaves and three eyes on all these, and as many heel cuttings as we can get. In making hybrid tea cuttings proceed the same as with Beauties, selecting nice clean wood and, better still, wood especially grown for propagating purposes. Cut just below the eye and just above, as close as possible without injuring the vitality of the eye. It is a bad sight indeed to see a bench of cuttings look like a cut off forest with the stumps sticking up all over. All this is due to cutting too high above the top eye. It does not do any harm necessarily but the looks are enough to keep any man who takes pride in his work, from cutting thus, for it makes an unfinished looking job.

Dipping Cuttings

If you think there is any chance of red spider being on the leaves at the time the cuttings are made, you had better dip them in some one of the many preparations that are on the market. This will do away with many that may be lurking around, and if done well will not do the cuttings any harm. Make the solution a little weaker than recommended by the manufacturer, and do not allow the cuttings to remain in the solution any length of time. Merely throw them in and stir gently and then rinse them good in clean water again. Beauties are sometimes dipped into the ammoniacal copper carbonate mixture greatly reduced in strength, but if care is taken, no black spot need appear on the leaves, and the dip omitted, as the ammonia is none too good for the underside of the leaf where the breathing pores are. It is a fact that the upper side of a leaf will resist the action of many chemicals, which if applied in the same strength to the tissues on the under side would kill them.

Keeping Foliage Off the Sand

When the cuttings are being put into sand care should be taken to point the leaves all one way, and to keep the leaves from touching the sand. Not that they should stand straight up into the air, but there should be air space between the leaves and the sand. This will give the cuttings all the necessary air, and will keep them from contracting various diseases as well.

Boltonias

BOLTONIA LATISQUAMA NANA.

As a distinct characteristic feature of the aspect of many hardy herbaceous gardens and borders during the month of August we notice the approach of those rich golden waves of color, which, from that time on are coming, rolling by and vanishing until frosts stop vegetation. It is the splendid spectacle of myriads of blossoms of the helenium varieties, the billows of gold of the rudbeckias, the warm tints of helianthus single and double, and the graceful panicles of the improved golden rods which compel our admiration. In case of those of us who are prone to look at certain hardy herbaceous plants as "unmanagable truck" their appearance is likely to justify the term. Fortunately, however, the number of craftsmen capable of mastering this material, and to go a step further, endowed with a clear conception of the artistic possibilities in the direction of beautiful alternate floral effects, are ever increasing. The wonderful variety of plants, in colors blending with the strong golden notes of late summer and early fall challenges individual ingenuity. Aside from late-flowering white phloxes, Chrysanthemum uliginosum and stellata, the bright blue panicles of Salvia azurea and Salvia Pitcheri and, the massive banks of blossoms of Eupatorium cœlestinum, we find in the different shades of hardy asters just the very notes which combined with yellow form most agreeable color accords. For the same purpose we should not fail to avail ourselves of the boltonias. The tall growing white Boltonia asteroides as a single plant or lined up in a single row draws little or no attention. Our opinion, however, is soon to undergo a radical change when seeing thickly growing plantations covering from 3 to 4 feet square. The white clouds of thousands of aster-like blossoms become irresistible. It is very similar with Boltonia latisquama. Reaching a height of from 5 to 6 feet this variety produces flowers of a beautiful soft rosy-lavender in great abundance. The demand for a low-growing type can be met by employing Boltonia latisquama nana, not exceeding 2 feet average height. The panicles of boltonias are freely branching. In a cut state used for filling vases they will be found long-lasting and graceful in effect.

Plantations thrive best in a rather light but richly manured garden soil. Throughout the north an open sunny exposure is a necessity; in the Middle Atlantic States I find boltonias also adapted for half shady positions. Propagation by divisions or from seed early in spring.

Richard Rothe

Riverton, N. J.

ORCHID NAMES.

Almost every amateur is anxious to raise a new hybrid orchid in order to have the pleasure of naming it himself. A few, however, do not wish for the trouble and time which the raising of a seedling takes, but much prefer to purchase a new and unnamed plant from one of the various trade growers. It matters little which method of procuring the plant is adopted, the amateur having the same privilege in either case. There is a wide difference between a new hybrid and a new variety. The former is produced by a combination of parents not previously effected; the latter applies to any variation differing from those already known or recorded.

Now the name of a hybrid is the word applied to a certain combination of species, and is, therefore, known as the specific name. It is of far greater importance than that given to a variety, and consequently requires considerably more care in its selection. Every time a variety is mentioned the specific name must always be repeated. The following are examples:—Cattleya Fabia var. Miss Williams, C. Fabia var. Emily R. Smith, and C. Fabia Stone House var. The specific name in this instance consists of but one suitable word, and its repetition is by no means objectionable.

The specific name of many hybrids consists, unfortunately, of more than one word, sometimes three, and the repetition of such long, unsuitable names is extremely awkward, as the following example proves:—Dendrobium Mary Jane Brown var. Miss Smith, D. Mary Jane Brown The Red House var., and D. Mary Jane Brown var. Sarah Ann Jenkins. Amateurs who take the responsibility of naming a new hybrid should always consider the other growers who in due course will produce plants with similar parentage, and who, by the rules of nomenclature, are bound to adopt the earliest specific name. These later hybrids are, of course, distinguished by a varietal name, which follows the specific one in a way similar to the name and variety of a species.

From the preceding remarks anyone will readily see the advisability of selecting a single word for the specific name of a new hybrid. Classical names are much to be preferred, although the name of the owner or raiser may be used in the Latin form. Varieties of species and hybrids can only be named in Latin when the character of the plant is expressed. Odontoglossum crispum roseum and Cattleya Holdenii alba are both correct, the latter word in each case expressing the character of the flower. But Odontoglossum crispum Smithii and Cattleya Holdenii Robertsii are incorrect, the use of Latin proper names for horticultural varieties being proscribed by the Brussels Congress of 1910.—*The Orchid World, London*

Horticulture's advertising value

It has been the established policy of this paper from the start, to devote its reading columns more to the practical and serious side than to the merely local and frivolous. On this ground it has made its appeal for the support of the profession in whose behalf it has zealously labored and its circulation has been built up solely on this basis. The chances assumed in thus breaking away from established popular standards of florist trade journalism were fully realized but we had faith that the horticultural profession was now big enough and earnest enough to extend encouragement and adequate support to a journal devoted primarily to matters of more than cursory local value. The best evidence of the soundness of our proposition lies, first, in the number of HORTICULTURE's subscribers, which we believe to be, at present, little if any less than that attained by any other American trade journal in a corresponding number of years, and, second, the character and purchasing power of our readers, which we believe to fully equal in the aggregate that of which any one of our contemporaries can boast.

State forests for Massachusetts

A bill to establish State Forests has been prepared for presentation in the Massachusetts Legislature by the Commission on the Taxation of Wild or Forest Lands, with the co-operation of the Massachusetts Forestry Association. It provides for a commission with power to acquire woodlands, or land suitable for timber growth, to be known as State forests and to be developed by the State forester. A circular sent broadcast by the Forestry Association gives convincing reasons for the proposed action. It shows that one-fifth of Massachusetts, or about 1,000,000 acres, is unproductive waste land which, if only half of it were cared for under a system as in the city forest of Zurich, Switzerland, would eventually give regular employment to 15,000 men and occasional employment to many thousands more. The bill has been drawn with care; it shows intelligent consideration of a very vital subject, and marks the beginning of a determined effort to do what should have been done long ago by Massachusetts whose policy in this respect, hitherto, has been in no wise comparable to that of many of her sister states.

Fresh flowers that keep fresh

Insofar as we can judge by interviews with the retail store florists they are not particularly proud of their part in the dissemination of dried, dyed, or artificial material for Christmas or any other time, but they make the point that the public are insistent to have these things and that cut flower producers are contributory to this state of affairs in that they demand for their product prices that appall and discourage would-be buyers of fresh goods. The supply dealers, while pushing the dried material business, are nevertheless placing it in the power of the florist to supply the public with fresh cut flowers in most attractive and satisfactory form, in the pretty and serviceable baskets they provide, lined with tin receptacles for water in which flowers will retain their freshness for a long time. Penn the Florist, of Boston, is making a persistent effort to introduce these things to the buying public and we hope he will succeed as well as he has in some other innovations which he has introduced. Each day his window shows a fine assortment of these dainty arrangements, in which all the market staples from cattleyas down to stevia are given a chance. The latitude for artistic combinations of colors and form is unlimited and a florist who has the requisite taste can do much in this way to awaken his customers to the absurdity of artificial things when so much natural beauty is at hand.

CELERY NOT KEEPING.

Editor HORTICULTURE:

Celery here has kept very poorly this year, for the centers rot away. Not what is called a dry rot but just a wet dirty rot. Other bunches that are not attacked with this are very light in weight and the white part, as I might say, is just like straw. Do you think that there is anything that can be done to prevent this? Do you think it was the drought we had last summer? Isn't a good way to pack celery for winter to put the roots firmly into wet sand, and put bunches about four to six inches each way? The atmosphere is dry and cool but not cold enough to freeze.

Dalton, Mass. C. S., Jr.

Replying to the foregoing would say that the treatment received last summer would not cause the trouble mentioned. Apparently, after storing, the plants have been allowed to sweat—probably through lack of air. Many use the same method of storing the roots in sand successfully, (soil will answer the same purpose at the roots) which shows the other conditions must have been wrong somewhere. A temperature of 35 to 40 should be aimed at; at the same time keep on some air to prevent sweating. Rectifying the atmospheric conditions is all that can be done now as any that have already started to go in the center will continue. The severe weather experienced in some sections of the country make it compulsory to lift and store celery in cellars or pits. Here this method is not followed. The plants are set in double rows nearly on the level, which is done to make them more easily accessible when fighting rust in the fall. Earthing up is left as late as possible, after which the sides and the top, up to foliage that is left exposed, is protected with dry leaves, these being covered over with a thin layer of soil to prevent their blowing away. Loose straw litter is thrown over the tops as the bad weather comes and removed when mild. If wide boards are nailed together and placed so ∧, directly over the rows it will save the litter breaking any foliage and turn most of the water to the sides. These should not be longer than eight feet or they will be difficult to handle. The exceptionally mild weather experienced this fall has been a detriment to good keeping of celery.

J. J. M. Farrell.

So. Norwalk, Conn.

SWEET PEA BUDS DROPPING.

Editor HORTICULTURE:

I would like to have a little information in regard to my sweet peas coming about half of the stems single flowered. They commenced blooming Christmas week. They have no disease of any kind. They are planted two feet apart in a good loam soil, rows running north and south and grown in a temperature of 50 at night and from 60 to 65 during the day. I have watered them about three times with sheep manure water, putting a peck to a 50-gallon barrel of water. They stand now about five feet high. The varieties are Christmas White and Pink, Mrs. Wallace and one other pink. They start with two buds but one will drop off, leaving only one flower, and the stems now are about five to seven and twelve inches. If some one could tell me what is the cause I would be very much obliged to him.

I have given them dressing of lime also, and one dressing of rose growers' bone flour, two days ago. They are throwing out side shoots now but some of the leaves at bottom are beginning to turn yellow and drop off. Is that any harm or will they do it when they get along in age? I have not had much experience in growing sweet peas in the house.

Shelburn Falls, Mass. J. W.

In reply to inquiry regarding buds dropping on sweet peas, would say that the last two weeks have been ideal weather for bud drop. The only remedy I would suggest would be to run the temperature a little higher, particularly in mid-winter—say 52 at night to 70 by day; 67 I think the proper temperature on sunny days and 60 on cloudy days. The atmosphere should never get clammy or dead. There should be just enough heat and air stirring to keep the atmosphere sweet. The vines would show a little soft growth by increasing the temperature in this cloudy weather, but that cannot be helped if the buds are to stick. Running them a little warmer and not over-watering them is the only solution for buds dropping.

Yours truly,

William Sim.

Cliftondale, Mass.

ANTS.

Editor HORTICULTURE:

Will you please publish the best remedy for ants in a conservatory adjoining the house, which cannot be fumigated with gas.

Yours truly,

Brooklyn, N. Y. C.

I take pleasure in sending you our circular on Ants, and especially refer you to the paragraph on the back page, as quoted below. I think where fumigation is impracticable, this method of using a sponge in sweetened water will prove as good as any. Of course, if the ants can be traced back to the nest, which would probably be out of doors, then the injection of carbon disulfid would thoroughly rid the premises of these pests, but ordinarily the tracing of the ant lines back to the nest is attended with considerable labor and trouble.

Very truly yours,

Arthur I. Bourne, Assistant.

Mass. Agricultural Experiment Station.

Extract from Circular No. 7.

If the nest is in the wall of the house or cannot be found, various baits may be used effectively. It is stated that maple syrup mixed with London Purple in a low dish and exposed to the ants, not only killed large numbers but prevented the recurrence of the pests for a long time afterward. An old and popular remedy is dipping a sponge in sweetened water and placing it where the ants are, and when the ants have collected in the sponge it may be dropped into hot water. A greasy bone may be used in a similar manner. A few repetitions of any of these baits is generally sufficient, for the ants seem to communicate the intelligence of danger or disaster one to another and they all seek safer quarters. A broad chalk line is an effectual barrier for many species, especially if frequently renewed. Placing the legs of tables in shallow vessels containing water is another protection from this pest, and a ring of powdered cloves around an article it is desired to protect is generally effective.

DISEASED CARNATION FOLIAGE.

"F. L. T.," Hingham, Mass., who sent sample of diseased carnation leaves is informed that it is not possible to diagnose what is the matter with the plants, because the leaves were too much dried up, for one thing, and because a description of the symptoms and behavior of the plants is needed. The variety should also be mentioned and what treatment the plants have been given for the last two or three months. If F. L. T. will furnish the above mentioned information an expert opinion will be obtained. Also would ask F. L. T. to give his full address to this office.

BIRDS DO POLICE DUTY.

"Birds are an aerial police force concentrating quickly on any unusual irruption of insects or the lesser animals," said Edward Howe Forbush, State ornithologist, at the first of the series of lectures in Horticultural Hall, Boston. His subject was "Utilizing Birds in Horticulture."

He said that a single bird will eat 100 insects daily and that a hawk will save farmers hundreds of thousands of dollars by destroying field mice and grasshoppers. It has been calculated, he said, that in Massachusetts alone birds devour 2,560,000,000 insects each day. He stated that birds are especially valuable in protecting the trees in the woods and also the grass crops.

To utilize birds in horticulture, he advised attracting them to the desired locality, then protecting them and doing everything possible to increase their numbers. Owls are particularly valuable, he declared, because of their warfare on field mice. He advised attracting kingbirds and martins, which drive away birds of prey and protect smaller birds.

Kingbirds can be attracted, he said, by hanging cotton twine in pieces about 12 inches long on fences or the branches of trees. Orioles can sometimes be attracted in the same way, but the bird houses and food are the principal means of attracting birds, he said. He urged that children be taught to take an interest in the portection of birds.

FARMERS' WEEK AT PENN. STATE COLLEGE.

During Farmers' Week, which begun December 29, there were registered 975 visitors. Three of this number were large growers of Pennsylvania, namely, Jos. Heacock and son, of Wyncote, and Mr. Pyle, of the Conard & Jones Company, West Grove.

Mr. Pyle gave very instructive and interesting talks on the subject of the Rose. All three men were much pleased with what the Department was endeavoring to do with its meagre equipment and they will co-operate in making it the best ever.

The Short Course in Floriculture started three weeks ago with an enrollment of seven men who are all located in Pennsylvania. Three of this number have had a little practical experience. This branch of study is becoming more and more popular from year to year and it bids fair to become a valuable asset to the younger men who contemplate going into the florists' business. In addition to the short course men, there are 38 regular students who are receiving instructions in commercial floriculture.

A FLOURISHING BRITISH SOCIETY

At the annual meeting of the National Rose Society, held in London, on Dec. 11th, it was reported that for the first time in the history of the Society, the members total over 6,000. The president stated that the year had been the most satisfactory in the annals of the Society. They had put by the biggest sum than in any previous year, whilst the literature sent out was better than ever. During the proceedings a telegram was read from E. T. Cook, president of the Rose Society of Canada, sending fraternal greetings.

W. H. Adsett.

CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

Monday night, January 12, the opening meeting of the New Year saw a splendid gathering of the representative men of all branches of floricultural industry in and around New York, in the cosy club room on 23rd street. It was President Siebrecht's last appearance in the roll of presiding officer and before handing over the gavel to his successor he made a few brief but inspiring valedictory remarks, thanking the committees and members for their loyalty and assistance during the year. The new president, Wm. H. Duckham, having been escorted to the platform with stately dignity by John Donaldson and Walter F. Sheridan, made a graceful little speech, appreciative of the cordiality of his reception, and pledged his best efforts for the welfare of the club. Patrick O'Mara then stepped forward and on behalf of John B. Nugent and with characteristic eloquence presented the president with a handsomely engraved ivory gavel which was accepted with words of due appreciation. Then were severally installed the other officers, after which resolutions of condolence on the death of Mrs. Warendorff were read by Mr. Guttman and the yearly reports were read by the various officers. From the treasurer's report it appeared that the club has a cash balance in bank of $5,703.71. The secretary's report showed the list of members to number 423 at the present time. Five new members were added and seven more proposed. A vote was recorded endorsing W. H. Maynard as a candidate for the position of Commissioner of the Bronx Parks. Adolf Affiliation Farenwald of Roslyn, Pa., was called upon for remarks and responded in acceptable style.

After a recess, L. W. C. Tuthill gave the promised talk on Advertising. It was crisp, epigramatic and keenly convincing. He took the ground that the time was not far off when the producers would have to unite in a general publicity campaign to better acquaint the public with their goods. Referring to the various kinds of advertising, profitable or otherwise he said: "It isn't the quantity of noise you make, but the kind of noise." Max Schling followed Mr. Tuthill in his own inimitable style. His approved form of advertising for the retail florist was to talk through his work and his art, first, last and always. Then came M. C. Ebel with his views which coincided closely with those expressed by Mr. Tuthill. Wallace R. Pierson followed with a criticism of the methods pursued by the florists' trade papers and what he considered the abuse of advertising privileges. Patrick O'Mara remarked that "a really good thing will sell itself but a really good thing well-advertised, will outsell itself." "Originality" was the keynote of his interesting talk. He was a believer in liberal advertising and declared that anyone who wants to get ahead must get on the housetops with what he has to offer, but he must present it in a new and original way or it will fall flat. Prof. Beal of Cornell then addressed the meeting, expressing the desire on behalf of the college, to be of more practical benefit to floriculture and to help solve the many problems confronting the florists. He urged the great need of more greenhouses and other facilities at the college.

On the exhibition table were the following: Begonia Florence Davenport, from R. J. Irwin; Carnation Laura Webber, from Charles Webber; Carnation Rosette, from Bergenfield Nurseries; Winter flowering sweet peas, from H. Pye. The Begonia was awarded a certificate of merit; the others, votes of thanks. Carnation Laura Webber had already been given a preliminary certificate.

The president appointed the following committees:

Legislative—F. R. Pierson, P. O'Mara, W. F. Sheridan.

Essay—L. W. C. Tuthill, J. R. Lewis, M. C. Ebel.

Awards—Jos. A. Manda, Frank H. Traendly, Robert Simpson, John Donaldson, I. S. Hendrickson, Julius Roehrs, Chas. H. Totty.

Exhibition—Wm. H. Siebrecht, Sr., John Miesem, Chas. Schenck, Max Schling, W. E. Tricker.

House—Frank M. Duggan, Alex. Guttman, George Mustoe.

Dinner—J. B. Nugent, T. B. de Forest, Robt. Koehne, Jos. Fenrich, Geo. E. M. Stumpp, Andrew Scott.

Outing—W. E. Marshall, Louis Schmutz, Jr., Philip Kessler, A. E. Wheeler, Anton Schulthies, Jr., R. J. Irwin, A. M. Henshaw, Al. Rickards, Robt. G. Wilson, George Siebrecht, Emil Schloss, A. L. Miller.

Resolutions on Death of Mrs. Chas. Armitage—Frank H. Traendly, L. W. C. Tuthill, A. L. Miller.

Transportation, Carnation Society Meeting—Robert T. Brown, Wallace R. Pierson, J. H. Pepper.

AMERICAN SEED TRADE ASSOCIATION.

A meeting of the executive committee of the American Seed Trade Association was held at the La Salle Hotel, Chicago, Friday, Jan. 9th, with the following members in attendance: President C. C. Massie, Secretary C. E. Kendel, Messrs. C. N. Page, Kirby B. White, L. B. McCausland and F. W. Bolgiano, of the executive committee; Messrs., Albert McCullough, Geo. S. Green and A. H. Smith, of the legislative committee, and by invitation Messrs. A. E. Reynolds, C. D. Boyles, J. C. Vaughan, S. F. Leonard, H. W. Wood and Curtis Nye Smith.

Washington, D. C., was chosen for the next convention, to be held June 23-25, 1914. A motion was passed, recommending that the convention in 1915 be held in California and a letter from Hon. W. W. Griest, M. C., requesting action on his bill H. R. 7473 reducing the rate on local and drop letters to one cent per ounce or fraction and on other first-class mail to two cents for the first ounce or fraction and one cent for each additional ounce, was referred to the Postal Laws committee. A tentative program was arranged which will be reported upon later.

NATIONAL ASSOCIATION OF GARDENERS.

The first quarterly meeting for the year 1914, of the Executive Board of the National Association of Gardeners, was held on Thursday afternoon, January 8th, at the Murray Hill Hotel, New York City. President William H. Waite called the session to order promptly at 3.15 p. m., these members being present: Thomas Logan, William Kleinheinz, John H. Dodds, James Stuart, John F. Huss, Robert Bottomley, John H. Shore, Arthur Smith and M. C. Ebel.

Several important matters were brought up for consideration by the Board, among which was an appropriation to properly advertise the Service Bureau to acquaint owners of estates and others requiring the services of gardeners that the National Association of Gardeners' Service Bureau is maintained solely for the purpose of providing efficient and trustworthy gardeners and without charge to employer or to applicant. It was voted to make the appropriation.

The establishing of a closer co-operation between the National Association of Gardeners and the various local horticultural and gardeners' societies scattered throughout the country was favorably considered. The secretary was instructed to write to the different societies interested in horticulture to obtain the views of their members on the desirability of a closer co-operation between the N. A. G. and the local societies in the interest of furthering the development of horticulture and of advancing the profession of gardening.

In response to a communication received from William F. Gude, chairman of the William R. Smith Memorial Fund Committee appointed by the S. A. F., asking that some appropriate action be taken in the matter of securing funds, William Kleinheinz was appointed to confer with Mr. Gude on ways and means whereby the National Association of Gardeners might co-operate with the National Committee to secure a suitable memorial for the late William R. Smith.

It was decided to enforce the by-laws providing that a member in arrears for dues for more than two years, be suspended. The secretary was instructed to drop all delinquent members from the roll, the concensus of opinion being that the interest of the association will be best served by having for its membership only such as are sufficiently interested to be in good standing. President Waite reappointed William Kleinheinz, Ogontz, Pa., Peter Duff, Orange, N. J., and James Stuart, Mamaroneck, N. Y., to serve on the committee to judge meritorious exhibits during the year 1914.

After the conclusion of business the meeting adjourned to the dining room of the hotel where the members present became the guests of President Waite.

The next executive meeting will be held in Philadelphia in April, the exact date to be named later by the president.

A Gardeners' Reunion will occur in

New York City during the flower show in March, which will include a bowling tournament and a dinner in the evening.

AMERICAN CARNATION SOCIETY.

At the meeting in Cleveland, Ohio, on January 28-29, Jos. H. Hill will read a paper on the productiveness of the standard varieties of carnations and the cost of producing blooms. A. T. Pyfer will read a paper on carrying carnation plants for blooming purposes over more than one season. Any member who has records of blooms cut, or who has ever carried carnation plants over more than one season, is requested to bring his records or experience along with him, so that both subjects may be discussed thoroughly.

Members will also bear in mind that

R. T. Brown.
President, American Carnation Society.

time for filing entries closes on Monday, January 19th. After that date entries may be filed by paying a charge of $2.00 per entry.

A. F. J. Baur, Secy.
Indianapolis, Ind.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

The regular monthly meeting of this society, was held at Greenwich, Conn., on Friday evening, Jan. 9. This society has made phenomenal growth since its organization in December, 1910, starting with fourteen members and now numbering 250. Three fall shows have been held, also two summer shows, all decided successes. A feature of the meeting is the non-competitive exhibits of flowers, fruits, vegetables, etc.

The annual entertainment and social night will be held at Stamford in the Jr. Mechanic's Hall, Wednesday evening, February 4th. Dancing will follow the entertainment.

Visitors at this meeting were Jos. Manda, of West Orange, N. J.; also Messrs. Cumming and Beers, of the A. N. Pierson Co., Cromwell, Conn. The exhibits were also very fine and the judges made the following awards:

Carnations, scarlet sport of Harlowarden, by A. Wynne, honorable mention; Laelia Gouldiana, by Adam Patterson, honorable mention; string beans, Early Mohawk, by C. A. Hokenson, vote of thanks; mushrooms, by J. T. Burns, honorable mention; Primula malacoides alba, by F. Lagerstrom, vote of thanks; Buddleia asiatica, grown by James Stuart, honorable mention; Oneidium splendidum, by P. W. Popp, cultural certificate; A. N. Pierson Co., certificate of merit for the new rose Hadley, and honorable mention for Enchantress Supreme carnations.

The date of the next regular meeting will be Feb. 13th. Best wishes to all for a prosperous new year.

P. W. Popp, Cor. Cec.

MASSACHUSETTS HORTICULTURAL SOCIETY.

Further extension of the activities of the Massachusetts Horticultural Society along practical lines was suggested by President J. K. M. L. Farquhar in his annual address at the inaugural meeting of the society on Saturday, Jan. 10. Among the possibilities of the future he spoke of interesting the young in the garden and instructing teachers so that they may be taught methods that will bring the encouragement of being successful in their efforts to help young gardeners and florists to a better knowledge of their calling, and to help all interested in garden work to a better understanding of it from the occupant of the city apartment limited to a window box to the owner of the large estate in the country. Something along this line is to be undertaken in the practical demonstration of garden work to be given in the society's lecture room. These demonstrations will supplement the society's regular Saturday lectures.

Reports of various committees were presented. Mrs. Francis King delivered a very interesting lecture on Flower Groupings in a Michigan Garden, with stereopticon slides in colors.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The next regular monthly meeting of the club will be held at Horticultural Hall, Boston, on Tuesday evening, January 20, 1914, at 7.30 o'clock. The newly elected officers will be installed and treasurer's, secretary's and other reports for 1913 will be read. This being ladies' night, regular business will be shortened so as to allow everyone to enjoy the entertainment which will be far and away the finest the club has yet had. After refreshments have been served, there will be dancing until midnight. Admission will be by ticket, which will be forwarded to all members.

Carnation night will be kept on February 17, when all the leading novelties will be shown.

W. N. Craig, Sec'y.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Plant Registration.

Public notice is hereby given that as no objection has been received or filed to the registration of the Zonal Geranium, John Meyer, and the Pelargonium, Eastern Star, by F. H. De Witt & Company, of Wooster, Ohio; and the rose, Mrs. F. F. Thompson, by Charles H. Totty, of Madison, New Jersey, and the rose, September Morn, by Dieterich & Turner, of Montebello, California, same become complete.

JOHN YOUNG, Sec'y.
January 10th, 1914.

NEW BEDFORD HORTICULTURAL SOCIETY.

The annual meeting of the New Bedford (Mass.) Horticultural Society was held at its rooms in the Standard Building on Monday, Jan. 5, 1914, President Barrows presiding. The Secretary's report indicated a growing interest in the society as evidenced by a large increase in membership. The treasurer's report showed a gain in that department in spite of the fact that the society had held four free shows during the year and had con-

David F. Roy.
President, New Bedford Horticultural Society.

tributed largely to the tree planting movement.

The following officers were elected: President, David F. Roy of Marion; vice-president, John I. Paulding; secretary, Jeremiah M. Taber; treasurer, Walter A. Luce; executive committee: William Keith, chairman; James Garthly, Arthur E. Griffin of Marion, Frank C. Barrows, Frank G. Tripp, Edward E. Shaw, L. J. Hathaway, Jr.

Miss Sarah B. Fay of Woods Hole, was voted a life membership. Miss Fay has been a large factor in the success of the rose show in the past years and rendered valuable assistance in encouraging rose growing among the amateurs. Frank C. Barrows, the retiring president, was presented a diamond scarfpin in token of the members' appreciation of his long service in that office and his untiring efforts in behalf of the organization.

D. F. Roy, president-elect is popular and able and will give the society an up-to-date administration. He is superintendent of the big estate of Col. H. E. Converse, which has been made one of the show garden places of New England through his horticultural ability.

Snapdragons----New and True Winter Flowering

I now offer this tested strain for the first time, in two distinct colors — **Pure White** and **Golden Yellow.** This novelty has been grown and developed for the past ten years by me and has proved to be continuous and profitable **Winter Bloomers,** producing a reliable mid-winter cut-flower crop.

Well rooted cuttings $10.00 per 100, *to the trade only.* Stock limited. Orders booked now, for deliveries in rotation after March 1st. Can also be obtained from J. Breck & Sons, Boston, Mass.

H. HUEBNER, Groton, Mass.

WORCESTER COUNTY (MASS.) HORTICULTURAL SOCIETY.

The lecture course for the season of 1914 has been arranged as follows:

Friday, Jan. 2, Bird lecture, by F. Schuyler Mathews, Cambridge; Thursday, Jan. 8, illustrated lecture, "Alpine Flowers," by Herbert W. Gleason, Boston; Thursday, Jan. 15, "Fruit Conference," report of delegates to the American Pomological Society meeting in Washington, D. C., David L. Fiske, Grafton, and discussion; Thursday, Jan. 29, Ladies' Day, talk on Indian Life, Legends and Songs, by Miss Bee Mayes (Pe-Ahm-E-Squeet), Floating Cloud, of Boston; Thursday, Feb. 5, "Vegetable Growing and Marketing," by H. W. Tinker, Warren, R. I.; Thursday, Feb. 12, illustrated lecture, "Travels in South America," by Prof. George H. Blakeslee, of Clark College; Thursday, Feb. 19, illustrated lecture, "Co-operation and Marketing as Seen in Europe," by J. Lewis Ellsworth; Thursday, Feb. 26, "Seed Growing," by S. F. Willard, Wethersfield, Conn.; Thursday, March 5, Spring Exhibition.

CLUB AND SOCIETY NOTES.

The 39th annual meeting of the American Association of Nurserymen will be held June 24-26, 1914, at the Hollenden Hotel, Cleveland, Ohio.

As we go to press the New York Federation of Floral Clubs is in session at Cornell University, Ithaca. Full report of the meeting will appear in next week's issue.

All the officers of the Kansas City (Mo.) Florists' Club were re-elected at the meeting on January 2d, as follows: President, G. K. Parker; vice-president, F. B. Fromhold; secretary-treasurer, W. L. Fowler.

The Executive Committee of the American Rose Society held a session in New York on Monday, January 12, at the office of Traendly & Schenck. There were present President W. R. Pierson, Secretary Benj. Hammond, Treasurer Harry O. May, Robert Pyle of West Grove, Pa., Eber Holmes, Montrose, Mass., S. S. Pennock, Phila.

The ninth annual convention of the State Horticultural Society, State Nurserymen's Association and State Beekeepers' Association will be held at Nashville, Tenn., on January 28th, 29th and 30th, 1914. The headquarters chosen will be at the Maxwell House. The meetings will be held in the Assembly Room of this hotel.

The Masonic Grand Lodge will be in session during the week, for which occasion the railroads of the state give a special round trip rate to Nashville. There will be a large exhibit of fruit. The Joy Floral Company has invited the members attending the conventions and their friends to visit their greenhouses. The Atlas Powder Company will have a demonstration showing the use of dynamite in horticulture.

Under the auspices of the Horticultural Society of New York, there will be a lecture in the East Assembly Hall, American Museum of Natural History, New York on Saturday, Jan. 17, at 4 o'clock, by Edwin Jenkins, of Lenox, Mass., on Sweet Peas.

Mr. Jenkins gave a very interesting and practical lecture before the society about a year ago on the rose. He is an enthusiastic sweet pea grower, and will undoubtedly give practical hints and information as to the cultivation of this popular flower. A good audience should greet him. At the same time there will be an exhibition of orchids, carnations and sweet peas.

The 59th Annual Meeting of the Western New York Horticultural Society will be held at Convention Hall, Rochester, N. Y., on January 28, 29 and 30. The program, which has just been issued, is quite lengthy and covers an unusual number of topics appertaining to fruit culture and garden vegetables. There is one talk on the reforestation of the Genesee Valley, but strangely enough, this organization although bearing the name of "Horticultural" gives no attention to ornamental trees, shrubs or flowers or other garden products except those aboved named.

The New Jersey Floricultural Society met Jan. 5th at Orange, N. J. The list of awards were as follows:

Wm. Reid, 1st, with Cypripedium Leanum; A. P. Nezel, 2d, with vase of roses; Max Schneider, 3d, with Begonia Gloire de Lorraine.

Non-competitive—Vote of thanks to Emil Panuska, for Libonia floribunda; Max Schneider, for Roman hyacinths; A. P. Nezel, for mignonette and carnations; Frank Drews, for cypripedium, and Chas. Ashmead highly commended for carnations and camellias.

The society holds its 19th annual dinner at the Plaza Hotel, Orange, N. J., on Feb. 2nd.

GEO. W. STRANGE, Sec'y.

The St. Louis Florist Club held its regular monthly meeting on Thursday, Jan. 8th, 35 members were present. The main topic was the holding of a spring flower show and after a long discussion it was voted not to hold it this year. The question of a fall show this year was left in the hands of the Publicity Committee. The club's 28th anniversary banquet was discussed and the time and place was left in the hands of the trustees.

R. J. Windler spoke as to his duty as State vice-president for the S. A. F., and asked for co-operation from the members, which was promised. John S. Carter, president of the Nicotine Mfg. Co., also gave a nice talk on what he thought would be a good plan to run a paying flower show.

The Elberon Horticultural Society held its regular monthly meeting January 5th with a large attendance present. It was decided to hold a Chrysanthemum Show in Asbury Park, New Jersey, this fall, for which an exhibition committee was appointed. It was also agreed to hold Carnation Night on Monday, Feb. 2nd. And all those desiring to exhibit new varieties can do so by sending them to William Bryan, florist, Elberon, N. J., who will see that they are properly staged. They may be sent by mail, United States Express or Adams Express as most convenient. A prize will be offered for the best vase of twelve, also cultural certificates. The newer varieties will also be passed upon by the judges.

Our president gave a very instructive talk upon the culture of Celosias, dwelling especially on the variety Castle Gould. Altogether this meeting has been one of the best the society has held for a long time.

WILLIAM BRYAN.

The Washington Florists' Company, Gude Bros. Company, and Dr. W. W. Evans, the latter a florist of Hamilton, Va., placed a number of new and popular roses and carnations on exhibition at the January meeting of the Florists' Club of Washington. Prince D'Arenberg caused considerable comment. The members compared the two roses and there were many who favored it in preference to Richmond. It is stated that apparently the darker the weather the finer is the color of the flowers which average 40 to 45 petals each. The Washington Florists' Company also exhibited a very dark rose which goes under the name of the Black Prince. The exhibition of Gude Bros. Company consisted of Benora carnations, Sweetheart, Mrs. Ward and Fire Flame roses, and sweet peas. Dr. Evans introduced Mary Meadow, a pink, and Burns Scarlet carnations, which received favorable mention. A resolution was adopted congratulating Mr. George W. Hess on his appointment as superintendent of the National Botanical Gardens. A. F. Faulkner, of New York, being present, was called upon to say a few words. Following the serving of refreshments adjournment was taken.

"Get them at Dreer's"

The Dreer Strain of Double Petunias

For nearly half a century the majority of the growers in the United States have been depending on the Dreer strain of Double Petunias, which this season compares favorably with stock we have heretofore supplied.

We offer for immediate delivery, good three inch pots, which will quickly furnish a good supply of cuttings, in fifteen varieties, 75 cents per dozen; $6.00 per 100, or the set of fifteen varieties, one of each, $1.00.

DOUBLE WHITE PETUNIA SNOW BALL

We have a large stock of this variety which is so useful for summer cutting, 3 inch pots, 75 cents per dozen; $6.00 per 100.

Seed of our **SUPERB STRAIN OF FRINGED PETUNIAS.** Double, 75 cents per 500 seeds; $1.50 per 1000 seeds. Single, 50 cents per trade pkt.; $1.00 per 1-16 oz.; $1.50 per 1-8 oz.

Our Quarterly Wholesale Price List, issued January 1st, offers a full line of seasonable Plants, Seeds and Bulbs. The above prices are for the Trade only.

ARTHUR T. BODDINGTON

SEEDSMAN **342 West 14th St., NEW YORK CITY**

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

Business Expansion.

The following notice, taken from The Public Ledger, Dec. 30th, 1913, is an indication that Philadelphia is still keeping up its reputation as a seed center and also that Henry A. Dreer, Inc., are continuing to make a healthy growth.

Settlement was made yesterday by William F. Dreer, President of Henry A. Dreer, Inc., for the property 716 Chestnut street, lot 22 feet 6 inches by 140 feet, recently purchased by him from Charles C. Harrison. The price paid for the property is not disclosed. It is assessed for the present year at $70,000, and was sold clear of encumbrances. Henry A. Dreer, Inc., have owned and occupied the adjoining property, 714 Chestnut street, lot of the same size, for many years. It is the purpose of the Dreer firm to enlarge its present store by taking in 716 Chestnut street. The sale is of particular interest as indicating not only the first movement of realty in the block between Seventh and Eighth streets on Chestnut for several years, but an intention on the part of the Dreer firm to maintain and enlarge the business in the location which it has occupied so long.

Extensive alterations are now under way, so that the two buildings will be connected in time for the spring trade. These two large buildings, together with their six-story warehouse at 710 South Washington Square, will be used entirely in handling their ever increasing business in seeds, bulbs and horticultural supplies; the plant end of the business being taken care of at their nurseries, Spring Grove, Riverview and Locust Farm.

This increase in space in which to handle their business will be of great advantage and the plans now under way will make the Dreer store one of the best equipped in the seed trade, giving ample facilities for taking care of the large number of customers who throng the store each day during the spring months.

Unfavorable Legislation.

The attitude of the present Secretary of Agriculture toward the free seed distribution, is one that must be hailed with pleasure by the seed trade in general. He is the first Secretary since the time of J. Sterling Morton, who has taken this attitude, and, by the way, the only one between him and Mr. Morton was Mr. Wilson. In talking with seedsmen, Mr. Wilson generally pretended to be opposed to the free distribution, but, nevertheless, under his fostering care, this graft grew from eleven millions to sixty-five millions of packets during his administration of the Agricultural Department, and had he remained another four years, the chances are that the grand total would have reached one hundred million packets. A considerable number of the employees of the Agricultural Department devote their time exclusively to this branch of department activities, and, of course, are always in favor, not only of maintaining the free distribution, but of increasing it. If this unjustifiable practice could be discontinued, a considerable number of both men and women, who are now feeding at Uncle Sam's crib, could be turned out to earn their living in lines that would be of some benefit to the general public.

Seeds Discriminated Against.

While discussing this matter, our attention was recently called to the seed laws, both state and national, that have been passed in the last few years. The men who legislate on this subject are, as a rule, absolutely ignorant of the matters they are considering, and the result of these laws in most cases is the creation of commissions to secure their enforcement. The men appointed are usually ignorant and inefficient. Under the parcel post law, seeds are about the only commodity barred. Animals of nearly all descriptions, fish and fowl—both dead and alive—may be sent by parcel post, but seeds, which are always securely packed and are as neat and clean a commodity as could be sent by post, are ruled out and must pay a higher rate of postage. If the aim of the law is to benefit the dwellers in the rural districts, there is nothing more important to them than the ability to secure their seeds from reliable houses in convenient form and at low rates of postage, for it must be borne in mind that whatever the postage rates are, the buyer of seeds ultimately has to pay them.

By the way, why is it that the National Department of Agriculture will examine so few samples of grass seeds for seed merchants each month, while for employees or farmers they will examine and report on any number?

Are Pea Prices Too High?

The contracting prices of the seed growers for the current year's crops show in many lines a marked reduction from those of the past few years. This is notably so in the matter of peas, but it is a question if prices are quite in line with present conditions. It must be borne in mind that the figures heretofore ruling have been the result of a succession of severe crop shortages when prices were abnormally high, seed stocks exceptionally valuable and short in supply, to such an extent that many buyers, both seedsmen and canners, were unable to cover their full requirements from year to year. At the present time, with the exception of a very limited number of varieties, there is a superabundance of peas. Nearly every seed grower is carrying surplusses of considerable magnitude, while the seed merchants themselves are overloaded. In the face of this situation, it would seem to have been the part of wisdom for the growers to have made their prices more in harmony with the existing conditions than to continue to keep prices at the present high level. The regular recognized

BULB GROWING IN THE U. S.

Bulletin No. 28 of the U. S. D. of A., recording experiments in bulb growing at Bellingham, Washington, proves very conclusively that Dutch bulbs, such as Hyacinths and Tulips, can be grown in the United States as well if not better than in Holland.

It would be a very unpatriotic American or poorly informed horticulturist who ever thought anything else. It really did not need the Department of Agriculture to prove it.

There is climate and soil in the immense area of the United States suitable for all plants of the temperate and sub-tropical zones. To gain the skill and train the workman so that it can be done on a commercially profitable basis takes time, money and brains and constitutes the real problem.

That this problem will be solved in time there is little doubt, but at present at least American grown bulbs will not greatly affect the market.

National Nurseryman.

CHICAGO NOTES.

H. C. Wullbrandt, proprietor of The Glove Greenhouses at 5200 Madison St., is in the south looking after his interests in a pecan orchard.

Local newspapers devoted large space to the report of the carnation exhibit given by the Chicago Florists' Club at the La Salle Hotel, Jan. 8.

Prospects are said to be bright for the success of the annual ball of the Cook Co. Florists' Association. Jan. 23. Tickets at one dollar per couple with no charge for extra ladies, can be secured from any of the wholesalers or from any members of the club.

The Poehlmann Bros. Co., placed the order for the wood work for thirteen new houses, with the Foley Greenhouse Co., Jan. 13. The houses are to be 27 by 250 feet with Garland gutters and Poehlmann truss, the latter the invention of their chief engineer E. G. Goodwin. The houses are to be erected by Wm. Mailander, and the rows of cement gutter posts are in place.

Two of the downtown retail florists report that they each sold over a thousand baskets filled with ruscus, statice, red berries, etc. Christmas week. The price was from $1.50 to $5.00 each and took the place of the dozen carnations or other flowers once so sought for as remembrances at the holidays. The retail stores still use many little baskets made up with prepared material or a mixture of the fresh flowers and prepared goods. A favorite combination just now is that of tulips lifted from pans and separated by dried statice.

The newly orgainzed Foley Greenhouse Co., located at 31st St., near Kedzie Ave., now has its plant ready for use. The place has a depth of 265 ft. with tracks running into the yards where cars can be loaded and unloaded inside the building. Spacious offices are located on the second floor. A feature of this location is its splendid natural light all through the building. A blue print room is convenient to the main room and there are possibilities for increasing to any size the upper floor by extensions over the machine rooms. Mr. Foley says the inquiries coming in indicate a good season ahead.

A serious accident happened to five of the six big boilers at Plant C. at Poehlmann Bros., Morton Grove, Jan. 12th. The boiler feed pump was not working and cold water was put in when the water in the boilers was low. The result was the springing of the flues out of the boiler heads, putting five boilers out of use and leaving but one set of pipes running around the outside to keep up heat, with an outside temperature of 4 degrees above zero. The accident was at 8 A. M., and Kroeschell was telphoned and truck loads of supplies and another of men were soon on the spot. The boilers were temporarily repaired by 4 P. M. and only the fact that it occurred on the one day of sunshine that we have had, saved the stock, for the temperature went to 36 degrees in the thirteen houses, each 27x750 ft.

Visitors—Thos. Brown, Robt. Rahaley and Albert Stahelin of Detroit, Mich.; Joseph Harmann, Coldwater, Mich.; Mr. Desmond, Minneapolis, Minn.; Jos. Hill, Richmond, Ind.; J. E. Jones and son Raymond of the Advance Co., Richmond, Ind.

PHILADELPHIA NOTES.

Alexander B. Scott, of Robert Scott & Son, Sharon Hill, left on the 13th inst. for a short vacation at Summerville, S. C.

Mr. and Mrs. Robert Craig sail the 19th inst., on the "Havana," for a brief trip to the Isle of Pines and other points in the West Indies. They are accompanied by Mr. and Mrs. Freeman (parents of Mrs. Robert Craig, Jr.).

We had a pleasant visit at this office the other day from Professor Fancourt, in charge of the Horticultural Department of the National Farm School. In renewing his subscription he said: "I like HORTICULTURE more and more. It gets better every week."

"Flowers from Snow to Snow" was the topic of a lecture delivered by J. Otto Thilow before the Garden and Orchard Society Friday evening in Presser Hall, 1714 Chestnut street. Among those present were Miss Jessie T. Morgan, principal of the Pennsylvania School of Horticulture for women, at Ambler, and a number of the students. Also a goodly sprinkling of prominent members of Philadelphia's 400 for twenty miles around. We call this good practical work for the advancement of horticulture. Is it any wonder the Florists' Club has elected Mr. Thilow its president three times running? We are all proud of him.

Visitors: Chas. Schoenhut, Buffalo, N. Y.; A. Graham, Warren, Pa.; Richard C. McGill, secretary McGill Seed Growers Co., San Francisco, Cal.; P. H. Neally, Suburban Life, New York City; A. N. Pierson, Cromwell, Conn.; P. L. Carbone, Boston, Mass.; H. Wilden, representing Warnaar & Co., Sassenheim, Holland.

WASHINGTON NOTES.

William F. Gude was unanimously elected president of the Washington Chamber of Commerce amid unprecedented acclaim, at the annual meeting of that organization held on Tuesday. Mr. Gude held this same position during the years 1909 and 1910 and it is said of him that never before or since has the chamber been so prosperous as during his administration. It has now a membership of about 800. Another victory for the florists.

In a report to Secretary Houston, of the Department of Agriculture, C. L. Marlatt, chairman of the federal plant quarantine board, gives the result of the first year of the board's work. Fourteen foreign countries, he states, have so far co-operated with the United States by establishing plant quarantine inspection with satisfactory certificates covering exportations here, Some plant shipments have contained injurious insect and furgous plant enemies in spite of their coming from countries where there was an inspection service. Out of 169 shipments from France and Japan, the gypsy moth, or some kindred pest, was detected in 129 shipments.

William F. Gude, of this city, Mr. and Mrs. Richard Vincent, Jr., of White Marsh, Md., and Mr. Henry Bester, of Hagerstown, Md., were last week the guests of the people of Frederick, Md. The occasion was the delivering of a lecture by Mr. Vincent in the large auditorium of Hood College in that city. A banquet was held in their honor at the City Hotel, at which were present city officials, the faculty of the college, florists from nearby towns and others, about forty in all. Every attention possible was accorded the guests and the local street car company placed at their disposal a special parlor-observation car which carried them to adjoining towns on a sight-seeing excursion.

A CORDIAL INVITATION

Is extended to the trade to visit and inspect our new establishment, Fifth Avenue at 46th Street, New York City.

During Recess

BANQUET AT TARRYTOWN, N. Y.

Tuesday night, Jan. 13, was the fiercest of winter nights in many years, but it could not chill the ardor of the members of the Tarrytown Horticultural Society when their 15th, annual dinner was concerned. This took place at the Florence Hotel, beloved of Tarrytownians and their friends as an ideal hostelry for such joyous gatherings, and the good record of the past was well maintained in the size and character of the attendance, the excellence of the menu and the care-free eloquence of the speakers.

President John Elliot set an admirable example for terseness and brevity in his opening remarks which was well followed by those who followed. He introduced as toastmaster, Mr. R. A. Patterson who is in feature, a classic replica of President Wilson, only more so, and who filled the position with due geniality and wit. Frank R. Pierson, Wm. J. Stewart of Boston and Park Commissioner Tibbetts of White Plains, were severally called upon and responded acceptably. Mr. Tibbetts displaying the right park commissioner spirit when he spoke of the poetry, romance and history of the country between the Hudson and the Sound and the duty of the horticulturist to illuminate this lovely section with the beauty of horticultural art. Frank L. Young made a great speech, full of humor, declaring that he had never taken a course in a horticultural college, but had struggled with Greek roots, and defied his neighbors at the table to give the botanical name of the potato. Hon. Chas. P. McClellan, Mr. Coffey of the Daily Argus, J. Harrison Dick of New York and F. V. Millard were also among the speakers, and all were entertaining and instructive. Secretary Neubrand is a past-master at arranging for a good time.

Notes.

The Albany (N. Y.) Florists' Club had a dinner, following their meeting on Thursday evening, Jan. 8. Short addresses were made by the officers and trade representatives present.

An invitation is extended to all members, friends and fellows-florists, to attend the annual florists' social and hop which will be held at Kasting Co.'s Hall, Buffalo, on Jan. 29th. The committee in charge is working hard to make this one of the most pleasant gatherings of the season and a good time is assured all.

The annual banquet of the Southampton, N. Y., Horticultural Society was held at the Commercial Hotel, Thursday evening, Jan. 8, when the members and their wives enjoyed a pleasant social time. Entertainment was provided by a professional banjoist and monologist, and Schaus' orchestra furnished music. The tables were handsomely decorated.

HINTS TO COMPILERS OF SCHEDULES.

Promoters of horticultural exhibitions will now be arranging their schedules. I have often thought how much better it would be if, instead of cups and medals, useful articles were offered for prizes. From my own experience of those responsible for the necessary polishing, etc., they become a useless annoyance, and are often put away out of sight. As for medals, they are neither use nor ornament. For instance: A provincial exhibitor takes a collection to London, at often great cost, and possibly obtains a bronze medal, which seldom afterwards will see the light of day In place of such useless articles, why not a silver table-centre, Rose-bowl, corner table, silver flower-vases, a tall vase for specimen blooms, sugar basin and cream-jug, tea and coffee service, and salver, with inscriptions? Such articles would be a pleasure for those responsible in the household instead of being a nuisance. I have heard ladies remark that flower show and other exhibition committees should have the assistance of ladies in the selection of useful prizes; then the household and posterity would look upon deserved honors with pleasure instead of the reverse.

—*A. C. in The Garden, London.*

R. M. Ward & Co., New York, are sending to the trade an ingenious wall order file, with a separate hook for each day in the week.

Personal

President-elect Wm. Duckham entertained his fellow officials of the New York Florists' Club at dinner on Saturday evening, January 10.

C. Albert Small of New York observed his birthday on Saturday, January 10, and congratulations were extended by many friends in the wholesale district.

Paul and Henry Dailledouze, the "Heavenly Twins," of Flatbush, N. Y., sailed on the S. S. Cleveland, Thursday, Jan. 15, on a trip to the Mediterranean and Egypt.

Having been appointed by the President and the appointment having been confirmed by the Senate, W. F. Kasting will at once assume the postmastership of Buffalo, N. Y., as soon as his bond is approved. The position carries a salary of $6,000 a year.

The Greek-American Florists' Association will hold their annual ball at Terrace Garden, New York, on Friday evening, Feb. 13. Tickets can be procured from Geo. Cotsonas, J. J. Fellouris, George Polykranas or the Boulevard Floral Co. Geo. Polykranas is chairman of the committee.

Boston visitors: Edward Reagan, Morristown, N. J.; Andrew Wilson, Springfield, N. J.; Mrs. Francis King, Alma, Mich.; H. C. Neubrand, Cromwell, Conn.

New York visitors: Benj. Hammond, Beacon, N. Y.; F. R. Pierson, Tarrytown, N. Y.; Robert Pyle, West Grove, Pa.; Eber Holmes, Montrose, Mass.; Wallace R. Pierson, Cromwell, Conn.; S. S. Pennock, Phila, Pa.; Walter Mott, Beacon, N. Y.; W. J. Stewart, Boston.

GARDENIAS

Dozen $2.00—$4.00, 100 $15.00—$25.00

For the balance of the season you can depend on us for all the Gardenias you need. The quality is as fine as any grown and our prices are always right.

Flower Market Reports

BOSTON The flower shipping business has gone through a hard experience in the past few days. Boxes incoming from growers or outgoing to out-of-town buyers have been received by the express companies, only as subject to delay, and much loss has been sustained by the many delays at stations and on trains, as well as by freezing, many lots coming to market last Monday and Tuesday frozen beyond redemption. The demand is not very active on anything. Roses are really scarce, but this occasions no privation as there are so many other things in sufficient quantity for every need. Carnations are abundant, the whites being in larger demand than the colored ones. In bulb material the supply is large and now includes excellent daffodils, which bring four and five dollars per hundred. Fine mignonette is now plentiful, selling from two to six dollars. Cattleyas are over-stocked. Violets in very light demand.

BUFFALO There has not been much change in market conditions the past week. Business is very much on the quiet side and enough stock to meet all demands. The rose supply is normal, though select and fancy stock are more plentiful than the shorts. Carnations have come on quite plentiful, but too many of the ordinary quality and more white are seen than colored. Lilies move quite satisfactorily. Beauties are in normal supply, but demand lacking. Tulips, daffodils and freesia are now added to the list and so far have had good sales. There is a nice supply of all miscellaneous material. A revival is looked for soon as wedding decorations and other social gaieties will be at their height.

CHICAGO Business is comparatively quiet. The reaction from the holiday season is not yet over and while some wholesalers are inclined to feel depressed the greater number regard business as about normal for Jan., with the exception of the loss caused by the extreme shortage of roses. The scarcity of roses reported in last week's issue, is still more marked this week and all good stock brings the top price. On the other hand, American Beauties are coming in quite freely though practically all are in long lengths and the demand is good. There are plenty of carnations and only strictly fancy will bring quoted figures while the great bulk of good stock sells lower. There are more weak stems seen than usual in carnations in mid-winter, owing to the warm December. Sweet peas are again on the counters and the supply is fair in quantity and quality. There is also a steady supply of lily of the valley and sufficient demand to use it to advantage. Tulips are appearing in larger quantity each day and sell readily. Lilies are in fair supply and all kinds of green can be had in any amount.

CINCINNATI Market conditions are fair for the supply is fully adequate in nearly all lines. The demand while good is not as large or active as it might be and prices as a result are beginning to slip downward. The supply of most of the roses is sufficient to take care of all demands upon it. American Beauties are still off crop as far as this market is concerned. Carnations are coming in strong and the larger part of the offerings are of excellent quality. Buyers are beginning to have a thing or two to say about the prices again. These have dropped a little as far as local business is concerned since the last writing. There are plenty of lilies and all other bulb stock. Violets are selling well but the price has dropped. Orchids and lily of valley sell fairly well. Good sweet peas are in demand.

PHILADELPHIA Last week was better than expected, considering that we are now going through the usual after-the-holidays dullness. The shorter grades of roses seem to be the best sellers, although they are not quite up to the standard as to quality. The pink roses sold better than the whites and the reds best of all, as they were scarcer—most of them being in a cut-out state after the Christmas week. Carnations are moving out fairly at moderate prices, the pink varieties rather better than the white. The quality of course is par excellence. Orchids are a little too plentiful at present, especially cattleyas, and this condition is reflected in the prices. Some of the cattleyas are under grade as to quality and that is especially true of Percivaliana. There are some nice spray orchids and very good Dendrobium formosum. Cypripediums are nearly over. Gardenias are in over-supply at present, quality very good. Violets are selling well, especially the singles, Lady Campbell being the leader. Lily of the valley fairly active. Quality shows quite some improvement. Minor items are selling well, especially daisies, forget-me-nots and mignonette.

Flower Market Reports

(Continued from page 90)

NEW YORK

While it is true that demand has been very light ever since the first of January yet the production is such that no serious accumulation is in sight and values have not suffered any great setback as has sometimes happened at this particular period. There is one exception, however, and it is one which would be least expected, viz. cattleyas. On all sides there is more than a surfeit of them and quantities are lost because of inability to get buyers for them. Only a few of the most select blooms realize quoted prices. There is every evidence that it will not be long before there will be an unwieldy surplus of bulb flowers. Good tulips and daffodils also freesia are now added to the variety on sale at all the wholesale places. Mignonette has begun to come in heavily and the quality is very fine. The first Acacia pubescens was seen this week. It came from W. H. Siebrecht. Japan lilies—rubrum, magnificum, etc.—are among the best sellers this season. They are forced in enormous quantities by A. S. Burns, Jr. They bring from $4.00 for short stemmed blooms to $10.00 for flowers on long stalks.

ST. LOUIS

This market has been highly satisfactory. There is no great abundance of cut stock, but just about enough to go around. Shipping trade fell off somewhat since the holidays. Prices have been high on some things and most reasonable on others. Violets are as they have been all season, scarce and of poor quality. Carnations are fine. Roses are becoming better in color and are in good demand. Miscellaneous stock selling satisfactorily.

CLUB AND SOCIETY NOTES.

The attendance at the Cincinnati Florists' Society meeting on Monday night was very slim. The evening was the coldest of the present winter and kept the growing contingent at or near their greenhouses. J. A. Peterson & Sons, exhibited specimens of Melior and a seedling Begonia of a type similar to the Melior, but as yet unnamed.

The Chicago Florists' Club held a very successful meeting at the La Salle Hotel; Jan. 8 and gave a public exhibition of over thirty new varieties of carnations from all parts of the country. All the old officers had been re-elected and P. J. Foley took charge of the installation ceremonies. Reports were made by the officers and heads of committees. Attendance was 65.

The Houston (Tex.) Florists' Club, at its dinner on Monday evening, Jan. 5, voted to designate the week beginning Feb. 15 as "Planting Week", and to ask the citizens of Houston to co-operate. Among the propositions made was the founding of a stock company for the purpose of selling flowers at wholesale. Such a company would enable flowers to be grown on a large scale it is said.

The 1915 Entertainment Committee are out to induce the Board of Supervisors of Los Angeles, Cal., to provide in the tax levies for 1914 and 1915 for the raising between $250,000 and $300,000 to carry out floral and entertainment plans alredy made for exposition year. This sum will be supplemented, it is expected by liberal contributions from Los Angeles and her citizens, both city and country.

The distribution of 1,000,000 rose slips and vast quantity of seeds is contemplated by the Entertainment committee as its initial venture in the line of making the city and county florally attractive for 1915.

The meeting of the Pittsburgh Florists' and Gardeners' Club on Jan. 6th was held in the big English room at the Fort Pitt Hotel, this being necessary to accommodate the members and their friends who were anxious to hear the talk of Geo. B. Parker on the Wild Flowers of Allegheny Country, and see the colored lantern slides. The pictures were of the highest class and the audience was entertained and instructed.

The officers for 1913 were renominated for 1914 namely: President, Neil McCallum; vice-president, E. C. Reineman; treasurer, T. P. Langhans; secretary, H. P. Joslin; assistant secretary, W. A. Clarke.

Carnation Matchless was shown by the Cottage Gardens Co., Queens, N. Y., and received a first-class certificate. This grand white drew much enthusiastic praise from our expert, Fred Burki. Gorgeous was exhibited by H. M. Weiss & Sons and was also given a first-class certificate.

A. N. Pierson, Cromwell, Ct., sent the new rose, Hadley, and a first-class certificate was awarded. J. A. Peterson, of Cincinnati, was present and showed his new begonia Melior, which was thought to be an improvement over Glory of Cincinnati, and Carl Becherer, gardener at Dixmont Hospital, Dixmont, Pa., showed seedling carnations, for which he was awarded a certificate of merit.

H. P. JOSLIN, Sec'y

Galva, Ill.—George Pierce, of Kewanee, has purchased the greenhouse business of A. G. Larson.

SEE?

In writing to Advertisers kindly mention Horticulture

SEED TRADE.

(Continued from page 95.)

growers are inviting a vast deal of more or less irresponsible competition which, nevertheless, is a factor to be reckoned with and very annoying if not embarrassing to them. This is a matter for the growers themselves to determine, but we still believe that they will eventually take our view of the matter.

Beans and Sweet Corn.

One item, which is not in surplus, is beans. Two or three of the green-pod varieties are easily obtainable at moderate prices, but excepting these, beans have not been in as short supply nor as high in price for a number of years. As might be expected, the present high prices of spot beans has resulted in a sharp advance in the price of futures and this advance, by the way, seems to us wholly justified. For a number of years beans have been selling entirely out of the relative proportion of values with peas, and the figures now ruling on contract are not a cent higher than they should be, according to the views expressed by the great majority, if not all of the leading growers.

Sweet corn seems to be in fairly good supply, although prices are firm at somewhat of an advance over those of a year ago, this situation being about in line with what we predicted some months ago. There has been no material change in conditions affecting the general line of small seeds since we last discussed this matter, and contracting prices for the 1914 crops are generally lower than those of the last three or four years.

California Conditions.

Information from California as to conditions prevailing in that state, indicate that they are very favorable. An abundant supply of rain has fallen; indeed it may be said that the only fears expressed now are that there may be too much moisture. Barring this possibility, it looks as if there might be an excellent crop of sweet peas next season, which will be welcomed by the trade in general.

By the way, we have been informed that some experiments in the growing of sweet peas in Idaho and Montana during the past two or three seasons have been rather disappointing. Whether these experiments will be continued another year, we have not learned.

Notes.

Boone, Ia.—F. A. Reichenbach has sold his retail seed business and will retire from the trade.

W. W. Jarred was elected vice-president of the Cumberland Seed Company, Nashville, Tenn., last week.

Clarence M. Shacklett, salesman for the Cumberland Seed Co., Nashville, Tenn., and Miss Gladys B. Sims, were married last week.

We are advised that mail order trade is opening up very satisfactorily and mail order houses in general are anticipating a good year's business.

CATALOGUES RECEIVED.

Henry A. Dreer, Philadelphia, Pa.—Dreer's Garden Book, 76th Annual Edition, 1914. Bound in cream tinted covers, with lettering embossed in gold and green, four full page plates in colors and profusely adorned with half-tone illustrations, this catalogue will find a cordial welcome from the seed and plant buying public. It comprises 256 pages besides covers and a number of inserts and they are closely filled with the good things in seeds, bulbs plants, aquatics, shrubs, implements and sundries, including a good list of approved novelties.

The Joy Book, Horseshoe Bulbology for 1914.—This is the title under which R. M. Ward & Co., New York, send out their wholesale price list of bulbs this season. A neat catalogue nicely illustrated. Quaint epigrams and unique philosophy interspersed here and there make this characteristic Wardian publication entertaining as well as useful in a business way.

Arthur T. Boddington, New York.—1914 Winter and Spring Wholesale Catalogue of Florists' Seeds and Bulbs. "The Seal of Quality" is the central external adornment of this very complete list of everything needed by the florist for forcing or outside planting. Some particularly interesting new and improved things are offered in the novelty pages.

Charles H. Totty, Madison, N. J.—1914 Catalogue of Chrysanthemums, Carnations and Roses for the Trade. Contains splendid portraits of the sterling flower novelties and standard varieties of recent introduction. A list that every grower will need. A colored plate of new chrysanthemums forms the title page.

Wm. Elliott & Sons, New York.—General Seed Catalogue for 1914. Covers very rich in color effect showing formal landscape and garden views of much merit. Contents comprehensive and illustrations excellent.

John Lewis Childs, Flowerfield, N. Y.—Trade Price List of Choice Gladioli and other Summer Flowering Bulbs and Plants. A grand collection especially of gladioli and lilies.

C. Petrick, Ghent, Belgium.—Wholesale Trade List for Spring, 1914. Azaleas, palms, camellias, etc. R. M. Ward & Co. are the American representatives of this establishment.

R. Vincent, Jr., & Sons Co., White Marsh, Md.—Wholesale Trade List of Vegetable, Greenhouse and Bedding Plants. All useful stock and prices interesting to wholesale buyers.

DO YOU KNOW VERMINE?

John Lewis Childs, Flowerfield, N. Y., writes:

"I suppose you will be glad to know that **VERMINE** is giving excellent satisfaction. Our greenhouse foreman says that it is the only thing that he has ever used that will kill white ants in the benches."

Valentine Burgevin's Sons, Kingston, N. Y., writes:

"We wish to say that we find **VERMINE** an excellent thing. We used it on a bench planted with Smilax to kill root lice or maggots, which ate the roots, and after two applications our Smilax is taking on new life and has started off to grow."

The Gardner Nursery Company, Osage, Iowa, writes:—

"We will use **VERMINE** on our out-of-door fields of strawberry plants if the inside test continues as satisfactory as it now seems."

W. N. Craig, Brookline, Mass, writes:—

"I have used **VERMINE** and found it effective against root maggots, cut worms, earth worms, ants and other ground pests."

VERMINE is applied one part to four hundred parts of water by thoroughly soaking the soil. It will protect your crops from the ravages of vermin under ground without the slightest injury to vegetation.

Obituary

Mrs. Charles Armitage.

Mrs. Armitage, widow of the late Charles Armitage, and mother of F. W. Armitage of Hitchings & Co., died at Elizabeth, N. J., on Saturday, January 10, aged 65 years.

E. D. Kaulback.

Edwin D. Kaulback, widely known in the florist trade as a large grower of Easter lilies, died at his home in Malden, Mass., on Friday morning, Jan. 9, after a short illness with pneumonia. He was sixty years old and during over forty years he has been engaged in the florist business in Malden, conducting a retail store, as well as extensive greenhouses. He was also a very large real estate owner in Malden. The funeral was held on Sunday, his four brothers serving as pallbearers, and the floral tokens from friends in the trade and others were numerous and beautiful. He leaves a widow and one son, Fred R., who it is understood will continue the business.

GREENHOUSES BUILDING OR CONTEMPLATED.

Grand Rapids, Mich.—Eli Cross, two houses.

Lessburg, O.—P. O. Mumma, one house.

Garrettsford, Pa.—James Verner, addition.

Coatesville, Pa.—W. P. Worth, range of houses.

Fairfield, Ia.—E. H. Montgomery, one house.

Dighton, Mass.—Frank Rogers, Elm St., one house.

Athens, Ga.—State College of Agriculture, one house.

Morton Grove, Ill.—Poehlmann Bros. Company, additions.

Wenatchee, Wash.—Milot-Mills Company, addition 20 x 100.

Cliftondale, Mass.—Jas R. and Roy A. Hatch, house 37x200.

Watkins, N. Y.—Willard H. Grant, one Lord & Burnham house.

Exeter, N. H.—McAlpin Bros., Lord & Burnham house, 65 x 600 feet.

Martin's Ferry, W. Va.—Arthur Dickson, Scotch Ridge, one house.

Spring Valley, N. Y.—A. S. Burns, Jr., range of Lord & Burnham houses.

Grand Forks, N. D.—University of North Dakota, two houses, each 28 x 150.

Union Grove, Wis.—Meredith Flower & Vegetable Co., range of houses in the spring.

St. Paul, Minn.—Range of conservatories at Como Park. The conservatory will be near the center of the park, about 1,500 feet west of the present structure. The ground plan calls for a tower 100 feet in diameter with show houses 100 feet long and 200 feet wide on either side. Hot beds will be at the rear. The completed structure will cost about $75,000 and will be one of the finest park greenhouses in the west.

Here is the Hot Water Boiler You Have Been Looking For

KING IDEAL BOILERS

25% More Efficient

On account of the T-shaped sections (see cut) there is a greater proportion of the heating surface exposed to the direct action of the fire than is possible in other boilers.

About 85% of the work done by a cast iron boiler is accomplished by this directly exposed heating surface.

The King has 25% more of this directly exposed surface—so it's 25% more efficient.

Let Us Tell You More About It.

KING CONSTRUCTION CO.

28 King's Road, No. Tonawanda, N. Y.

Makers of King Iron Frame Greenhouses

FIRES.

St. Albans, Vt.—The greenhouse of ex-governor E. C. Smith on Congress street, was considerably damaged by fire last week.

Lowell, Mass.—The dwelling house, barn and part of the greenhouses of J. J. McManmon were burned on Tuesday night, Jan. 13.

Cincinnati—The greenhouses of Albert McCullough were destroyed by fire Sunday night, January 11th. Fortunately the loss was covered by insurance.

Ridgewood, N. Y.—A disastrous fire in buildings on Knickerbocker avenue, on the morning of January 6, did considerable damage to the store of "Nick", the florist, at No. 391.

West Islip, N. Y.—A heavy loss was sustained by Alex D. C. Arnold on January 8, through the total destruction of the big boiler house connected with his greenhouses and the consequent injury to plants by the cold. The fire was discovered about 1.30 A. M., and although the firemen from the neighboring villages, including Babylon, were called, nothing could be done, as the greenhouses and boiler house were remote from a water supply. It is not known how the fire started. A workman had made the round of the boilers a short time before and found everything all right.

NEW CORPORATIONS.

Birmingham, Ala.—Gorman-Gammill Seed and Dairy Supply Co. Capital stock $10,000.

Clarksville, Tenn.—Metcalfe Greenhouse Company, capital stock $3,000; incorporators, Roy Elliott, Percy Richardson, R. C. Bertsch, T. L. Metcalfe and Dancey Fort.

Wheeling, W. Va. — The Nursery Farms Company, capital stock, $5,000. Incorporators, Baird Mitchell, John E. Stevenson, Juliet Smith, Minnie Knoke and Thomas C. Stevenson.

When writing to advertisers kindly mention HORTICULTURE.

Easy to Erect, No Center Posts, Self-Clearing of Ice and Snow, says T. B. Pengelly, Irondequoit, N. Y.

"It may be of interest to you, to know that in the Spring of 1912, I decided to build a greenhouse. After looking around to find which kind I thought to be best, I decided to build one of Lord & Burnham's Iron Frame greenhouse, 208 feet long, and 40 feet wide, and it pleased me so well that this last summer, I build another just like it. So I have now two greenhouses 208 x 40 feet, and they give complete satisfaction.

It may also be of interest to you to know that we erected them ourselves, which is a very simple matter. We first set the side-posts and then with the aid of a gin-pole, we raised the rafters in place, then placing the purlins, then the truss, tightening all bolts securely. This completes one section, then we started on another section, and so on, until the construction was completed.

We then started on the wood-work which is very simple, as everything is cut and fitted.

I like these forty foot houses. There are no center posts to bother. We have three walks, one in the center, and one on each side, which leaves us two double beds with a pipe in the center of each to rest our work-plank on.

It pleased me the other day to see the ice and snow slide off those houses, while the old fashioned wooden-framed houses were darkened all day long.

In closing, I wish to thank you for your courtesy and square dealing."

Best Commercial Novelty For 1914

Only new variety of plants awarded Certificate of Merit at the Nat'l Flower Show, N. Y., April, '13.

New Scarlet Bedding Geranium

"Helen Michell"

This charming variety is by all odds the most brilliant and finest scarlet geranium ever put on the market. The blooms are gigantic and the number of flower heads on the individual plant is remarkable. It is wonderfully vigorous and hardy. Starts to flower early in May and continues uninterruptedly until cut down by frost. Even through dry hot weather it retains its brilliancy of color and great flowering qualities. It is of medium height, very compact with lustrous heavy foliage. The flowers are semi-double, while the individual florets are frequently 2 inches in diameter. We have already booked orders for some 30,000 plants. The stock is limited and we predict a heavy demand for "Helen Michell."

Read what two of the Greatest American Geranium Growers say about "Helen Michell"

Philadelphia, June 15th, 1912.

Gentlemen

Relative to the new Geranium "Helen Michell," which was shown to us a few days ago, would say that we consider this variety a GREAT IMPROVEMENT over Alphonse Ricard. The flower is borne on a long, stiff stem, is MUCH LARGER than the Ricard variety, and the color is superb. It appeared to us to be a very VIGOROUS GROWER and UNUSUALLY FREE.. We have known of this variety for the past two years and think it will be one of the grandest bedders in commerce.

Yours truly,

ROBERT CRAIG CO.

White Marsh, Md., June 10, 1912.

Gentlemen:

We take pleasure in assuring you that we were very favorably impressed with the new GERANIUM "HELEN MICHELL." It certainly possesses merits of exceptional value to the grower, and we are confident it will immediately find its place among the leading class of Geraniums.

Respectfully yours,

R. VINCENT, JR. & SONS CO.

Prices: 25c each; $2.50 doz.; $15 per 100; $125 per 1000. Charge accounts invited.

LAWN GRASS

"The Right Seed in The Right Place"

We furnish grass mixtures for dooryards, terraces, lawns, athletic and polo fields, cemeteries, parks, country clubs, country estates.

Repeated laboratory tests on individual mixtures assure superiority of quality and growth.

Experience of over fifty years of successful seed business assures you of correct proportions.

Experiment has shown us that a mixture of the proper grasses is more satisfactory than an individual grass. Why waste your time and money experimenting? Let us furnish what you need.

NOTES ON CULTURE OF FLORISTS' STOCK

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Young Cyclamen

Cyclamen do not succeed in widely fluctuating temperatures. A night reading of 54 to 56 degrees is a happy medium, with a 10 degree rise in the day time with sunheat. When the seedlings are large enough to handle they should be potted. Be sure to always leave the upper part of the little corm above the ground. Use fresh loam and leaf mold with enough sand to make it quite porous. Do not try to force a cyclamen by raising the temperature. Give ventilation whenever possible and keep them clear of fly and thrips by spraying with nicotine solution and light fumigation. Keep them well up to glass and as spring approaches give them an average night temperature of about 52 to 55 degrees. Do not shade cyclamen until the first of March.

Carnations

Carnations carrying a heavy crop of buds should have some plant food. There is nothing better than mulches and liquid manure. Rotted cow manure makes by far the best mulching. If the plants are pretty well established and in condition to stand a little feeding then you want it not too well rotted. If it is just rotted enough to be free from danger of souring, it will furnish a good deal of nourishment as well as protect the surface from baking and drying out. Before you put on these mulches, a light sprinkling of wood ashes will help to stiffen the stems. Air-slaked lime also will have this effect, but we like the ashes better, as they do not seem so caustic. To make liquid manure use either cow or sheep manure. A bushel of cow, or about one-fourth that amount of sheep manure will do.

Propagating Chrysanthemums

With the advent of January the man who is growing for exhibitions begins to turn his thought to propagating for the coming season. Place the stock plants in a cool, airy house, where the cuttings can make a hard, firm growth. Many commercial growers simply throw their stock under the benches and leave them there until it is time to begin propagating. Such a method is folly, pure and simple. The cuttings are weak and the plants, because they have been growing in insufficient light, have lost most of their vitality. The commercial grower does not want to propagate his stock so soon for average cut flower growing but he will find it an advantage to root the plants and set them out on a bench in a cool house. These can be topped latter on.

Swainsona

Cuttings of Swainsona galegifolia root in ten or twelve days, with bottom heat. Any side shoot from three to four inches long, taken from growing, thrifty plants by pulling it sideways out of the axil formed by leaf and main stem, is a good cutting and needs no further trimming. These cuttings must not be allowed to wilt neither before nor after they go into the sand. If regularly attended to as to watering, potting and repotting, they will make good 6-inch flowering plants by Decoration Day, suitable for cemetery planting. They are, however, of greater value for indoor culture, and when planted out in quantity on a sunny bench, or into a suitable bed will be a perfect sheet of countless, pea-shaped snow-white flowers from June until away into winter. Every spray of bloom in its airy, deep-green setting of fern-like foliage, brings ready money, if rightly handled by its grower. If marketed immediately, or shortly after being cut, the flowers will wilt too quickly and hardly ever recover. But if picked when nearly all the blooms are fully open, and placed in water and kept in a cool, but light place for twenty-four hours, the flowers may then be safely used for any purpose.

Pyrethrums

Now is a good time to start a batch of these very valuable plants. Cuttings placed in a moderately warm propagating bed will root readily now. When they are rooted pot up into 2½-inch pots, using a rich compost. Keep shifting until they are in 4 or 5-inch pots. These will make excellent stock for the Memorial Day trade. Do not keep them too warm. From 45 to 48 degrees at night will do.

Soil Sterilization

Mr. Farrell:

Dear Sir Apropos of your remarks on the use of sterilized soil for seed sowing (page 5), I should like you to give me some advice as to a simple yet practical method of so treating soil on a small scale, not necessarily requiring any large initial outlay in the erection of elaborate plant for same, but a handy workable way which would be likely to prove of some practical value on a place of limited area. J. D. W.

Glen Cove, N. Y.

In answer to J. D. W. I would say that soil sterilizers are simple and easy to make and can be made any size to suit. All that is necessary is a box any length or width that you may like, but only a foot deep; when made deeper the steam does not go through it so good. On the bottom of this box you should have a series of inch perforated pipes, running the full length. If they are placed about a foot apart they will do the sterilization perfect. To connect these pipes with the steam use a short piece of inch pipe, with a long thread on each end, to go through the center of the box and fasten it to the bottom by two lock nuts. The end inside the box can now be connected to the perforated pipes and the end outside can be connected with the steam pipe by either another inch pipe or hose. To use this box sterilizer place the soil to the depth of about 8 inches, leaving it as light as possible, cover with some boards or a piece of canvas and turn on steam, which will vary from 180 to 212 degrees in the soil. With high pressure boilers you can sterilize the soil in 2 hours, but with low pressure boilers it would take anywhere from 5 to 8 hours. Where you do not use steam it would pay to hire a portable boiler for the purpose.

Mr. Farrell's next notes will be on the following: Care of Violets; Christmas Solanums; Cosmos; Gardenias; Orchids; Stevias; Lobelias.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

The Cold Snap

Notwithstanding all that is written about sufficient wrapping paper in the packing, many growers failed to have their boxes frost proof in the recent cold snap, and as a result many hundred dollars' worth of flowers were frozen. Many of these came from up-to-date places where one would never think of looking for frozen flowers. Experience has taught us that it pays to have a roll of heavy wrapping paper always on hand, and this with plenty of newspaper put around the shipping boxes on the outside will do wonders in keeping the frost out. The corners of the boxes should be well papered, as usually they are left with the paper about half an inch away from the end, and it does not take a very big crevice for Jack Frost to enter and then the flowers are done for.

Fires

Looking over the trade papers one will see accounts of a great many fires with thousands of dollars loss to growers. Some are covered partly by insurance but the loss of the season's crop is far worse than the loss of buildings. In many places the cellar seems to be an ideal place to deposit all kinds of rubbish, old paper boxes and many other useless things. These naturally dry out as the fires are forced in cold weather and make nice kindlings to start a fire. Keep wood and stuff away from the boiler room. Have the floor above the boilers of steel and concrete, if at all possible, and if this cannot be, at least see that there is good protection of the floor above the boilers. Then it is well to invest a few dollars in fire extinguishers and keep them handy. An extra line of pipe all through the place which connects to fire hose only, a hydrant here and there, will be a very profitable investment. The cost is small compared to what the loss may be if no provision for fire protection is made. Have a reel of fire hose that is never disturbed in every potting shed, two or three in the larger ones, and let it stay there, so that anyone can find it there even though it was pitch dark. Never let the employees remove this hose. It is well to have a fire bell, too, that can be rung to summon help on any size place. Where possible have telephone connections at least to the manager's house. All this seems a lot of fuss but when a fire starts it will all be paid for.

Fresh Water for Vases

Just because it is winter and cold is no reason why all the cut flower vases should not be refilled, at least every other day. During warm weather it is necessary to refill every day, and it is not a bad plan to carry it out even in cold weather. Flowers, to keep fresh must have fresh water. Stagnant water will kill the foliage along the bottom of stems, and the cut flowers are very poor specimens after the foliage is gone. Keep the jars and vases clean and full of fresh water—clean enough to drink.

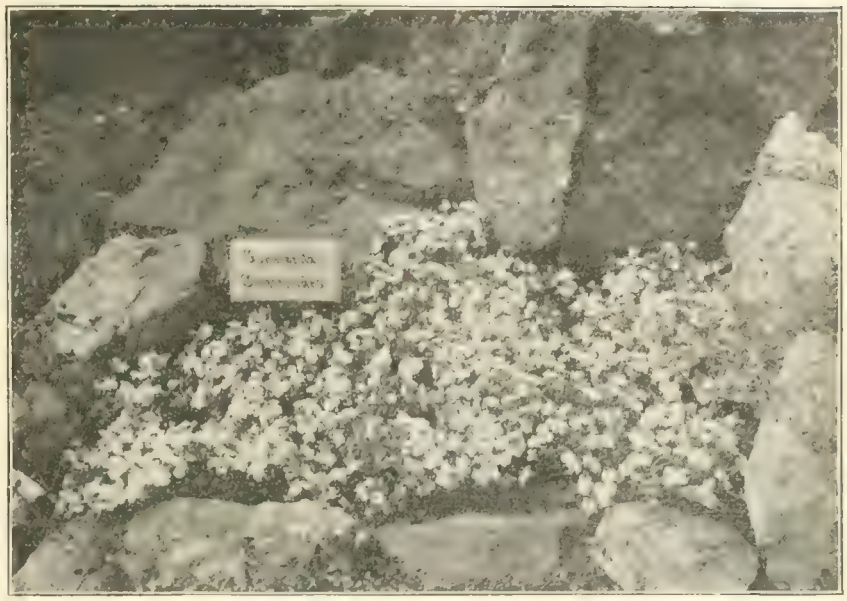
Watering Cuttings in Sand

As soon as a batch of cuttings is put into sand they should be watered well and then if drainage is good and sand not too fine they will take a watering every day for a while. In watering try to have the water a little warm—at least within 10 degrees of the temperature maintained in sand. On many places where an elevated tank is used the water will be ice cold, the tank being full of ice, and this is no water to use in a propagating house. Even the plants suffer to some extent when watered with this ice water, and the cuttings receive a good chill to say the very least, as it will take quite a while for the sand to warm up again. A good plan is to have the water pipe for the propagators run along the heating pipes and as it is used the heat will take the chill off at least.

Watering in the Houses

With the wind blowing a gale and the mercury down to zero the benches will dry out very rapidly, and, as is often the case—very unevenly. Watch the soil very carefully, and be sure to give sufficient amount of water, where all the mulch has disappeared. A little coarse sod mixed with a little rough manure may be applied to hold the water in place, or better still a light mulch of good, well decayed cow manure can be use. The former, however, will no doubt be much more convenient to apply, and liquid manure can be used to furnish all the necessary plant food. Bonemeal, of course, should be added to the sod mulch, or a little of it scattered before using the manure. This seems so natural that we sometimes forget to write it.

Fumigating



Do not neglect this important item in the growing of roses. Keep the plants clean. With the coming of the warmer and longer days the fly will multiply much more rapidly than ever. So will spiders spread if given half a chance. If you would have clean houses for the coming spring and summer, keep after the bugs now. A mild fumigating or spraying every now and then will be all that is necessary and thus all insects will be kept out. A heavy spray or fumigation is not so very good for the plants, and is liable to do harm. Try to arrange to have it done just before syringing; it is more effective. Never have the plants too dry while fumigating, for a damp atmosphere is essential to the success of the operation, and also to the safety of the plants.

Tying

With the rush of propagation do not neglect tying in the least, or there may be a chance for regret. A bench of Beauties kept well tied will produce far more flowers than a bench neglected. Then, too, you can see many things on the plants while tying which would escape unnoticed, unless you make regular trips among the houses to inspect them. In doing so go over the whole house thoroughly—benches, soil, plants and all. You will be surprised at what you will find here and there.

Gypsophila

Few flowering garden plants are better known than the "Babies' Breath" or Gypsophila. The main reason for its popularity is its wide latitude of usefulness in a cut state. The graceful panicles of the annual Gypsophila elegans, as well as the perennial Gypsophila paniculata and its double form, floro pleno, seem indispensable for midsummer table decorations. A few sprays mixed in bouquets, centerpieces or vases take away any stiffness in the form of some common garden flowers, ameliorate and soften colors and, in a general way, help to improve matters perceptibly. To be without a continuous supply of babies' breath during the sweet pea season, for florists of northern summer resorts, reflects very badly on judgment. In the eyes of most of his customers the craftsman minus the always desired article is a complete failure. The easy way of growing the annual kinds in proper rotation leaves no excuse whatever. The perennial species mentioned, during the period of their being in bloom, serve the same purpose. The comparatively new Gypsophila paniculata flore pleno may be cut, dried and preserved for winter use similar to helichrysums, acrocliniums, rhodanthes, xeranthemums and other immortelles. Less known and by no means duly appreciated we find the two dwarf-growing kinds, Gypsophila cerastioides and Gypsophila repens. As shown by our illustrations, both are ideal rock-garden plants of charming appearance. The flowers of the European native, Gypsophila cerastioides being of a clear white with finely penciled brown veins, never fail to draw attention, while the light graceful masses of tiny blossoms of Gypsophila repens evoke the admiration of all. For dry wall planting both prove a material hardy and highly effective. Gypsophilas are mostly raised from seeds planted as early as possible in Spring. The annual varieties should be sown on the garden space where we want them to flower. The perennial species may be started in cold frames or in seed pans under glass at moderate heat and sufficient ventilation on bright days. Gypsophila cerastioides can also be freely propagated by divisions. A light soil and open sunny exposure is the rule for all species mentioned. Perennials need leaf-covering for winter protection.

GYPSOPHILA CERASTIOIDES

"Can you beat it?"

One of the fine arts of the flower business, it seems to us, is the wonderful precision with which the rose growers today time their holiday crop. The Killarney breed of roses lends itself admirably to this control, however. Cold or warm, sunny or cloudy, whatever the weather may choose to be preceding the Christmas holidays, the rose man faces the market with a full crop when the great day draws nigh and ten days thereafter the houses are about as clean as a mown field. A very striking contrast to old-time conditions, surely. The advantage of this clever proficiency is seen in the tone of the market reports for the past two weeks—roses holding their steady market value everywhere—carnations too many and their market value impaired in consequence. It will be a fine thing for the carnation and the cattleya, too, when they can be brought into such tractable submission as seems to be the case with the forcing rose of today under modern management.

Danger Signals

A. Rosenthal, editor of The Modern View, in editorial comment on the recent campaign in St. Louis against the use of flowers, says:

"Not alone in the sad and tearful hours, but also in the glad and joyful celebrations, is the futility of floral folly and extravagance equally and obviously useless. There also should be thought of those who need medical aid, money, bread, coal, clothes and education. The beautiful rose is more glorious transformed into a health reviving meal to starving stomachs."

Between the Jewish women of St. Louis who would thus abolish the use of flowers for any and all occasions, sad or festive, the "Junior Prom" committee at Harvard who on the ground of economy forbid the sending of flowers by any Harvard man to his lady guests at the dance this year, the clergymen who will not allow flowers at funerals where they officiate and, lastly, the underbred fashion leaders who give preference to artificial and preserved material where fresh flowers should be used, the way of the florist is certainly beset with its full share of trouble and solicitude. Fortunate, it is, indeed, for the florist that the influence of these fanatical meddlers can never be anything more than local and transitory. The love for flowers and the sentiments to which they appeal are too strongly rooted in the human heart for it to be otherwise. It would be the height of recklessness, however, not to take heed of these danger signals and try to minimize their influence by eliminating as far as possible any methods or practices which afford grounds for reasonable criticism of the florists' business. If there is any way in which this beautiful industry can be elevated, its ways refined and objectionable features reduced, it is time for those who make it their avocation to get busy, as individuals and through every organized means, so that the hold of the florist upon the affection of the people shall grow and not diminish.

Warning

We must again warn our readers that HORTICULTURE has no traveling representatives or subscription agents. At this time of the year, especially, we have complaints from subscribers who have been induced to pay some imposter the price of one or more years' subscription for HORTICULTURE. Letters received indicate that one of these crooks is operating in some of the Long Island, N. Y., towns. Watch out for him.

PRIVATE AND COMMERCIAL AFFILIATION.

Mr. Editor:

I have read with great interest in your issue of January 10 the article, "Private versus Commercial Florists," by F. E. Palmer—a most timely topic and very nicely expounded. I fully agree with Mr. Palmer regarding the mutual workings of the S. A. F. for all branches of horticulture. The foundations of our national society are laid on a very large basis, as you, Mr. Editor, proved by quoting a portion of the laws governing membership. That is surely plain enough for everyone to understand if he wishes to do so. But, Mr. Editor, I take exception to your view of the value of discussing this matter just now. The question is, what has the so-called private gardener to benefit by being a member of the S. A. F., and is he wanted in that society? So I say, anything which will educate or enlighten our brother from the private branch of our profession to the usefulness and broadness of our national society is never amiss. Our friend, the private gardener, not being in the maelstrom of professional business, has no need to worry over the price of coal. Tariff and price of plants and cut flowers don't keep him from his sleep, his life is not near so strenuous as his commercial brother's is, and so he has not felt the need of co-operation as we commercial florists have, and has stayed in the background mostly, apparently satisfied with his lot. While his commercial brother has been pushing himself and horticulture upward and forward at all times, he has at the same time pulled his private brother up with him. You smile? I can prove it to you. Who has given you all the fine forcing roses, carnations and others so that you can have the finest of flowers for your employer in winter? Through whose enterprise have the greenhouse building firms been able to put lots of money and brains into their business, so that they can build better houses for you? I think fully nine-tenths of all articles writen in our horticultural papers are from the pens of commercial men. Who has formed and organized all the florist clubs and most horticulture societies? The commercial man is the live wire in all of it, and it's only natural that he should be; he needs it most. While the individual efforts of the commercial florist has been great, he could not have attained the success we now are proud of if he had not had the help and co-operation of the national society and the florist clubs. The interchange of ideas in discussions has stimulated the brains to greater activity, and the exhibitions held by the national society or local clubs have boosted our business as well as our standard of quality.

In no country in the world has the commercial grower of plants and flowers been so generous with his knowledge and experience. He has and still is giving it free to all who need it. It is true that our national society is still small in numbers; it's true that thousands of men are still taking the fruits of others' labors without giving their mite; it's true that horticulture is still behind other professions in united strength and effort, but it is also true that the day is breaking when all our scattered interests will be welded together in one great national society. To do this, we need the private florist just as much as any one. We cannot longer do without you, Mr. Private Florist. Do your part now. Prove to all that you can be just as generous and just as good a fellow in doing things as the commercial florist. Recognition will follow quickly, as is shown in your Boston club. A private florist is now president of the New York Florists' Club in recognition of work well done. It is what we do that counts, not what we are. When the National Society comes to Boston this summer, how will the Boston club stand towards affiliation? It will be the main issue to come before the meeting. Will you be united or will class distinction and prejudice turn you as a body from the right way? I hope not. The Boston club has been able to unite the commercial and the private men as in no other club in the country; that is an achievement to be proud of. Now crown it by standing solid for affiliation next August.

A. FARENWALD.

Roslyn, Pa.

BEGONIA MELIOR.

This is a new winter-flowering variety; parentage, Lonsdale's light pink sport from Gloire de Lorraine × Socotrana. A strong, robust grower, about 12 or 18 in. to 2 ft. in height; foliage nearly round, of a dark green color; flowers borne in great profusion: male flower 1¾ in. to 2 in. across, 4-petaled; female flower very rare, 5-petaled. Color a delicate shade of soft satiny pink, a shade lighter than Glory of Cincinnati; flowers from November till March; in prime condition during December and January. It is easy to propagate, and succeeds best in equal parts of loam and leaf mould, and some sand added. Temperature while in bloom 56° to 58° at night. This new begonia is a marked improvement over Glory of Cincinnati, and will be disseminated in July, 1914.

"A MAN'S A MAN FOR A' THAT."

For many years I have had an increasingly friendly feeling for the Editor of HORTICULTURE. I never could define the cause of it. The mystery is solved now, however. I see by a recent issue of the Florist's Exchange that W. J. S. was born on March 17th. Of course that makes him "one of us," and surely, being a Bostonian, he is a "Home Ruler." No wonder he displays the tartan of his family so proudly on his bosom. A Stewart! Born in Boston!! and on St. Patrick's Day!!! What more can be added? May his years be many.

PATRICK FLANAGAN.

New Rochelle, N. Y.

Where was St. Patrick born? Ed.

CLUBS AND SOCIETIES

LANCASTER COUNTY (PA.) FLORISTS' CLUB.

On January 13th, a party of twenty-three from Lancaster visited Strasburg, visiting the establishments of Amos Rohrer and Chas. B. Herr. Mr. Rohrer has added two very fine modern houses. He had quite a batch of schizanthus in bloom and the quality of flowers would almost bring them into the orchid class. At Mr. Herr's, the show place of Lancaster County, every thing was in the pink of perfection from the office cat to the bench of Enchantress Supreme. Mr. Herr grows every thing well but if there is any difference in his ability to get the best out of any one variety it is with Beacon. He has it the best of any one in this section and better than the writer ever saw it any where in the United States.

Coming back to Lancaster we met the rest of the crowd at the Brenneman Building and sat down to a real banquet 6.30 P. M.

The out-of-town visitors were F. M. Read of The Whilden Pottery; C. U. Ligget and E. J. Fancourt of the S. S. Penock-Meehan Co.; E. I. Hoehl of S. S. Skidelsky & Co., and D. T. Connor, representing Lord & Burnham Co., all of Philadelphia; T. E. Wohlert of Narberth; A. S. Brandt and Aug. Schaffer of York; T. J. Nolan of The King Construction Co., and last but not least Prof. E. I. Wilde of State College. Prof. Wilde gave us a very instructive talk, dealing principally on Carnations. He also made a strong plea for the support of the florists in getting legislation to appropriate more money for floriculture at State College as they now have some 38 term students and a number of short termers whom they are trying to instruct in floriculture with one greenhouse 30 by 100.

He was followed by F. M. Read, D. T. Connor, Aug. Schaffer, A. S. Brandt, E. I. Hoehl, T. E. Wohlert, ex-president A. M. Herr and the newly-elected president B. F. Barr. Harry Schroyer acted as toastmaster and Mr. Linkey and Mr. Goldbach had a German sangerfest which was Greek to most of the visitors but highly enjoyed by those who understood it.

At the business meeting B. F. Barr was elected president, Lemon Landis secretary; H. K. Rohrer treasurer and Elmer Weaver vice-president. After the business meeting sports were indulged in up to midnight. On the exhibition table Matchless was shown in its usual fine form, a vase of Gloria was much admired for its color and, last but not least, was a bunch of Philadelphia from Detroit that opened up as good as if they had come in from a local grower. It was its first appearance here and made a very good impression. A few members who do not have regular firemen were kept away from the banquet by the first real winter we have had in this section, the thermometer going four below zero during the night and hanging at ten above during the day.

Feb. 19, will be observed as Carnation Night. Ye men especially interested in carnations, from far and near, take notice and remember you are always welcome in Lancaster, Pa.

ALBERT M. HERR.

GARDENERS' AND FLORISTS' CLUB OF RHODE ISLAND.

The annual meeting of this club, at Providence on Monday evening, Jan. 19, was made a very pleasant social event by the serving of refreshments and exchange of views for "the good of the club." There was an excellent attendance of members and W. J. Stewart of Boston was present as a guest.

Retiring President Eugene A. Appleton opened the meeting. Alex. Macrae was chosen temporary secretary and a vote of regret and sympathy with Secretary Chappell in his recent accident was unanimously passed. A

CORNELIUS G. HARTSTRA
President-elect Gardeners' and Florists' Club of Rhode Island

letter of greeting from A. M. Rennie, Gary, Ind., was read and plans for improving the section of the city adjoining the old canal, by W. T. Hatch, were displayed and explained by Robert Johnston. The president-elect, Cornelius G. Hartstra, then took the gavel and Robert Johnston, on behalf of the members, presented the retiring president with a handsome umbrella, suitably engraved. A hopeful address was made by the president, indicating his desire to make the year 1914 a most successful one for the club. He called upon W. J. Stewart, who responded with a spirited appeal for loyalty to the best horticultural interests of city, state and New England and asked for a large attendance at the Boston convention next summer. James Hockey followed with words of enthusiasm regarding the outlook and urging an immediate grasping of the great opportunities for improvement in exhibition management. Mr. Powers told stories as the chowder was handed around and toasts were drank to the prosperity of the club and to the absent secretary.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

According to custom, the January meeting of the Gardeners' and Florists' Club was "Ladies' Night." On this occasion it is part of the ceremony of installation of the new officers to stand them up in a row, let the ladies see how fine they look, and, with a couple of hundred admiring feminine eyes gazing upon him, what florist or gardener wouldn't put on his best smile and make all kinds of promises to be good during the year? Altogether, "Ladies' Night" is a great night for everybody, and on this particular occasion it surpassed the record.

Horticultural Hall was filled to the limit with an aggregation of beauty and wisdom, youth and maturity, harmony and good fellowship such as any organization might well be proud of, and all lines of "private" and "commercial" and "allied trades" were obliterated. Business was very brief. The secretary's notes showed an average attendance of 162 at the meetings of the past year; 74 new members had been added, 4 members had died. The treasurer's report showed a balance of $1657.63 on hand. President Kennedy made a brief but very optimistic address, outlining the great work for the coming season—the club's part in receiving and entertaining the S. A. F. convention visitors. He appointed Peter Miller, James Wheeler and Henry Penn as members of the general preliminary convention committee to represent the club, together with himself and S. A. F. Vice-President Welch ex-officio. He appointed the standing exhibition and entertainment committees with William Sim and Wm. J. Patterson as chairmen, respectively. Twelve new members were enrolled.

Then came the musical program and for an hour the audience was treated to the best entertainment they ever had. Mr. James Singer, Miss Katherine Singer, Miss Margaret Alexander, Miss Marion Kay, Mr. Joseph Lorraine, Miss Ruth Dyer and Master Sawyer were the artists and there was not a weak spot in the feast of vocal and instrumental music, character impersonations and recitations which they presented. After that refreshments were served lavishly and then followed dancing, which lasted until the midnight hour.

STATE FLORISTS' ASSOCIATION OF INDIANA.

The annual meeting of the Indiana State Florists was held on Tuesday, January 13, at the Hotel Severin, Indianapolis. It was a well attended and interesting session. President W. W. Coles in his address referred to the approaching meeting and exhibition of the Chrysanthemum Society of America, which is scheduled for Indianapolis next November, and urged prompt activity in preparation therefor so that a creditable showing may be assured from the local growers. He spoke optimistically of the Associa-

tion's present condition and outlook for the future.

Officers for the ensuing year were elected as follows:

President—Walter W. Coles, of Kokomo.
First Vice-president—W. J. Vesey, Jr., Fort Wayne.
Second Vice-president—John Hartje, Indianapolis.
Secretary—O. E. Steinkamp Indianapolis.
Treasurer—H. L. Wiegand, Indianapolis

The exhibits included carnations St. Nicholas and Shasta by Baur & Steinkamp; White Enchantress by Hartje & Elder; Gloriosa and White Wonder by W. J. & M. S. Vesey; Beacon, White Enchantress and Mrs. Ward and rose Ophelia by E. G. Hill Co.; Washington and Rose-Pink Enchantress by Stuart & Haugh; Yellow Prince and Yellowstone by F. Dorner & Sons Co. All the foregoing were given honorable mention. Quite a number of new carnations were on exhibition and were scored as follows by the committee:

From R. Witterstaetter, President Valentine, 88 points; No. 1021E, 75. F. Dorner & Sons Co., Champion, 80; Sensation (provisional), 85; Good Cheer, 83; No. 271, 81; seedling, 75. Hartje & Elder, No. 23, 76. E. G. Hill Co., No. 3, 79. S. S. Skidelsky & Co., Philadelphia, 77.

In the evening there was a banquet at which some entertaining talks were given and a pleasant social time enjoyed.

AMERICAN CARNATION SOCIETY.

The secretary will start for Cleveland, Monday evening, January 26. All mail matter which will not reach Indianapolis by Monday morning should be addressed in care of Hotel Staettler, Cleveland, Ohio. The early entries have been heavier than usual, indicating a large showing of the divine flower. This, in connection with the retail display, should be of especial interest to the members.

If you have paid your dues, bring your receipt with you, to avoid delay in securing banquet ticket, badges, etc. Wear your A. C. S. button.

Sessions will be held Wednesday evening, Thursday morning and afternoon. Banquet Thursday evening.

A. F. J. Baur, Sec.

Chicago to Cleveland.

The Chicago party for the annual convention of the American Carnation Society, to be held at Cleveland, January 28-29, will travel on the Lake Shore & Michigan Southern railroad, leaving La Salle street station at 11:30 P. M., January 27, due at Cleveland the next morning at 7:35. The fare one way is $7.75. Berths, lower $2, upper $1.60. Berths can be reserved through C. K. Thompson, at the Lake Shore & Michigan Southern railroad ticket office, corner Clark and Monroe streets (telephone, Randolph 5300), or through J. B. Deamud, chairman transportation committee, 160 North Wabash avenue (telephone Central 3155).

J. B. Deamud,
Chairman Transportation Committee,
Chicago Florists' Club.

Boston to Cleveland.

The party from Boston for the Carnation Meeting will leave South Station at 11.15 P. M., Monday, January 26. Due in Cleveland 4.35 P. M. Tuesday. Parties wishing to join should notify William Nicholson, Framingham, Mass.

New York to Cleveland.

The New York party for the American Carnation Society s meeting at Cleveland will leave the New York Central Station on the 6.45 P. M. train on Tuesday, January 27th, arriving at Cleveland Wednesday morning at 7.35.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The regular monthly meeting of this society was held on the 20th inst., the newly-elected president, Samuel T. Bodine, in the chair. After the routine business was disposed of the audience—which was one of the largest for some time—listened to a very interesting address on Hardy Perennials by Richard Rothe of the Dreer staff of experts. The speaker also gave a splendid series of stereopticon views illustrating his subject. Mr. Rothe showed himself thoroughly familiar with all phases of gardening and discussed the fine points with fine enthusiasm. We hope to find room for the address in full in an early issue.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

President Theodore Wirth has appointed E. T. Mische, Portland, Ore., as state vice-president for that state, and Daniel MacRorie state vice-president for the northern part of California.

John Young, Sec.

CLUB AND SOCIETY NOTES.

The Hardy Ornamental Plant Growers' Association will hold its annual meeting at Boston next August. C. J. Molloy, of Rochester, N. Y., is secretary.

The annual dinner of the Morris Country Gardeners and Florists' Society, was held at Piper's Hotel, Morristown, N. J., on Tuesday evening, Jan. 20.

The Retail Florists' Association of St. Louis met on January 19 at Hotel Bern. Reports were presented by the committees on "crepe pullers" and "union florists."

The Connecticut Pomological Society and the Connecticut Vegetable Growers' Association will hold a horticultural convention at Foot Guard Hall, Hartford, on Feb. 3 and 4.

The Lady Florists' Home Circle of St. Louis met on Wednesday afternoon at Mrs. F. C. Weber's. The attendance was good and all had a jolly time. Mrs. F. C. Weber, Jr., will entertain the ladies at next month's meeting.

The annual spring show of the Pennsylvania Horticultural Society has been fixed for March 25, 26 and 27. Premium lists can be procured from David Rust, secretary, Horticultural Hall, Broad and Locust streets, Philadelphia.

The first regular exhibition of the Massachusetts Horticultural Society for 1914 will be held on Saturday and Sunday, January 31 and February 1. Lorraine begonias, primulas, orchids, carnations, bulbous stock, fruits and vegetables are liberally provided for in the prize schedule.

The regular meeting of the Cook Co. Florists' Association was held Jan. 15th. The nomination of officers resulted as follows: President, N. P. Miller; vice-president, Alex. Henderson; secretary, A. T. Pyfer; treasurer, John Zech; sergeant-at-arms, M. Fink and Otto Goerisch; trustees, A. Zech, P. Pearson, J. L. Raske, P. Olsem, J. Novak, R. Schmidt, E. Peacock and F. Otterbacher.

At the meeting of the Nassau Horticultural Society on Wednesday afternoon, Jan. 14, at Glen Cove, N. Y., it was decided to hold the annual dinner at the Oriental Hall, Glen Cove, in February, date not yet decided. Mr. Beers, of the A. N. Pierson Co., Cromwell, Conn., addressed the meeting as did also Mr. Collins, representing Carter's Tested Seeds, Inc., Boston. Mr. Collins offered a special prize for competition at one of the future shows. Awards were made to Percy Chubb and James McCarthy for carnations. Exhibits for next meeting will be gardenias, freesias and Primula malacoides.

Harry Jones Cor. Sec.

The regular meeting of the Oyster Bay (N. Y.) Horticultural Society was held on Jan. 16th. The chief interest of the evening was a very instructive paper by Alfred Walker on vegetable growing, etc. James Duthie secured the prize for carnations and Joseph Robinson that for sweet peas. Frank Petroccia received honorable mention for some fine plants of Primula malacoides. Frank Petroccia also received the gold medal for the most meritorious exhibits at the 1913 meetings. The medal was given by Joseph Robinson. It was decided to hold future meetings on the fourth Wednesday of the month. John Ingram will lecture on orchids at the next meeting and the exhibits will be narcissus, cyclamen and chicory.

The date of the annual dinner has been changed to February 12.

SMITH MEMORIAL PLANS GET RECOGNITION IN CONGRESS.

The Smith Memorial plans gained considerable headway when, on January 12, Congressman George S. Graham, of Philadelphia, Pa., introduced into the House of Representatives a bill (H. R. No. 11401 appropriating $50,000 for the purpose of erecting a monument to perpetuate the memory of William R. Smith, late superintendent of the Botanic Garden.

Now that the seed has been sown in the ground it is up to all who are interested in this movement and every florist, and every florists' organization in the country should get on the job and send a few words of encouragement to Mr. Graham and tell their representatives in both of the Congressional branches that they want this bill enacted into law. In this respect due credit must be given to William F. Gude, through whose efforts this bill was drawn up.

The new wholesale cut flower store of B. A. Snyder & Co., 278 Devonshire street, Boston, is roomy and exceptionally well fitted for the business. This will undoubtedly take its place permanently as one of Boston's leading wholesale houses.

WASHINGTON NOTES.

While in town last week visiting friends, and looking after personal business, William F. Kasting annexed the title of "Hon." and incidentally the position of postmaster of his home city. The Hon. "Billy" left Washington with a face wreathed in smiles and his commission as postmaster with the signature of the President thereon, tightly clutched in his right hand. His many friends in Washington are indeed glad to hear of this honor conferred on a fellow-florist and their congratulations and best wishes are with him.

It looks as though there would be something in the way of a contest for the presidency of the Florists' Club of Washington as there are several factions each with its particular nominee who are beginning to wake up, take notice and do a little electioneering to put some life into the next meeting when the names will be submitted. There is quite a lot of fine presidential timber this year. There is a man on F street, one on Connecticut avenue, to say nothing of the present incumbent, either of whom would fit the chair nicely. The next meeting will take place on February 3 and it is expected that the exhibit given at the last meeting will be duplicated. There were a few empty seats at the last meeting but it is expected that the club will have to provide a few more at the next one.

The florists are particularly interested at this time in a bill which has just been introduced into the House of Representatives by Congressman Avis which provides penalties for those who seek to mulct others through the medium of worthless checks. A fine of not to exceed $100, imprisonment not to exceed 90 days, or both, will be assessed against those who shall be found guilty of a misdemeanor through the giving of a check or draft under $20, while checks or drafts amounting to more than that sum, if unaccepted by the bank against whom it is drawn, makes the author thereof guilty of a felony and subject to a fine of not more than $1,000, imprisonment for not more than two years, or both, unless restitution is made within 20 days after the giving of notice, verbal or written, of the protesting of the check or draft.

Visitors: Fred Michell, Jr., Phila.; Mr. Cohen, representing Wertheimer Bros., New York; D. T. Connor, representing Lord & Burnham Co.

FIRES.

Springfield, Mass.—The Oakes' greenhouses in Bush street, owned by Mrs. Katie Cartter, was damaged by fire on the night of Friday, January 16, to the extent of $4 000 to $5,000. Mrs. Cartter carried no insurance.

New Haven, Conn.—Three greenhouses of Charles Munro's range on Townsend avenue were burned and the contents ruined by fire on the evening of January 12. The fire is believed to have started from an overheated furnace. The loss is placed at $4,000. The houses were insured.

Lord & Burnham Co., have just completed at Irvington, N. Y., the largest green house factory and the best equipped foundry in this country.

Improved Golden Chadwick

(Pollworth)

The Chadwick family of Chrysanthemums are the highest type of the commercial varieties, and any sport of Chadwick that is an improvement will be welcomed. This new variety has its origin in the West. We have taken part of the stock and will distribute the variety the coming season. It is described as identical with the parent in all respects except form and color of the bloom. It is a perfectly formed flower and a deeper golden yellow in color.

It is a variety that will be found all that the name implies. It means better late mums, and you need it.

Our Catalog for the Price.

CHRYSANTHEMUMS

Our Novelties for 1914 are ready for immediate delivery on such varieties as Meudon, Jas. Fraser, Mrs. R. H. Boggs, Mrs. Paul Moore, Daily Mail and Mrs. Ernest Wild at $2.00 plant; $20.00 per dozen. Chieftain, $5.00 per dozen.

We had over twenty acres of 'Mums growing outdoors last year in order to guarantee our stock being propagated only from plants that had not been fed or forced in any way.

Send for our catalogue of over four hundred and fifty varieties, including the Gold Medal Singles; the Caprice Family, which we introduced last year: the Early Flowering varieties which are becoming the rage and all other Standard varieties.

CHARLES H. TOTTY, Madison, N. J.

New Carnation, "Pink Supreme"

It has not the size or length of stem of Matchless, but for a good strong healthy growing plant that makes flowers of good size continuously from September until thrown out in the Spring ***it is supreme.*** Color light-shell pink. Calyx good; is not a splitter. Stem holds the flower erect and is of good average length. Is a good shipper and keeper.

Rooted Cuttings Now Ready. $10.00 per 100; $100.00 per 1000.

Absolutely nothing but clean healthy well rooted cuttings sent out.

"Get them at Dreer's"

The Dreer Strain of Double Petunias

For nearly half a century the majority of the growers in the United States have been depending on the Dreer strain of Double Petunias, which this season compares favorably with stock we have heretofore supplied.

We offer for immediate delivery, good three inch pots, which will quickly furnish a good supply of cuttings, in fifteen varieties, 75 cents per dozen; $6.00 per 100, or the set of fifteen varieties, one of each, $1.00.

DOUBLE WHITE PETUNIA SNOW BALL

We have a large stock of this variety which is so useful for summer cutting, 3 inch pots, 75 cents per dozen; $6.00 per 100.

Seed of our **SUPERB STRAIN OF FRINGED PETUNIAS.** Double, 75 cents per 500 seeds; $1.50 per 1000 seeds. Single, 50 cents per trade pkt.; $1.00 per 1-16 oz.; $1.50 per 1-8 oz.

Our Quarterly Wholesale Price List, issued January 1st, offers a full line of seasonable Plants, Seeds and Bulbs. The above prices are for the Trade only.

During Recess

Horticultural and Agricultural Society of Northern Westchester.

The eleventh annual dinner of the above society was held as usual at the New Castle Inn, Mt. Kisco, Thursday evening, January 15th. Preceding the dinner was a short business session at which James Andrews, the energetic president of the past two years, laid down the gavel of authority; but before doing so installed the new officers, as follows: John Hall, president; Arthur Rose, vice-president; John Walsh, treasurer; M. J. O'Brien, recording secretary, and in turn President Hall installed Mr. Andrews financial secretary. At 8 P. M. the members and their guests, numbering over sixty, sat down to a most excellent dinner. After the coffee and cigars President Hall introduced the toastmaster, M. C. Ebel, of Madison, N. J., who opened the speechmaking with a very lucid talk on the gardener and his vocation. He urged that if all men in the gardening profession could only grasp the potential influence for good, that the National Association of Gardeners could command by increased membership—say two or three thousand—no gardener who valued his own or fellowman's welfare would be outside the National Association. Mr. Ebel read a telegram from W. E. Maynard and a letter of regret from Chas. H. Totty, who was called to Philadelphia and who had he been amongst us would have spoken at length on the coming International Show in New York in March. The toast, "Our Society," was responded to in a very able speech by Ex-President Andrews. The new president also responded gratefully and promised all his energy in keeping the society in the high plane in which it has been kept by his predecessor. "The Seed Trade" was responded to by Samuel Burnett, of Burnett Bros., and by Al. Rickards, who kept up a ripple of laughter during his discourse. Edward Green spoke for "Our Guests," saying for himself and the others that it gave them infinite pleasure to be guests of so hospitable and respectable body of men as the gardeners and superintendents of Mt. Kisco and vicinity. The toastmaster spoke for the "Horticultural Press," maintaining that it today is the greatest friend of the employer or the gardener. The toast to the "Town Officials" was responded to by Thos. O'Brien, Commissioner of Highways, Bedford, N. Y., in a most able discourse. "Our Town" was ably responded to by T. J. Hartnett, of Mt. Kisco, who was vigorously applauded when in the course of his address he said "It is not sound policy to elect very wealthy residents to town offices, as they do not, as a rule, fill out the requirements of the minor details of their duty, nor come in close enough touch to the wants of the plain people." "The Lay Members of Our Society" was responded to by Dr. Plageman. "Our Host," by Mr. Churchfield, the amiable proprietor of the New Castle Inn, the whole company singing "He's a Jolly Good Fellow."

Interspersed between the speeches, songs were rendered from time to time by W. J. Collins of Boston, Thomas Ranger, Alfred Kast, M. R. Smith and Prof. Eggleston, the latter officiating also as accompanist. A vote of thanks was passed to Mr. Ebel for his unique qualities as toastmaster, and the proceedings came to a close with the singing of "Auld Lang Syne."

M. J. O'Brien, Rec. Sec.

ITEMS OF INTEREST IN BRITAIN.

The National Sweet Pea Society is endeavoring to secure a preventive and cure for the disease known in Britain as streak, which has caused sad havoc in many gardens. The society is offering a prize of ten guineas and a gold medal to the first person or society producing a satisfactory remedy.

In connection with the Anglo-American exhibition which is to be held at Shepherds Bush this year, a representative committee has been appointed to deal with the horticultural section. It is intended to pay special attention to the laying out of grounds, whilst flower shows and conferences are to be held during the season, which extends from May to October.

The death has lately taken place of Mr. John Mattock, of Headington, near Oxford, who was famed as an exhibitor of tea roses at the principal shows.

Jan. 19, 1914.

My Dear Sir: We enclose herewith check for another year's subscription to HORTICULTURE, which is a very valuable paper to all those interested in the florist "profession." We look to its arrival each week with renewed interest. May it continue to improve as in the past.

ARTHUR T. BODDINGTON

SEEDSMAN **342 West 14th St., NEW YORK CITY**

SEED TRADE

James Farquhar, of Boston who has been ill, sails this week for Porto Rico on the Coama from New York. He expects to return in April.

Chicago, Ill.—A new seed house is shortly to be opened at 331 West Randolph street, by A. S. Ringler, of the Ringler Rose Company.

Salina, Kan.—Edward Tatro has purchased the remaining stock of the Beebe Seed Company and will carry on the business.

The Bureau of Chemistry of the Penna. State Department of Agriculture has completed arrangements for the enforcement of the new pure seed law which went into effect January 1. H. E. Gensler, the chemist who will be in charge of the work, under supervision of Chief Chemist Kellogg, has returned from Washington, D. C., where he studied similar work carried on by the national Department of Agriculture.

CATALOGUES RECEIVED.

Leamon G. Tingle, Pittsville, Md.—Catalogue of Strawberry Plants, Small Fruits and Nursery Stock.

S. M. Isbell & Co., Jackson, Mich.—Seed Annual, 1914. Strong on vegetable seeds of high quality.

Geo. H. Mellen Co., Springfield, O.—General Illustrated catalogue of plants, hardy and tender, seeds, bulbs, etc.

Clark W. Brown, Ashland, Mass.—Catalogue and Price List of Gladiolus and Dahlia Bulbs. A well-selected, choice list.

Frederick Roemer, Quedlinburg, Germany—Wholesale Catalogue of Choice German Flower Seeds. An extensive list.

Otto Katzenstein & Co., Atlanta, Ga.—Trade Price List of Seeds of American Conifers, Trees, Shrubs, Herbs for season of 1913-'14.

United Refrigerator and Ice Machine Co., Kenosha, Wis.—Illustrated Descriptive List of Ice Machines, Refrigerators and Store Fixtures.

Samuel Fraser, Genesee, N. Y.—High Grade Fruit Trees. An interesting catalogue containing some valuable instruction and advice for planters.

Good & Reese Company, Springfield, O.—1914 Spring Trade List for Florists; Nurserymen and Dealers Only. Wholesale prices on miscellaneous stock.

E. Neubert, Wandsbeck, near Hamburg, Germany—Illustrated Wholesale Price List of Ferns, Hydrangeas, Begonias and Miscellaneous Greenhouse Plants.

Roman J. Irwin, New York—Florists' Wholesale Catalogue of Plants, Cuttings, Bulbs and Choice Flower Seeds. A very neat illustrated price list, pocket width.

L. E. Williams, Exeter, N. H.—1914 Price List of Collected Native Trees, Shrubs and Plants. The most desirable ornamental material is listed and quoted in quantity.

Dammann & Co., Naples, Italy.—General Price List of Vegetable, Flower and Tree Seeds, Plants, Roots, etc., for 1914. An interesting offering of seed novelties included.

Head's Bergenfield Nurseries, Bergenfield, N. J.—Descriptive Price List of Dahlias, Carnations, Chrysanthemums, Phloxes, etc. Varieties quoted represent the cream of their respective varieties.

Thomas J. Grey Co., Boston, Mass.—General Seed, Plant and Implement Catalogue for 1914. Neat and distinctive as ever. Attractive covers in sepia. Contents, 100 pages, the usual well chosen list.

St. Przedpelski, Plock, Polonia, Russia—Price List of Tree and Shrub Seeds. Printed in Russian, French and English. An interesting and useful catalogue for importers of tree and shrub seeds.

Coldwell Lawn Mower Company, Newburgh, N. Y.—"The Long Green." An Idyl, just right for a good laugh between bites. After reading it you will buy a Coldwell Lawn Mower or else die of regret that you didn't.

Iowa Seed Co., Des Moines, Ia.—Annual Catalogue for 1914. Established 49 years, this firm puts out a catalogue worthy of the approach of their golden wedding. It is a business book and will, no doubt, fill the bill.

J. Bolgiano & Son, Baltimore, Md.—General Price List of Garden, Field, Flowers and Lawn Seeds, Poultry Foods and Supplies. Fully illustrated and quite unique in arrangement. Also Poultry Catalogue for 1914.

R. Vincent, Jr. & Sons Co., White Marsh, Md.—Wholesale Trade List of Vegetable, Greenhouse and Bedding Plants. The firm issuing this tempting price list have been growers of plants for the trade for a generation and they know how to select the good things as this publication shows. Send for a copy.

W. Atlee Burpee, Phila., Pa.—Wholesale Price Catalogue for Market Gardeners, Florists and Farmers' Clubs; 150 pages. Burpee Annual for 1914; 38th year. Also, "The plain truth about seeds that grow." Both ideal catalogues, fully illustrated and introducing a lot of promising novelties for the coming season.

J. J. Wilson Seed Annual, Newark, N. J.—Seed Annual for 1914. Mr. Wilson, in establishing the new seed house which this catalogue represents, chose as his slogan, "The Best of Everything and Everything of the Best." This and other equally attractive maxims forms the top line on each page. It makes a very nice and well-balanced catalogue.

Knight & Struck Co., New York.—Catalogue of "Heatherhome" Seeds and Plants. An unique production in the line of floral catalogues. Bound in light blue, covers fastened with a silken cord. Much space is devoted to descriptions and the two hundred and ten pages are closely filled with descriptive notes on color, culture, etc., in fine type, without pictorial illustration. There is a brief introduction by Mrs. Francis King. Each copy is sent out in a neat box and the effect is distinctly elegant.

Arthur Cowee, Berlin, N. Y.—The Modern Gladiolus—The Glory of the Garden. This catalogue, devoted exclusively to the Gladiolus, is a very "classy" production. The introduction of pictures of spikes of choice varieties in natural colors on the reading pages is quite an innovation in flower catalogue making and together with the interesting text will do well its part in increasing the appreciation of and demand for this most brilliant of summer-flowering bulbs. The illustrations are exceedingly good and true to life.

NEWS NOTES.

New York, N. Y.—Schloss Bros., The Ribbon House, have removed from 542 Broadway to larger quarters at 31-33 East 28th street.

Fort Madison, Ia.—J. M. Auge has retired from the florist business. The business will hereafter be conducted under the name of J. M. Auge & Co., J. C. Auge, manager.

West Dighton, Mass.—J. Harvey Briggs has suffered considerable damage to his violet beds by the cold spell, which found his heating equipment inadequate to the strain.

Dorchester, Mass.—One of the most regretable cases of damage by the severe cold spell of last week was the freezing of a fine batch of cyclamen, about 10,000 geraniums and other spring bedding stock in the greenhouses of W. H. Tomlinson. The insufficiency of heating apparatus and the heavy wind is given as the cause. Mr. Tomlinson estimates his loss at twelve to fifteen hundred dollars.

CHICAGO FLORISTS' CLUB.

President French's Report.

Although we have had no special doings in the way of large exhibitions, etc., our club has enjoyed a steady increase in membership and everything is progressing nicely. There has been a wonderful growth in the Florists' Telegraph Delivery Association. The florists and the people are beginning to realize the advantages of being able to "telegraph flowers" to almost any part of the country and of having nice fresh stock delivered on time, without delay, worry or express charges. Publicity has been discussed from different angles, apparently resulting in more advertising in the daily papers, street cars, etc. Still, to my mind, there has been no concerted action by the florists to create more business, especially during times when stock is plentiful and prices reasonable. I notice that around the holidays when stock is scarce, prices high, and the demand heavy, the wholesalers and commission men will double and treble their ads. when they know that it will be practically impossible to fill their orders even at advanced prices. Then again, when there is a glut in the market, and I believe that most of the gluts are caused not by a loss of business, but by the output of the greenhouses being doubled and trebled—stock in full crop, fine quality, immense quantities, and no especial efforts being made to create more business to take care of the increased production—instead of big ads you will see ads cut down and hear the same old story: "The market is rotten."

The Price Problem.

The question is, what effect would it have on the market if the big holiday ads were used, and the public given the benefit of lower prices during these gluts? Would it pay? Would it move the stock? Would the public respond? Who would derive the benefit, the retailers, commission men or growers? Who should pay for the advertising? Some say you would never be able to get the prices up again. In answer to that we have only to point to what happens during the fruit season or the vegetable season. When the first ones come in, prices are high—people expect to pay high prices when stock is scarce; as the season advances the quantity, and as a rule the quality increases but the prices decrease. As the season is near the end the prices go up again. If these conditions are true with fruit and vegetables, why would they not be true with flowers?

Bargain Sales.

I believe much more new business could be created and more money made all the way round by the retailer, the wholesaler and the grower if more money were spent advertising "bargains" during these periods of over-supply. How much business would the department stores have after the holidays if it was not for their big advertising campaigns, price reduction, stock taking, etc.? Still if you will compare their price reductions you will find that they have not reduced their prices any more and often not as much as the florist, but they are making a noise—they want everyone to know and feel that his dollar will purchase $2.00 worth of stock, and they get the business!

Fathers' Day.

Senator J. Hamilton Lewis, of Beau Brummel fame, made strenuous efforts to have a Father's day legalized. Did he have the support of the florists? Maybe he did, but I did not hear about it. They should have been up on their toes and helped this good thing along. After the popularity of Mother's day a Father's day would naturally mean another big flower day. The florist should not only be on the alert and help further any such suggestions, but should be the one to offer them. The trade should get together and have that day set at a time when flowers are plentiful and the demand light. This could be done. Our friend J. Ham doesn't care a continental whether Father's day comes in December or June—it would not make any difference to him, but it would make a vast difference to the florist. The following story told by H. K. Adair, the western advertising expert, conclusively shows that silence is not always golden.

About Donkeys.

"A donkey once fell into a well. A fox saw him fall and running up looked over the well curb. 'O, help me out, good fox,' said the donkey. 'No, I can't do it,' the fox answered. 'I have not the strength, but feeding in a grove not far away I see an elephant; call him and he will have you out in two shakes. Now I must be off.' The fox hurried away, but the donkey said to himself, 'I am very weak from the shock; if I raise my voice to call this elephant my weakness will be aggravated. No, I will not submit myself to such a strain. It is the elephant's duty to come to me without calling,' and the donkey lay back in the icy water and died of hunger and cold. A year later the fox, passing the well, saw the donkey's skeleton and exclaimed: 'If in the transmigration of souls it ever happens that donkeys become men, then surely this donkey will become one of those merchants who won't advertise.'"

Flood Philanthropy.

Last spring the Chicago Florists' Club did more real good than is generally known. I refer to the time of the disastrous storm and floods which caused heavy losses to many florists in the devastated districts. We did not come to the front with a donation, as soon as the catastrophe had occurred, as it appeared that the sufferers were being as well taken care of at the time as possible, but a few weeks afterwards when men and women were struggling to re-establish their business, our club stretched forth a helping hand, sent a statement to the trade papers, who kindly gave it prominence, telling the flood and storm victims to write our secretary, stating what they needed to help them again start in business. We received some very pitiful letters but not one appeal for cash. What these people wanted was stock or material to help them get a new start.

Our members responded to the appeal by donating thousands of rose, carnation and chrysanthemum plants, bulbs, nursery stock, etc., besides pots, building material and glass. I am pleased to state that every appeal was taken care of and a surplus left to draw on. This was practical help given at the time that it was most appreciated. We have letters on file from these people, letters that came straight from the heart, conveying their thanks to this club for what it had done for them in their hour of need—letters that any organization might well be proud of. Gentlemen, I speak of this matter at some length because it shows how much practical help a society of this kind can give if handled in the proper way. These sufferers were not club members; with two exceptions, they did not even live in our state; but the assistance was

freely given and with our best wishes, I want again to thank our members for their prompt and liberal assistance which came as a ray of sunshine and gladdened many a heart bowed with grief. The Chicago Florist Club is to be congratulated upon having so many representative members who are willing at all times to give good substantial help in cases of disaster or urgent need.

Flower Show Topics.

I want to thank the growers for this beautiful display of carnations. I believe these exhibitions are a form of publicity that gets more publicity. The Chrysanthemum Society of America, in conjunction with the Horticultural Society of Chicago and the Chicago Florists' Club, held their annual chrysanthemum show at the Art Institute last fall. There was a splendid showing of both cut flowers and plants, but it seemed to me that the Art Institute is no place to hold a flower show. A few meetings ago the possibilities of holding a large tent show on the lake front in the spring was discussed, and a motion prevailed that our trustees draft a letter making such suggestions and mail it to the Horticultural Society for their consideration.

We ought to make preparations for a fall flower show at the Coliseum. The records of 1906 show that the paid admissions amounted to over $17,000, and the show was a financial success without any floor space being sold. Now that times are different, the retailer realizes its value and is paying for floor space at the big shows because of its advertising possibilities. If the proposition is handled right and advertised freely we ought to repeat the success of 1906 and then some. I heard it said that a flower show kills business. Look over your books of 1906 and see how the First National Flower Show of Chicago affected your business for that year, how it affected prices, and then you have a decisive answer that will satisfy you beyond a doubt.

If we intend to have a flower show this fall let us have a big one. See if we can't eclipse the record of 1906. Try to attend as many meetings as possible, bring some one with you and all join hands with the committees and make the coming year "a hummer."

CHICAGO NOTES.

The fern situation is unusual this year and the prices are higher now than at any time last year—$2.50 per 1,000. It seems, on account of the big supply in Wisconsin last summer many local wholesalers did not place their usual orders in the east. When the western supply ceased earlier than they had expected, many were found with no provision for the winter.

A FLORAL BURNS WINDOW.

Arranged in Honor of the Poet's Birthday and a Potent Attraction for Throngs of Admirers.

The Chicago creditors of H. A. Fisher Co., of Kalamazoo, Mich., held a meeting Tuesday afternoon to discuss ways and means of satisfying their claims against that firm. The Chicago market is estimated as losing fifteen thousand dollars and the Kalamazoo growers as much more. E. E. Pieser, representing Kennicott Bros. will go to Kalamazoo to look after their interests. Geo. Fisher has been the Chicago buyer for years.

Henry J. Stockmans, for seven years landscape gardener at the Chicago West Side Parks, has sent in his resignation to take effect Feb. 15th, when he will give his whole time to building up a business which he already has started in Chicago. Mr. Stockmans, who was born and reared in Belgium has followed his calling in many other countries, being three years in Kew Gardens in England, three in Scotland and France. Coming to America he was in Fairmount Park, Phila., and at the time of the St. Louis World's Fair he laid out the sunken gardens there. He came from St. Louis to Chicago. Mr. Stockmans is a great lover of his work and his skill in laying out the floor of the colliseum at the time of the National Flower Show is well remembered.

Visitors: Mr. Blackman and wife, Evansville, Ind.; H. W. Buckbee, Rockford, Ill.

NEW CORPORATIONS.

Savannah, Ga. — McCabe-Stafford Floral Company, capital stock, $1,500. Incorporators, E. F. McCabe, W. J. Stafford and Bryant Beasley.

Los Angeles, Cal.—The Van Nuys Nursery Company, capital stock, $25,000. Incorporators, C. B. Hewitt, E. W. Hewitt, W. F. Eilers, C. Lehman and H. A. Decker.

GARDENIAS

$1.50–$4.00 Doz.

We have quantity as well as quality, and in large lots we can quote special prices. All grades are perfect flowers. The difference is in the size of flowers and length of stem.

Flower Market Reports

BOSTON Trade is decidedly stagnant in the wholesale markets. Roses are scarce but nothing else is. Even on roses the call is largely for the cheaper grades and the fancy goods move with reluctance. Carnations are plentiful. They are disposed to accumulate and growers are wondering whether McKinley Day is going to help them any. Spencer sweet peas are leading the race in popularity bringing fully double the price of the old type, which, as Wm Sim predicted a year ago are pretty near their end, as a cut flower item. Violets are quite scarce, but they are not selling, the doubles being practically dead stock in this market now. Bulb flowers are slowly increasing in quantity and improving in quality.

BUFFALO Considerable improvement was shown in market conditions beginning on Wednesday last, and Saturday saw a good clean-up on about everything that was salable. The demand helped to consume a good portion of the carried-over carnations and as short roses are on the short supply this also helped the carnation situation to a great extent. Daffodils, tulips and other spring flowers are coming in more plentifully but the supply of lilies has shortened. Paper whites are still had in abundance and there is a good general supply of the usual staples. Weddings have come on again and the White Killarney is again in demand, while only ten days previous there was no call whatever.

CHICAGO The situation remains unchanged so far as roses are concerned. The shortage is more severe than before in years and prices are ranging as high as during the holidays. With the almost entire absence of sunshine, carnations are including a large percentage of splits and weak stems but notwithstanding this there are some really fine ones. American Beauties cannot be called first-class but there are enough to meet the demand, the long-stemmed ones predominating. Some excellent lily of the valley is offered. Tulips are coming a little more freely but there is no great quantity of them. Freesia is in fair supply. There are practically no home-grown violets to be had now and the warm weather makes eastern shipments rather uncertain. Some fine sweet peas are now being cut and are quickly disposed of. Lillies and callas are in fair supply. Orchids are too much in evidence and move slowly. Some good asparagus is coming from the south, both plumosa and Sprengeri, as well as good supply of home grown. There is quite a difference between the quantity of bulbous stock seen on the counters this year and previous years. The returns have proved that the quantity heretofore grown could not be sold at a good margin of profit and many growers bought fewer bulbs in consequence.

CINCINNATI Supply has been slowly decreasing since the middle of last week. Roses at the time of this writing are far short of actual needs. The growers all appear to be pretty well off crop. Both Richmond and American Beauties are better than they were. The number of the last named is not as yet very large but the appearance of the stock indicates that a good crop is about due. The carnation cut is adequate for requirements and includes a very considerable amount of stock of a high quality. Lilies are in good supply and sell nicely. Calla offerings are not very large as yet. Violets sell well but only the quantity of doubles is sufficient. Singles are very scarce. Sweet peas include many excellent blooms that find a ready sale. The cut of bulbous stock is not very large but is sufficient for requirements. Lily of the valley and orchids sell well in limited quantities.

(Continued on page 126.)

NEW CHRYSANTHEMUMS

Each season it has been hard for us to take care of orders, as a great many customers did not order till late in the season. This year we advise placing orders early. We have a splendid supply to offer, stock guaranteed.

Flower Market Reports

(Continued from page 126)

NEW YORK The unsettled weather conditions have not been conducive to either flower production or flower selling. The receipts in the wholesale houses are generally light and, although there is a little more activity in the market this week, as compared with last, yet it cannot be said that trade is up to what it should be at this date. If the demand were at all rushing there would be some scrimmages in the rose line, as the quantity being received is very limited. Of other things there are enough and of some there are too many. Indications point to a lightening up of the cattleya supply. The bulbous flower receipts are not yet unwieldy but the quality on some lines will have to be better before they become a competitive feature. Violets are still a disappointment in every way.

PHILADELPHIA Conditions have improved considerably—a larger volume of business and everything selling out clean at fairly good prices. As the new week starts in prices have gone up a notch or two. Beauties are particularly scarce, with demand excellent. Other roses are not so scarce except in the shorter grades and the call seems to run more on these than the long-stemmed. Carnations have been too plentiful since the new year but they are over the hump now and the prices are more like what they ought to be. Orchids are moving more freely, and while still plentiful there is a much better tone to this market. Gardenias have shortened up and are in better shape as to demand. Sweet peas selling well; quality fine. These are in excellent supply except in the orchid-flowering varieties. The latter are picked up very promptly on arrival and few are to be seen except early mornings. Violets are suffering from the severe weather which hurts their sale probably more than any other flower. Mignonette and daffodils are strong features of the market and are bringing fair prices. Camellias are in limited supply; they are being used more as a novelty than for intrinsic merit—as compared with roses.

WASHINGTON Quite a scarcity of flowers has been reported during the week. Prices remain much the same as they were during the holidays and in some grades and varieties the florists are almost glad to pay any price. The annual shortage of roses is already apparent; red roses are not being received in quantities large enough to fill other than a small demand. On narcissi paper white and Roman hyacinths the production far exceeds the call. Carnations are still selling at $4 and $5 per hundred. A moderate amount of gardenias are being received but orchids are quite scarce again. The business during the past week has been quite satisfactory. The word "satisfactory" as here used means that the florists are doing slightly more business than they expected but the volume done is nothing to boast about.

ST. LOUIS There was quite a good market last week as far as demand was concerned. The market was not crowded with anything except carnations. These have been coming in abundance as all the local growers are on crop, but it is just opposite with roses as they are all off crop now. As to other stock such as violets, sweet peas, Roman hyacinths, paper whites, etc., the market affords just enough except in violets, which have been off all season. Good smilax is somewhat scarce.

NEW YORK QUOTATIONS PER 100. To Dealers Only

PHILADELPHIA NOTES.

Wm. J. Muth, representing the King Construction Co. for this territory has moved his office to 112 North Lansdowne avenue, Lansdowne, Pa. (a nearby suburb of Philadelphia).

A new figure has appeared in our midst who promises to loom large in the affections of those who have advertising to sell. We refer to W. F. Therkilson, who has joined the Burpee staff. A big, pleasing personality, who looks good to your correspondent even if he has not yet handed out to him a good contract for HORTICULTURE.

Mr. and Mrs. John Burton have been resting at Atlantic City since their recent family bereavement. Mrs. Lee (mother of Mrs. Burton) who has been a member of the Burton household at Chestnut Hill for many years and who was well known to visiting members of our craft from far and near, passed away January 2nd, aged 97 years.

W. Atlee Burpee addressed the sales managers' Association of America at their annual meeting and banquet at Kugler's on the 19th inst. As the largest mail order seedsman in the world his words carried weight and were listened to with great attention. Stress was laid on the cumulative effect of continued advertising and also on the great importance of truthfulness of statements. One of the greatest handicaps to legitimate business he considered to be the fake advertizer, who destroyed confidence all along the line and much care should be taken in selecting mediums that rigidly exclude everything that looked the least overdrawn or shady.

Visitors—John Young, N. Y. City; Chas. H. Totty, Madison, N. J.; George Cruickshank, rep. R. & J. Farquhar & Co., Boston, Mass.; A. B. Clark, Milford, Conn.; H. L. Holmes, Harrisburg, Pa.; N. B. Keney, Le Roy, N. Y.; J. B. Agnew, Pacific Seed Growers' Co., San Francisco, Calif.; F. R. Pierson and J. R. Fotheringham, Tarrytown, N. Y.; F. H. Rogers, Alpena, Mich.

The following officers of the Rochester Florists' Association were re-elected for the third consecutive term at the annual meeting of the organization on Jan. 12: President, John Dunbar; vice-president, George Arnold; treasurer, W. L. Keller; secretary H. B. Stringer. Professor E. A. White, of Cornell University, spoke on the course that is offered at Ithaca in flower culture.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

HELP WANTED

WANTED—A good Rose grower, for a place of 50,000 ft. of glass, near Boston. Must be able to take charge in absence of foreman. Address "W. R. M.," care of HORTICULTURE.

GARDENERS WANTED—Man familiar with greenhouse plants and propagating; permanent position in Florida. Man for country place, employing one or two assistants; must be familiar with outside work; no glass. Man for small country place—one man only—some house work. Man for greens keeper, country club; only single men need apply. State age, experience and salary wanted. CARL RUST PARKER, Landscape Architect, 910 Fidelity, Portland, Maine.

SITUATIONS WANTED

WANTED—Young Englishman (age 25) requires situation as under gardener in private establishment. Eleven years' experience under glass. Grapes, peaches, melons, carnations, malmaisons, stove and greenhouse plants; excellent references. Apply by letter to BOX 605, Moosic, Pa.

FOR SALE

FOR SALE—Fresh from factory, new; 10 x 12, 16 x 18, 16 x 24, double thick. A and B qualities. Market dropped. Now is the time to buy and save money. PARSHELSKY BROS., INC., 215-217 Havemeyer St., Brooklyn, N. Y.

In writing to Advertisers kindly mention Horticulture

Personal

A. G. Fehr, florist, has been elected president of the Belleville, Ill., Retail Merchants' Association.

Adam Knaught, florist, of Saugerties, N. Y., celebrated his 85th birthday at his home on January 6.

Miss Kate Harris of the Memphis Floral Co., who has been seriously ill, is now convalescing at El Paso, Texas.

David Welch of Welch Bros., Boston, started for Old Point Comfort on Thursday, January 23, in hopes to restore his health.

Miss Gertrude Marie Louise Siebrecht, daughter of Henry A. Siebrecht, Jr., florist, of New Rochelle, N Y., eloped on Tuesday night, January 13, with Louis Meyer Bull, of New York, and the pair were married in Jersey City. The bride is sixteen and a half years of age and the groom is twenty.

E. S. Miller, of Wading River, N. Y., writes from Eatonville, Wash., at the foot of Mt. Rainear, that he has been enjoying himself to the limit since his arrival there on November 27 over the C. P. R. He leaves for the east, Feb. 1, and will stop off at Chicago, Pittsburgh and other points of interest.

We are very sorry to learn of the unfortunate accident that befell W.E. Chappell, the genial secretary of the Florists' and Gardeners' Club of Rhode Island a few days ago. Mr. Chappell fell while attending to some repairs on his greenhouse, breaking two ribs—one of them piercing the lung, it is said.

Announcement is made of the engagement of William Cotter, vice-president of the Montreal Floral Exchange to Miss Amy Rebman, of Danville, Pa. Mr. Cotter is the son of Lawrence Cotter of Lakeview Rose Gardens, Jamestown, N. Y., and a graduate of the Mechanics Arts High School of Boston. Miss Rebman is the daughter of S. C. Rebman, a well known steel man of Danville and Pittsburgh.

Cincinnati visitors: Ralph M. Ward, New York; Ellis Woodworth, representing The Sefton Co., Chicago; Meyer Heller, New Castle, Ind.

Obituary

Albert E. Brownell.

A. E. Brownell, proprietor of Seekonk Gardens, Seekonk, R. I., died on January 4, aged 48 years. He had been in poor health for a long time.

Eugene Corley.

Eugene Corley, a life member of the S. A. F., and formerly secretary and treasurer of the Green Floral Co., Dallas, Texas, was killed in an auto accident on Saturday, January 10, at Fort Worth, along with three other men. The car in which they were riding was struck by a switching engine at a railroad crossing.

Woonsocket, R. I.—During the severe wind storm Tuesday night, January 13, a large part of the roof of John N. Stobbart's greenhouses was blown away.

Do you raise early or late potatoes?

There's a difference between early and late varieties that should be considered in fertilizing.

For the early kind use 1,000 pounds per acre of a fertilizer containing 10%

POTASH

5% ammonia and 8% phosphoric acid. Under average conditions, 800 pounds of 3-6-8 is the most profitable for late crops.

Some growers double these amounts, for they are convinced that Potash Pays.

Caution: Be sure your Potash for potatoes on heavy soil is in the form of Sulfate.

Write for Potash prices and for Free books with formulas and directions. We sell any amount of Potash from a 200-pound bag up.

DO YOU KNOW VERMINE?

John Lewis Childs, Flowerfield, N. Y., writes:

"I suppose you will be glad to know that **VERMINE** is giving excellent satisfaction. Our greenhouse foreman says that it is the only thing that he has ever used that will kill white ants in the benches."

Valentine Burgevin's Sons, Kingston, N. Y., writes:—

"We wish to say that we find **VERMINE** an excellent thing. We used it on a bench planted with Smilax to kill root lice or maggots, which ate the roots, and after two applications our Smilax is taking on new life and has started off to grow."

The Gardner Nursery Company, Osage, Iowa, writes:—

"We will use **VERMINE** on our out of-door fields of strawberry plants if the inside test continues as satisfactory as it now seems."

W. N. Craig, Brookline, Mass., writes:—

"I have used **VERMINE** and found it effective against root maggots, cut worms, earth worms, ants and other ground pests."

VERMINE is applied one part to four hundred parts of water by thoroughly soaking the soil. It will protect your crops from the ravages of vermin under ground without the slightest injury to vegetation.

Mankato, Minn.—Neil Neilson, State street, one house.

Gallion, O.—J. A. Farnsworth & Son, one house, 32x100.

Johnstown, Pa.—T. Malbranc, three houses, each 30x300.

Woburn, Mass.—Mishawum Greenhouses, house 50x250.

Jamaica, N. Y.—A. L. Miller, range of vegetables houses.

Mansfield, O.—Stuhldreher Bros., range of King houses.

Honeoye Falls, N. Y.—Charles Fowler, Moninger house 20x50.

Charles City, Ia.—Sherman Nursery Company, one 300 ft. house.

Lord & Burnham are now erecting the iron work of a house, 80x600 ft., at Exeter, N. H., for W. A. McAlpine. The glazing, painting and piping of this house will not be taken up before March 1st. This is the third Lord & Burnham house to be erected for Mr. McAlpine. The first houses are each 60x400 feet. The plant will therefore cover 96,000 square feet, or nearly two and a quarter acres under glass in three houses. The greenhouse now building is, we believe, the widest house in New England.

Lord & Burnham Co. are also manufacturing a curved eave house for Thomas G. Plant. This house is to be erected at Ossipee Park, N. H. The house is curved. The side walls are parallel, but each are built on three different radii. This greenhouse is to be erected complete very early next spring.

DREER'S "Riverton Special" Plant Tub

The President Of Our Company Has Written Seventeen Advertisements

HE says it's high time you knew exactly the way Hitchings does business.

He seems to think we haven't told you enough about the seventeen main advantages about doing business with us. Or, saying it another way, we have talked too much about things in general and too little about things in particular.

You see I have been writing these ads. for the last eight years and at first what he said made me just a wee bit put out.

But after thinking it over, am now sure he is dead right. So look out for his first ad.

It will be straight from the shoulder.

Looks are Deceiving

HERE are two spoons, both the same size —same design—same weight—look exactly the same.

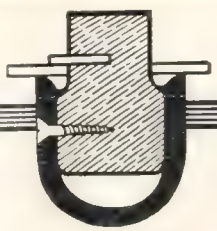
One is silver on the outside only. The other is silver both outside and in. One costs considerably less than the other, simply because it's worth less.

Carrying the comparison still further, take two greenhouses—both have curved eaves—both look like the U-Bar curved eave houses.

One is made with U-Bars.

The other isn't.

Looks are deceiving.



The U-Bar house costs more because it's worth more. It's a U-Bar house both inside and out.

The thing for you to decide is—do you want the original genuine curved eave house—the house built with complete galvanized steel frame of U-Bar.

Send for catalog. Or send for us. Or both.

Erected for George Eastman at Rochester, N. Y.

Best Commercial Novelty For 1914

Only new variety of plants awarded Certificate of Merit at the Nat'l Flower Show, N. Y., April, '13

New Scarlet Bedding Geranium

"Helen Michell"

This charming variety is by all odds the most brilliant and finest scarlet geranium ever put on the market. The blooms are gigantic and the number of flower heads on the individual plant is remarkable. It is wonderfully vigorous and hardy. Starts to flower early in May and continues uninterruptedly until cut down by frost. Even through dry hot weather it retains its brilliancy of color and great flowering qualities. It is of medium height, very compact with lustrous heavy foliage. The flowers are semi-double, while the individual florets are frequently 2 inches in diameter. We have already booked orders for some 30,000 plants. The stock is limited and we predict a heavy demand for "Helen Michell."

Read what two of the Greatest American Geranium Growers say about "Helen Michell"

Philadelphia, June 15th, 1912.

Gentlemen

Relative to the new Geranium "Helen Michell" which was shown to us a few days ago would say that we consider this variety a GREAT IMPROVEMENT over Alphonse Ricard. The flower is borne on a long stiff stem, is MUCH LARGER than the Ricard variety, and the color is superb. It appeared to us to be a very VIGOROUS GROWER and UNUSUALLY FREE. We have known of this variety for the past two years and think it will be one of the grandest bedders in commerce.

Yours truly,

ROBERT CRAIG CO

White Marsh, Md., June 10, 1912.

Gentlemen

We take pleasure in assuring you that we were very favorably impressed with the new GERANIUM "HELEN MICHELL." It certainly possesses merits of exceptional value to the grower, and we are confident it will immediately find its place among the leading class of Geraniums.

Respectfully yours,

R. VINCENT, JR. & SONS CO.

Prices: 25c each; $2.50 doz.; $15 per 100; $125 per 1000. Charge accounts invited.

LAWN GRASS

"The Right Seed in The Right Place"

We furnish grass mixtures for dooryards, terraces, lawns, athletic and polo fields, cemeteries, parks, country clubs, country estates.

Repeated laboratory tests on individual mixtures assure superiority of quality and growth.

Experience of over fifty years of successful seed business assures you of correct proportions.

Experiment has shown us that a mixture of the proper grasses is more satisfactory than an individual grass. Why waste your time and money experimenting? Let us furnish what you need.

NOTES ON CULTURE OF FLORISTS' STOCK

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

LIBRARY NEW YORK BOTANICAL GARDEN

Care of Violets

Plenty of air on all clear days is especially necessary for violets. No set rule can be laid down, only bear in mind to give all the air possible. During all mild weather it is always better to lower the fires during the day, lest the temperature should run too high, which would soon lower the quality of the bloom as well as shorten the season. It is much safer to run the house too low than too high. Another thing, if you do not watch them closely it is easy for the aphis, both green and black, to get a start before you notice it, so fumigate often.

Christmas Solanums

This is the proper time to sow the seeds of Christmas peppers and Jerusalem cherries. The former, also called celestial peppers, can easily be grown into sturdy, well-fruited bushes in 5 and 6-inch pots by next Christmas. The seeds are sown in flats and in a rose house temperature they soon grow up to good sized seedlings requiring 2½ or 3-inch pots in their first shift and a 4-inch pot for the next. In this they should be allowed to become firmly established before planting them out in the field. Single plants in a thoroughly root-bound condition when set out in the spring stand the lifting in the fall much better than any not so compactly rooted. The value of celestial peppers is greatly enhanced by frequent short shifts when grown under pot culture, but do not make the error of using a pot one or two sizes too large. Give them about 60 degrees at night.

Crotons

Crotons are extremely nice and useful plants, when well grown. To handle these plants is no easy work. They require continued watchfulness in ventilation, atmospheric moisture, watering, temperature and cleanliness. Great care in ventilation will now be needed to equalize as far as possible the temperature inside. During sunshine it can run up to 78 degrees and at night stay at or about 68 degrees. Keep them sprayed on all good days and damp down the house two or three times a day for they like a superabundance of moisture in the air all the time. On the other hand, never let it approach a point suggestive of humid stagnancy. Cuttings root readily in a pretty warm propagating bed, but do not take to the soil so readily after being potted up, unless a brisk bottom heat is again employed in connection with hot house conditions. Even after their second shift into three-inch pots the combination of bottom heat and fairly warm quarters is by no means to be despised.

Gardenias

The propagation of gardenias is only successful where a somewhat high degree of heat combined with a rather close and congenially moist atmosphere can be steadily maintained. During midwinter a rightly placed and carefully attended indoor propagating case comes nearest to giving full satisfaction. Cuttings should have a bottom heat of 75 to 85 degrees, with top heat 10 degrees lower. Keep the sand moist and warm and give them a spray every morning. Keep shaded and rather close until they are rooted. When their roots are about half an inch long pot them up. Good soil for these is one-half leaf-mold, one-fourth ordinary good soddy loam, and the remainder sharp sand.

Orchids

Orchids will be benefitted by a little shade before the middle of February. Where conditions make it possible this shading should only be given about an hour and a half before noon and the same after noon. The ideal orchid shade—and one that should be exclusively used whenever possible—is one of either lath blinds or cloth, the former being the best as they break the direct rays of the sun. When applying shade as a paint on the glass always avoid overdoing it. Just streak the glass so as to produce a light cloud-like effect. Keep the houses fairly well damped down so as to keep the atmosphere in a moist condition. From this out the plants will require more water. Those that are not in flower should have a syringe every morning and be given some ventilation.

Starting Lobelias

Start a good batch of lobelias now Double lobelias—stock plants—will soon be covered with a fine lot of cuttings. These can be taken off and placed with carnation or chrysanthemum cuttings. Sow some seed of the trailing varieties now and they will come in handy.

Foliage Plants

The end of January and up to the end of February is an excellent time in which to do any necessary overhauling among the pandanus, crotons, dracænas, marantas, and other foliage plants. The bulk of these need an annual potting or surface dressings. Frequently plants can be shaken out of the pots, the balls picked over, fresh drainage given and some new surface soil and the same pots will do for another year. Nearly all do well in a compost containing some fern fibre or peat in addition to loam, but this is not really necessary. Marantas like some peat, as do authuriums such as Andreanum and colored varieties like Veitchii, but crotons and dracænas do well in pure loam with a little old manure and sand added. It will be necessary to give a light shading to some of the colored-leaved plants now to prevent scorching. Be sure to make it light, however, as we are still likely to get considerable dark weather. The young stock rooted during the present winter should have the benefit of some bottom heat and be kept freely syringed on all good days.

Mr. Farrell's next notes will be on the following: Abutilons; Calceolarias; Care of Mignonette; Pelargoniums; Sowing Asters; Seeds to Sow Now.

Do You Want To Be An Artist?

Did you ever read of the famous Persian carpet of gems, captured by the Saracens? The ground work was of rich brocade woven with silk, mingled with threads of gold. This carpet was one of the marvels of the world. It was four hundred and fifty feet long by ninety feet wide. It was designed to imitate a garden of flowers. Thus earth's richest gems were made to pay deference to floral loveliness. The leaves were formed of emeralds and other green stones, while the buds and blooms were composed of pearls, rubies and sapphires and other rich gems of fabulous worth, the cost reaching to a hundred millions.

The one who can put a beautiful landscape on canvas, who can paint the carnation or the rose so as to faintly represent them and who can arrest the procession of flowers as they pass by, and put them on perpetual exhibition is a genius. Any man who could go into our great floral parks and put the varied expressions of the peony, the phlox, the gaillardia and columbine, with the radiant and stately delphinium, upon a canvas so the whole scene would represent a perpetual summer, would immortalize himself. He who copies nature most faithfully wins the greatest renown. But the original transcends the copy, and you can produce the original, while the artist can be at his best only a feeble imitator. Take a live flower in all the prodigality of its loveliness—a living, breathing thing, exhaling that delicious fragrance. When it goes into the picture it can only be a corpse of itself. It cannot breathe—no aroma floats around it. It is dead. You can stand before the very highest productions of art in the effort to portray the floral world, and you are not in the presence of reality. You simply see the effigies of things beautiful. So nature rises supremely above art, and the painter can only touch the hem of our garments.

Did you ever watch the flowers as they were making their toilets? No lady of fashion displays more exquisite taste or greater care in adornment. There must be a touch here and another there. The outer petals must be just so large, the inner must wear just such colors. Watch the La Tulipe peony unfold. Did ever maiden before her glass show greater skill or pay more attention to detail. First you see a swelling bud, the surface interlaced with green and red. Then the ball expands, bound in bands of delicate pink and crimson. Look again, what a marvel of loveliness! Now the ball opens showing a lovely form of delicate flesh and carmine. Now it breathes and the breath has such sweetness. You look again and it is changing. At first it is the blush of the morning; then comes purest white with now and then a dash of red, and slowly it fades away dying so gracefully and by its side another is going through the same process. Look around you, see the columbines, the lilies, the majestic Oriental poppies all busily at work, intent as blooming girls to put on their choicest garments. You can call these things into life, but where in all the wide earth is the genius who can transcribe this work—these everchanging robes of beauty—yea, the life of these radiant hosts that put themselves on dress parade to reward you for your interest on their behalf? Never warm-hearted maiden in the radiant glow of her first love ever tried to make herself more attractive than these dainty flowers, which array themselves in all the witchery of their loveliness, that they may give you welcome.

What would you think of a picture on a vast scale 100 by 200 feet, every portion of which was aglow with the clearest and finest representations of the choicest garden of flowers? Such a production would put a man at the very front of his profession. A building would be erected for it and crowds would come to visit it. What if he could so reproduce them that the spectator would breath their very breath and could see them making their toilet! Now it is possible for you, my friend, be you man or woman, boy or girl, in one-tenth of the time it would take to train a painter, to reproduce the living forms in all their delicacy, with the tints of the rainbow woven into their garments with touchings and pencilings and tracery, far more exquisite than ever came to human genius.

See that Oriental poppy. It is seven inches across. It is a flame fashioned into a flower of dazzling brightness. Look within. See those delicate, tremulous stamens. See that seed pod. Could human skill mould its equal? See those pencilings all done up in jet. Put it on canvas? No! Such an object is the despair of the artist. What an immense amount of the highest skill nature displays in making that single flower and yet last year you got a little root like a parsnip, the size of a pencil, and lo, there is your reward. Your skill and success are such no human skill can fairly represent. So you are an artist, far transcending the mere copying art. All around you are those masses evoked by your skill. No deft hand, however, well-trained can produce them. You see an interpretation of God's love to man. Every radiant, graceful form is but an expression of His precious "thoughts" to us. You may never be a painter but you can be a florist. With a little effort you can take a piece of unsightly brown earth for your canvas and put upon it a fairer scene than ever fell from painter's brush. This is not all. You stand in the very gateway of the eternal beauty. You are a co-worker with God, with the great artist who paints life, who puts the resplendent bow on the brow of the storm, who hangs the mantle of splendor on the sun, who tints the mountains of cloud with amber and amethyst, as they stand sentinel of the dying day. Is it not wonderful that this Artist of everlasting beauty will come down and work with you, and second all your efforts?

You plant the seeds and bulbs, and wield the hoe, and the simple instrument is a wand in the hand of a king. You touch the earth and miracles of beauty spring up. Then the unseen brushes begin their work. In the sweet, still and dewy morning, in the calmness of the night, and in the heat of the noon day He works with you.

Plant the rose, the peony, the tulip and the columbine and care for them, and lo, the silent partner comes without noise or heraldry, and the blessed work goes on. Soon a thrill comes to you. You feel the honor of it, the glory of it—this partnership with Him who paints the splendors of the suns. All unconsciously you feel an ache and eagerness as though some unknown pressure were brought to bear upon you, and you are mightily moved with the fact that it is the yearning of God to reveal Himself through your brain and hands and hoe. He wants to be introduced to the world so people can understand him.

Yes, in a short time you can rival the splendor of that famous carpet which was the world's wonder and for weeks revel in its delights, allured by its resistless fascination. How you will rise in your own estimation—thankful that you can invoke the beauty of the Lord to glorify your garden of delight.

C. S. Harrison.

York, Neb.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur C. Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Pale Green Foliage on Beauties

We have a Beauty house which has about five hundred and fifty plants. About fifty or more plants, from the tips down, lose their color, turning a very pale green, and then again there are other plants whose shoots are apparently healthy that run blind and lose their leaves quite heavily. These diseases, if they are diseases, have only been noticed in the last two weeks or so, to my account.

Three weeks ago we gave the benches a top dressing of soil about an inch in depth, mixing wood ashes and Clay's fertilizer in the soil. Previously there was a light top dressing of cow manure. This was rubbed over before the other dressing was applied. The plants got a little drier than usually, for the first watering after the soil was put on.

Would you please tell me if we have made any mistake in applying this top dressing, to cause either one of these troubles? If so, kindly tell what to do? We have grown roses in this house for ten years and this is the first time we have noticed these cripples so bad.

W. H.

Penna.

In reply to inquiry, would say that the grower will find that the mulch referred to had something to do with it. Wood ashes when unleached, i. e., when they have never been allowed to soak or get wet, are a good strong fertilizer in themselves, without being mixed with a strong fertilizer like Clay's. The inch of mulch applied, if the plants were not in condition to take it, would certainly be harmful, and likely cause the plants to behave as they did. To help the plants recover, a good watering or two to wash some of the chemicals out of the soil, then a light dose of lime, and keeping the plants on the dry side for a while will greatly help them to start again, although if the houses are very badly affected it will not pay to bother trying to bring the plants around. To insure a crop for June and July, or perhaps earlier, we would recommend that the grower cut some of the plants down to about three inches. Then remove some of the loose surface soil, and not water the plants until after some growth begins to show. Syringe very lightly, and from the back of the bench to the front, so as to be sure and not get them too wet. The first shoots will no doubt produce buds at once, but these should be pinched as soon as they are large enough to be seen. If possible remove these with one leaf, although this is not always possible. If these buds are removed in time the shoots will hardly stop growing. As soon as growth is started the plants can receive a little water. Begin by watering a little around each plant, and gradually enlarge this circle. As soon as the whole bench can be watered, apply a little coarse manure or rough sod to hold the water where it is put. Then when growth gets up to the first wire, either liquid manure or a mulch of cow manure can be applied. This depends on the weather; if cloudy a little weak liquid will do, and if the weather promises to be clear for a while then a little well decayed manure and bonemeal can be applied. Should too many shoots appear remove some of them, saving only about eight or ten. Be sure to cut the plants low enough, for if they are cut too high the growth will be too weak and of little account. Many fail in treating thus, just because they did not cut low enough. We would not recommend using either wood ashes or Clay's on Beauties, unless the nature of the soil warranted it. Experiment for a year or two on a few plants, and see what the result will be. There is nothing that will take the place of good cow manure when it can be had. The grower does not mention the depth of the soil in the benches. We think there is too much, our experience being that Beauties behave better when there is less soil in the benches, four inches being quite enough. It is too late to remove some of it at this season, as the roots would be disturbed too much.

Potting Cuttings

As soon as the roots begin to show very nicely in the sand, the cuttings should be potted at once. Use a rather light soil for this purpose, for heavy soil will be hard for the young rootlets to penetrate, and a good many will die. If the soil is a heavy clay, a little leaf mold or old, finely decayed manure can be added to make it more open and light. See that there is plenty of crock in the bottom of the pots to insure perfect drainage. Be very careful not to lift any more cuttings out of the sand than can be potted at once, as air will hurt the young rootlets if they are exposed any length of time.

Placing the Pots

As the cuttings are potted they should be placed on the bench at once, taking care that all the leaves are pointed one way. There is no special way to do this, and they can be placed so that they can be syringed and watered to advantage. Needless to say they should never be placed so that they will shade one another. This can be done by letting each leaf come between the pots back of it and not straight back into and over the cutting back of it.

Watering

All watering should be done quite early in the day, and on clear days only. If it is necessary to water on cloudy days, water so that the cuttings will dry off as good as they can under the condition.

Care of Newly Potted Cuttings

If the temperature in the propagator was raised the least little bit, the cuttings will not feel the change so much, and after five or six days in the rose house, will be perfectly at home. All newly potted cuttings should be heavily shaded with newspaper every clear day, and if the day is only partly cloudy a light covering of single thickness of paper will do. These coverings can be applied later every morning and removed earlier in the evening, until at the end of a week it can be left off altogether. Be very careful not to get the cuttings too wet or they will damp off. Syringe very carefully every time chance will offer with a steady stream of water. Do not use too much pressure, or some of the cuttings will be loosened in the soil, and once they are loosened they will seldom amount to anything.

The poetic side

We are privileged to present in this issue another inspiring prose poem from the pen of our gifted and venerable correspondent, Rev. C. S. Harrison. Where can we find in the whole realm of commercial horticulture such an artist in word painting—such a master of heart-thrilling expression and beautiful imagery? It will do us all good to read it over and over again, turn aside for a little time from the worthless small talk and shop gossip which is assumed by many to be the ideal reading matter for the average florist and see if we can't imbibe some of the fervent enthusiasm and devotion to the beautiful things of our business which so animates and inspires this "grand old man" of Nebraska horticulture.

Selling park flowers

Commenting upon the protest of the florists of Memphis, Tenn., against the alleged action of the park commission of that city in selling flowers to the citizens, the Memphis News-Scimitar well says that the surplus flowers and plants might better be used in adorning the grounds of the various eleemosynary institutions, both municipal, denominational and private, and that in beautifying the hospitals and public schools the park department would be taking a humane and public-spirited course. On general principles, the florists of Memphis or any other city are justified in objecting to business competition by any public institution or department, but we are happy to say that occasion for complaint on this score is very rare indeed.

A grave mistake

In these days when the American people are just awakening to a realization of the reckless destruction of their forests and the frightful rapidity with which their beautiful native shrubbery and wild flowers are being exterminated by mercenary despoilers, it is deplorable to read in a New Hampshire paper a lengthy article descanting upon the money to be made from tearing up mayflowers and checkerberry stems and cutting off the mountain laurels for the dollars that might be realized from their sale. Then comes a Worcester, Mass., paper in approval of the rapacious sentiment and calls attention to the fact that all these things abound still in Worcester County, advising the organization of the unemployed for the purpose of collecting them for commercial purposes—practically urging the devastation of their country and the sale of their birthright "for a mess of pottage." On the other hand, we have the Massachusetts Horticultural Society awarding a medal to the town of Ashby in recognition of its preservation of its mountain laurel, New England's loveliest shrub. Worcester County boasts a horticultural society of long standing and there is one in New Hampshire, too. There would seem to be a good opening for both of these organizations to do some very much-needed educational work in their respective fields and it might, under the circumstances, be expedient and opportune for them to start in first on the daily papers which advocate a course so reprehensible.

GRAPE CULTURE UNDER GLASS.

(A paper read before the Westchester and Fairfield Horticultural Society, by Wm. Morrow.)

Let us begin with the border. I have had some experience with three different kinds, viz: inside, outside, and a combination of both, with an arched foundation under the front of the house, which allows the roots of the vine to ramble in either direction, the vines being planted inside. This I consider the best for second or spring starting, but for early forcing, the inside border has the advantage of the roots being protected from the cold compost outside, at a time when the vine is in a brisk growing temperature.

The make-up and material of the border I will pass over at this time, except to say that thorough drainage is the most important part of it. As to the planting, I prefer a young vine that has just filled its pot with roots for summer planting. This can be set in place without any check to its growth. Two-year-old dormant vines, such as we get from Europe, should be taken to some convenient place where they can be carefully shaken out and washed clean with hose, both root and top, and then planted at once, spreading out the roots to their full length in planting. This washing should be done at some distance from the grapery, to protect that place from undesirable citizens. These vines can be cut back to the desired length. From twelve to twenty inches, according to strength, is a good length to leave them. The cuts should be gone over with Thompson's Styptic or shellac, which will prevent bleeding. When this has had time to dry on the cuts, one good watering is in order, which will likely be all they will need until the young growth is a foot or more in length.

A fine spray from the hose should be given every dark day, and several times on bright days. It often happens that a young vine will make much heavier wood up the trellis, than it will in the first two feet of its growth. This can be helped to some extent by pinching out the top at a length of five feet, so that the leaf you leave is not more than one inch in size. This should not be pinched again until the end of the season. Weak laterals will start and should be allowed to make a few joints before pinching, or rather should not be pinched at all unless one of them happens to be getting too much headway at the expense of the main rod.

All of these shoots should be cut clean off at pruning time, as it is at the side of where they grew that the flowering shoot will come. If fruit is wanted the second year, one or two laterals could be allowed to hold their flower. These shoots will draw to the glass, which should be twenty inches from the trellis. Pinched at two joints ahead of the bunch, all the sub-laterals should be rubbed off between the bunch and the main rod, except the one opposite the bunch, which should be allowed to remain, but pinched to one leaf at a time. As soon as the wood of the young shoot will stand to be bent, they should be brought down a little at a time until they reach their proper place on the wires, in order to secure a good sized flower, which should make a large bunch.

A little manure water can be given about a week before the flower opens. This water should not be stronger than cow manure, as the active young roots can be checked at this stage, and both leaf and flower would be scorched. During this stage the temperature should not fall below 60. It may run up to 90 by day with strong sun but the floors and return pipes should be sprayed several times a day or the pollen will get scorched, and the set in that case is just as poor as a dark weather set, but with plenty of air and careful dampening in sudden sunbursts the longest bunches will set right to the tips. Care should be taken not to wet the flow pipes at this stage. As soon as you are sure that the set is complete, a good wash with the hose should be given and continued every bright day until color commences.

Black Hamburgs and such like varieties should be thinned as soon as it is possible to do it, because if the bunch gets close, the water will lodge there for several hours and you will find rusty berries and spoiled bunches. Muscats can be left until the berries are much larger, as so many of them are not properly pollinated that it is better to go over them a second time than to go too severe on them in a small state, until you can be sure of their condition.

When the berries are commencing to color, or the second swell, a good dose of sheep manure water seems to help them along. Nitrates in careful hands can also be used and will do good if not overdone. Don't put them in careless hands unless you court disaster. I have seen a [illegible] ruined by the use of nitrate of soda. You may get a good crop for a year or two, but you will have to replant and make a new border.

A TRIO OF TOTTY NOVELTIES.

CHALDON. M. DROUARD, LA PACTOLE.

AMERICAN CARNATION SOCIETY

Annual Meeting and Exhibition Held in Cleveland, Ohio, January 28th and 29th.

Buffalo, N. Y., Was Selected as Next Meeting Place — Officers Elected Unanimously.

The annual meeting and exhibition of the American Carnation Society, was held at the Hotel Staettler Cleveland, Ohio, Jan. 28 and 29. President R. T. Brown presided over the opening session, Wednesday evening, and presented the following address:

PRESIDENT'S ADDRESS.

For the twenty-third time we have met as a Society to do honor to our divine flower, the American Carnation. Our meeting this year must be considered a memorable one in the history of the Society, inasmuch as it will see the award of the first Dorner medal to the originator of the best undisseminated seedling carnation, entered and scored for this award at a previous annual meeting. The conditions under which this award is made are somewhat stringent, and I believe that this medal should be considered as the very highest award in the power of the Society. I would point out to raisers of seedlings the great advantage to be gained by entering the preliminary class for this award, all seedlings of promise. It seems likely that this class will become one of the most prominent at our exhibitions. A new and interesting feature of our exhibition this year is the table decorations, the staging of which shows the possibilities of the different varieties now under dissemination. It is to be hoped that this innovation will be extended along decorative lines in the future.

Representation at New York and San Francisco.

At the summer meeting of the directors and officers of our Society, it was voted to give our hearty support to the approaching Spring Flower Show to be held in New York, to the extent of taking charge of the staging and judging of the carnation section. The prize schedule is an attractive one and should appeal to every member, and I hope to see our Society strongly represented in the exhibits. We have not obligated ourselves in any way financially and I would suggest that this Society offer a special medal, or a cup, for award in a class to be decided upon at this meeting. An undertaking of this kind, in the greatest consuming city on the American continent, should certainly receive our very strongest support. Some sort of a representation in the way of an exhibit at the Panama-Pacific Exhibition in San Francisco next year might be deemed advisable, and the subject is one well worthy of discussion. I would recommend that the Society give serious consideration to the matter, and believe that our friends on the Pacific Coast will be willing to aid us to the utmost of their power.

R. T. Brown.
President, American Carnation Society.

Color Classification.

There still seems to be some difference of opinion in regard to the color line as applied to flowers on exhibition. Many of us think that the line as now drawn is satisfactory for our purpose. Notwithstanding, there may be some better plan than the one adopted of using a standard disseminated variety of carnation as representing the limit of a range of color. If anyone has a suggestion to make, I think it should be well received by this Society. It could be discussed at the present meeting and, if found worthy of adoption, put into effect. It is certainly very desirable that our standards in this respect should be beyond question.

"Gluts."

Carnation growers have, in the last year or two, suffered much loss through "slumps" or "gluts" in the market, carnations being the first subjects to feel the influence of a short demand. Is this because our markets are too greatly centralized? Would it not be well to encourage a local shipping trade in our growing centers, and thus remove some of the congestion? These "slumps" seem to occur more frequently, and when the market is low it seems to me that carnations are the first to feel the depression.

Proper Packing.

A general improvement in the method of packing carnations for the market might result in increased value of the product. The present practice of bunching has a tendency to cheapen the appearance of the flowers, and they certainly do not have the same splendid attractiveness that roses have when opened, or any other flowers shipped into market carefully packed in layers with protection between. When opened, a box of flowers, packed in this manner, presents a pleasing appearance to prospective buyers. It has always seemed to me that the bunching system is wrong. When in bunches carnations are presented to view in much the same way as outdoor flowers grown at practically little cost, and most of which, in times of large supply, pass in quantities to the refuse dump.

Elements of Popularity.

I have noticed, in trips made through retail sections in New York recently, that none of the leading stores display carnations. Roses, orchids, lily of the valley, and other choice flowers are prominent, but carnations are conspicuous by their absence. If there is a decrease in the popularity of carnations, is it because our retailers are not giving these flowers the prominence they should have? Is, as some claim, the carnation losing popularity because of lack of fragrance or keeping qualities? It may be that our esteemed past president, Fred Burki, was prompted by an observance of the latter characteristic, to offer his prize for the vase of carnations presenting the best appearance at the close of our exhibition. Whether it is so or not, the fact remains that appearances would warrant our thinking so.

Plant Deterioration.

We have heard a great deal of late

in regard to plant deterioration in many of our standard varieties. Are they deteriorating? It is a question. We may go to some establishments and find certain standard varieties looking very poorly, while in others we may see the same varieties finished in a manner that leaves nothing to be desired. May not any difference be due entirely to methods of growing, chemical changes in soil, or some other cause?

Duty to the Society.

When we consider the large number of carnation growers in the country, it is to be deplored that so few of them think it well to become members of this Society. It cannot be that the question of the amount of dues is responsible, for they are small indeed. It must be a lack on the part of many growers to realize the tremendous amount of work done by the Society in the direction of the improvement of the standing of the carnation, and the great benefit to be gained through organization. It is not an individual benefit which anyone might receive from organizations of this character, that should be looked for, but rather the general good and high standing of our business, which is best obtained by such a body as our own. Can we not increase our membership, at least to a point which shall make our Society more thoroughly representative of the whole trade? It might be possible to compile a list of growers of carnations in this country and Canada, and when the same is available, our secretary could send out a letter appealing to such growers who are not already members, to come into the fold. This is merely a suggestion.

The Program and the Outlook.

Our program for the meeting embraces essays by some of our well-known growers, on subjects which are very pertinent to the Society's work.

It is pleasing to note that some of the spirit expressed at our former meetings is again manifest. We all remember the very interesting papers and discussions which entered into our Society's work in years past, and many of us have been benefited through the information thus brought out. While, of course, a great deal of the formative work of the Society has been accomplished, new theories and ideas are advanced continually, and there could hardly be any better time for their consideration than at our annual meeting, when they could be discussed by some of our most noted growers.

It may be that we have reached the highest point of development of the carnation, as regards size, but no doubt there are many lines of improvement open, among them increased productiveness, improvement in color and more variety of color, and certainly there is need for the development of greater fragrance in our seedlings. This subject was touched upon by our ex-president at our last meeting.

I hope that the sessions of this convention will be well attended and that all in attendance will feel free to discuss the many questions which may arise, and that our deliberations and decisions will be the ultimate benefit of the Society so dear to us.

SECRETARY'S REPORT.

Secretary A. F. J. Baur then read the following report:

Your secretary begs leave to report on the past year's work as follows:

We are pleased to report a slight increase in the membership this year, instead of the decrease suffered each year for several years past. We now have 285 annual members and 12 life members in good standing; 36 of these owe for 1913. Since the last report 37 new members have been taken in and five old delinquent members have paid up. Thirty-two have been dropped from active membership on account of failure to pay the 1912 dues, so that at the present time we have an increase of 10 active members over last year. This seems to be getting back to the old order of a slight increase each year.

Since the last audit was taken, the secretary has collected moneys as follows:

Membership fees	$521.00
Advertising	265.52
Dorner Fund	11.29
Miscellaneous	799.00
Total	$1,596.81

A. F. J. Baur.

Secretary, American Carnation Society.

All of which was turned over to the treasurer and his receipt taken therefor, except $101.50, which came in while the audit was being taken. This includes $708.00, the amount of the cash premiums awarded for carnations at the National Flower Show in New York last spring and which the management turned over to us for distribution.

The books of the secretary and treasurer were audited by a professional accountant and found correct, as is shown by his report, which will follow the report of the treasurer. All accounts owing by the society were paid promptly by the treasurer on warrants drawn by the secretary and signed by the president.

The annual report was printed and distributed among the members, as is customary. The schedule of premiums for this exhibition was delayed slightly on account of several matters which needed to be adjusted at the time of the fall flower show.

Five new varieties were registered with this society since the last report went to press. The register is gradually nearing completion, although we are still getting additional data which is lacking. Our thanks are due the trade press for printing gratuitously all matter given them for publication, and assisting in gathering information regarding some of the varieties we intended to drop for lack of data.

The change in the method of conducting our meetings seems to have stimulated interest and is no doubt at least partly responsible for the improved condition of the membership roll. The plan of relieving the local contingent of all financial responsibility is meeting with general approval and should cause our conventions to be in great demand. We hope this year, to gather all the information possible, in the way of attendance, expenses, etc., for use in arranging for future meetings. The local committee has labored harmoniously for the success of this meeting and our thanks are due them for carrying out so completely the wishes and instructions of your officers. They deserve special commendation for the display of retail work, put up here. Our thanks are also due the growers who donated the blooms used for this display.

The Board of Directors held its midsummer meeting in the S. A. F. & O. H. convention hall at Minneapolis, Minn., on August 21st, 1913. A report of the transactions will be read at this meeting for the purpose of getting suggestions on several matters and your approval of the board's action in regard to the Medal of Merit.

TREASURER'S REPORT.

Treasurer F. E. Dorner's report was presented as follows:

EXPENSES.

Paid per orders on Treasurer	$1,501.78
Balance cash on hand Jan. 20, 1911	780.04
	$2,284.82

RECEIPTS

Balance Feb. 28, 1913	$630.84
Received cash	1,653.98
	$2,284.82

PERMANENT FUND

Balance Feb. 28, 1913	$2,000.00
Invested at 4 per cent	

DORNER MEMORIAL FUND.

Balance Feb. 28, 1913	$1,018.71
Interest to Jan. 1, 1914	41.13
	$1,059.84

PAID OUT.

Paid in medal for 1913	$18.71
Transferred to General Fund for 1914 Medal	40.00
	58.71
Balance, 4 per cent interest	$1,001.13

F. E. DORNER, Treas.

The auditors then presented their report confirming the same.

Report of directors was next read by the secretary and in accordance with the recommendations in the same, Peter Fisher was awarded a special medal for having produced Beacon.

NEXT MEETING PLACE.

Buffalo was selected as the meeting place for next year and the officers were then nominated as follows; all being chosen unanimously.

NOMINATION OF OFFICERS.

President S. J. Goddard; Vice President, W. F. Kasting; Secretary, G. F.

J. Baur; Treasurer F. E. Dorner; Director Fred. Burki; Judges Willam Nicholson and E. A. Stroud.

Joseph H. Hill then read the following paper.

Productiveness of the Standard Varieties of Carnations and the Cost of Producing Blooms.

After having had the pleasure of reading the interesting and instructive symposiums on the Carnation that have appeared in our various trade papers, it may seem like occupying your time in this meeting with something already threshed out and clearly understood by all, but the secretary of our society has been familiar with the fact that we keep a careful and detailed account of the producing powers of the various carnations grown on our place, and that is the reason he has asked me to prepare this paper.

It is just as essential to success for the carnation grower to keep tab on his varieties and discard the drone as it is for the successful dairy man to rid himself of the cow which fails to produce the required number of pounds of milk per year, or the up-to-date poultry man to chop off the head of the hen which fails to "come across" with her allotted number of eggs.

These figures which I will proceed to give you of the productiveness of the so-called standard varieties are compiled from an accurate record of each day's cut of blooms, and is absolutely free from guess work. No account was kept of flowers cut before they had attained character enough to be marketable. On sorts that are accustomed to "split" we have kept a separate record and were able to tell at the end of the season the percentage of imperfect flowers.

Let us consider first that grand old variety Enchantress which, with its long list of sports, constitute over 50 per cent. of the total plantings of carnations in this country. From Enchantress plants benched the 15th of July, 1912, the yield was 14.6 perfect blooms per plant and 2.8 with split calyces but saleable flowers. From White Enchantress our yield was 16 perfect flowers and 1.6 "bursts" per plant.

White Wonder, that peerless white, heads the list for productiveness with an average of 16.6 good flowers, and 1.1 faulty ones per plant. From these same Wonders we took during December, January and February, an average of four cuttings; had these early cuttings been allowed to go up into flower, it would have increased the average of this variety to 21.7 or nearly 22 flowers per plant.

Next comes Beacon with a yield of 14.2 perfect and 2.4 split flowers. Our Mrs. C. W. Ward plants produced an average of 12.3 blooms that were perfect and 1.2 that were not high grade.

The general impression is that this superb variety is a little slow in production, but even so, it makes up in quality what it lacks in quantity. The increased price received for this carnation when it is well done reimburses the grower by coming well up to the average in return of money per square foot.

Rosette, being a second year novelty last season, was robbed of a good many cuttings, and taking that into consideration an average of 14 blooms per plant with not enough split flowers to even mention speaks well for this new dark pink.

Among the varieties classed as non-splitting come **Gloriosa** and **Pink Delight.** These two wonderful introductions of the Dorners ran a "neck and neck" race throughout the season with Gloriosa, much to our surprise, showing 13.2 flowers cut from each plant and Pink Delight with 13 even.

F. E. Dorner.

Treasurer, American Carnation Society.

The grower, by planting these two varieties closer on the bench than the heavier growing types are set, is able to realize financially per square foot as much, if not more than he does from his freer sorts.

The commission man, who is onto his job, as well as the grower who markets his own product, knows that the average buyer will pay more for Gloriosa or Pink Delight because they give tone and class to his carnation display.

White Perfection with us is not so productive as White Wonder, but its purity of color and symmetry of form, combined with its size and erect stem, make us hesitate before placing it among the discards. White Perfection's average was 13 good and 1 split flowers per plant.

Commodore produced 11 blooms per plant. The average was reduced considerably by the taking of a great many cuttings. Commodore like some of the other varieties, must be planted closer than the average on the bench to make it profitable.

Benora is a grand addition to the list of truly good carnations, a model in growth, remarkable for the uniformity of bloom, and above all it is an excellent shipper and keeper. As with the popular yellow rose of today, it is only a question of a short time until Benora, as well as Yellow Prince, and the fancy crimsons find their deserved place with the flower buying public. Benora also belongs to the non-splitting class and produced 10½ blooms per plant in addition to a wealth of cuttings that found a ready sale.

Other varieties tested last year were St. Nicholas, with a yield of 13 blooms, and Wodenethe with 12.

Taking all these varieties mentioned into account, the average per plant was a fraction less than 15 blooms and in addition to this an average of 2 cuttings from each plant.

Now just a few words as to the cost of producing these 15 blooms. The plant upon which these flowers were grown occupied ¾ of a sq. ft. of the *entire ground surface* covered by glass. The recognized market value of a strong healthy carnation plant at the time of benching is, say 6 cents. The cost for coal last winter to grow that plant was .023 cents. Ten cents was expended for the labor on that plant to make possible its required production of blooms. 3.4 cents represents that plant's share of the interest on the investment. 2 cents was the tax on the plant for shipping cases, fertilizer, soil, repairs, and other small incidentals. Not until the plant in question earned .237 cents net did it begin to "bring home the bacon."

The amount of profit to be figured from a carnation plant, therefore, depends upon the condition of the market, and the grower's ability to place his product where it will bring a fair return.

The report of the Judges then followed.

Mr. Pyfer, of Chicago carnation Company next read a paper on the Policy of Carrying over Carnation Plants for second Year. It was a very practical and seviceable essay.

THURSDAY'S SESSION.

W. F. Kasting declined at the opening meeting, Thursday morning to accept the vice-presidency and presented the name of S. A. Anderson, Buffalo, N. Y., which was accepted. It was voted that hereafter nobody but the judges and secretary of the society should be allowed in the hall while

Five New Single Chrysanthemums

Money makers that every florist should grow:

Place your order now; Spring delivery from 2¼ in. pots.

MENSA A grand, pure white, large flat flower, with yellow eye, several rows of heavy petals of great substance. Fine habit. A splendid shipper and keeper. $1.50 per dozen, $10.00 per 100.

MISS MARY POPE A charming pink mid October, large, graceful flowers borne erect on long stems, very beautiful in sprays. Excellent habit and free. $1.50 per dozen, $10.00 per 100.

CHARLES KINGSLEY Rich buttercup yellow; large, bold flowers of great substance. Splendid habit very free; good in every way; one of the best yellows grown. $1.50 per dozen, $10.00 per 100.

YELLOW MENSA 1913 Novelty. A beautiful light yellow sport from the popular Mensa; same substance and habit as its parent. Large flowers on stiff stems. $2.50 per dozen, $15.00 per 100.

CELIA Leading Novelty. Exquisite lemon yellow; large flowers with foliage well up to the blossoms. Stiff habit—exceedingly fine for cutting in sprays. $2.50 per dozen, $15.00 per 100.

SINGLES

For 60c. per dozen, $4.00 per 100.

Jessie Curtis (crimson); **Hilda Wells** (Tuscan red, yellow at base of florets); **Mary Richardson** (Salmon and gold); **Mrs. Heneage** (Anemone, brilliant yellow).

POMPONS

50c per dozen, $3.00 per 100

Lula (white); **Mrs. Frank Beu.** syn **Souvenir d'Or** (orange and bronze); **Magnificent** (light bronze); **Savannah** (clear yellow); **Rev. W. Hoffman** (bronze tipped yellow).

Lowell, Mass.

KILLARNEY BRILLIANT

The best Rose we have ever introduced. If your order has not been placed

ORDER NOW

We have a splendid lot of Own Root and Grafted plants that will be ready to ship the last of February.

Own Root, $30.00 per 100; $250.00 per 1000
Grafted, 35.00 per 100; 300.00 per 1000
Plants from 2 1-2 inch pots

Address all orders to

ROBERT SCOTT & SON

SHARON HILL, - - DELAWARE CO., PA.

Improved Golden Chadwick

Improved Golden Chadwick

(Pollworth)

The Chadwick family of Chrysanthemums are the highest type of the commercial varieties, and any sport of Chadwick that is an improvement will be welcomed. This new variety has its origin in the West. We have taken part of the stock and will distribute the variety the coming season. It is described as identical with the parent in all respects except form and color of the bloom. It is a perfectly formed flower and a deeper golden yellow in color.

It is a variety that will be found all that the name implies. It means better late mums, and you need it.

Our Catalog for the Pu...

A. N. PIERSON, Inc., Cromwell, Conn.

the judging is going on, also that all the exhibition vases be painted a dark bottle green.

Discussion of Joseph Hill's paper was opened by W. N. Rudd, who could see no practical value in the conclusions as to the cost of growing any specified variety in any one place and asserted, that you cannot publish any set of rules that will make an expert carnation grower of any man, but could see good value in comparisons between varieties as to productive qualities.

President Brown agreed with Mr. Hill's proposition, and stated that Cottage Gardens records for seven years show average returns of three and one-tenth cents per flower.

W. N. Rudd read the thoughtful report of the committee on the president's address and an interesting general discussion followed.

ELECTION OF OFFICERS.

The officers as nominated were elected by an unanimous vote, S. A. Anderson being substituted for W. F. Kasting. The President appointed Wm. Nicholson, E. G. Gillett and Joseph Hill a committee on final resolutions.

Interesting discussion on the mutual relations of retailers and societies was in progress as we went to press.

Attention was called to the nine beautiful non-competitive tables of decorations made by the Cleveland Retail Florists from new varieties contributed by many carnation growers and which we shall fully describe next week.

THE EXHIBITION.

The exhibition was staged very conveniently for examination, each class being on a round table separately. Judging was done promptly and award cards were on by five o'clock on Wednesday. Much regret was expressed that the extensive exhibit of F. Dorner and Sons Co., was ruined in transit.

Considering the distance and all conditions, the New England growers have much cause for pride in their winnings.

List of Awards.

The awards were as follows:

A Roper, Tewksbury, Mass., Silver medal, for Miss A. Coombs and second in light pink class.

Stroud's, Biddeford, Maine, first for one hundred and fifty white, with White Wonder, second for one hundred Pink Delight, fifty Pink Delight and fifty Enchantress.

Fred Dorner and Sons Co., first for one hundred Yellow Prince.

W. N. Rudd, first for one hundred Rosette; second for fifty Rosette and one hundred white seedling.

S. J. Goddard, Framingham, Mass., first for one hundred Pink Delight, fifty each Gloriosa, Pink Delight, Rosette, Beacon and Yellowstone. Second on fifty White Perfection.

S. S. Skidelsky & Co., sweepstakes and best one hundred light pink with

PEERLESS PINK

The Best and Most Prolific Carnation for You to Grow

Compare this record with other new and standard varieties. From 2,000 plants we cut 14,092 perfect flowers from September 1 to January 1, an average of seven blooms per plant first four months. Early bloomer, easy to handle, grows quickly, producing an abundance of perfect flowers which are the **Best Keepers and Shippers.** Your customers like a good dark pink carnation today and demand it, but you are not able to fill the demand as there has not been a **good dark pink** heretofore. Therefore grow **Peerless Pink** and keep your customers pleased. Rooted cuttings ready now. $12.00 per 100, $100 per 1000.

The **Herald, Scarlet,** three years the best scarlet at the Flower Shows. The Herald is making good with 95 per cent. of the growers who bought it last year. Rooted cuttings ready. $6.00 per 100, $50 per 1000.

STANDARD VARIETIES FOR FEBRUARY DELIVERY.

	Per 100	Per 1000
Peerless Pink, brilliant pink (C. C. Co.)..	$12.00	$100.00
The Herald, Scarlet	6.00	50.00
Enchantress Supreme, deeper than Enchantress	6.00	50.00
Pink Delight, flesh pink	6.00	50.00
Gloriosa, medium pink, Winsor shade...	4.00	30.00
Rosette, dark pink	4.00	30.00
Benora, variegated	$4.00	$30.00
Pocahontas, crimson	4.00	30.00
White Wonder	3.00	25.00

PERENNIALS AND WHAT THEY MEAN FOR THE AMERICAN GARDEN.

(A paper by Richard Rothe read before the Pennsylvania Horticultural Society, at the January meeting.)

Under hardy perennials we understand herbaceous plants of marked longevity, distinguished by ornamental foliage and flowers. As such we know they have been cherished in the gardens of the ancients and, centuries later, we notice their prominent part on the terraces of the Italian Renaissance. The rigid formality of the French epoch and the stiff lines of the succeeding Dutch gardens left little room for their use, while the following era of the free naturalistic English park, though, at the beginning appreciative and liberal in granting space, soon indulged in the carpet-bedding fad to an extent to render the hardy herbaceous border a side issue of secondary importance.

The Revival of Interest.

The first impulse for the present general revival of interest in herbaceous plants was given by Great Britain, with Germany as a close second. Ideal climatic conditions, and a traditional perception and love for the beautiful in floral garden effects resulted in examples well worth envy. Old-time favorites, for a long period inmates of modest country peoples' front yards, re-entered the gates of the gardens of the aristocracy. We witnessed the beginning, not of a fad, but of a new era. As its morning chime we heard the plea for the lovely treasures of our grandmothers' old-fashioned flower gardens. The movement found ready enthusiasts on this side of the Atlantic and has steadily gained in strength. Today we find ourselves face to face with the perennial flower garden as a distinct branch of modern garden art.

Nursery catalogues are handed over to us year after year, but we rarely fully appreciate the immense work entailed in their make-up and the meaning of well-selected illustrations which in many instances convey excellent suggestions for artistic arrangements. To be just, we cannot overlook the important part of missionary work done by enthusiastic amateurs. The high educative value of the books of Miss Gertrude Jeckyl, published in England, have fructified the conception of artistic use of hardy perennials of home owners and gardeners both here and abroad. There are also popular works of American writers on the same subject which are well worth serious study.

Popularity Growing.

The herbaceous flower garden as a modern feature of American home-grounds has become a fact and as to its future there is no doubt. Of course the skeptic still points at the brief flowering period of many of the best plant species in this class. It is sometimes asserted that the hot summer climate of our middle Atlantic and Central States is a serious obstacle for a venture in the given direction. We are also reminded of the difficulties in keeping up the neat and tidy appearance of such gardens throughout the season. Nevertheless, those gardens continue to steadily gain in general popularity. There must be a reason for this state of affairs. Compare the customary formal parterre or the conventional shape and looks of the better class of flower beds on our lawns with the advanced type of modern herbaceous gardens and you will find it.

Entering the modern herbaceous flower garden, preferably the one of regular formal design surrounded by the greenery of hedges, or protected by moderately high walls or white wooden fences, there is nothing of imposing grandeur in it, but we very soon feel that sheltered atmosphere of a private home. We notice different ground levels of various divisions; retaining walls crowned by balustrades, connecting stairways with white wooden arches overhead, serving as support for Rambler roses, wistarias and clematis vines. I mean the formality which, in resorting to a few architectural additions for artistic effect as sun dials, statuary, Japanese stone lanterns, seats, garden houses and pergolas, does so, without falling a prey to the pergola epidemic of today. What we aim at, is a fitting scenic setting for an ever-changing floral coming and passing away; a setting to give background and tuneful resonance for a beautiful harmony in rich and glorious color accords.

(To be continued)

During Recess

Morris County Gardeners' and Florists' Society.

The Morris County (N. J.) Gardeners' and Florists' Society assembled around the festive board on Tuesday evening, January 20, and enjoyed to the limit the 18th annual reunion of this energetic organization. Charles B. Weathered filled the position of toastmaster with the ability grown from long experience, and the speeches were replete with wit, wisdom and instruction. The tables were beautifully decorated and there was plenty of excellent music, instrumental and vocal. After the opening words of welcome by President Ernest Wild the various toasts and those who responded were as follows:

The Morris County Gardeners' and Florists' Society, by W. H. Duckham; The Society of American Florists and Ornamental Horticulturists, by Chas. H. Totty; Gardening as a Profession, by Dr. Evans, Morris Plains; The New York Florists' Club, by Frank H. Traendly; The work of the Morris County Gardeners' and Florists' Society, by C. Turner, Morristown; Morris County, by E. J. Burke; The Horticultural Trade Press, by J. Harrison Dick; The Ladies, by J. Austin Shaw; The Provincial Press, by F. G. Aulsbrook; The National Association of Gardeners, by M. C. Ebel. The floral decorations were grand.

The third annual banquet and dance of the employees of Bobbink & Atkins, Rutherford, N. J., was held at the Municipal Square School, Friday evening, Jan. 24. The ballroom was beautifully decorated with palms, bay trees and flowering plants from the firm's nurseries, and the table decorations were potted azaleas and ferns.

Dancing followed the banquet until a late hour.

Among those present were Mr. and Mrs. L. C. Bobbink, Mr. and Mrs. F. L. Atkins, Mr. and Mrs. C. H. Atkins, and Mr. and Mrs. A. H. Bobbink.

UNPACKING FROZEN SHIPMENTS.

Shipments of soft wooded plants at this season are occasionally received in a frozen condition; not entirely on account of insufficient protection in packing, but owing largely to unforeseen and severe weather changes.

When the thermometer suddenly drops below the zero point, as it did recently, plant shipments are apt to suffer while waiting on station platforms or during wagon delivery no matter how carefully packed, and a little judgment in unpacking will in most instances bring the plants out of a frozen condition with little or no injury.

The undersigned received during the recent severe spell a shipment which included geraniums of various types, fuchsias, begonias and other soft wooded subjects from pots; the ball of earth on practically every plant being frozen hard, the frost penetrating even to those in the center of the boxes. Although the shipment looked rather hopeless, the boxes were placed immediately in a cool shed with a temperature just above the freezing point and allowed to remain 48 hours, thawing out gradually. The plants were then unpacked, placed in a slightly higher temperature, kept well shaded, and were soon in condition to be potted.

The loss on the entire shipment did not exceed 5 per cent, the begonias suffered no more injury than the geraniums and the plants are now well established and in a growing condition. A. N. Pierson, Inc.

One hundred rats a month is a record for a trap in one establishment, but that is the number caught in a livery stable in Scranton, Pa., in one of the traps invented by H. D. Swarts of that city. See ad on page 172 this issue.

From the Royal Horticultural Society, Westminster, S. W., Sept. 9, 1913. "Your Gladiolus 'Peace' is now in full flower at Wisley and is a very beautiful variety, strong and doing well."

From Messrs. Dobbie & Co., Edinburgh, Scotland, Sept. 8th, 1913. "With reference to the bulbs of Gladiolus 'Peace,' we have to say that these have turned out true and very fine indeed."

From Messrs. Warnaar & Co., Sassenheim, Holland, Sept. 15, 1913. "We beg to inform you that we were awarded with a Certificate of Merit by the Dutch Bulb Growers Association meeting in Haarlem for Gladiolus 'Peace.' We have very fine blooms of it and think it a very good bloom for late work. It grows very strong and flowers freely."

From Wilhelm Pfitzer, Stuttgart, Germany, Sept. 10th, 1913. "The growth of 'Peace' is robust and the foliage has a remarkably dark green color. The flowers are large and the spikes are producing a good impression. Taking altogether, 'Peace' is a remarkable variety."

Gude Brothers Co.

FLORISTS & FLORAL DECORATIONS.

1214 F ST. NORTHWEST.

WASHINGTON, D.C. June 28, 1913.

Mr. Arthur Cowee,

Berlin, N.Y.

Dear Sir:

We are returning by express today the Gladiolus bulbs, the variety Peace, which you so kindly gave to try for forcing indoors. We are pleased to state that they beat anything for growing that we have ever seen. They came in more than a week ahead of other very early, earlier than the other varieties and the spikes were so fine that we sent for a photographer to photograph the first ones, but through some mishap we never succeeded in getting a good photograph of them. They were without exception the finest spikes of gladiolus that we have ever seen any place or any where, and for indoor growing they seem to be a perfect success. We remain,

Very truly yours,

Gude Bros. Co.

NOW IS THE TIME TO PLANT "PEACE" FOR FORCING

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

Chicago Seed Notes.

The Holland bulb firms are well represented now in Chicago. Buyers are inquiring closely into the causes of the failure of so many of the bulbs now being forced. The Holland men attribute the trouble to the bulbs being heated in transit. They say they are never troubled with bulbs coming blind in Europe and that the bulbs were in excellent condition when shipped. The representative of one of the prominent houses claims to have a contract with the Holland-American line to have all their bulbs stowed below the water line on the steamer as the stock is on the water in August or September and the temperature above the water line often reaches 150 degrees, which blasts the flower buds. Some contracts between the shipper and the boat lines contain an indemnity clause for twice the price of the bulbs in case of injury from heating in transit. This will reimburse the Hollander for the bulbs and the American buyers for duty, freight and cost of forcing—but leaves the florist with no stock for his customers.

CATALOGUES RECEIVED.

Atlantic Nursery Co., Inc., Berlin, Md.—Trade Price List for Fall 1913 and Spring 1914.

Alfred Mitting, Holland, Mich.—Catalogue of Berries grown by a Berry Specialist. An excellent convincer.

Martin Cohanzie, Painesville, O.—Catalogue of Field Grown Hardy Herbaceous Plants and Ornamental Shrubs.

D. V. Burrell, Rocky Ford, Colo.—1914 Seeds. Burrell's Select Rust-Resistant Rocky Ford Canteloupe is the leading specialty.

Colorado Seed and Nursery Company, Denver, Colo.—General Catalogue and Cultural Guide for 1914. Considerable individuality in this catalogue.

W. E. Marshall & Co., New York.—Descriptive Catalogue of Shrubs, Trees and Herbaceous Plants. In typography and arrangement a well-made catalogue. Contents good.

J. G. Harrison & Sons, Berlin, Md.—Catalogue and Price List of Fruit and ornamental Nursery Stock. A very handsome publication with several colored plates and attractive covers.

Kelly Bros. Nurseries, Dansville, N. Y.—Catalogue of Trees Direct from Grower to Planter. With a cover illustration of Elberta peaches so true to life that one's mouth waters as you look at them.

George S. Woodruff, Independence, Ia.—"The Modern Gladiolus." A catalogue of the best strains and varieties, home grown. Also wholesale price list of leading commercial varieties, for growers only.

Maloney Bros. & Wells Company, Dansville, N. Y.—"Guaranteed True to Name Trees, Direct from Nursery to You." A first-rate head line. And there's a handsome cover picture of luscious cherries in natural colors.

The Haerens Co., Somergem, Belgium—Illustrated Price List, 1914. For the Trade Only. Colored-plate of Azalea Haere Will's Pink Pearl, a sport of Vervæneana and which won first prize at the International Exhibition of Ghent in 1913.

H. F. Michell Co., Phila., Pa.—Wholesale Price List of Seeds, Bulbs, Tools, Fertilizers, etc. Handsome Cover Illustration of the New Zonal Bedding Geranium Helen Mitchell in natural colors. A very helpful catalogue of the really good things for the trade, well displayed and illustrated.

Henry F. Michell Co., Philadelphia, Pa.—Seed Book for 1914. A 224-page catalogue covering every department of vegetable and flower seeds, implements and sundries very completely. Colored plate of hardy phloxes and on front cover a combination arrangement in colors, of Buddleia variabilis magnifica and Dahlia Pride of Andalusia. There is a large novelty and specialty list and the book is profusely illustrated throughout.

PUBLICATIONS RECEIVED.

Sweet Peas Up-to-Date. Published by W. Atlee Burpee & Co., Phila., Pa.—This is the 1914 edition of this indispensable manual, by K. W. Kerr, from observations made at Fordhook Farms trial grounds during the past six seasons and previous experience. Every grower of sweet peas will need a copy of this standard publication.

The Horticultural Directory and Year Book for 1914, published by the Journal of Horticulture and Poultry Office, London, has come to hand in good time. This useful volume is in its 55th year and is indispensable to anyone seeking to do business in the British Isles or on the Continent of Europe. The book this year contains 648 pages containing besides lists of nurserymen, florists, gardeners, private estates, etc., an immense amount of information on subjects appertaining to commercial horticulture. It is right up-to-date and everybody should have a copy of this new edition.

BUSINESS TROUBLES.

J. C. Levenson, 478 Boylston St., Boston, busted.

Fred D. Green, of Farmville, Va., a nurseryman and farmer, filed a voluntary petition in bankruptcy in the United States District Court on January 13. He declared liabilities of $26,499.10, more than one-half of which are secured by collateral.

A petition in bankruptcy has been filed against Mary W. Giatras, florist, at No. 238 Columbus avenue, New York, by these creditors: Growers Cut Flower Co., $1,745; Gerard Dreyer, $99, and Herman Weiss, $15. It was alleged that she permitted Schloss Bros. to obtain a judgment, under which her stock, safe, fixtures, etc., were sold out on Jan. 16.

Red Bank, N. J.—Miss Hartgen has closed up her flower shop here. The store fixtures were bought by Oscar Hesse, Jr.

CLUBS AND SOCIETIES

NEWPORT HORTICULTURAL SOCIETY.

An unusually well attended meeting of this society was held Jan. 27. Work on the schedule for the June show was the main business, and the offer of many special prizes were received from horticultural firms, including the following: Joseph Breck & Sons, for tuberous begonias; J. M. Thorburn Co., vegetables; T. J. Grey Co., vegetables; James Carter Co., gloxinias; Bobbink & Atkins, roses; A. N. Pierson, roses; W. B. Scott, annual plants. The members of the Newport Garden Association and summer colony are also contributing many liberal prizes, which when added the the regular list of the Horticultural Society will make a very attractive schedule. This show, which is dated for June 24 and 25, will be held under the auspices of the Newport Garden Association and the Newport Horticultural Society as last year, and present indications point to a much more extensive display than conditions permitted last year. An ideal place for holding the show is now almost assured. A part of the estate of ex-Senator G. P. Wetmore, on the corner of Bellevue and Le Roy avenues is the place under consideration, and the Garden Association have promised to provide suitable protection for all classes of exhibits.

A. MacLellan, A. S. Meikle and secretary Wm. Gray were appointed a committee to work with members of the Garden Association in making arrangements for the show.

At this meeting President MacKay exhibited two vases of exceptionally well grown stocks "Beauty of Nice" to which a cultural certificate was awarded.

J. ROBERTSON.

CONNECTICUT HORTICULTURAL SOCIETY.

Malacoides night was observed by the society on January 23rd, President Huss exhibiting three plants: one white, one pink, and the other a rose color. Alfred Cebelius showed six plants each of Cineraria grandiflora and Cineraria Boddington, the latter being cactus flowered, of a delicate pink color. A first-class certificate was awarded to each exhibit. Mr. Cebelius stated that the seed of the cineraria was sown about the 20th of July, and that they had been given nothing but compost up to a few weeks ago, when he commenced giving them liquid manure.

President Huss exhibited ferns, showing different stages of growth from the time the seed first sprouts and onward. The secretary read the paper President Huss delivered in New York City recently, when he exhibited a miniature greenhouse showing the various stages of growth of ferns. Mr. William H. MacKenzie advocated decorating with Primula malacoides and with white and pink Killarney roses, stating that the combination is very pleasing.

ALFRED DIXON, Sec.

HORTICULTURAL SOCIETY OF NEW YORK.

At the exhibition of the Horticultural Society of New York, on January 17, Max Schling showed a floral basket and two bouquets of exceptional beauty and was awarded a diploma. A "special" was given to A. N. Pierson for the new rose Hadley, and also to Lager & Hurrell for a fine collection of orchid blooms. J. P. Mossman, gardener for Clement Moore, A. J. Manda gardener for Mrs. H. I. Pratt, J. W. Goodier gardener for C. S. Roebling, W. H. Waite gardener for S. Untermyer, J. T. Burns gardener for Miss C. A. Bliss, R. Hughes gardener for J. B. MacDonald, Howard Nichols gardener for J. B. Trevor and J. Canning gardener for A. Lewisohn, were the winners in the various plant and flower classes provided for in the schedule. Orchids and carnations were the leading features.

ESSEX COUNTY FLORISTS' CLUB.

The regular monthly meeting of the Essex County (N. J.) Florists' Club was held on Thursday evening, Jan. 15th, at the Kreuger Auditorium, Belmont avenue. The attendance was good, almost the entire membership being present. Two new members were elected and after the business meeting a fine social evening was enjoyed. The next meeting will be held on Feb. 19th. It will be Exhibition Night and the committee expects to have a fine display, as a good many growers have made arrangements to exhibit. Any grower having anything to show at this meeting will get all information from J. Rassbach, of the Exhibition Committee, 23 Broad St., Bloomfield, N. J.

JOHN CROSSLEY, Sec.,
39 Belleville Ave., Newark, N. J.

AMERICAN ROSE SOCIETY.

The first entry to be made for an exhibit of roses is by Anton Schultheis of College Point, L. I., New York.

The prize list has been revised and added to. The Mrs. Hubbard gold medal for best new rose of American origin brought out during the past five years, will be an important event to be decided.

There is likely to be a larger number of exhibitors than last year, if inquiry regarding space position, prizes and dates of exhibits are any guide.

BENJAMIN HAMMOND, Sec.

Club and Society Notes.

A movement is on foot to organize a strong horticultural society for Hampden County, Mass. A preliminary meeting was held at Springfield on January 16.

A joint meeting and exhibition of the Illinois and Indiana State Florists' Associations will be held at Danville, Ill., on March 9-11. Preparations are being made for a very large event.

Eugene A. Appleton of Providence was elected president of the Rhode Island Horticultural Society at the annual meeting held on January 21 in the lecture room of the Providence Public Library. Mr. Appleton, one of the leading florists of Providence, succeeds Thomas Hope, for the past three years president of the Society. Mr.

GEO. B. HART, Manufacturer, 24 to 30 Stone Street, Rochester, N.Y.

Hope also served four years as vice-president, and he declined a renomination.

The Danville Florists' Club was organized Tuesday evening, Jan. 13, at the store of Smith Bros., Danville, Ill. The election of officers resulted as follows: President, H. E. Smith; vice-president, Peter Britz; treasurer, Chas. Walker; secretary, Joseph Smith.

The Retail Florists' Association, of St. Louis, held its regular monthly meeting on Monday, January 19. The following officers were nominated for offices: Harry Young, president; Theo. Miller, vice-president; A. Gernious, secretary; F. H. Weber, treasurer. The election takes place at the next meeting. Ex-President Sanders resigned as active member and was elected an honorary member.

The County Growers' Association of St. Louis will hold its meeting next week, Wednesday, February 4, at the usual place. A large attendance is looked for.

CHICAGO NOTES.

One of the handsomest stores in all Chicago is the north side Schiller store, in that fashionable quarter of the city, at 4509 Broadway, where the intersection of Kenmore makes an acute angle which is ideal in this case. With windows on both streets the appearance at night is that of flowers and blooming plants almost in the open and with the brilliant lights, the handsome equipment of the store shows off to best advantage. This store and the one on West Madison street speak well for the executive ability and far sightedness of Geo. Asmus, the business manager for many years, and the several members of the Schiller family actively engaged in the work.

Bulb Situation.

The injury to the tulip bulbs last summer is daily becoming more apparent as the time for blooming comes on. Among the early varieties so far, whole crops of Proserpine have come blind and Le Matelas so far are not promising well. Just what the result will be with the later varieties is hard to tell, but the loss in Chicago will foot up large. One grower, who had forty cases for cut flowers, reports everything coming blind and says he will not waste space and effort by bringing any more of them in.

Visitors—Martin Smith, Danville, Ill.; George Vatter, Marinette, Wis.; Paul Berkowitz of H. Bayersdorfer & Co., Phila. Pa.; Chas Schwake, New York

WASHINGTON NOTES.

Fred H. Kramer has an interesting window display at his store on F street. In the center of the window is an old-fashioned spinning wheel and surrounding it is a large quantity of miniatures. A rocky woodland scene and quantities of real cotton blossoms complete the display which is attracting widespread attention.

A well thought-out plan to take advantages of the great natural beauty of Rock Creek Park, by making it the foundation for a great national arboretum and "a greater botanic garden," is about ready to be presented to Congress, following conferences between Assistant Secretary of Agriculture Galloway, the District Commissioners, army engineers and members of the joint committee on Library.

William F. Gude, the national representative of the S. A. F. and O. H., in conversation with the HORTICULTURE correspondent, states that there seems to be some little misunderstanding with respect to the bill recently introduced in Congress providing for the appropriation of $50,000 for erecting a monument to the late William R. Smith. It seems to be the opinion of all that this will be something in the way of a stone but there is absolutely nothing in the bill to give that impression. "A monument," said Mr. Gude, "is anything that perpetuates the memory of a person or event, according to Webster, and our monument may take the form of a beautiful garden, a library, a building to be the home of the S. A. F. and O. H., or anything else along that line. What we want is to have the bill passed and then a committee will be appointed and florists will be asked to serve thereon. Many things have been suggested but the time is not yet ripe for the making of permanent plans. What is needed now is the support of every florist and society in the pushing of this bill, after that we will have something to say."

Visitors—Joseph Goudy, with H. A. Dreer, Philadelphia, Pa.; Robert Schoch, with M. Rice Co., Philadelphia, Pa.; Joseph Heacock, Wyncote, Pa.; J. L. Towner, with Griffith & Turner Co., Baltimore, Md.

CINCINNATI NOTES.

Advices from Middletown, Ohio, state Geo. Beckman has withdrawn from the Busy Bee Floral Co.

The Cincinnati delegation to the Cleveland meeting this week comprises, Mrs. and Mrs. J. A. Peterson, Mr. and Mrs. C. E. Critchell, Gus Adrian, Max Rudolph, R. Witterstaetter and Wm. Murphy.

Visitors—A. J. Mueller, New York; A. M. Sanders, of Poehlmann Bros.; Phil Valk, representing Geo. Borgfeldt, New York City; Wm. Gardner, mgr. of P. J. Olinger's greenhouses, New Castle, Ind., and Wm. Rodgers, mgr. of the Miami Floral Co., Dayton, Ohio.

BUDDLEIA ASIATICA.

So many inquiries have come in regarding this beautiful winter flowering novelty since it was illustrated in our issue of January 17, that we asked William Anderson, who grew the plant shown in the illustration, for some notes on its culture and no doubt our readers will be interested in Mr. Anderson's reply. He says:

"This particular plant was from a cutting taken in August, 1912; so that the plant is about 16 months old. It is easily grown and if pinched during the summer until September 1st can be had in flower for Christmas grown in a temperature of 55 to 60; and, I believe, if grown cooler successional batches could be brought in up until Easter."

Buddleia asiatica is one of the Wilson collections from the wilds of China. It has been given the name of the "White Flowered Winter Lilac." Every shoot terminates in a slender arching raceme of deliciously fragrant flowers, very useful for cut-flower purposes.

GARDENIAS

$1.50—$4.00 Doz.

We have quantity as well as quality, and in large lots we can quote special prices. All grades are perfect flowers. The difference is in the size of flowers and length of stem.

Flower Market Reports

BOSTON Trade in this market has shown little if any improvement over last week although it has been brisk at times, it falls flat at others. Roses are still scarce while carnations are in fine condition and the supply fairly good. Violets are plentiful as also lily of the valley. Cattleyas and sweet peas can be had in any quantity. Yellow jonquils are in good demand and the supply is good.

BUFFALO The market, although gradually improved, has experienced no heavy over-supply the past week. Roses are still scarce, especially the medium and short grade. There have been sufficient carnations to help out. Many shipments of carnations are lacking in quality and there are too many weak stemmed and splits. Lilies have shortened up and the demand has been heavy. Beauties are also scarce. Bargain signs have been noticed, but these were on violets only. Other stock in fair supply.

CHICAGO The rose situation is simply this, that it is impossible to fill orders complete, regardless of price. The shortage is along all lines, but is felt more where demand is heaviest, in medium grades. This is naturally turning the trade to carnations, which toward the latter part of the week began to show signs of stiffening in price and diminishing in supply.

The market is receiving some fine butterfly sweet peas, which are picked up quickly. There is a good demand for longiflorum lilies and the supply is not large. American Beauties are showing the effect of a whole month, almost entirely without sunshine and the color and quality are not the best. A few extra fancy tulips of double yellow Coronne d'Or were sent in, but there were plenty of poorly grown, short stemmed tulips, that did not sell at all. A limited quantity of long Yellow Prince and a beautiful clear pink claimed by the grower to be a pink La Reine were quickly bought up. Paper whites are again selling well and lily of the valley is in good demand.

CINCINNATI Last week proved a good week. There was an active demand, and everything cleaned up easily at substantial prices. The supply was very limited, green goods being the only thing that was plentiful. Owing to the continued cloudy and dark weather, rose receipts decreased to a point that was about the minimum for this time of the year. An ordinarily good cut of carnations helped to make up for the deficiency in roses. Giganteum lilies which were plentiful also did their share in this work. Other miscellaneous lines, such as callas, narcissus, jonquils and the like enjoyed a good call. There was also a steady demand for the smaller flowers. Sweet peas sold well, most all of them were of excellent quality. One cut of single violets is very small. The doubles are in a fair supply and move nicely. Lily of the valley, orchids and primrose are offered in good quantities.

Single Daffodils

Golden Spurs, very choice, $5.00 per 100; $40.00 per 1000.
Other Varieties, $1.00 per 100; $7.00 per 1000.
VALLEY. Special, $4.00 per 100. **Extra**, $3.00 per 100.
ORCHIDS. Cattleyas, best, $6.00 per doz.; $40.00 per 100. Medium, $4.00 per doz.; $25.00 per 100.
Dendrobium Formosum, $6.00 per doz.
Oncidium Splendidum, yellow, extra choice, per 100, $10.00, $12.50.
Mixed Orchids, $5.00, $10.00 and $15.00 boxes.
GARDENIAS. Special, $3.00 per doz.; $20.00 per 100. **Fancy**, $2.00 per doz.; $15.00 per 100.

NEW YORK There is no particular change in business. Some people claim it is dull, but others do not find it so. American beauties are scarce, selling for 75c. and in some cases $1.00. Roses as a general rule are scarce and lily of the valley is plentiful. Lilac sells for $1.50 per bunch. Bulb stock is clearing out nicely. If there is a glut of anything, it is cattleyas and gardenias and these are most magnificent in quality but are being sold at ridiculously low figures. Carnations are meeting with good demand. Lilies are not quite so plentiful; some especially long stemmed lilies are fetching $15.00 per hundred. There is the usual supply of freesia, myosotis, daisies and other seasonable flowers in market.

PHILADELPHIA Very fair week. Prices held firm with upward tendency. The demand was good all along the line and nearly everything was on the scarce side except cattleyas, lily of the valley and daffodils. All roses scarce, especially in the lower and medium grades. Special Beauties jumped a notch. Carnations stiffened up considerably, notwithstanding that there was a good supply of very fine quality, and the clean-up was good, there being nothing left at the end of the week for the street gentlemen. The orchid market held about the same as week previous—plentiful and good quality. Oncidium splendidum is now in good form, so is Dendrobium Formosum, and Cattleya Percivaliana. Cypripediums are over. Violets are moving fairly well, but like lily of the valley the market on them is not very brisk. Gardenias also move out fairly well, although it seems as if the popularity of this flower is rather less than what it has been the past few seasons. As already noted, daffodils are rather too many for the market to absorb and prices show a tendency to recede.

Flower Market Reports

(Continued from page 165)

this is not very marked as yet. Golden spur and others have been added to the French Trumpet Majors. A few double von Sions are to be seen. Acacia pubescens has just made its annual bow to an admiring if select audience. Its cheerful golden smile is like a burst of sunshine in a gloomy world.

ST. LOUIS. There was good business at all the commission houses and the demand was more than the market could supply any day last week. Roses and carnations are not any too many. Violets are coming in much better than any time this season and the trade is more hopeful for next month, as St. Valentine's Day demand is always big. Sweet peas, too, are in good supply and the demand large. Bulb stock is not any too plentiful and the market cleans up almost daily on Paper Whites and Roman Hyacinths, also lily of the valley and lilacs.

WASHINGTON There is what might be termed a near-famine in the local flower market. Climatic conditions have been very unfavorable during the month. American Beauty roses are the hardest hit and it is almost impossible to pick up a dozen of these at times in any one place. The only variety in roses that is plentiful is Killarney. Carnations, instead of being a drug on the market as was expected some weeks ago, are bringing high prices. The double violets are rapidly being supplanted by the singles and the latter are now being received in extra fine condition. Harrisii lilies are in good demand. Orchids are much more plentiful. Gardenias, too, are plentiful.

NEWS NOTES.

Monroe & Reynolds is the name of a new wholesale florist firm at 111 W. 28th St., New York.

A new wholesale flower establishment is to be opened in Indianapolis, Ind., by A. Brandt.

James Coyle has removed from 101 West 28th street to 104, on the opposite side of the street.

PATENTS GRANTED.

" " & Spren (100 bunches)	10.00	to	20.00	20.00	to	50.00

PHILADELPHIA NOTES.

J. Otto Thilow, of Dreer's, left on the 24th inst. for Jamaica and adjacent points. Object: recreation, investigation and potentiality. He is due back in Philadelphia February 12.

Frank Polites has opened a new branch at the ferry terminus of the subway. The fittings are refined and elegant and the show space is unusually ample for this kind of location. This bids well for a large and profitable outlet for cut flowers and plants.

S. S. Pennock, of the Pennock-Meehan Co., headed the Philadelphia delegation for the Cleveland convention of the A. C. S. He bore with him a showing of a new carnation Mrs. Akehurst, a fine pink, distinctively fringed, which looks like a future winner.

Among other evidences of progress in the Michell business this season is a new department specially devoted to advertising and promotion. It is in charge of E. A. Pettitt, who has been for the past five or six years with N. W. Ayer & Sons. Mr. Pettitt is young and bright and enthusiastic, brimming over with new ideas and thoroughly imbued with the axiom that advertising is the art of compelling appreciation of the goods one is offering. We extend greetings and welcome.

Philadelphia visitors: C. Percy Barnard, Northbrook, Pa.; Howard Thompson, Kennett Square, Pa.; L. B. Coddington, Murray Hill, N. J.; W. G. Badgley of Badgley, Reidel & Meyer, New York City; W. C. Langbridge of Jerome B. Rice Co., Cambridge, N. Y.; Jasper Lorimer, Bridgewater, Pa.; D. Cameron of Sander & Sons, St. Albans, England; James Harrigan, representing Peter Henderson & Co., New York City.

PERSONAL.

Among the private bequests of Elbridge Torrey of Dorchester, Mass., who died on Jan. 2, was the sum of $2500 to Frank Farrell, his gardener for many years.

W. A. Manda, South Orange, N. J., has just returned from England on the Majestic after the worst shaking-up at sea he ever experienced. He says that the horticultural part of the Anglo-American Exhibition will be an assured success.

John J. Hunter, formerly of the firm of Kennedy & Hunter, seedsmen of New York, has accepted a position as special traveling representative for the Consumers' Fertilizer Company of New York. Mr. Hunter has had many years of experience among the greenhouse men and florists, and is well known and popular with the trade. The Consumers' Fertilizer Company, which has an up-to-date factory at Farmingdale, N. J., is manufacturing, in addition to their regular grades of farm fertilizers, special fertilizers for greenhouse work, and Mr. Hunter will devote his energies chiefly to this end of the business, for which work he is particularly well qualified.

Boston visitors—Mart. Boks, Ghent, Belgium; E. M. Parmelee, representing J. H. Allen Seed Co., Sheboygan, Mich.; Walter Mott, representing Benj. Hammond, Beacon, N. Y.; Jas. McGregor, Dublin, N. H.

Editor of HORTICULTURE:

Dear Sir:—I enclose a postoffice order for one dollar for HORTICULTURE. Could not think of doing without it. The illustrations alone would be more than good value to say nothing of the feast of good things every week found in its pages. I read every page with interest; it could hardly be better.

Illinois, Jan. 22, 1914. J. S. F.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

HELP WANTED

GARDENERS WANTED—Man familiar with greenhouse plants and propagating; permanent position in Florida. Man for country place, employing one or two assistants; must be familiar with outside work; no glass. Man for small country place one man only—some house work. Man for greens keeper, country club; only single men need apply. State age, experience and salary wanted. CARL RUST PARKER, Landscape Architect, 910 Fidelity, Portland, Maine.

SITUATIONS WANTED

SITUATION WANTED—As Working-Foreman on Commercial, Public or Private Place, by February 15th or later, by good, practical, experienced grower and propagator of roses, carnations, mums, all cut flowers, pot and bedding plants, forcing for Easter and Christmas stock. Decorator, landscape gardener, good vegetable grower, etc. Capable of taking full charge. German, married, no children, 32 years' experience in Germany and America; honest, sober and steady; best of references. Please state particulars in first letter. Address "E. Y.," 814 Copeland St., East End, Pittsburgh, Pa.

FOR SALE

FOR SALE—Ten Miles from Boston

9 Acres of land, 3 greenhouses 20 x 200, 50-h. p. boiler, 7-room bungalow, all modern improvements, nearly new small stable, coal for season all in, everything in A-1 condition. Net income $3,000. Will sell for assessed value. Address "N," care HORTICULTURE.

FOR SALE—Fresh from factory, new; 10 x 12, 16 x 18, 16 x 24, double thick. A and B qualities. Market dropped. Now is the time to buy and save money. PARSHELSKY BROS., INC., 215-217 Havemeyer St., Brooklyn, N. Y.

NEWS NOTES.

Avondale, Pa.—Charles Snyder met with a loss of about $500 by the pipes of his greenhouse freezing.

Tonawanda, N. Y.—Max Groeber has purchased the Summey Greenhouses and store on Wheatfield street.

Salem, O.—Joseph E. Bonsall, who leased his greenhouses to V. A. Cowgill, has purchased the lease and will re-enter the business.

Washington, D. C.—Louis E. Hoover is now sole owner of the business of Mayberry & Hoover, who dissolved partnership last week.

8 Grape Vines, 6 Currant Bushes $1

All best 3 year old stock. If planted now or early spring will fruit next summer. Should ground be frozen we tell you how to protect and keep them dormant ready for early spring planting. Orders accepted now and forwarded at any future time if preferred. Grapes are Worden, Niagara, Iona, Concord, the best early mid-season and late varieties. Large cherry currants. Write for list of our **$1 Friend Makers**, consisting of all kinds of Fruit Trees, Berries and Roses.

Cultivate Horse-Radish Garden, Field or Farm.

Nothing as profitable. We tell you all about it. **The Landscape Garden Co., Newburgh, N. Y.**

Walter Mott's Notes by the Way

Westerly, R. I.

S. J. Reuter & Son are working up a supply of the rose Prince E. C. d'Arenberg, and from reports received will be pressed owing to the limited stock and large demand. Lady Ann Barrondell is the latest arrival. 'Tis a fine rose, a very vigorous grower and pleasing shade of pink.

Hadley, Mass.

The Montgomery Co. establishment has been visited of late by many prominent growers who are especially interested in the new rose Hadley, which in itself well repays the visitor, who sees it now at its best. Only Killarneys, Richmonds and Hadleys are grown here, and an excellent opportunity for comparison is offered by the two latter being grown in the same house. Hadley shows up superior in every point, more particularly in color and in foliage.

F. R. Pierson, accompanied by J. A. Fotheringham, were interested visitors, just previous to my visit.

Arrangements have been made for distribution of Hadley by A. N. Pierson owing to lack of proper facilities at home.

Springfield, Mass.

J. W. Adams Co. received awards for fruit and conifers at the exhibition of the Mass. State Fruit Association, held here during the past week, and which was a success in every respect.

The recent severe freeze will affect much stock that is established here, particularly California privet, of which a stock of forty thousand plants are believed to be affected. Shall know later.

Meacham & Haskett of the Posey Shop are increasing their clientage by advertising specials when stock is plentiful. Just at present 'tis the reverse.

Aitken makes a fine showing of the Mrs. Ward rose in yellow baskets and ribbon, and finds it a big seller.

Newport, R. I.

The Broadway Hardware Co. will soon reopen on the site of the Weaver Building, destroyed by fire some time since. A full line of garden stocks will be carried. T. J. Nolan, one of the partners, reports a satisfactory list of customers to be transferred to the new store.

Gibson Bros., now on Bellevue Ave., have things well shaped out since the partnership was dissolved and have plenty of business ahead.

It is rumored here that Carl Jurgens intends removing to Chicago to take up the growing of lily of the valley in that city.

St. Louis.—V. H. Morgan, a representative of Lord & Burnham Co., New York, was a caller last week. John Rosenkrantz & Son, of Heemsstede, Holland, bulb growers and nurserymen, have opened an office at Webster Grove.

LEMON OIL CO'S STANDARD

SOLUBLE IN WATER

NO ODOR **INSECTICIDE** NO POISON

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites. Ants, Insects on Rose-bushes, Carnations, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

C. J. JAGER COMPANY

13-15 Custom House Street Boston 33 Canal Street, Providence, R. I.

Cleans a building of Rats and Mice in short time, keeps it cleaned, for it is always ready for use. Made of galvanized iron, can't get out of order, lasts for years. Large number can be caught daily. Go to Catcher mornings, remove device inside, which only takes few seconds, take out dead rats and mice, replace device, it is ready for another catch. Small piece cheese is used, doing away with poisons. Catcher is 18 inches high, 10 inches diameter. When rats pass device they die, no marks left on them. Catcher is always clean. One of these Catchers set in a livery stable in Scranton, Pa., caught over 100 rats in a month. One sent prepaid to any place in United States upon receipt of $3. Catcher, 8 in. high, for mice only, prepaid $1. On account of shipping charges being prepaid, remittance is requested with order.

THE H. A. STOOTHOFF & CO., MOUNT VERNON, N. Y.

DO YOU KNOW VERMINE?

John Lewis Childs, Flowerfield, N. Y., writes:—

"I suppose you will be glad to know that **VERMINE** is giving excellent satisfaction. Our greenhouse foreman says that it is the only thing that he has ever used that will kill white ants in the benches."

Valentine Burgevin's Sons, Kingston, N. Y., writes:—

"We wish to say that we find **VERMINE** an excellent thing. We used it on a bench planted with Smilax to kill root lice or maggots, which ate the roots, and after two applications our Smilax is taking on new life and has started off to grow."

The Gardner Nursery Company, Osage, Iowa, writes:—

"We will use **VERMINE** on our out-of-door fields of strawberry plants if the inside test continues as satisfactory as it now seems."

W. N. Craig, Brookline, Mass, writes:—

"I have used **VERMINE** and found it effective against root maggots, cut worms, earth worms, ants and other ground pests."

VERMINE is applied one part to four hundred parts of water by thoroughly soaking the soil. It will protect your crops from the ravages of vermin under ground without the slightest injury to vegetation.

Obituary

Mrs. Wilson.

Mrs. Wilson, mother of James S. Wilson of Des Moines, Ia., died at her home, 5082 Cabanne avenue, St. Louis, Mo., last week, aged 80 years. One daughter and two sons survive her.

C. D. Thayer.

Charles D. Thayer, one of the first men to engage in commercial flower growing in Worcester, Mass., 43 years ago, died on Saturday, January 24, aged 63 years, from heart disease. Mr. Thayer retired from business about two and a half years ago.

Isaac E. Coburn.

Isaac E. Coburn, well known for many years as a grower of fine pansies, died at his home in Everett, Mass., after an illness of several weeks, on Thursday, January 22, aged 71 years. Mr. Coburn was born in Weston, Mass., and removed to Everett in 1871. He was a frequent exhibitor at the shows of the Massachusetts Horticultural Society. He leaves two sons and a daughter.

KING IRON FRAME GREENHOUSES

Improved Flat Rafter

"All the Sunlight All Day"

That's what makes things grow, and that's what our improved

Flat Rafter Iron Frame
GREENHOUSE

gives you, without any sacrifice of strength. Simplified construction from foundation walls to eaves, ⅝ in. instead of ½ in. rafters, which allows us to reduce their depth from 3½ and 4 to 3 inches. Think of the morning and afternoon sunlight this saves.

It will pay you to write for Bulletin No. 46 right now.
Take advantage of our free information bureau.

KING CONSTRUCTION COMPANY
28 KING'S ROAD • NORTH TONAWANDA, N. Y

FIRES.

Zimple, La.—A small greenhouse of C. Porim was destroyed by fire last week.

Tuscarawas, O.—The greenhouses and heating plant of Daniel Affolter were damaged to the extent of $3000 on the morning of January 2d.

Westfield, Mass.—A greenhouse of Nicholas Brothers on Dennis street was badly damaged by fire Jan. 26th. Nearly all the glass was broken and the stock destroyed. Loss $2,000, partially covered by insurance.

Witmer, Pa.—The greenhouse of Elias Lefever was set on fire by the explosion of the boiler on Tuesday morning, January 13, causing a damage of about $300. Only a part of the house, which is 300 feet long, was damaged but many flowers and plants were destroyed.

Poughkeepsie, N. Y.—Fire believed to be the work of an incendiary, destroyed the handsome Bridgeman dwelling and a number of violet houses on the Ferncliffe estate of Vincent Astor at Rhinebeck on Friday, January 23, causing a loss estimated at $15,000. The dwelling and violet houses were recently purchased by Vincent Astor from F. W. Bridgeman. The dwelling was unoccupied, but the violet houses were leased by William Cook, a violet grower of Rhinebeck, and were stocked with plants.

For many years plans for erecting a Municipal Horticultural Building in Boston have been discussed but they have fallen through. One of the last things which Mayor Fitzgerald expects to do before giving up his office is to discuss plans for the erection of such a building. The approximate cost will be about $250,000.

A DASTARDLY CRIME.

Glasgow, Scotland, Jan. 24—A bomb outrage, believed by the police to have been carried out by militant suffragettes, today destroyed the extensive conservatory in the Glasgow Botanic Gardens known as the Kibble Crystal Palace. The great glass roofs and sides of the structure were blown into thousands of pieces. Many valuable plants were ruined.

A caretaker succeeded in severing the fuse of a second bomb just before the first one exploded. He had a narrow escape from losing his life.

INTERIOR W. B. DAVIS HOUSE SHOWING MEN ON PAINTING SCAFFOLDS.

Why We Can Erect Houses So Quickly

FIRST and foremost our erection methods are a combination of office development and erection practice. We don't want half our men to go to the job and then set them plan how to go about erecting. It is laid out and planned out at our factories by our construction engineers and approved by the erection superintendent. Definite detailed instruction and explanatory blue prints are then sent to the erection foreman who has the job in hand. He can't even start work. He and his men don't have to spend time there on the job waiting to work out the work it's practically all worked out for him. Nor can the men spend time "sizing up scaffolds." We have set up erection units that take care of that and in many cases provided iron fittings can be used so that putting up or shifting scaffold is a simple matter. Look at this illustration and you will see how those 8 men can paint a distance up the roof of 5 purlins by only shifting their standing planks. Combine these carefully thought out erection methods with the fact that our materials are cut to fit, at our factories, and are made ready with holes drilled for immediate erection; and then see if you can't see how it is that we can put up your houses so quickly and **put them up so well**. Both of which are vital things to consider when placing your greenhouse order. Wouldn't you rather pay for less useless time being **put on** your house and have better material **put into** it? That's Lord & Burnham's way of doing it.

LAWN GRASS

"The Right Seed in The Right Place"

We furnish grass mixtures for dooryards, terraces, lawns, athletic and polo fields, cemeteries, parks, country clubs, country estates.

Repeated laboratory tests on individual mixtures assure superiority of quality and growth.

Experience of over fifty years of successful seed business assures you of correct proportions.

Experiment has shown us that a mixture of the proper grasses is more satisfactory than an individual grass. Why waste your time and money experimenting? Let us furnish what you need.

NOTES ON CULTURE OF FLORISTS' STOCK

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Abutilons

Now that we have plenty of bottom heat the spare room in the propagating sand should be utilized to the utmost in the rooting of cuttings of indispensable stock. This includes abutilons, a class of plants altogether too sparingly represented in florists' stock for their current local trade. There is hardly any purpose for which some one variety of abutilon could not be used. The semi-matured new growths root readily at this time of year and the treatment of abutilons in general differs but little from that of geraniums. When they are rooted they can be potted into small pots, using a compost of three parts fibrous soil to one of manure and if any leaf mold is handy use some of it. They should have a night temperature of about 55 degrees and from 65 to 70 degrees on sunny days. All are good and easily grown subjects for the greenhouse and bedding.

Calceolarias

Calceolarias should now be in their flowering pots. Use a rather light loam, not chopped or sifted too fine, with a fourth or fifth of thoroughly rotted manure. If the soil is heavy add sand to the manure. Some will be starting to push their flower spikes and these are better to be pinched which causes the plants to break freely and make much nicer flower heads. Short of actual freezing, the plants can hardly be grown too cool. Forty degrees at night is far better than 50 degrees, and in the lower temperatures the green aphis is far less troublesome. While a little winter sun will not harm, we prefer to grow them with a light shade even at this season. On clear morning we give a light spraying over. Those of the rugosa section are useful at Memorial Day. These should now have their last pinching and can go in their flowering pots. At no time must they be allowed to wilt, and, like the cineraria, they must never be overwatered. Avoid extremes both ways. Give mild fumigation every week.

Care of Mignonette

Now the days are beginning to lengthen out, the beds will take more water and they should have liquid manure which should, however, be employed sparingly, both as to strength and frequency of application; a warning worth heeding. To make these plants bloom freely from now on be careful not to have the roots in too wet or dry condition and guard against all extremes in temperature. Keep the night temperature as near 45 degrees as possible with about 10 to 15 degrees higher with sunshine. If the plants are in a vigorous condition they should have a top dressing of cow manure one part and new soil two parts, but don't be too generous with this mulch. A half-inch at a time, and then every now and then as they need it will be better than to indulge in one heavy application. Give daily admission of air to harden the foliage, so it will stand after cutting. Keep them disbudded right along which will give better spikes and better stems to cut from, which will bring better prices.

Pelargoniums

See that these plants are kept growing from this out. Give them a sunny house, yet one where a low night temperature of 45 degrees or so is maintained. Feed liberally with liquid manure. An alternate top-dressing of Clay's or some other equally highly concentrated fertilizer will also assist in making the wood firm and cause the plants to flower freely. Where they are very much pot-bound they should be repotted in a compost containing two-thirds fibrous loam, one-third dry cow manure, also a dash each of sand and fine bone. Drain the pots well and pot firmly, leaving good margin for water. Green aphis is the arch enemy of the show pelargonium and must never be allowed even to show itself. We often see batches of these beautiful plants simply alive with aphis. The growers then give them a heavy smoking, which is likely to remove the pests and flowers at the same time. Fumigate often in light doses. Keep the plants spread out and as light as possible, and on warm days give them a syringing. If they are treated thus, you will get nice, stocky plants which will be creditable to you and satisfactory to your customers.

Sowing Asters

Now is a good time to sow some of the early asters. There are quite a few florists who have vacant bench room to fill up with something. Probably the earliest of all asters is Early Wonder now obtainable in two colors, pink and white. This comes in at least a week ahead of Queen of the Market, has larger flowers and partakes more of the character of the Comet section. Queen of the Market is the standard early variety to grow. It gives a tremendous crop of flowers not so long-stemmed as the later sorts, but valuable for all classes of design work. The Hohenzollerns are also fine early asters, with big flowers, and are grand for cutting. The seed should be sown now in flats. Cover lightly and place in a temperature of 50 to 55 degrees at night. Keep the little plants, when they appear, close to the glass to make them sturdy. In benching asters, remember that they appreciate a nice and rich soil—one such as chrysanthemums could thrive in. As a rule white asters have first call, pink, light blue and dark blue following in order of popularity.

Seeds to Sow

Do not fail to make sowings of verbenas, petunias, torenias, snapdragons, grevilleas, vincas, myosotis, stocks, mignonette, celosias, bedding begonias, salvias, pentstemon, Musa ensette, lantamas, dianthus, dimorphotheca, etc. Start these seeds in a warm house, where they will germinate without any trouble.

Mr. Farrell's next notes will be on the following: Alternantheras; Care of Palms; Flowering Shrubs for Easter; Rambler Roses; Sweet Peas; Starting Coreopsis.

Retailers in line

The scheme for the participation of the retail florists in a flower show as successfully carried out at Cleveland opens up a very promising vista of possibilities. The difficulties which have been found almost unsurmountable in an exhibition planned on competitive lines are entirely removed and we look to soon see quite a change in the aspect of our flower shows as a result of this well-arranged innovation. Of course, the scheme can be carried out fully as well with standard varieties as with novelties, and with other flowers as well as carnations. We would suggest, as an improvement, that exhibitors be allowed to use one other small flower in combination with carnations, for grace and color effect, such as sweet peas or lily of the valley.

Old and new problems of the A. C. S.

Last year at New York, the American Carnation Society faced a rather serious problem when it came to selecting place and policy for its 1914 meeting. The outcome would seem to indicate that the dilemma was wisely met. Cleveland was selected primarily for its availability as a location where a revival of enthusiasm and popularity on old-time lines together with an influx of new members might reasonably be looked for. This object was presumably attained, although it might be a question whether the success of this meeting would be repeated under other circumstances and diversions such as an important national event in contiguous territory and only a few weeks removed. The presence of so many old-time seasoned convention faces from points more or less remote must have been very gratifying to those who carry on their shoulders the responsibilities of the society's management, while no well-wisher of the organization could fail to feel pleased with the preponderance at the sessions of youthful and closely interested attendants. Just what proportion of these latter availed themselves of the opportunity to take up membership we know not, nor have we any idea to what extent the accessions to membership were affected by the discontinuance of the custom of free admission to the banquet as a members' perquisite, but of the interest displayed by the younger element in the meetings and in the banquet there can be but one opinion. The selection of a nearby city for next year's meeting, in view of the foregoing, appears to have been judicious and to offer a reasonable assurance of the continued support of the new blood enlisted on this occasion. Complications are not impossible, however, should the American Rose Society also select Buffalo as its meeting place next year as now appears probable, thus introducing once again the problem of a compromise date for a joint convention with the alternative of a split attendance of long-distance members and more or less dissatisfaction in either case. The decision of the National Flower Show Committee to hold the Fourth National Flower Show in Philadelphia in the spring of 1916 will again bring to the front the same predicament between the insistent advocates of a mid-winter meeting for business reasons and those to whom this is not particularly essential.

MID-WINTER SHOW AT BOSTON.

The midwinter exhibition at Boston Jan. 31 to Feb 1, while somewhat limited in the number of exhibits was fully up to the usual high standard of quality. Primulas and begonias exceptionally fine. In cut flowers carnations showed up well especially the prize winning White Enchantress and White Wonder, Commodore and Pink Delight. These were staged by A. A. Pembroke. Princess Dagmar from Patten was superb. Many of the local prominent growers were absent with their exhibits, at the Cleveland meeting, which was responsible for the limited number here. It was pleasant news to the stay-at-homes to hear they had scored so well out there. There was only one exhibit of roses, a grand vase of the unnamed seedling from the Waban Conservatories. It was conceded that Alex. Montgomery has a gem to introduce to a discriminating flower loving public in the near future. Thos. Roland had the field to himself on sweet peas. Begonia Florence Davenport was shown with Glory of Cincinnati. Its superiority was evident. Buddleia asiataca from R. & J. Farquhar & Co., was strikingly attractive. Knight & Struck Co., had chorizema and epacris. Yellow and white snapdragon from H. Huebner, were very fine. Wheeler & Co., showed a collection of exquisite phalaenopsis.

WALTER MOTT.

List of Awards.

Plants—Begonia Gloire de Lorraine—1st, Mrs. J. L. Gardner; 2d, A. M. Davenport. Begonia Glory of Cincinnati—1st, Mrs. Lester Leland; 2d, A. M. Davenport. Freesias 1st, Wm. Whitman; 2d, Miss C. Warren. Primula sinensis—1st, Wm. Whitman; 2d, Wm. Whitman; 3d, Mrs. J. L. Gardner. Primula Kewensis 1st, E. A. Clark. Primula stellata—1st, Mrs. J. L. Gardner; 2d, Wm. Whitman. Primula obconica—1st, Wm. Whitman; 2d, Wm. Whitman; 3d, Mrs. J. L. Gardner. Primula malacoides—1st, Wm. Whitman; 2d, Mrs. Frederick Ayer; 3d, Duncan Finlayson. Roman hyacinths—1st, Wm. Whitman; 2d, Mrs. J. L. Gardner. Calanthes—1st, Wheeler & Co. Three orchids, other than calanthes—1st, F. J. Dolansky; 2d, Mrs. J. L. Gardner; 3d, F. J. Dolansky. Specimen orchid, other than calanthes—1st, Col. Charles Pfaff; 2d, Wheeler & Co.; 3d, Mrs. J. L. Gardner.

Flowers—Carnations—Vase of fifty, not less than five varieties—1st, M. A. Patten; 2d, A. A. Pembroke. Vase of twenty-five, not less than three varieties, private growers only—1st, E. B. Jordan; 2d, Mrs. Frederick Ayer. Fifty white—1st, A. A. Pembroke; 2d, A. A. Pembroke. Fifty red—1st, A. A. Pembroke. Light pink—1st, J. W. Minot Co. Flesh pink—1st, A. A. Pembroke; 2d, Strouts. Dark pink—1st, A. A. Pembroke. Crimson—1st, J. W. Minot Co. Scarlet—1st, J. W. Minot Co. White variegated—1st, A. A. Pembroke. Freesias—1st, F. W. Fletcher. Violets, single—1st, Miss C. Warren; 2d, E. Bingham. Violets, double 1st, E. Bingham. Sweet peas 1st, Thomas Roland.

Gratuities—Mrs. Frederick Ayer, Erica melanthera; Miss C. Warren, Erica melanthera and Lachenalia Nelsoni; Mrs. J. L. Gardner, cyclamen; A. M. Davenport, Gloire de Lorraine begonia, white and pink; Thomas Roland, sweet peas; Mrs. C. G. Weld, tulips; Miss C. Warren, Cytisus racemosus; Wheeler & Co., Phalaenopsis amabilis; Patten & Co., Carnation Princess Dagmar.

First class certificates Thomas Roland, winter flowering sweet peas Christmas and White Spencer; H. Huebner, winter blooming antirrhinums; Duncan Finlayson, Cymbidium hybrid eburneum x insigne; F. J. Dolansky, Cattleya Trianae Mrs. Thomas F Galvin; M. A. Patten, Farquhar's Universal mignonette; Waban Rose Conservatories, unnamed rose.

Cultural certificates—Martin Sullivan, superior cultivation of Primula obconica and Primula Malacoides; A. A. Pembroke, vase of Calendula Orange King.

Honorable mention Knight & Struck Co., Epacris paludosa and Chorizema cordata splendens; R. & J. Farquhar & Co., Buddleia asiatica; Mrs. C. G. Weld, pink snapdragons.

NEW RED ROSE, "HOOSIER BEAUTY."

This engraving was intended to appear in the advertisement of Messrs. F. Dorner & Sons Co., and E. G. Hill Co., last week, but Uncle Sam was two days behind time in delivering the plate. We are glad to give it room in our reading columns for it is a fine portrait of a fine rose. See adve. on page 149, issue of Jan. 31.

NEW AZALEAS.

At the Azalea exhibition in Ghent, Belgium, during the Christmas Holidays, the Haerens Co., exhibited a number of novelties. Among those which won the most distinction for very early forcing qualities and color of the flowers were the following Azalea indica varieties:

Haere Will's Pink Pearl; very similar in color to Enchantress carnation. President Edg. Wartel; a sport of Pres. Osw. de Kerchove. President W. Wilson; a sport of Vervaeneana very deep rose bordered with lighter pink. Marie Antoinette; an excellent Christmas variety, rose color. Camellia Alba Plena; a double white, similar in shape to camellias.

OBITUARY.

We very much regret to learn of the death of the youngest daughter of William T. Burton, superintendent of Mrs. Kennedy's estate at Bar Harbor, Me., which occurred on Tuesday evening, February 3, very suddenly. Mr. Burton has a host of friends in the profession and all near and far will join in feeling the deepest sympathy for him and his family.

AMERICAN CARNATION SOCIETY

Additional Proceedings

REPORT OF COMMITTEE ON THE PRESIDENT'S ADDRESS.

Your committee for the consideration of the President's address respectfully submits the following report:

Trophies.

We feel that the taking of an active executive part in the exploiting and management of a strictly local exhibition, by this society, is likely to lead to serious complications in the future. On the other hand it is the duty of the society to encourage in all feasible ways the public exhibition of the carnation everywhere. For these reasons your committee does not favor the award of a cup or other trophy of large value at the New York exhibition, as creating a precedent for similar demands from other parts of the country in future, which demands could hardly be met. Your committee recommends that one silver and one bronze medal be offered for competition at the New York exhibition and that the society, when proper application is made, offer similar medals at other exhibitions where it is shown that such exhibitions are of sufficient importance to warrant such offer.

Color Classification.

The question of the color line in the pink classes having been set for special discussion need not be considered by this committee except that your committee would recommend, no matter what color divisions may be adopted, that the judges be authorized, at any time when convinced that a mistake has been made in any entry in the pink classes, to transfer the exhibit wrongly entered to the proper division of the pink class and to consider it therein without prejudice, the same as though it had been originally so entered.

"Gluts."

It seems to your committee that "slumps" or "gluts" in the market are occasional, but inevitable conditions to be met in growing and marketing perishable crops. It might be well to suggest to the grower the advisability of more strictly and carefully grading and culling his product at such times. We believe that the marketing of carnations carefully packed in boxes is to be recommended for the better grades and in markets which will accept flowers so packed.

Cultural Questions.

We doubt that carnations are losing either in fragrance or keeping qualities. It is true that some varieties are more fragrant than others—this has always been the case. It is certainly true that flowers produced during the comparatively sunless winter months will never be so fragrant as in late spring or early summer when the sun is approaching its maximum in intensity of effect. Your committee feels that the deterioration which occurs in carnations is largely due to bad or over-intensive cultivation and especially to improper methods in the selection of cuttings and their handling. We believe it quite possible to build a variety up by careful cultivation and especially by continued intelligent and careful selection in propagating.

Membership.

It is surely to be regretted that more of the men interested in the growing and sale of carnations have not become members of this society. Other societies perhaps are making no better, if as good a showing. We feel that there is no way of largely increasing our membership except by the slow and sure way through the active and continuous efforts of our members with their individual friends and acquaintances.

Your committee is hardly inclined to admit that we have exhausted the possibilities of development in the carnation in any direction—even in size.

Respectfully submitted,

S. J. Goddard.
W. Nicholson,
W. N. Rudd.

ADDITIONAL PRIZE WINNERS.

In our hurried notes last week the name of J. W. Minott Co., Portland, Me., was accidentally omitted from the list of prize winners. This firm won first on 50 "any other crimson" with Pocahontas, second on 50 Beacon and second on "any other flesh-pink" with Melody. The Hitchings cup offered as a sweepstakes in Sec. A., was worthily won by Philadelphia exhibited by S. S. Skidelsky & Co. The Burki prize for the vase of carnations holding in best condition to the end of the exhibition was awarded to S. J. Goddard for his Pink Delight. It is worthy of note that of the five vases considered by the judges for this award, four were from Goddard's collection. The president-elect evidently "has the goods on him."

GOOD TEAM WORK.

We do not recall any similar occasion where the members of the local committees of arrangements were more constantly and efficiently "on their job" than at this Cleveland meeting. In fact they were in evidence at all times, industriously attending to their duties and in the most courteous manner to all the visitors. These committees were constituted as follows:

F. A. Friedley, chairman; Publicity, H. P. Knoble; Decorating, Chas. E. Russell, T. J. Kirchner, Timothy Smith; Entertainment, Geo. W. Smith, Herbert Bate, Herman Hart; Retail display, F. C. W. Brown; Admission, George Bate.

CARNATIONS IN SECOND YEAR.

In the discussion which followed Mr. Pyfer's paper on carrying over carnation plants a second year, the consensus of opinion seemed to be that the success or faliure of such a method would depend largely upon the summer climate of the locality, which should be cool, and also upon the local demand for the summer grown crop. Strout's at Biddeford, Me., had been very successful in this respect and had the benefit of both the pre-requisites mentioned. It was generally agreed that the hot sun in most places was a great and almost unsurmountable drawback to success with "carried over" carnations.

THE TABLE EXHIBITS.

The plan for enlisting the support of the retail florists of Cleveland, as carried out, was quite a success. Ten decorated dinner tables were shown, each by a different florist, and the material in each confined to one new carnation, the flowers being provided by the respective growers or introducers of these novelties and the assignments being chosen by lot. No awards were given and no priority or distinction recognized. "Philadelphia," entered by S. S. Skidelsky & Co., was nicely exploited by J. M. Gasser Co., the centre being a tall slender vase with three low baskets at the base. Knoble Bros used Roper's Alice Coombe in a slender centre vase flanked by three low vases. Patten's Princess Dagmar was nicely handled by C. M. Wagner. Gloria was well displayed in a beautiful gold vase and three small baskets by Smith & Fetters. Adam Graham & Sons' subject was Peerless Pink, grown by the Chicago Carnation Co., a lovely combination with Adiantum Croweanum. The Eadie Co. had Matchless, from Cottage Gardens Co. The flowers in the central design were festooned with strands of baby ribbon in soft colors. In this instance, especially, permission to use one flower other than the carnation, to add color life would have been a great help to the decorator. Mrs. E. G. Wilson had Gloriosa in a graceful vase effect but rather overloaded with pink chiffon. Yellowstone from F. Dorner & Sons Co. was displayed in a low arrangement by Westman & Getz, with Adiantum Farleyense. Joy from A. L. Randall Co. was used in a low handle basket by the Jones-Russell Co. Pink Supreme from J. H. Leach & Son, North Easton, Mass., looked fine in a low wide vase arranged by A. M. Albrecht.

THE BANQUET.

This social feature of the convention, so enjoyable always, was a splendid success. The baskets and vases of flowers that had been exhibited were now turned to use as table decorations for the guests. Many of the ladies were in evening gowns. Officers and speakers were lined up at one long table and the other guests were grouped at round tables, making a brilliant and inspiring picture and there was plenty of good music.

President Knoble of the Cleveland Florists' Club started the exercises of the second section with a few words of welcome, expressing the hope that

the visitors would soon come again to Cleveland. President Brown of the American Carnation Society next made a short address, voicing appreciation of the kindness and hospitality of the florists of Cleveland. Adam Graham was then introduced by him as toastmaster. Those who know this versatile and eloquent veteran need no assurance that he kept things going lively. His introductions were inimitable, full of humor and characteristic Scottish wit. He spoke incidentally of John Thorpe, who was the father of the present chain of florists' organizations, as having made his first home in Cleveland when he came, a young man, to this country from England, and paying a warm tribute to his genius and horticultural ability. He "brought down the house" with a most comical reference to E. G. Hill's pre-eminence in business shrewdness and the declaration that Mr. Hill's son Joe was in no respects his inferior, having, according to his paper read the previous day, "got every plant on the place so educated that they all have to ring the time clock every morning."

George Asmus of Chicago, responded for the National Flower Show, telling of the successes of the past and forecasting the future development not only in indoor shows, but in outdoor exhibiting as at Minneapolis last summer and as contemplated for next summer in Boston.

Wm. J. Stewart, of Boston, responded with inborn enthuiasm to the toast for the Ladies. His illustrations of the helplessness of the sterner sex when deprived of the companionship and ministrations of mothers, sisters, daughters and sweethearts drew forth a veritable whirlwind of applause and merriment. Mrs. E. G. Wilson, who responded for the Men was equally successful in eliciting uproarious applause with her apt and comical allusions to man's place as a perpetual care, yet most delightful luxury in woman's existence.

Charles Gibson, a local celebrity long known as "Carnation Charley," proved a very entertaining speaker and storyteller. H. B. Howard of Chicago, said a few words for the Horticultural Press and J. W. Rodgers of Dayton, said some pleasant complimentary things for Our Hosts.

W. F. Kasting was received with long-continued applause as the new postmaster of Buffalo. He urged that everyone do all possible to advance floriculture and bring it to its rightful position as the peer of any industry in the world. He invited all to come to the Buffalo meeting next year and promised to send any errant husbands at that meeting back by parcel post on request from home. S. J. Goddard, the newly elected president, spoke in terms of praise of the show which Cleveland had gotten together and expressed high hopes for next year's meeting.

Telegrams of congratulation were received from Theodore Wirth, Minneapolis, and W. F. Gude, Washington, and the Tippecanoe Club of Cleveland, who were having their eleventh celebration of McKinley Day, sent thanks for vases of carnations that had been sent from the exhibition to grace their tables. Final resolutions were read by E. G. Gillett, Cincinnati, and then came Auld Lang Syne" as the close of a most enjoyable evening.

THE J. M. GASSER CO. TABLE DECORATION AT CLEVELAND EXHIBITION.
Carnation Philadelphia used.

NOTES OF INTEREST.

One of the most impressive object lessons of the exhibition was the overwhelming advantage in keeping qualities shown by the eastern-grown flowers over the majority of the exhibits from the west. In fact much of the latter was never put on the tables, practically the entire shipments of two of the large growers in that section arriving in useless condition, as stated in our notes of last week. Just what part the sunless weather of late and express companies' methods of handling, had in the misfortune thus sustained was a much discussed question on all sides. The eastern growers having traveled much the longer distance were naturally greatly elated.

In the discussion of the recommendations in the president's address, on Thursday afternoon, W. N. Rudd, speaking for the special committee, recommended that in view of the serious complications that might develop as a result of over active participation with other bodies in any large show, the Carnation Society should not offer any very valuable trophy at the New York Show this spring as creating a precedent for a similar demand from other parts of the country which the society would be unable to meet. This and other recommendations were unanimously adopted.

The three vases of 100 blooms each eligible for the award of the Fred. Dorner gold memorial medal for "any undisseminated seedling carnation," were superb examples of modern carnation development. They were Matchless, Gorgeous and Princess Dagmar, and Matchless, entered by the Cottage Gardens Company, won the prize. These three exhibits were, on vote of the society, sent to the Tippecanoe Club of Cleveland on Thursday evening, to adorn the tables at the eleventh anniversary celebration of McKinley's birthday.

On Wednesday afternoon a party of about 30 of the long-distance visitors was taken in autos, under escort of Messrs. C. J. Graham, Friedley, Bate Bros. and other local florists, to see the city and suburbs. Calls were made at the greenhouses of Adam Graham & Sons, F. R. Williams Co. and Frank Friedley and finally the White automobile factory. Fully two hours were consumed in a very superficial tour through the various departments of this great hive of mechanical industry.

Much sympathy as well as widespread disappointment was manifested when practically the entire carnation shipments of F. Dorner & Sons Co., and R. Witterstaetter, proved to be unfit to stage, the flowers being all closed up, the yellow variety, Yellow Prince, being about the only thing saved from the wreck.

J. A. Peterson's display of twenty specimen plants of his new begonia Melior was a centre of attraction for the trade and the public. In size and luxuriance of bloom it is certainly a marvel. We understand that Mr.

Peterson has another surprise in the begonia line nearly ready to spring.

This was one of the few instances where the American Carnation Society escaped blizzard weather as an accompaniment to its midwinter meeting. A temperature of 65 degrees on January 29 is a record which will long stand unbeaten.

The Chicago Carnation Co. distributed a handy tabulated folder, with the various classes of the premium list ready for filling in with the awards. It was a convenience much appreciated by the visitors.

If every florist in the country could see the mound of Primula malacoides with mirror background in the window of the J. M. Gasser Co., the sale of this dainty little plant would be prodigiously increased.

A store window filled with straw hats, with a sign reading "Fur Caps $1.60," on January 29 was good evidence that Adam Graham has not quite got a monopoly of all the humor in Cleveland.

E. Allan Peirce found much interest attaching to his exhibit of the new waterproof paper pots he is about to put on the market. Many advance orders for spring delivery are already booked.

We do not know of a more eligible location for a flower store anywhere than the "flat iron" corner in Cleveland, occupied by the Jones-Russell Co. They make good use of it, too.

Birch bark interior finish, particularly in windows, seems to be quite popular in Cleveland. We noticed several of them.

SOME CLEVELAND GROWERS.

The houses of Adam Graham & Sons are not located where they can get as much sunlight as desirable and the carnations show the result. It does not take long in this smoke-clouded city to get a deposit on the greenhouse roofs which shuts out much of the light. Ferns do finely under such light and general stock looks well. We noted a splendid array of trained Rambler roses that promise good for Easter. Plenty of lilies coming along nicely. All the houses are being fitted as rapidly as possible with cement benches.

The establishment of the F. R. Williams Co., in which also Bate Bros. and the Cleveland Cut Flower Co. are interested, comprises a very extensive range of houses mostly of the ridge and furrow type. Tile benches are used throughout. Carnations and roses are grown by the acre and they look good. Bulbous stock is also a large specialty. The visitors were much interested in an automatic coal feeding arrangement here.

Frank Friedley has also a very large place. Here is found a supply of about everything — carnations, ferns and other greens, bulb stock, callas, roses and a large planting of sweet peas — all in finest of "ship-shape."

TWO CHUMS AT CLEVELAND MEETING.

R. E. Jones, of Advance Co., Richmond Ind. Sam Seligman New York City.

PERENNIALS AND WHAT THEY MEAN FOR THE AMERICAN GARDEN.

(A paper by Richard Rothe, read before the Pennsylvania Horticultural Society, at the January meeting.)

(Continued from page 184)

The Procession.

Sweet and mellow are the first strains of the vernal prelude with the white of snowdrops, rockcress and leucojum, and the yellow of primrose, narcissus and crocus, and the blue of scillas, hepaticas, anemones and violets. During April it gains in volume when Primula Sieboldi, Alyssum saxatile and Iris pumila join and the wealth of blossoms of hardy candytufts, doronicums, trollius and ranunculus come in evidence. By the aid of the strong notes of Cottage and Darwin tulips, German iris, foxgloves, bellflowers, lupins, peonies, sweet williams, anchusas and Pyrethrum hybridum it swells on to the glorious height of the May day, emphasized by the festive crescendo of the jubilant color fanfares of the Oriental poppies. For several weeks our garden becomes pregnant with the sweet fragrance of hardy garden pinks, and just when the hardy garden roses are at their height, we may enjoy the most charming three-color accord of June consisting of the blue of Delphinium hybridum, the white of Annunciation lilies and the yellow of coreopsis or oenotheras. In turn the bold, stately spikes of Yucca filamentosa call for our admiration and, from now on, in broad, evenly-balanced cadenzas of the rich shades of Japanese iris, Phlox paniculata, spiraeas, vernicas, anthemis and gladiolus we see ourselves gradually gliding over to the grand color finale of the fall. Montbretias introduce new notes; we also enjoy the playful intermezzo of light-winged masses of flowers of the Japanese anemones, swaying in a gentle breeze. The warm golden waves of tall, late helianthus and heleniums roll by and vanish. At last we witness the supreme effort of dahlias, hardy fall asters and chrysanthemums, vieing with the hues of the autumn foliage to give strength and radiance to the closing strains of the most beautiful color symphony on earth. To the thinking human mind, the total picture is an illustration of the fleeting character of all things earthly.

The Way of the Enthusiast.

Likewise is a certain conventionality on our front lawns exposed to street or highway unavoidable. The herbaceous flower garden, as part of American home grounds, should represent a sheltered atmosphere in which we may be ourselves and nothing more. To suburban and country residents it becomes more and more a private studio in which to enter into the intimate acquaintance of plant life and enjoy floral beauty. Self-interest, self-action and the free exertion of individual taste in devising and planning, is not only a delightful occupation, but in by far the most instances the guarantee for advance and final success. The novice, who with samples of her tapestry and wallpaper in hand on a busy May day over the seed store counter requests our advice in her selection of herbaceous flower seeds for an immediate lively mid-summer and fall effect, in colors corresponding with the interior of her boudoir, may sometimes prove more than amusing. She will, however, in time join the ever-increasing number of more advanced flower lovers, who with pencil and note book in hand, at regular intervals, pay visits to our nurseries which command our serious attention. One of the latter category, an ardent garden enthusiast, in the course of a conversation a few years ago, speaking of her beautiful nothern sea coast home, said: "I call myself fortunate to have a gardener who well understands how to grow plants; but just think of how much more efficient he would prove if he would love flowers and look at them as I do!" It was a mere incident, causing a remark which throws a flashlight on the situation. To love flowers means in this case to possess the faculty to absorb their beauty, discern character of habit and form, and the trained eye and practical experience for the all-important work of associating hardy plant species for successive effects.

Are the majority of us taking notice of the signs of our time, by early preparation for near exigencies? Insert an "ad" in the want column for a competent man to take charge of a first-class herbaceous garden; the result and after experience is likely to give you the answer.

CLUBS AND SOCIETIES

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

A meeting of the National Flower Show Committee was held in the Hotel Statler, Cleveland, Thursday, Jan. 29, 1914. Present: Charles H. Totty, New Jersey; Willis N. Rudd, Illinois; George Asmus, Illinois; A. Farenwald, Pennsylvania; William F. Kasting, New York; John Young, New York. George Asmus, of Chicago, was unanimously elected chairman of the committee, to succeed Charles H. Totty. Mr. Totty was accorded a hearty vote of thanks for the great work he had done as chairman and for the very successful manner in which he had arranged for and carried out all arrangements for the recent successful show held in New York City.

The invitation of the Florists' Club of Philadelphia to hold the next National Flower Show in the spring of 1916 in Philadelphia, was unanimously accepted. The secretary was instructed to invite the Pennsylvania Horticultural Society to co-operate in making this coming show the biggest ever held in this country. Mr. Farenwald presented photographs of the building wherein it was proposed to hold the show and letters giving the dimensions and particulars, especially as to the exhibition hall itself.

Chairman Asmus appointed the following committees:

Premium or Schedule committee: Charles H. Totty, A. Farenwald, Thos. Roland.

Committee on Contracts and Lease: A. Farenwald, W. F. Kasting, W. P. Craig.

Publicity committee: W. N. Rudd, Chas. H. Totty, John Young.

Committee to secure special prizes: Wm. F. Kasting, Theo. Wirth, W. N. Rudd.

The meeting was most enthusiastic and stirring addresses were made by W. N. Rudd, Wm. F. Kasting, Chas. H. Totty and A. Farenwald, showing that the experience gained in the recent exhibitions would help to make the Philadelphia Show the grand success that it should be. It was the unanimous opinion of the committee that no city in the United States is better able to conduct a National Flower Show successfully than the city of Philadelphia. It is doubtful if many of the members of the society realize the great amount of hard work which is being done by the National Flower Show Committee at their meetings and during the time that the arrangements for the Show are being made, and if every society member will assist and do his little share, there is no question but what this exhibition will be the best ever.

Department of Plant Registration.

Public notice is hereby given that Julius A. Peterson & Sons, of Cincinnati, Ohio, submit for registration the Begonia described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the Secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Raiser's description:—Seedling, result of cross between Lonsdale's light pink sport of Gloire de Lorraine, and Socotrana. Strong robust grower, from 12 to 18 inches to 2 feet in height; flowers are borne in great profusion; male flower is 1¾ to 2 inches across and 4-petaled; female flower 5-petaled and very rare; color of flowers a soft, delicate, satiny pink, a shade lighter than Glory of Cincinnati; foliage nearly round and of a dark green color. It flowers from November till March and is in prime condition during December and January. Easy to propagate. Succeeds best in equal parts of loam anl leaf mould with some sand added. Temperature while in bloom, 56 to 58 degrees at night. Name, "Melior."

JOHN YOUNG, Sec..

January 31, 1914.

THE AMERICAN ROSE SOCIETY.

The Executive Committee of the American Rose Society will meet in New York City on Feb. 9th. The business before the committee will be the fixing of dates for staging the different exhibits, the arranging for managing details, as there are always a number of things that do not show for much, but if not looked after cause many little annoyances. The great exhibition of last year reflected much credit upon the working management. Various entries are already started, and it looks as though the rose growers are going to take a very active interest in the show. The American Rose Society would be very glad to have early notice of intending exhibitors. Any one having special prizes to offer we shall be pleased to hear from them. A variety shall be considered undisseminated, which cannot be exhibited by other than the introducer. All roses shall be disqualified where exhibited with more than two growths (one pinch) except in classes calling for displays. No variety shall win either the American Rose Society Silver Medal or Gold Medal more than once.

The Waban Rose Conservatories have offered a special prize of $25.00 for Russell roses.

BENJAMIN HAMMOND, Sec
Beacon, N. Y.

The American Rose Society records the new rose, "Francis Scott Key" originated by John Cook, Baltimore, a seedling from "Cardinal" crossed with crimson unnamed seedling, flowers red; size large to very large, with sixty petals or more, opening to high center; a strong, free and easy grower averaging more long, sturdy stems than any other Hybrid Tea rose.

BENJAMIN HAMMOND, Sec.

FLORISTS' CLUB OF PHILADELPHIA.

R. T. Brown of the Cottage Gardens was the attraction at the monthly meeting held on the 3rd inst. He gave an informal address full of well digested and up-to-date information on the carnation. The latest claimants for public favor were ably discussed and much valuable advice given in regard to propagating and marketing. By careful attention to these details an aggregate return of three and a quarter cents per flower was realized during the past five years. With an average cost of production of twenty three per plant showing a handsome profit in growing this flower commercially, provided the retailers do their duty and give proper returns. Comparisons of English methods of growing and marketing were made and such of these as were applicable to our differing conditions and climate were duly noted and recommended. The latest word from the Cleveland convention was also a feature of Mr. Brown's very interesting and instructive talk.

P. Joseph Lynch of New Castle, Indiana, gave an interesting talk on roses, emphasizing the point that many of the older roses like Bonsilene, Cecille Brunner and Marie Guillot were still in the ring and doubtless there were many more worthy of careful test, and the retailers should wake up and make their customers interested. He said it was just as Mr. Brown remarked about the older carnations. The new ones, many of them were good but we should never be in too much of a hurry to throw out our old well-tried standbys.

Among the exhibits of the evening were some splendid flowers of new varieties, which created great interest. Pennock-Meehan showed Mrs. Akehurst, also seedling No. 30 clear white and Princess Dagmar. S. S. Skidelsky showed Philadelphia. Cottage Gardens, Matchless and a sport of Mrs. C. W. Ward a pure light pink. Richard Langle, a vase of white Enchantress very well done and a large pure white seedling Freesia. J. M. Rider, Baltimore, vase of pink seedling, color of Enchantress Supreme, also a new white seedling.

The secretary read a letter from the S. A. F. National Flower Show Committee stating that the Club's invitation to hold their next International Exhibiton in Philadelphia had been accepted. The subject for next meeting, "Geraniums," by a master-hand R. Vincent, Jr., of Maryland; stereopticon illustrations.

NEW BEDFORD HORTICULTURAL SOCIETY.

The regular monthly meeting of the New Bedford Horticultural Society was held Monday, Feb. 2, with the largest attendance known for several years. It has been the policy for three years past to have all shows free and depend on the generosity of the public to support these by what is

practically an associate membership. This has been made possible through the kindness of the trustees of the Public Library, who have granted the use of the first floor of their beautiful building together with janitor service, provided no admission was charged. At this meeting plans were evolved for four free shows the coming season, viz.: Peony show early in June; Rose show the latter part of the same month; Dahlia and general flower show in September; Chrysanthemum show early in November. The annual banquet will be held on the 19th of this month and the annual clam-bake in August, for which the entertainment committee are making elaborate plans. Altogether this bids fair to be the banner year for this society. An entertainment committee was appointed consisting of W. F. Turner, chairman, James McVicker and George H. Reynolds,

WILLIAM F. TURNER.

ELBERON HORTICULTURAL SOCIETY.

The Elberon (N. J.) Horticultural Society held its regular monthly meeting Feb. 2. This being carnation night, the carnation growers of the Elberon section of Long Branch turned out strong and made a very creditable exhibition. C. H. Totty, of Madison, N. J., was a welcome visitor, acting as one of the judges. He complimented the growers on the quality of the flowers, and especially White Wonder, as grown by George Masson, and Beacon by Thomas Hambleton. They were superb. Mr. Sperling, of the Stumpp & Walter Co., was also in attendance and complimented the growers on their skill.

Following is a list of the awards:

Carnations White: George Masson 1st with White Wonder; D. C. Kelly 2d, White Perfection. Light pink: George Masson 1st with Pink Enchantress; Thomas Hambleton 2d, Pink Enchantress; D. C. Kelly 3d, Pink Enchantress. Dark Pink: D. C. Kelly 1st with C. W. Ward; Anthony Bauer 2d, C. W. Ward; John Clunas 3d, Northport. Red: Thomas Hambleton 1st with Beacon; John Clunas 2d, Beacon. Sweepstakes in all classes: George Masson 1st with White Wonder; George Masson 2d, Pink Enchantress.

D. C. Kelly, cultural certificates for mignonette and Rose Radiance; John Clunas, cultural certificate for Phalaenopsis Schilleriana; C. O. Duncan, cultural certificate for Coelogyne cristata; George Masson, honorable mention for sweet peas.

WM. BRYAN.

GARDENERS' AND FLORISTS' CLUB OF BOSTON

The next regular monthly meeting of the club will be held at Horticultural Hall, Boston, on Tuesday evening, Feb. 17, 1914, at 8 p. m. The lecture of the evening will be by L. W. C. Tuthill of New York, on "Advertising, the Gasolene of Business." It will be carnation night, and many of the 1914 novelties, as well as all the more popular standard varieties will be shown.

The annual club banquet will be held at Horticultural Hall on Tuesday, Feb. 24. Reception, 5.30 to 6 o'clock. Banquet at 6. Following the entertainment and post prandial exercises, dancing will be enjoyed. Tickets are now on sale and may be had from any of the officers or members of the executive committee.

W. N. CRAIG, Sec.

"FRANCIS SCOTT KEY"

New Rose by John Cook—A seeding from Cardinal and an unnamed seedling; a strong, vigorous grower, very large flowers, with extra long stems.

CLUB AND SOCIETY NOTES.

The regular meeting of the Cincinnati Florists' Society will be held on Monday, Feb. 8, at the club rooms.

Arrangements are being made for a flower show and trade exhibit in the Mayer building, Erie, Pa., on March 9th to 14th.

As a token of appreciation of his services as president, the Pasadema, (Cal.) Horticultural Association presented to James G. McGillivray, retiring president, a gold watch, on the evening of Jan. 16th.

The Horticultural Club of Boston, had as guests at its monthly meeting on Wednesday evening, Feb. 4, Dr. George E. Stone of Amherst, Mass., and Dr. J. J. Kennedy of Readville. The topic discussed was Progress in Rose Hybridization.

J. I. Donlan, former secretary of the old New York Gardener's Society says there is a movement on foot to get that organization active again. He will be glad to hear from any of the old members who are interested, at 133 West 28th street, New York City.

The Nebraska State Association of Florists held its annual meeting January 20th at the Lindell Hotel in Lincoln. Ed. Williams of Grand Island was elected president and Lewis Henderson of Omaha, secretary. Addresses were made by Charles H. Green of Fremont, J. R. Simonton of Falls City, Charles Faulkner of Omaha, Lewis Henderson and others.

At a meeting of the executive committee of the Horticultural Society of Chicago, January 27, it was decided that owing to the difficulty of securing a desirable place to hold the exhibition no spring show will be held this year.

MICHAEL BARKER, Sec. pro tem.

The following officers were elected at the sixth annual meeting of the Boston Retail Florists' Club: Thos. F. Galvin, Jr., president; Henry Comley, vice president; Benjamin H. Green, secretary; Julius Zinn, treasurer; Henry Penn, Sam Wax, N. Silverman, F. H. Houghton and Ed. McMulkin, directors.

Richard Vincent, Jr., is agitating a proposition for an excursion by water to the S. A. F. convention in Boston next August. Many in Baltimore, Washington and neighborhood have already looked favorably upon the proposition, and Mr. Vincent expects that others from Pittsburgh, Cincinnati and elsewhere may be induced to join. If a party sufficiently large can be secured, it is proposed to secure a special steamer from Baltimore on the Merchants' & Miners' line. All interested should communicate with Mr. Vincent at White Marsh, Md., who will be able to give cost of trip, etc.

THE SWEET PEA.

(A paper read before the Horticultural Society of New York by Ed. Jenkins.)

I was led to choose the sweet pea as a subject for my discourse this afternoon for several good and substantial reasons: First, because this beautiful annual is perhaps more truly "everybody's flower" than even the rose or any other plant in cultivation. Secondly, because the sweet pea above any other plant responds to good cultivation and liberal treatment by yielding to us a magnificent display of flowers over a long period and forms a grand exception to the old adage which says "you can't have your cake and eat it too," for the more sweet peas you pick the more you have, and, in fact, if you don't pick them you won't have them for very long. The rose and the carnation are sometimes so improved by the hybridist as to lose one of their greatest charms, their perfume, but not so with our favorite.

Its Origin.

While realizing that you expect from me practical cultural remarks, I feel sure that you will pardon a brief excursion into the history of the introduction to cultivation and the subsequent development of the sweet pea to its present measure of perfection.

As it is almost certain that the sweet pea reached America through Great Britain, we must go back there for a glimpse of its earlier development. About the last year of the seventeenth century an Italian priest named Cupani found the sweet pea growing wild in the island of Sicily and sent some plants of it to a Doctor Uvedale, at Enfield, in England. We do not know much about it from this date for the next hundred years or more, but suppose it to have been cultivated to some extent. In 1820, some six colors or shades were listed and in 1860 there were nine. Then, about 1877, commenced the great Eckford epoch when varieties and shades of colors were multiplied with great frequency, together with an increase in size and substance. This period of development continued without interruption till about the dawn of the twentieth century, when the sweet pea world was delightfully astonished by the advent of the waved standard, better known as the Spencer type. As this type reigns supreme today, at least among the summer-flowering kinds, we may well spare a minute to note this wonderful occurrence and to observe that when the sweet pea had reached such a stage of development that she was ready to make a break, or as gardeners call it, "to sport," and she did so in three different places the same season, viz.: in Earl Spencer's garden, in Northamptonshire, (whence the name of Spencer), and with Mr. Unwin, at Cambridge; also with Mr. Eckford, at Wem, in Shropshire. This tendency to break in several different sections the same year has been noted in some other plants, and one might argue that it was a sign that nature was jealous and opposed to monopoly. The old grandiflora variety, Prima Donna, appears to have been the chief factor as a parent of the Spencers, and its general tendency to throw four flowers to each stem seems to have been transmitted as a characteristic of the Spencers. The last few years have brought still another change in duplex standards and occasionally duplex petals. What the future may have in store we know not, but that greater glories await us in the future, the past gives us every reason to hope.

The "JOY" BLACKBERRY

brings joy to all who grow, sell, or eat it. It is immensely profitable to the market grower, and "a joy forever" to the amateur gardener. The canes are of ironclad hardihood and need no staking. They yield heavily, all the canes being literally loaded with fruit every year. I have tested this berry for several years, and am willing to stake my reputation upon it. In the winter of 1911-12 every Blackberry in my trial grounds was damaged more or less **except the Joy** which came through with every bud and terminal in **perfect** condition.

Grow This Berry. It is Hardy and Wonderfully Productive

JOY Blackberries are coal black, and large, almost as thick through as they are long. In luscious flavor they surpass by far all other Blackberries I have ever grown. In my long experience with this berry its canes have never been affected, even slightly, by orange rust or other fungus disease, and I believe it is immune to them.

A full assortment of Strawberries, Raspberries, Blackberries, Grapes, Currants, Gooseberries, Garden Roots, Hardy Perennial Plants, Shrubs and Vines, Evergreen and Shade Trees, Roses, Hedge Plants, etc. Illustrated descriptive catalog replete with cultural instructions, free to everybody. Established 1878. 200 acres. Quality unsurpassed. Prices low.

LOVETT J. T. LOVETT, Box 153 Little Silver, N. J.

Preparing the Soil.

The next phase we have to consider is how to treat the sweet pea so as to get a maximum of quality and quantity. The ordinary everyday method is to sow the seed in rows very thickly, as soon as the ground is ready to work in spring; then with the exception of giving supports of some kind, the grower leaves the plants to take care of themselves until the flowers appear, and on some naturally rich soil, if perchance the rainfall is more than ordinarily abundant, very good results may now and then follow. However, the true lover and sweet pea enthusiast will not be satisfied by any such uncertain methods, but will cast about to find means whereby success is more nearly assured.

Apart from good seed, the fundamental basis, the all-important foundation of success, lies in the proper preparation of the soil, and if this operation is shirked or in any way skimmed over, your efforts will in a large measure be set at naught, and disappointment will almost surely be your lot, unless you are fortunate enough to possess one of those rare conditions of an ideal soil, rich, deep and porous. Possessing this, you might well ignore this part dealing with the preparation of the soil, but as in about ninety-five per cent. of the cases we are only blest with about six to eight inches of tolerably good soil we must labor heartily to improve this so that we may have from twenty-four to thirty inches of well-manured compost. The time to do this to the best advantage is during the months of September and October, as at this time the ground is usually in good condition for maneuvering. Generally work is not so pressing as in spring, and further it gives time for settling of the soil before planting.

Let me now describe the method which I have found very satisfactory, though making no claims to superiority over other methods. Assuming a hypothetical case of six rows, each fifty feet long, we would lay out a rectangular plot thirty-six feet by fifty and on the shorter or thirty-six foot side, three feet from the corner, set a stake, then every six feet a stake, until the six rows are indicated. Stakes should be placed opposite each other at both ends and should denote the center of each row. Now commencing on the fifty foot side, we remove the top nine inches to soil from three feet on both sides of the center of row one and place it outside of our plot entirely, to be later carted or wheeled to finish the last row The top soil being removed, we dig a trench (always using the end stakes as a center) eighteen inches deep and two feet wide, placing the subsoil removed on either side of the trench where the good topsoil has just been dug off. Then commencing on row two, we remove the topsoil off the six feet wide and to the same depth as before and use it for filling trench one, but not without mixing about a ton of half decayed farm-yard manure and fifty pounds each of bonemeal and woodashes, also about two pounds of well pulverized sulphate of iron, being sure at all times to thoroughly incorporate the whole mixture. Proceed thus to the last row when soil from row one will be used for filling. As each row is finished endeavor to leave the soil ridged up so as to give the frost a chance to do all the disintegrating possible. That all this sounds like a heavy task I know full well, but if you would have good, long stemmed peas, from the middle of June till at least the middle of September, this, or some modification of this method, must be followed.

Sowing the Seed.

Having prepared the soil we next come by logical sequence to the sowing of the seed and by all means spare no effort to secure good seed from a reliable seedsman. If you would not be disappointed in securing some choice variety which you have set your heart upon, get them as early as possible and keep in a cool place until sowing time arrives.

Before we sow, or perhaps before we buy, it will be in order to determine how many seeds we require. On the basis of six rows fifty feet long, i

will require six hundred plants to space the plants six inches apart, which is quite thick enough. At any rate, if we start to raise six hundred, the chances are that from one cause or another a few will succumb between germination and planting out time, if they do we can plant eight inches apart and this will fill up the rows and possibly give better flowers than if planted six inches apart. To raise our six hundred plants we must put in about nine hundred seeds, estimating a seventy per cent germination which is about what we may reasonably expect. At the outside it will only require three ounces, as each ounce contains more than three hundred seeds.

This immediately brings up the question of what is the best time to sow? While personally convinced by reasoning that the autumn is the *ideal* time to sow in pots or flats, carrying the plants through the winter in frames or a very cool greenhouse, and planting out as late in spring, and while I am following this method this winter, still I do not feel that I have given it a sufficient trial to advocate it conscientiously.

The system I have followed for several years is to sow in small pots about the middle of February or the beginning of March. Before sowing we treat the seed with cultures of the nitrifying bacteria, believing for the small expense and trouble involved in this operation, that the possible results make it well worth while, but I will not enter into the details of nitrocultures, as full directions always accompany each purchase, any more than to say its application is very simple.

The seed being sown, we prefer to germinate at a temperature not less than fifty, because at lower temperatures the whites and creams especially are very liable to rot. Some advocate the filing or chipping of the seed coat, and others soaking in tepid water to promote more rapid germination, but at the temperature mentioned and with plenty of water, we have never found these aids necessary. As soon as germination has taken place and the growing points are above the soil, a temperature of forty-five or even lower at night will suit. During the day a free circulation of air is always desirable as if the plants are in any way coddled natural resistance to disease will be impared and instead of a thrifty, hardy plant, we shall have nothing but weaklings. As soon as weather permits, remove the plants to a cold frame as the sooner they get away from artificial heat the better, and on every favorable occasion remove the sash completely so that the air may have full freedom to play around the plants. Needless to say they must never be allowed to suffer from lack of water, or to become starved for the want of repotting. According to locality the plants may generally be planted out in their permanent quarters from the tenth of April to May 1.

Planting Out.

Still cloudy weather is the ideal condition for planting, as on such a day the injury to the plant from temporary exposure of its roots will be a minimum. The trenches should have been moderately firmed by walking over them and then raked over finely, do not fear to open the ball and spread out the roots, even at the risk of breaking a few rootlets, as the advantages gained by doing so will more than offset any little damage. In planting be sure to press the soil into intimate contract with all the roots and if the soil be on the dry side, follow the planting with a good watering and then hoe the ground thoroughly.

Let not those who have no facilities to do all these things despair because much might be accomplished where the interest is great, and even if we are obliged to sow directly outside, providing we thoroughly prepare the soil in some such manner as here advised, and if our subsequent treatment is of the right kind, very gratifying results may follow. If we must sow in the open, let us make drills about two or three inches deep on top of the prepared trenches and sow just as early as possible, putting the seeds about an inch apart, so as to allow for losses, then if they come up fairly thick, take out enough to leave the plants from six to eight inches apart.

Supports.

Going back to our plants which we left just planted out, it is advisable to place all around them some bushy brush about a foot or so high, as it will afford some slight protection from cold biting winds, which may be expected at this early season and will give the plants the comforting feeling of having something at hand to cling to as soon as they feel the need of it. For permanent supports for sweet peas, there is nothing better than good brush six to eight feet tall set firmly in the ground, but as this is sometimes rather difficult to obtain, a fairly good substitute will be found in large meshed poultry wire nailed to posts.

Having provided good supports for the plants, the routine work will be to keep the ground hoed as frequently as possible and to prevent overcrowding. A little judicious thinning will occasionally have to be practiced by cutting away superfluous shoots. If flower buds should appear before the plants have reached about three feet in height, it will be a good plan to disbud them, as too early flowering will militate against the future well-being of the plant, but when the plants have acquired the requisite height and strength and flowering begins in earnest, you must be sure to keep all flowers picked clean as if any go to seed the plants will soon cease growing, and your season will come to an abrupt end.

Feeding.

After the plants have been flowering for some length of time, the careful grower may note that the flower stems are getting shorter and that there is a slackening of growth generally. Here at this time is where some quick acting manure, well watered, will give the required stimulation and in a few days growth will be back to the normal and may be kept there by repetition of some such methods as have just been suggested.

Fertilizers.

The question might well be asked here, what shall we use to feed and stimulate our plants into growth? I do not believe there is any one thing very much better than another, as long as good judgment is used in the application, but I would especially urge beginners to err on the short side, rather than over-do it. I have found that after the plants have been flowering for a week or two they will generally stand a light feeding once a week and by the application of two pounds of nitrate of potash dissolved in fifty gallons of water and this amount applied to each fifty foot row every two weeks, alternating the week between with about five pounds of superphosphate sprinkled along each row, will keep the plants tuned up to their work at all times. If weak liquid manure is available an occasional dose will be beneficial or a sprinkling of soot well watered in will do good not only as food, but as a tonic, which seems to brighten and intensify the colors immensely.

Mulching.

Mulching forms an important part in the treatment of the sweet pea during our hot dry summers, but care must be exercised here, as elsewhere. The two danger points to avoid, are getting it on too early and using too close material. Wait until the ground has thoroughly warmed up, which will not be till nearly the first of July, and conserve the moisture in the meantime by frequent hoeings. If a mulch is put on too early in the season the ground is kept cold by the exclusion of the sun's rays, and the bacterial flora which inhabits the soil (and upon which all plants must depend in a large measure for their sustenance) are retarded in their development, and because this bacterial flora must have a free supply of air, the mulch should be of a loose nature, straw litter or dried leaves.

Shading.

Unfortunately some of the finest kinds of orange, salmon, scarlet and crimson shades must be protected from the sun if we would have them at their best and so to facilitate the application of shade these varieties should be planted together. Light cheesecloth is sometimes used to stretch over these kinds that burn, as it is quite inexpensive, but a more satisfactory shade is made by erecting a

NATIONAL ASSOCIATION OF GARDENERS

The "SPENCER" Type of Sweet Peas

"The Seal of Quality"

Burpee's Unequaled List for 1914. Arranged Alphabetically. Choicest Re-selected Stocks Grown on "Floradale Farm."

SPENCER SWEET PEAS are a great specialty with us! We were the first to grow the seed in America, the stock having been entrusted to us before introduction, even in England, of the original **Countess Spencer.** We have grown "the original Beauty" and its many "sportive" children with painstaking care each season since. There are but few other growers—either in England or America—who can supply an equal assortment of **True** RE-SELECTED "SPENCERS" that are uniformly of such choice quality. Seedsmen and planters generally can see how superior our stocks now are by the trials at FORDHOOK FARMS next June or July, while those who may be in California are invited also to inspect the growing crops at our FLORADALE FARM in the beautiful Lompoc Valley. Every planter's garden, however, is really a trial ground and we shall be quite content if any "Doubting Thomas" will send us only a portion of his order and **note the difference** in character of flowers produced!

		Per Pkt.	Per Oz.	Per ¼ lb.	Per Lb.
3102	**Afterglow.** Per pkt. of eight seeds, 15c.	$0.25			
3106	**American Spencer.** Red flakes on white ground	.10	$0.30	$0.85	$3.00
3108	**Apple Blossom Spencer (Burpee's).** Rose and pink	.10	.30	.85	3.00
3110	**Arthur Green.** Maroon shaded violet.	.10			
3112	**Asta Ohn.** A charming soft lavender.	.10	.40	1.50	
3114	**Aurora Spencer (Burpee's).** Cream mottled orange	.10	.25	.75	2.50
3118	**Beatrice Spencer.** White ground, tinted pink and buff	.10	.20	.60	2.25
3122	**Blanche Ferry Spencer.** Rose standard, white wings	.10	.40	1.50	
3124	**Blue Jacket.** A fine rich dark blue self	.15	.75		
3128	**Captivation Spencer (Burpee's).** Rosy wine red	.10	.35		
3132	**Charm (Burpee's).** Per pkt. of twenty seeds, 15c.	.25			
3134	**Constance Oliver.** Delicate pink, suffused cream	.10	.30	.85	3.00
3138	**Countess Spencer.** A soft rose-pink	.10	.20	.60	2.25
3140	**Dainty Spencer (Burpee's).** White, edged with rose	.10	.30	.85	3.00
3142	**Decorator (Burpee's).** Per pkt. of ten seeds, 15c.	.25			
3144	**Duplex Spencer.** Beautiful cream-pink	.15	.65		
3146	**Earl Spencer.** Brilliant salmon-orange	.15			
3148	**Edith Taylor.** Bright salmon rose	.15	.75	2.50	9.00
3150	**Elfrida Pearson.** Light pink. Pkt. (twenty seeds), 15c.	.25			
3154	**Ethel Roosevelt (Burpee's).** Pink flakings on cream ground	.10	.35	1.00	3.50
3160	**Florence Morse Spencer.** Beautiful light pink	.10	.30	.85	3.00
3162	**Florence Nightingale (Burpee's).** Best lavender **Spencer**	.10	.40	1.50	
3164	**Florrie.** Rich pastel shades of rosy crimson lake	.15	.45	1.50	4.00
3170	**Gaiety Spencer.** White striped with rose-crimson	.10	.40	1.50	
3172	**George Herbert.** Bright rosy-carmine.	.10	.20	.60	2.25
3176	**Gladys Burt.** Salmon-pink on primrose ground	.10	.35	1.00	3.75
3178	**Helen Grosvenor.** A lovely bright orange-pink	.10	.40	1.10	4.00
3180	**Helen Lewis.** Standard orange; wings orange-rose	.10	.30	.85	3.50
3182	**Helen Pierce Spencer.** White mottled blue	.15			
3184	**Hercules.** A very large rich pink of excellent form	.15	.65	2.25	8.00
3185	**Illuminator.** Rose, heavily suffused salmon-orange. Per pkt. of 12 seeds, 15 cts.	.25			
3186	**Irish Belle, or "Dream" (Burpee's).** Lilac flushed pink	.15	.65

BURPEE'S BLUE LIST FOR 1914

The most complete catalogue published for **Market Gardeners, Truckers and Florists.** For the planter who "knows" it contains complete lists of all that is best in vegetables and flowers, while the grower who is uncertain as to the best varieties suited for his purpose may be guided by the bull's eye ⊙ placed after what is known to be best. In addition full descriptions are given many new and most valuable varieties.

BURPEE'S BLUE LIST FOR 1914 contains **148** pages with hundreds of halftone and engraved illustrations. Within the pages of this catalogue we have condensed an experience of thirty-five years both in handling and the actual growing of seeds.

If you garden for profit (that is, sell your products in the market) you are entitled to a copy of this complete and easily understood catalogue, but if you are a private planter please do not ask for a copy, as we must protect the Market Gardener, Trucker and Florist.

W. Atlee Burpee & Co.

"SEEDS THAT GROW"

PHILADELPHIA, PA.

CHRYSANTHEMUMS Our Novelties for 1914 are ready for immediate delivery on such varieties as Meudon, Jas. Fraser, Mrs. R. H. Boggs, Mrs. Paul Moore, Daily Mail and Mrs. Ernest Wild at $2.00 plant; $20.00 per dozen. Chieftain, $5.00 per dozen.

We had over twenty acres of 'Mums growing outdoors last year in order to guarantee our stock being propagated only from plants that had not been fed or forced in any way.

Send for our catalogue of over four hundred and fifty varieties, including the Gold Medal Singles; the Caprice Family, which we introduced last year; the Early Flowering varieties which are becoming the rage and all other Standard varieties.

CHARLES H. TOTTY, Madison, N. J.

PINK SUPREME THE CARNATION FOR MONEY PRODUCTION

Early, free, persistent, makes ideal plants in field; lifts easily. Color, light-shell pink. Does not fade in hot weather. Tested thoroughly by five competent growers and easily outblooms all others of its color. Awarded Report of Merit by Gardeners and Florists' Club of Boston, 1913. First prize at show of Co-operative Flower Market, April, 1913. In heavy demand at every high class store in Boston.

Rooted Cuttings Now Ready. $10 per 100, $100 per 1000

J. H. LEACH & SON NO. EASTON, MASS. *Or* J. M. COHEN, Co-operative Flower Market 2 PARK STREET, BOSTON, MASS.

light wooden framework and by nailing ordinary builder's lath spaced about an inch apart. Through this the plants seem to get all the light necessary, a free circulation of air, and the flowers will not burn.

Labeling.

If there is one thing more exasperating than another to the sweet pea grower, it is to find that when his plants come into flower the varieties are more or less mixed. This is more likely to happen where the plants are sown and grown in pots. To avoid this, we recommend a label in each pot and when planted out make a plan and keep a record of the location of each variety; by such means confusion and annoyance will be avoided. This will be of great importance if we go in for crossing and seed.

Crossing and Seed Saving.

To those who have had no experience in attempting to cross fertilize the sweet pea some puzzling situations may occur, but they must learn that several days before the blossom opens the pollen is ripe, the stigma is ready, and fertilization has taken place, if it is ever going to take place. Therefore, being equipped with this knowledge, we proceed to carefully open the keel of the bud and upon examination of the anthers with a pocket lens we determine whether we are too late by finding out if any of the pollen grains are shed or ready to shed. Provided we find them intact, we cut all the anthers clear away, leaving only the stigma, and upon this stigma apply the pollen from the flower which you wish to make the cross with and your work is complete. It is well to fertilize all the flowers on a stem as in that way you are more sure to get the cross you are aiming at, or if you do not think that advisable, cut away the unfertilized flowers. Tie a small durable label to the stem with the records of the cross.

To make sure of good seed, either artificially or naturally fertilized, July is none too early to begin, as the plants are then at the height of their vigor and you get a chance to get your seeds ripe before the fall rains set in. If you determine to save your own seed you will go carefully over your rows and remove all those not true to type (and, alas, there are always a goodly number) before allowing any seed to set. In raising and flowering your crosses you will have many disappointments as well as some delightful experiences and it is well to remember that it takes several years for a cross to settle down to a fixed type, but this delightful uncertainty is only one of the many charms of raising new kinds.

Insects and Diseases.

Even the dainty fairy-like sweet pea is not exempt from the attacks of insect pests and among these green fly is perhaps the worst. The only remedy for this pest, is some form of nicotine spray, of which there are a number on the market, and a careful grower will not let this or any other insect get a very strong hold on his plants before he takes measures for its eradication. Red spider may be kept in check in water applied forcibly with the hose, and thrips, like the green fly, must be fought with a nicotine spray .

Of the fungoid diseases, mildew is at once the most common and perhaps the hardest to deal with, for while there are many preparations on the market for the prevention and cure of mildew, the best way to combat it is to keep up the natural resistance of the plants by conserving their vigor as long as possible. A soil well supplied with potash is supposed to preserve the plants from attacks of the so-called streak disease, but healthy plants set out on new ground annually is the surest way of avoiding all the diseases.

Various Methods of Planting.

No one should think that rows are the best and only means of planting the sweet peas. Rows undoubtedly are the most satisfactory means where cut flowers and economy of labor are the main objectives, but where a pleasing artistic effect is desired, then we may plant in clumps at the back of herbaceous borders, or in beds or in curved lines, or yet in tubs for standing on terraces or verandas, or they may be planted to hide an unsightly wall or building; in fact, there is almost endless scope for the grower's ability in forming harmonious color combinations and pleasing effects in general by the proper disposition of this charming plant.

What Varieties to Grow.

There is such a host of varieties to choose from that the prospective grower may well be bewildered in making a choice, and with the idea that it may aid some, I will name a few of each color, that, having grown them myself, I know to be good:

White—King White, Snowdon, Nora Unwin.

New Red Rose
"FRANCIS SCOTT KEY"

A Seedling of Cardinal Crossed with an Unnamed Red Seedling

Flowers large to very large with sixty and more petals opening to a high centre. Averages longer and stiffer stems than any Hybrid Tea Rose I know of under glass, A hardy and easy grower. Every florist can grow it.

It does not need coaxing or boosting. Stock limited. Plants Ready for Delivery from now on

Strong plants, own root, 2 1-2 in. pots, $30 per 100; $7 for 12 plants; $12 for 25 plants. Cash with order

Cream — Dobbie's Cream, Primrose Beauty, Isabel Malcolm.
Lavender — Orchid — R. F. Felton, Mrs. Heslington.
Maroon — Nubian, Mrs. Cowdy, King Manoel.
Scarlet — Scarlet Emperor, Vermillion Brilliant.
Crimson—Maud Holmes, King Edward Spencer.
Dark Blue—Navy Paradise, Lord Nelson Spencer.
Cream Pink—Mrs. Hugh Dickson, Doris Usher, Mrs. Routzahn.
Pink—Margaret Atlee, Hercules, Countess Spencer.
Rose Pink—John Ingram, George Herbert, Rosabelle.
Orange Pink—Edrom Beauty, Helen Lewis.
Orange Scarlet — Edna Unwin, Thos. Stevenson.

The following dozen kinds are bicolors, flaked, striped and mottled, but are wonderfully fine things and should be grown by everyone that can afford the space:

Afterglow, Prince George, Bertie Usher, Mrs. W. J. Unwin, Arthur Green, Senator Spencer, Helen Pierce Spencer, Inspector, Melba, Charles Foster, Agricola and Mrs. Cuthbertson.

To those sweet pea enthusiasts who would get a more extended knowledge of their favorite flower than is possible from a brief half hour's paper, I would commend them to the following books: "The Sweet Pea Annual" issued by the National Sweet Pea Society of Great Britian, or Walter P. Wright's "Book About Sweet Peas," or "The Modern Culture of Sweet Peas" by Thomas Stevenson, but above all show your interest by joining the American Sweet Pea Society and attend its exhibition here in this building on June 28 and 29.

The Rev. W. T. Hutchins said of the sweet pea: "The sweet pea has a keel that was meant to seek all shores; it has wings that were meant to fly across all continents; it has a standard which is friendly to all nations; and it has a fragrance like the universal Gospel, yea, a sweet prophecy of welcome every where which has been abundantly fulfilled."

Improved Golden Chadwick

(*Pollworth*)

The Chadwick family of Chrysanthemums are the highest type of the commercial varieties, and any sport of Chadwick that is an improvement will be welcomed. This new variety has its origin in the West. We have taken part of the stock and will distribute the variety the coming season. It is described as identical with the parent in all respects except form and color of the bloom. It is a perfectly formed flower and a deeper golden yellow in color.

It is a variety that will be found all that the name implies. It means better late mums, and you need it.

MISCELLANEOUS

BUSINESS OPPORTUNITY.

A correspondent near Philadelphia whose good standing is well known to us, writes: "I have about thirty acres of very fine land, suitable for nursery business, and am anxious to get hold of a good, live, young fellow, one who is up in this line of work and a hustler, to go into the nursery stock with me. I do not think there will be any trouble in giving him a nice line of trade, but would not consider anyone unless he had some capital and thoroughly understood how to run it.

"Have frequent inquiries for the laying out and fixing of grounds, furnishing material, etc., for the work. This could be handled as a nice profitable investment for the right man."

Address in confidence GEORGE E MEYER, care George C. Watson, Dobson Bldg., 9th and Market Sts., Philadelphia, Pa.

BRITISH HORTICULTURE.

The Anglo American Exposition.

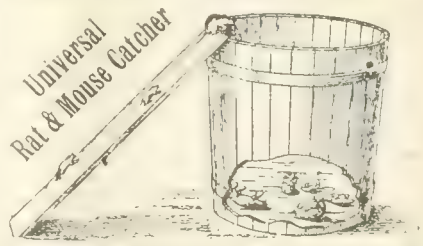
At the Anglo American exposition to be held at Shepherds Bush, London, this year, every effort will be made to secure a thorough representation of the highest forms of American and British gardening. This section is being organized by a committee thoroughly representative of horticulture, arboriculture and forestry. Adequate provision has been made for the display of rock and water gardening of the most varied character. Roses will, of course, have a big slice of the space set apart for them. Ornamental trees and shrubs are also to be seen in great variety. The outdoor bedding will be in every way worthy of the important exposition. The opening takes place in May and the exposition will be open for six months.

A Shortage of Flowers.

There has been a shortage of flowers on the London market. At the time of writing (Jan. 16th) the outlook is very serious for the street vendors depending upon this class of trade for their livelihood. At this period of the year there is usually a big supply of French flowers available, such as mimosa, violets, and narcissi. Owing to the severe weather there has been an unusual shortage from this source. The street sellers have had to fall back on artificial flowers. Supplies from the Scilly Isles and Guernsey will soon be upon the market, and this will relieve the situation.

W. H. ADSETT.

NEW INCORPORATION.



Youngstown, O. The Leisch Implement Company, capital stock, $25,000.

NEWS NOTES.

Boston, Mass.—Mrs. Horatio N. Slater is to establish an Italian garden at the corner of Beacon and Hereford streets this spring.

Boston, Mass.—The council has voted to appropriate $25,000 of the Parkman fund for the building of the foundation of the proposed new horticultural building in the Fenway.

New York, N. Y.—The first meeting of the creditors of the bankrupt firm of Wm. Hagemann & Co., will be held at the office of Seaman Miller, 2 Rector street, New York city, on Feb. 13th, at 3 P. M.

Cleans a building of Rats and Mice in short time, keeps it cleaned, for it is always ready for use. Made of galvanized iron, can't get out of order, lasts for years. Large number can be caught daily. Go to Catcher mornings, remove device inside, which only takes few seconds, take out dead rats and mice, replace device, it is ready for another catch. Small piece cheese is used, doing away with poisons. Catcher is 18 inches high, 10 inches diameter. When rats pass device they die, no marks left on them. Catcher is always clean. One of these Catchers set in a livery stable in Scranton, Pa., caught over 100 rats in a month. One sent prepaid to any place in United States upon receipt of $3. Catcher, 8 in. high, for mice only, prepaid $1. On account of shipping charges being prepaid, remittance is requested with order. H. D. SWARTS,
Inventor and Manufacturer, Scranton, Pa.

FOR FULL DESCRIPTIONS SEE OUR CATALOGUE—MAILED FREE.

We are the largest [illegible] of Cannas in the world. Our prices on Cannas will be in comparison with any house in the Canna business.

Our Cannas are fully [illegible] so that three and one-half feet are strong, sound, dormant, and are packed 250 in a box. Two can be [illegible] and shipped as one. One box of 250 sold at [illegible] rate. It is cheaper for you to buy a box of 250 than [illegible] at [illegible] rate. Write for [illegible] prices on quantities.

If any Cannas are not found [illegible] it may be understood that they are superseded by the foregoing. If selection is left to us we will substitute or send only the best for all purposes.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

Canners' Convention Exhibits.

The American seed trade is very creditably represented this week at the Canners' Convention being held at Baltimore, Md., Feb. 2-6, in the Fifth Regiment Armory.

J. Bolgiano & Son, Baltimore, Md., have a very large and attractive display. They are advertising their new tomato introduction of this year, the "John Baer." This tomato is attracting much attention from the visiting canners. On account of the quality and scarcity of seed, it is selling at $50.00 per lb. The "Greater Baltimore" tomato seed is also very prominently displayed. All other varieties of tomato seed of any prominence are also found in Bolgiano's exhibit. They have on display a full line of peas, beans and sugar corn. The E. B. Clark Seed Co. of Milford, Conn., have a full line of seed peas, beans, sugar corn and beets. They also have several jars of well selected pods of peas in solution. The Leonard Seed Co. of Chicago, Ill., are showing a very extensive line of sugar corn on the ear, also a sample line of seed peas and beans. John H. Allen Seed Co. of Sheboygan, Wis., are showing an extensive sample line of peas and beans. The Livingston Seed Co. of Columbus, Ohio, are displaying very extensively Livingston's New Stone tomato seed along with "True Blue" seeds in general. W. W. Barnard Co., Chicago, Ill., are showing an extensive sample line of seed peas and beans. Jerome B. Rice Seed Co., Cambridge, N. Y., have a complete line of canners' and picklers' stocks. Rogers Bros., Alpena, Mich., have a very attractive display, showing seed peas and beans. S. D. Woodruff & Sons, Orange, Conn., a full sample line of seed peas and beans. F. H. Woodruff & Sons, Milford, Conn., samples of seed peas and beans. D. M. Ferry & Co., Detroit, Mich., a sample line of seed peas, beans and sugar corn.

Chicago Seed Notes.

At the outlying seed stores about Chicago all hands are busy getting ready for the early orders of the market gardeners, who have been able to work out-of-doors nearly all the winter. The unseasonably warm weather, however, is not believed by the seedsmen to favor the seed trade, as beets, carrots, parsnips, etc., buried in the ground, have been more or less of a loss and made money scarce. Onions, also, have not kept well. Onion sets, on the contrary, are reported by the largest dealers to be showing excellent keeping qualities owing to their fine condition when stored in the fall.

At the four stores of the Leonard Seed Co. seed testing is going on and the filling of orders is well under way. Leonard Clarke, manager of the branch store at 4845 Milwaukee avenue, and one of the coming men in the seed business, devotes much time to studying into the scientific side of the seed question, and is an enthusiast in his work. The Perfection Garden Cultivator for hand use, placed on the market by the Leonard Seed Co. this year, is taking well and several hundreds are now sold. It has four discs which, by a simple changing of the bolts, by the fingers, can be adjusted to any angle, throwing the soil to or from the plants.

PHILADELPHIA NOTES.

The officers of the William Henry Maule Co. have just been announced and are as follows: M. H. Maule, president; Chas. P. Maule, vice-president; Edward C. Dungan, treasurer and general manager; H. E. Maule, secretary. Capital, full paid, $150,000. Incorporated under the laws of the State of Pennsylvania. All branches of the business are now located in the new Maule Bldg., 23rd and Arch streets.

Fred Michell, Jr., is off on a three weeks' trip through Western Pennsylvania. Strictly business. If there's room for New Englanders and Old Englanders in this "God's Own Country," surely "His Own Chosen People" ought to have a look in also in their own bailiwick! Young Ajax has girded up his loins and although he looks and talks as meek as Moses he'll sell you something—if you don't watch out!

Seventeen heads of departments of the Burpee staff were entertained by W. Atlee Burpee at dinner on January 30. The occasion was a very enjoyable one and testified once more to the harmony and good feeling which pervades the Burpee happy family—from its chief down. Whoever said there is no sentiment in business is greatly mistaken. In the hands of a mighty master craftsman like a Burpee sentiment can be welded into an irresistible instrument capable of conquering the world. Mr. and Mrs. Burpee left for a brief vacation south, on the 2nd inst.

Visitors: Maurice Fuld, New York City; B. E. Brotherton, Detroit Mich.; P. Joseph Lynch, New Castle, Ind.; R. T. Brown, Cottage Gardens Co., Queens, N. Y.; James Cumming, Toronto, Canada; Charles H. Seybold, Wilkesbarre, Pa.; William Herbert, Atco, N. J.; M. Henry Lynch, West Grove, Pa.; Fred Chesky, Churchville, Pa.; Charles Vorkeller, South Bethlehem, Pa.; Charles L. Schmidt, Harrisburg, Pa.; J. Pritchard, Bedford Hills, N. Y.; J. D. Cockcroft, Northport, N. Y.

CHICAGO NOTES.

D. R. Freres has so far recovered from a long siege with typhoid fever that he will be out of the hospital this week.

Nickolas Monsen, who has a retail store at 3310 Fullerton avenue, had the misfortune to fall and break his leg just above the ankle, Jan. 30th.

There will be no flower show in Chicago this spring. At a recent meeting of the executive committee of the Horticultural Society of Chicago it was so ruled. A continued shortage of flowers was one of the main reasons.

The United Fertilizer Co., which a year ago took over the business of D. D. Johnson and which has since had its headquarters with Poehlmann Bros., has now moved its office to Buffalo. Wm. F. Kasting and several Chicago florists are interested.

The twenty-five Chicagoans who attended the Cleveland convention are back and report a successful meeting and also a very pleasant time. They also remarked that the eastern carnations are apparently getting more sunshine than the western stock.

If a twelve-inch fall of snow makes a winter, Chicago experienced the real article on January 31st. Traffic was much hindered and the regular Saturday trade among the florists was greatly interfered with. As has been the order of events this season, a rain soon followed.

The florists who have a large shipping trade are expressing their dissatisfaction at the advanced rate from 40c. to 60c. per 100 pounds, made by the express companies, and which went into effect Feb. 1st. A reduction was made on long distance shipments but as florists' shipments are largely under one hundred miles, the additional charge on short distances more than offsets the reduction.

The financial affairs of the H. A. Fisher Co. of Kalamazoo, Mich., are causing considerable comment in the market and it is expected that suit will be begun against them by one of the heavy losers. It seems that while the November bills were unpaid large accounts were run in December and some of the creditors will lose thousands of dollars. In some cases, bills covered a much longer period, but no one seemed to know that there were any bills unpaid except his own.

The Chicago Carnation Company has certainly a trio of fine commercial carnations in the Herald, Peerless Pink and Aviator. In point of earliness The Herald comes first. During last December the grower's record shows a cut of 10,650 blooms from four beds 5 by 150 ft., with no split calyxes in spite of dark weather.

Peerless Pink is also exceptionally fine for cloudy weather. The color is a deep pink, very pleasing, petals full and seemingly held by a calyx that could not burst. The stems are wiry and long and the plants are well covered with buds and blooms. Aviator (1915) is of an entirely different type. It is smaller, of the brightest red and so prolific that the writer predicts that it will be in the "come to stay" class.

White Wonder has supplanted White Enchantress and White Perfection here and as grown here it could hardly be surpassed. Pink Delight is worthy of its name and the records show that it has produced three to one as compared with Enchantress.

Visitors—Wallace R. Pierson, Cromwell, Conn.; J. R. Fotheringham, representing F. R. Pierson, Tarrytown, N. Y.; John A. Evans, Richmond, Ind.; H. E. Philpott, Winnipeg, Man.; Chas. A. Fawcett, representing H. Frank Darrow, N. Y.; Jas. W. Heacock, Wyncote, Pa.; Albert Meir and E. Duff, of the Rentschler Floral Co., Madison, Wis.; Paul M. Palez, Little Rock, Ark.

ALBANY NOTES.

Everybody is pleased to see Harry G. Eyres back on the job once more after his long period of illness.

Pink Pearl rhododendron in small pots fully flowered out in last week of January makes a lovely object. The Rosery had a nice lot of them in last week from Fred. Goldring, the first to be seen this season.

Wm. C. Gloeckner, who runs an up-to-date store not far from the Ten Eyke Hotel, has introduced a very clever and useful card system for following up and verifying delivery of flower orders telegraphed to other cities.

The Albany Cut Flower Exchange after closing up its first year of business finds the situation very satisfactory and encouraging. It has already attained a very pleasant relationship with both branches of the trade, and largely through the genial personality of Manager Tracey.

We saw at Danker's, a few days ago, some pretty fine carnation blooms which did not look familiar, and were informed that they were the variety Delhi, now almost forgotten. These were good enough to remember, however. A pretty plant seen also at this place was Lachenalia tricolor. This pretty flowering bulb should be much more commonly grown for florists' use. The flowers last a long time.

Albany florists are badly bit by the new labor law, which prescribes hours for employees and restrictions in connection therewith greatly at variance with the custom and the peculiar requirements of the flower business. Just how they will be able to adjust their business in conformity to the recent enactments is a problem, but there appears no other alternative than to comply literally with the legal requirements which were undoubtedly aimed at other lines of business but from which the florists are not exempted.

New York, N. Y.—Woodrow & Marketos have leased the large store at 37-39 W. 28th street for ten years. This is the largest store to be occupied by any one florist establishment in the 28th street district. The store proper has an area of 4,000 sq. ft. and the basement is of equal size. It will be used exclusively for the wholesale florist plant business, the store being used as a display room, and the basement, which is reached by a capacious elevator, for receiving stock, potting, etc. They expect to open about Feb. 15th.

New Roses

P M QUALITY

KILLARNEY BRILLIANT

This Rose is without doubt one of the best ever put on the commercial market. Advance orders have never been equaled by any other Rose in the history of the flower business.

For February and March delivery: **Own Root**, $30.00 per 100; $250.00 per 1000. **Grafted**, $35.00 per 100; $300.00 per 1000.

For immediate delivery: **Grafting Eyes**, $200.00 per 1000.

HADLEY

A beautiful, velvety, crimson Rose, very fragrant, of strong, vigorous growth. Flowers large and double, borne on long, stiff stems. A very valuable addition to the Red Rose list.

For February and March delivery: **Own Root**, $30.00 per 100; $250.00 per 1000. **Grafted**, $35.00 per 100; $300.00 per 1000.

PRINCE D'ARENBERG

Another addition to the Red Rose list, and a very valuable addition it is, of Richmond shade, good-sized flower. Much more double than Richmond, vigorous growth and blooms freely right through the winter.

For February and March delivery: **Own Root** and **Grafted**, $30.00 per 100, $250.00 per 1000.

	Own Root		Grafted	
	100	1000	100	1000
MRS. CHAS. RUSSELL	$12.00	$100.00	$17.50	$150.00
FIRE FLAME	12.00	100.00	17.50	150.00
MRS. GEO. SHAWYER	12.00	100.00	17.50	150.00
CECILE BRUNNER (Sweetheart)	12.00	100.00	17.50	150.00
JONKHEER J. L. MOCK	$7.50	$60.00	$12.50	$120.00
SUNBURST	12.00	100.00		
MARYLAND	7.50	65.00	15.00	120.00

And all other Standard Varieties: **Own Root**, $7.50 per 100; $60.00 per 1000. **Grafted**, $12.50 per 100; $120.00 per 1000.

Write for a complete list of CARNATION CUTTINGS.

Flower Market Reports

BOSTON For the past few days the weakening process has been going on under the influence of mild atmosphere and bright skies, which is rapidly pushing along the roses and carnations and assures us that the period of scarcity is about gone for this year. Carnations are perhaps, feeling the situation more than the roses thus far. Indeed, one rose—American Beauty—continues scarce and the wonderful hold which this rose has upon the people is well demonstrated by the maintenance of near-holiday values all through the past month. Violets are still a disappointment, the sales being limited and slow. Bulbous flowers are in larger receipt than they have been, trumpet daffodils being far in excess of normal needs and prices cut in two. Even lily of the valley is overweighted, but the quality is very fine. Cattleyas are selling for about one-half of the January quotations.

BUFFALO Spring-like weather was had throughout most of the past week and trade was generally good on all lines. Spring flowers had a good call, with a tendency to check slightly the sale of carnations. There are too many of the ordinary carnations and not enough of the good. This is true especially of white which have been altogether too plentiful. For McKinley Day only a light demand was had. Beauties are scarce and prices rule high, though there is no special demand. Other stock in ample supply.

CHICAGO There is still difficulty in securing stock enough to fill the normal requirements of the market, and late or unusual orders are very apt to be filled in part only. As has been the case for several weeks, roses are the farthest from being in sufficient supply. With continued dark weather, there is little chance of an immediate improvement. Now and then a fortunate grower has a house of Killarneys which is producing some excellent blooms, in spite of conditions, and these are bringing the highest prices. American Beauties in general are not as good as usual at this season, but as in the case of roses there are good exceptions. The greater portion of them are inclined to be a little off color owing to dark weather. Quite a fair quantity of tulips are coming now and include some extra fancy, as well as many very small ones. The butterfly sweet peas are a little more plentiful and of fine quality. There are some unusually good freesias, far superior to the old variety in the market now. Lily of the valley is good and selling well. Cattleyas are still in excess of demand, and ferns sell at $2.50 per 1,000.

Flower Market Reports

(Continued from page 205)

CINCINNATI The average receipts of blooms has increased somewhat, while demand seems to fall off, and prices have begun to shrink. If the warm weather keeps up there will probably be an influx of stock that will be greater than the market can utilize. Rose receipts have increased slightly, but are not as yet sufficient for requirements. American Beauties while good are very slow in coming into another crop. The offerings of carnations are large and only those of quality are being utilized. The call for violets, double ones in particular, has fallen off so considerably that buyers almost dictate the prices. The supply of single ones has increased. Sweet peas are in fair supply and continue to be good property for the wholesaler. Orchids and lily of the valley are also in good supply, but enjoy only a fair call. A limited number of marguerites come into the wholesale houses. There are plenty of lilies and all are of a very high quality. Paper white and yellow narcissus are glutted, but the supply of each is not so large but that a strong demand for them would easily clean them up nicely. Freesia sells well.

NEW YORK The market has been quite bare of roses during the past week, but there has been an abundance of all other flower stock and should the warm, bright weather continue it will not be long before there will be roses in abundance as well as everything else. Wholesalers are looking for a big influx of roses and carnations before long. Daffodils, mainly single trumpet, are coming in heavily. Lily of the valley is again in good supply and extra fine quality. There is a moderate supply of tulips; plenty of good lilies, which have gone down a little in price, and a large overstock of freesias of quality ranging from very fine to very slovenly. Few violets are yet in evidence. Wallflowers, mignonette, calendulas and small flowers in variety are in sufficient quantity. Primula malacoides is being grown considerably for cut flower purposes, but is not as attractive in cut state as on the plant. There are plenty of cattleyas and other orchids such as laelias, dendrobiums and splendid oncidium spikes. Trade in general is on the quiet side and on some mornings drags discouragingly.

NEW YORK QUOTATIONS PER 100. To Dealers Only

MISCELLANEOUS	Last Half of Week ending Jan. 31 1914	First Half of Week beginning Feb. 2 1914
Cattleyas	10.00 to 40.00	10.00 to 40.00
Lilies, Longiflorum	6.00 to 10.00	6.00 to 10.00
Callas	12.00 to 15.00	10.00 to 12.00
Lily of the Valley	1.00 to 4.00	1.00 to 3.00
Paper Whites, Roman Hyacinths	1.00 to 2.00	1.00 to 2.00
Freesias	1.00 to 3.00	1.00 to 3.00
Daffodils	1.00 to 3.00	1.00 to 3.00
Tulips	2.00 to 4.00	2.00 to 4.00
Violets	.50 to .60	.50 to .60
Mignonette	2.00 to 6.00	2.00 to 6.00
Daises	to 2.00	1.00 to 2.00
Sweet Peas (per 100 bunches)	6.00 to 12.00	4.00 to 12.00
Gardenias	6.00 to 16.00	6.00 to 16.00
Adiantum	.50 to .75	.50 to .75
Smilax	8.00 to 12.00	8.00 to 12.00
Asparagus Plumosus, strings (per 100)	15.00 to 35.00	20.00 to 50.00
" " & Spren (100 bunches)	10.00 to 20.00	20.00 to 50.00

PHILADELPHIA A vast change has come over the face of things since our last report. The bright weather and the longer days have increased supplies of nearly all kinds of flowers. Meantime there has been no corresponding increase in business, so that prices generally have shown a tendency to recede—although this is not very marked as yet. All roses except American Beauty are more plentiful but not so much so as the carnations. The latter are in very much larger supply. But even Beauty are expected to get a move on by the end of the week. Gardenias are about as usual. Orchids rather too many, with demand light. There is a large supply of violets—more than can be used to advantage. Sweet peas have come with a rush; splendid quality; prices very much lower except on the "orchid-flowering" sorts which are still behind the demand. Mignonette easier. Any amount of daffodils, freesia, tulips and other bulbous stock. Acacia pubescens and myosotis may be had if one orders a day ahead.

ST. LOUIS The market has not been at all satisfactory the past week. The retailers had their troubles with it early in the week and the wholesalers the latter part. Stock was quite scarce at first in all lines and grades. All of a sudden it became plentiful and the retail business dull. The big snow storm on Thursday and Friday also had a bad effect. Prices have lowered somewhat except on roses. These are still somewhat scarce and a big crop is looked for soon. Carnations are down in value and there are plenty of them in all varieties. Violets and peas are now coming in quite heavy. Bulb stock is looking up better than last week. More of it coming in and quality excellent.

POSTMASTER KASTING.

Wm. F. Kasting, the new postmaster at Buffalo, N. Y., formally received the keys at the Federal building on Saturday last. With his office so congested with flowers and friends that there was barely room left in which to move, the popular new incumbent assumed his position shortly after noon. The outgoing postmaster was not there to greet him, leaving that formality to his deputy, but Howard H. Baker, the last Democrat to hold the office, was present together with scores of personal friends and fellow florists.

At noon every inch of space around the walls of the expansive office was covered with floral offerings and as a matter of fact it was almost like a flower show. A few remarks by Mr. Kasting in which he said "I see among you many business men and I take the opportunity to say that it is my fixed purpose to so conduct the administration of this office as to merit the approval of business men and reflect credit upon our government. A banquet was tendered him by friends at the Orpheus Hall in the evening.

NEW BOSTON FLOWER MARKET.

The Boston Co-operative Flower Market, now located on Park street, has leased for eight and one-half years, the street floor and basement at 256-258-260 Devonshire street facing Winthrop Sq., and will remove on March 1. The two floors comprise an area of 13,000 sq. ft. McAlpine and Budlong who have had headquarters elsewhere will come in to the new market, the former taking 1800 sq. ft., and the latter 800. This move brings both markets and all the wholesale commission [illegible] together in Winth[illegible]

[illegible] Co., of [illegible] Cleveland, Ohio, have bought out The Cleveland Plant & Flower Co., and have taken over their growers.

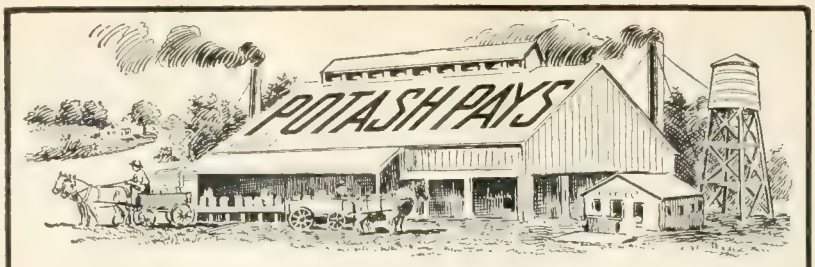
Greensboro, N. C.—A. & M. College, conservatory.

Tucson, Ariz.—Tucson Seed Company, range of houses.

Maywood, Ill.—E. C. Amling, two rose houses each 34x250.

Joliet, Ill.—Chicago Carnation Co., range of carnation houses, in spring.

Jamestown, N. Y.—A. Beckrink & Son, Lord & Burnham house 40x120.



Islip, N. Y.—Fire in the boiler house of James T. Riley on the evening of Jan. 15th caused a damage of $500.

Bridgeton, N. J.—Wm. J. Smith, North Laurel street, one house. Mr. Smith was formerly in the pot manufacturing business.

NEWS NOTES.

Galva, Ill.—George Pierce has purchased the greenhouse business of A. G. Larson.

Scranton, Pa.—One large greenhouse of Morel Bros., Boulevard ave. has been totally destroyed by a mine settling beneath the property. Two other houses are also seriously affected. The damage to houses and plants thus far is estimated at $2,000.

Why fertilize for vine instead of for what you sell or pack? The fertilizers offered to canning crop growers are generally too low in available

POTASH

They produce too much vines and not enough of the beans, peas, corn and tomatoes that bring good cash for their trouble. If you are raising canning crops, don't accept a fertilizer lower than 10 to 12% in Potash.

Write for our booklet on fertilizers for special Crops. It shows how Potash Pays

If your dealer sells only low-grade goods, get our prices on Potash Salts. We will sell any amount from one bag of 200 lbs. on up.

FOR FLORISTS AND GARDENERS

Formulated and Manufactured by men who have made a life study of

FLOWERS—FRUITS—VEGETABLES

UNDER GLASS

In this Country and Abroad

Proper fertilization under glass is more important than fertilization out of doors—and

Fertilization is Our Specialty

Why pay ocean freight and dealers' commissions on Imported General Fertilizers when you can buy Fertilizer Direct from the Manufacturer especially prepared to meet *your individual requirements.*

We are also manufacturers of MAK-GRO Odorless Plant Food put up in one pound tins and five pound bags—a splendid side line for Florists operating their own stores.

We are at your service on all matters relating to Greenhouse Fertilization. Write us for further particulars

CONSUMERS FERTILIZER CO., Long Acre Building **New York City**

Factory and Laboratory, Farmingdale, N. J. | **Experimental Greenhouses, Catonsville, Md.** | **Experimental Farm, Farmingdale, N. J.**

DO YOU KNOW VERMINE?

John Lewis Childs, Flowerfield, N. Y., writes:—
"I suppose you will be glad to know that **VERMINE** is giving excellent satisfaction. Our greenhouse foreman says that it is the only thing that he has ever used that will kill white ants in the benches."

Valentine Burgevin's Sons, Kingston, N. Y., writes:—
"We wish to say that we find **VERMINE** an excellent thing. We used it on a bench planted with Smilax to kill root lice or maggots, which ate the roots, and after two applications our Smilax is taking on new life and has started off to grow."

The Gardner Nursery Company, Osage, Iowa, writes:—
"We will use **VERMINE** on our out-of-door fields of strawberry plants if the inside test continues as satisfactory as it now seems."

W. N. Craig, Brookline, Mass, writes:—
"I have used **VERMINE** and found it effective against root maggots, cut worms, earth worms, ants and other ground pests."

VERMINE is applied one part to four hundred parts of water by thoroughly soaking the soil. It will protect your crops from the ravages of vermin under ground without the slightest injury to vegetation.

We Have Opened a Boston Branch Under the Charge of J. N. Keeler

IT is located in the John Hancock Building, corner of Franklin and Federal Streets, being near the South Station, not far from Washington Street, and handy by to the Flower Exchange.

Mr. Keeler has been with us for sometime and knows our different constructions thoroughly.

He also is accurately informed on constructions in general, having had the advantage of being associated with other greenhouse concerns before coming with us.

Many of you already know Mr. Keeler. Those of you who don't, will find him to be a frank, earnest likeable man with whom you will find it both a satisfaction and a pleasure to do business.

In the last year, we have erected several iron frame houses with the rafters spaced 12 feet apart instead of 8. The glass is 20 inches wide (not 24).

Not only does this modification of our standard construction make a lighter house, but you also have a third less columns. With houses wider than 40 feet,—for those who want the fewest possible columns across the house, as well as lengthwise of it — we have our Special Lattice Rafter Construction which has many decided advantages in its favor.

Then there is our curved eave construction and the way we have successfully solved the side ventilation problem, which has always been a certain drawback to that type of construction.

All these things, Mr. Keeler is thoroughly informed on, and we hope you will give him the opportunity to talk them over with you.

"Safety First" is, and always has been the basic principle of our constructions. You can depend on, depending on Hitchings Houses.

Our catalogs you are heartily welcome to.

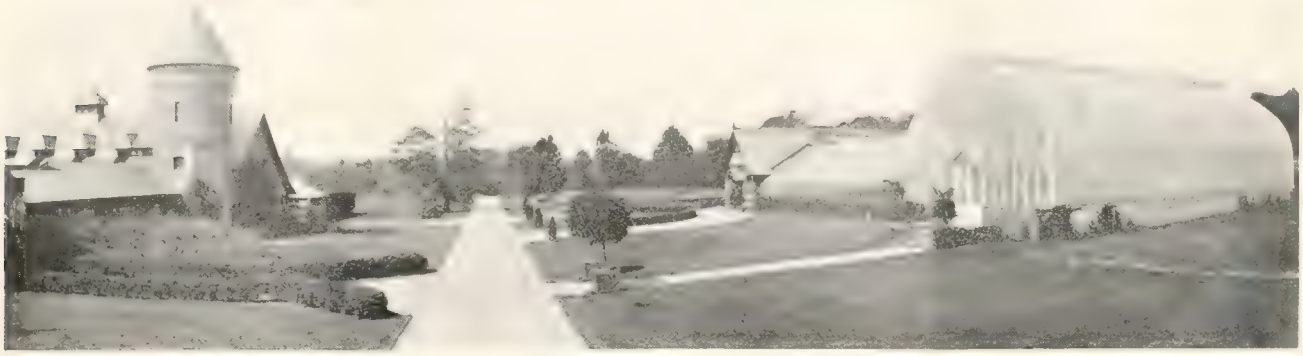
FACTORY—Elizabeth, N. J.

DOGS can be divided into two classes—those that are heavy set, and clumsy; and those that are not.

There are two kinds of greenhouses: the other kinds and the U-Bar kind. The U-Bar is a light, graceful house of proven endurance. The "other kinds"—let's talk about them some other time.

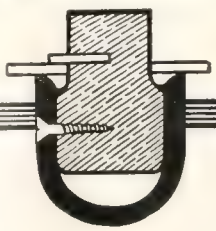
But right here and now, before we talk about anything else, we want to say just this one thing in particular, and that is—the only practical difference between "other kinds" of construction that are not the U-Bar, is that some of them are made better than others; but any one of them can be built by anyone.

With the U-Bar it's entirely different. The U-Bar greenhouse can be built only by the Pierson U-Bar Company.



Now you can't compare an alligator and a dog—you must compare things that are alike—one dog with another, for example. For exactly the same reason, you can't compare a U-Bar house with other houses—*because there's absolutely no comparison.*

Therefore, the U-Bar is in a class all by itself.



That this class is strictly high class must be so, else why would the U-Bar be imitated as much as possible, just as nearly as possible. Take the curved eave, for instance: It was originated with the U-Bar construction—we were absolutely the first ones to build a curved eave house. The curved eave has been, as far as possible, adapted to other constructions. But the one it is best adapted to is the U-Bar construction, because it is constructed with U-Bars. None other is as light, as graceful, as enduring—no one denies that.

If you want the genuine curved eave house, you want the U-Bar house. Other houses may look like it, but that's the only way they are like it.

Send for the catalog. Or send for us. Or both.

Here's a grass test. Alphano Humus was spread on the terraced part, and the customary barnyard manure on the rest.
The Alphano being in powdered form, was raked in. The manure being characteristically lumpy and full of litter, eventually had to be raked off, carrying along much of its worth.
Three days before this photograph was taken, all the grass was cut. The very marked contrast in the height and evident depth of color of the grass between the two portions, tells its own story of the real worth of Alphano Humus.

A Talk to Those Who Are Not Awake to the Merits of Alphano Humus

HUMUS is the very backbone of any productive soil. The greater its humus content, the higher its productive power and the longer its fertility endures.
The difference between freely workable, fertile top soil and "packy" or "gravelly," unproductive sub-soil, is the difference in the amount of Humus it contains.
Humus itself is just simple, plain, every day decayed vegetable matter. When you walk in the woods, it's the humus that gives that soft, springy feeling. It's the Humus that fills itself full of water and gradually liberates it, feeding the springs and streams. It's Humus in the wood soil that plays so important a part in preventing the rains from rushing down the hills and mountain sides, filling the streams and causing flood disasters.
Humus it is that makes a heavy soil lighter, and light soils heavier. It's Humus that absorbs the nitrogen and other plant foods and combines them, making readily available foods for plant growth.
It's Humus that holds the moisture in soil, fortifying it against the summer's protracted heat. Without Humus, soils are sterile.
So much for Humus in general; now a word about Alphano Humus in particular.
Down at Alphano, New Jersey, are deposits of Humus, varying in depth from 18 inches to 5 feet. Scientific authorities estimate that it has been thousands of years in forming. They state it to be composed of highly decayed vegetable matter, with which is mixed the remains of fish and animal life, together with the mineral matter washed down from the neighboring hills.
When this deposit is dug up and put in piles, it "heats." This proves beyond all dispute, that it is far from inert, but lively with the bacteria of ferment, so essential for rendering the nitrogen available as well as increasing the activity of the bacteria already in any soil.
This bacterial action is highly important in aerating the soil, and in the uniting of the various soil properties to increase their availability for plant roots.
This Alphano Humus, of Nature's own make, we dig, dry, and prepare in a powdered form, already for your use.
It is rich in nitrogen, carrying as much as from 3 per cent. to 4 per cent.; against one-half of one per cent. contained in barnyard manures. It analyzes high in phosphates, lime and the various other plant life giving properties. Being in powdered form, you can easily incorporate it in the soil. Being odorless, you can use it at any time, anywhere, absolutely without objection. Being entirely sanitary, it overcomes the menace of disease distribution, ever present with animal manures.
Being so much stronger than such manures, and lasting so much longer than chemical fertilizers, it has distinct advantage over either. Being so reasonable in price, you can use it freely, and know that you are not only stimulating the soil, but giving to it a long enduring fertility.

A Connecticut Estate had some side hill land so void of Humus, it would scarcely grow beans 5 inches high. Alphano Humus was spread on and plowed in. This celery grew on that very same land that very same year.

5 Bags for $5. $12 a ton. $8 per ton by the carload. F. O. B. Alphano, N. J.

We welcome the opportunity to prove what Alphano Humus will do for you, based on what it has done, and is doing for others.
Use it this Spring on your lawn—rake it in—not off, as you do with barnyard litter. Dig it around your shrubs—use as a mulch for rhododendrons—garden with it. Give it a fair trial.
Send for the Humus Book; it tells all about Humus in general and Alphano Humus in particular.

ALPHANO HUMUS CO., WHITEHALL BUILDING NEW YORK CITY

GERANIUMS

This catalog is now being mailed to the trade.

We have one million in 2-in. and 3-in. pots ready for immediate shipment in the finest collection that has ever been offered to the American florist in Novelties, Ivy leaved, Variegated, Scented, and over 100 Standard varieties representing the highest development of Geraniums yet attained. We furnish good sorts at $2.00 per 100, $18.50 per 1000. Our new illustrated Geranium Catalog marks a new epoch in catalog making—is a maximum of the printers' art. If you don't get yours let us know.

LAWN GRASS

"The Right Seed in The Right Place"

We furnish grass mixtures for dooryards, terraces, lawns, athletic and polo fields, cemeteries, parks, country clubs, country estates.

Repeated laboratory tests on individual mixtures assure superiority of quality and growth.

Experience of over fifty years of successful seed business assures you of correct proportions.

Experiment has shown us that a mixture of the proper grasses is more satisfactory than an individual grass. Why waste your time and money experimenting? Let us furnish what you need.

NOTES ON CULTURE OF FLORISTS' STOCK

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Alternantheras

A good crop of cuttings will now be available from the stock plants. The cuttings after they have been sheared off, or taken with a knife should be put in the sand in close rows. They require a good watering when put in and shade for five or six days. With bottom heat they will be rooted in a little more than two weeks, when they should be lifted and put into flats. If pot plants are required, these, when they have made sufficient roots and are crowded in the flats, can be potted into 2½ or 3 in. pots. Light, fibrous soil, kept moist, suits alternantheras, and a bench up near the glass, warmed from underneath, is the best place for them, better than hotbeds or frames. Two or three crops of cuttings can also be had of those first propagated; in fact, when kept going, cuttings in plenty can be got from quite a limited number of stock plants.

Care of Palms

In potting palms, it should be remembered to always give small shifts. When they are overpotted or tubbed the soil usually becomes soured and wormy before the roots can take it up, and good results are impossible when this occurs. In regard to compost, shake out the finer particles of soil and use good fibrous loam. A good compost for palms is two-thirds fibrous loam, one-third peat mold with a liberal addition of sand. Large plants can have some coarse bone added and a little well-dried cow manure. Always pot firmly and water with caution until the roots are actively at work in the new compost. All your palms may not need shifting. Those that are not to be repotted can have a top-dressing, picking away some of the old material first, and then renewing with rich compost. Before repotting see that the palms are clean. To keep them clear of scale, spray occasionally with some insecticide that will loosen up the scales, allowing them to be sponged off clean.

Flowering Shrubs for Easter

It is just as well to bring any flowering shrubs intended for Easter a little early. A temperature of 45 degrees is high enough to start with. A moderate moisture at the roots, but copious, frequent sprinkling overhead will soon bring about an even all-around break and the starting of active root fibers. This accomplished, they may safely be treated to more heat. A graded, slow rise to 60 degrees, with from 5 to 8 degrees higher on bright days will finally fix the even course of regular forcing, promote luxuriant growth and perfect development of foliage and flowers. The temperature can be raised 5 degrees every ten days until you have them at about 70 at night. Shrubs will have better flowers and foliage if they have all their hard forcing ten days before they start to open their buds. When they are fairly well out in flower a drop to about 50 degrees at night will add to their keeping qualities as well as give substance to their flowers.

Rambler Roses

Plants to be in bloom for Easter should now be in a sunny house with a night temperature of about 55 degrees. If the shoots are now 5 to 6 inches long on the Ramblers they are all right. But where they are not that far advanced, when they have developed some root action and the new growth appears, the temperature should be slowly raised to 60 or up to 65 degrees if necessary. While under this forcing they will need water in ample quantities both at the roots and in overhead sprinkling. When they get into fairly good growth they will need careful watching so that they do not dry out too quickly, a condition which is very liable to produce a few flowers prematurely instead of a full set of bloom. Ramblers want abundant water supplied, and liquid manure every fourth day until the flowers begin to expand when it should be discontinued. When ventilating avoid cold drafts, which will cause mildew to start and soon render the plants unsaleable. Look out for plants growing near heating pipes as once red spider gets a foothold they are speedily ruined.

Sweet Peas

Sweet peas sown in pots and growing cool will make fine stock for spring flowering. If the place on the benches is not ready, sow from four to six seeds to a 4-inch pot and they can be planted in the benches in about four weeks. Sown at this time there will be less difficulty than with the early crops. They will last for picking from four to six weeks and will find a good market and price. A good compost for sweet peas should consist of about three parts loam to one of manure. They should have a temperature of 45 degrees to 50 degrees at night with a rise to 60 to 70 degrees with sunshine. Keep them well up to the light, syringe on all bright days and be careful about watering. Whether profitable or not depends now on cultural skill and not on market conditions as formerly, for good sweet peas can now be sold right along at excellent prices.

Starting Coreopsis

Plants intended for Memorial Day can be brought into a cool house in a week or two. It is always better to start these plants slowly and cool. In about two or three weeks they can stand 50 degrees. As the roots become active they will want lots of water, and weekly doses of liquid manure. Give plenty of ventilation.

Mr. Farrell's next notes will be on the following: Azaleas; Dracaenas; Euphorbia fulgens; Orchids; Tuberous Begonias; Starting Lemon Verbenas.

A new "break"

A new boost for the flower business has just appeared and from a most unexpected source. One of the polling places in Chicago is located in a florists' shop and it was announced in the daily papers that women going to register there would each be presented with a bouquet of flowers, donated by the proprietor. We don't know whether this gentleman seeks to encourage the women in the exercise of the right of suffrage or is simply in pursuit of lucrative publicity, but, in either case, he wins and wins deservedly. The "antis" have the struggle of their lives ahead of them if this thing spreads. Or will they make out a case of "pernicious activity"?

Advantages of modern equipment

In our occasional rambles among the flower growers we are constantly impressed by the overwhelming advantages enjoyed by those who possess modern-built greenhouses over those having old-time outfits, in the production of marketable roses, carnations and various other flower staples. There are, of course, a few exceptions—object lessons, demonstrating that without adequate knowledge, industriously used, the finest of up-to-date houses are apt to turn out lamentable results. Location, sunlight, soil and other factors also count in the success or failure of all such undertakings, as everybody knows, but, everything else being reasonably equal, the man having houses planned and built on the advanced systems of greenhouse construction and heating of the present day will be found far in the lead when the season's profits are counted up.

Our friends, the greenhouse builders

For the advantages alluded to in the foregoing we must thank the greenhouse building firms who, in the healthy business rivalry of recent years, have been less concerned with the competition to underbid than with the struggle for supremacy in the science of construction, durability and perfection of every detail. The splendid structures which shelter the products of the commercial grower of today, as well as those of his wealthy amateur neighbor, represent years of close investigation and study of the myriad problems of the science of light and heat and their practical application to the specific demands of a rapidly advancing business. One of the best evidences of the stable character and dignity which the floral industry has attained is the enterprise and confidence displayed and the capital being invested in greenhouse construction. It would seem almost impossible to further improve but no doubt the next few years will see continued advancement for there is every reason to believe that the plant, flower and fruit forcing industry is yet only in its infancy and no business offers fairer inducements for the employment of capital and brains.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ružička

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Young Cuttings After Potting

Even with the best of care there will be a few cuttings that will go to the bad, and if the number does not exceed ten per cent, it is doing nicely. The smaller the loss the greater credit for the grower. After a week or two in pots the cuttings that are going to die can be easily picked out and done away with, and the space thus gained can be used to grow some more. Be very careful with the hose for too much water and a few cloudy days will play havoc among the little plants, causing many to die of rot, getting all black at the bottom and gradually dying to the top. As soon as growth starts, a little more water can be applied. When looking over the benches take a plant every now and then and turn it out of the pot so that you will be able to see just how moist the soil really is, and at the same time you will see how many roots the plants possess and will then have an idea how to keep them, should a bad spell of dull cloudy weather come along. Syringe as often as is possible, for you will then not only rid the plants of many undesirable insects, but will help promote growth.

Lime Water

If the soil in the pots starts to get coated with a green scum, it will be well to water the plants a little now and then with lime water. This green should not appear, and if perfectly clean pots were used it seldom will until after the plants have been in pots six months or more. Where a large number of plants are being grown it will not pay to bother mixing the lime water in cans, and the only way is to get a barrel every here and there, dump a peck of lime into it, and then slake it. After it is well slaked fill the barrel with water, and allow it to settle. Use the clear water from the top only, otherwise the plants or leaves of the cuttings will get a coat of lime, which would be of little benefit to them, and look bad besides.

In the Old Houses

Just because the rush of the propagating season is here there is no reason why the old houses should be allowed to go back, as there is plenty of time yet to grow many cut roses before they are torn out. Neglect now will mean bad roses in the spring and there might as well be none as to have poor stuff, for there will be plenty of other flowers on the market and when there is plenty to select from the buyers will not have to take all that is offered, so some of the stuff is bound to go to the bad.

Tying

Keep right on with this, and never neglect to keep the plants tied, for they go back very quickly when allowed to lie around at all. This is especially true of Beauties, which will go blind very quickly, Killarneys and the roses of that habit will require very little tying, and an occasional touching up will be all that is necessary to keep all the plants in good shape. With Beauties it is different, and they should be gone over almost weekly, and straightened out, so that they will never be real bad. Once they are allowed to go back it will take time and time to get them into shape again. When tying it is well to pick off all the yellow leaves that you come across and as soon as the house is tied go over the benches and pick them all up and burn them. This will make the plants look much neater, and will benefit them as well.

A DUTCH VIEW OF THE GLADIOLUS SITUATION.

Editor HORTICULTURE:

Dear Sir—With great surprise the Council of the Dutch Gladioli Society has read your editorial of Dec. 27th, about the Dutch gladioli. We permit ourselves to answer in the following:

The growing of Gladioli in Holland has increased much in a very short time and this proves that the state of this culture must be sound, as in the opposite case it would be quite impossible that this culture could have developed in such a way, nothing being more difficult than growing bulbs or any article whatever, which are liable to disease. As for the damages which might be caused in shipping the bulbs we can only say that every year the Dutch bulb growers ship enormous quantities of bulbs to the U. S. of A. with the best success and that they take care, of course, that gladioli do not arrive in America spoiled and sweating.

It is not to be denied, however, that the prices of gladioli are very low at present, which we too regret very much. This fact has nothing whatever to do with the more or less good quality of the Dutch Gladioli, but is the result of overproduction. This, however, cannot last long, there being nobody who can grow an article a long time at a lower than production price, and people very soon start to plant fewer bulblets and less young stock, which quickly diminish the stock of saleable bulbs for the following seasons and consequently the price soon returns to a normal state.

Hoping to have given by these lines a better insight as regards the Dutch Gladioli, we remain,

Yours truly,

THE DUTCH GLADIOLI SOCIETY,
K. Velthuys, Sec'y.

DREER EXHIBITS ON THE GARDEN PIER, ATLANTIC CITY, N. J.

The Gardens located on the new Garden Pier, Atlantic City, N. J., have been leased by Henry A. Dreer, Inc., Philadelphia, for exhibition purposes. This new pier, which will be the chief attraction on the ocean front, was built at a cost of over one million dollars and will be further extended in the near future. The Gardens are located in the center of a beautiful court leading to the theatre, which has been leased by Keith for a term of 25 years. Hundreds of thousands of persons from all over the United States will pass these Gardens and the advertising thus obtained will be of a national character.

The Gardens consist of two large square plots, with a smaller circular plot between and will afford ample space for liberal displays of plants and flowers, including a large pond of water lilies and other aquatic plants. These exhibits will be changed frequently in order to make a continuous and varying display during the whole year. This method of advertising is unique and has never before been attempted on so large a scale. It will be exceedingly attractive to the public and particularly interesting to those florists who visit Atlantic City during the summer.

CLUBS AND SOCIETIES

BUFFALO FLORISTS' CLUB

The best attendance ever had at any club affair in Buffalo was at the regular meeting of the Buffalo Florists' Club on Tuesday last.

With President Legg in the chair, the regular routine of business went through and as there were visitors and a paper to be read, same was cut short. A brief talk was given by Professor E. A. White on the experiments being held at the Agricultural College, which was very interesting. A paper was also read on chemical fertilizers by Leon Neubeck, and a lively discussion followed.

An invitation and challenge was read from the Rochester bowlers for a contest; the first game to be bowled in Rochester on Feb. 20. Jos. Streit, manager of the Buffalo team has his men in training and a warm contest is looked for. Urgent request is made that all who possibly can attend should give their support as rooters at the coming event. The Rochester boys are royal entertainers and an exceptionally good evening's sport is assured for all. A good bunch from Buffalo will leave on train at 3.15. Any information regarding same may be had from Mr. Streit.

During the afternoon and evening a carnation exhibit was held in connection with the meeting. The committee and club members extend their thanks to the growers who sent in the following exhibits:

Matchless, the beautiful white, Cottage Gardens, Queens, N. Y. Dagmar, Patten & Co., Tewksbury, Mass. Ideal, W. C. Stroh, Attica, N. Y. Ward and Enchantress, white, Miller & Stroh, Alden, N. Y. Philadelphia Pink, S. S. Skidelsky, Philadelphia, Pa. White Wonder, White Bros., Medina, N. Y. Enchantress, pink, L. H. Neubeck, Eggertsville, N. Y. Enchantress Supreme, Dailledouze Bros., New York City. Enchantress, Rosette, White Wonder, Gloriosa and Yellow Prince, Palmer & Son, Lancaster, N. Y. White and Pink Enchantress, C. F. Christensen, Eggertsville, N. Y. Pink Supreme, J. H. Leach & Son, N. Easton, Mass. Pink Enchantress, H. A. Blasdell, North Collins, N. Y. White Perfection, Ward, Pink Enchantress and Double White Killarney Rose, C. T. Guenther, Hamburg, N. Y. Mrs. C. E. Akehurst, C. Akehurst & Son, White Marsh, Md. Sweet Peas, Zvoeneks winter flowering orchid type, Lavender, Venus and Mrs. Skach, Jerry Brookins, Orchard Park, N. Y.

It was a grand display of carnations, which has not been equalled at any carnation show held in connection with any Florists' Club meeting. Many out-of-town florists were with us and highly commented upon such a fine exhibition of blooms.

At the next regular meeting a paper will be read by Ed. Lehde on soil mixture and this should prove interesting and a good discussion should follow. At this time the election of officers will be held and the regular annual banquet will follow the meeting. Nomination of officers for the ensuing year: President, W. H. Eiss; Vice-president, R. E. Boettger; Secretary, William Legg; Fin. Secretary, Albert F. Vick; Treasurer, E. C. Brucker.

FLORISTS' CLUB OF WASHINGTON

As a result of the nominations for the various offices of the Florists' Club of Washington, George H. Cooke will be the next president, and William F. Gude, treasurer; Elmer C. Mayberry, secretary, and Adolph Gude and Theodore Diedrich, trustees, have been renominated with no contestants in the field. The only contest will be for the office of vice-president, for which O. A. C. Oehmler and R. L. Jenkins have been proposed. Both of these gentlemen have a lot of followers and the fight promises to be a good one. Mr. Oehmler for several years was secretary of the club and has served as a member of many of its committees. Mr. Jenkins is one of the most popular of the club's members and has always been willing to do his share of committee or other work which might fall to him.

A letter acknowledging with thanks the congratulations extended him by the membership upon his appointment as superintendent of the Botanic Garden was received from George W. Hess. Speaking on the proposed William R. Smith Memorial plans, Mr. William F. Gude asked that each member consider himself as a committee of one to bring in some tangible suggestion as to the form this Memorial should take and to present it at the March meeting. Apparently Mr. Gude favors the erection of a suitable building to form the home in the National Capital of the Society of American Florists and Ornamental Horticulturists although he refused to commit himself on the subject.

A certificate of merit was awarded to A. N. Pierson, Inc., Cromwell, Conn., on the new Hadley rose, a vase of which was on exhibition.

CHICAGO FLORISTS' CLUB

At our meeting Friday evening, Feb. 6, the matter of affiliating with the S. A. F. & O. H. was brought up, but upon motion, action was deferred until our March meeting, when it will come up as a special order of business. A committee consisting of W. J. Keimel, Geo. Asmus and Aug. Poehlmann was appointed to take up the matter and report at the next meeting. J. F. Ammann and Mr. Loveridge addressed the Club on the coming meeting of the Illinois State Florists' Association at Danville, Ill., March 10 and 11. A special car has been chartered from Danville to Urbana, where the visiting florists will inspect the new range of glass at the University of Illinois. The Club passed a resolution at this meeting, stating that whenever a member is ill, flowers should be sent to him instead of fruit as heretofore, and that said flowers shall be purchased only from a retailer.

J. B. Foley, Sec.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

A very attractive programme brought out a good attendance at the club meeting at the Fort Pitt Hotel on the night of February 3d. First on the list was a talk, illustrated by lantern slides on "Gardening by Dynamite." All the details of the process of applying and firing the dynamite for the removal of rocks and stumps were shown. Then followed instructions as to preparing the land for crops, etc.

A talk by A. Frishkorn on the Propagation of Holland Bulbs followed, in which all stages in development were fully explained.

Mr. Frishkorn was assisted by Mr. A. Colyn of Voorhout, Holland, who was able to answer the many questions asked. Among other things he said that the old way of making crosscuts in the mother hyacinth bulb was being superceded by the plan of scooping out a hole in which the bulblets could form.

Interesting displays of cyclamen and forget-me-nots were made by Carl Becherer, gardener at Dixmont Hospital; carnations by Jno. Costoff, gardener at Beechwood Farms and daffodils and tulips by the Bureau of Parks.

The election of officers for 1914 resulted as follows: President, Niel McCallum; vice-president, E. C. Reineman; treasurer, T. P. Langhans; secretary, H. P. Joslin; assistant secretary, W. A. Clarke; executive committee, P. S. Randolph, C. H. Sample, A. Frishkorn.

NEW YORK FLORISTS' CLUB.

The regular meeting of this club on Monday evening, Feb. 9, attracted a good attendance, numbering one hundred or more. The approach of the date for the big flower show and the prospect of listening to a talk on greenhouse construction by W. R. Cobb, of the Lord & Burnham Co., made a good drawing combination.

After the presentation of various committee reports, much time was taken up with matters connected with the Flower Show. F. R. Pierson of the joint committee of the Horticultural Society and the Club gave a very interesting talk on the situation and the prospects. The announcement of the widespread interest being displayed by the retailers was hailed with approbation. Already five special silver cups have been offered by the leading hotels of New York and more are expected. Trade tickets will be sold at $20 per 100 and season tickets will be issued to all members of the Society and Club. A large number of applications for membership were received.

Among the exhibits were carnations. Mrs. C. Akehurst, grown by C. Akehurst & Son and shown by S. S. Pennock-Meehan Co., Rosette by Head's Bergenfield Nursery, Prince Edward, by A. C. Begerow and Rose Hadley by A. N. Pierson Co.

Mr. Cobb's lecture was illustrated with lantern slides and was a rare treat.

ST. LOUIS CLUB AND SOCIETY MEETINGS.

The St. Louis County Growers' Association held a well attended meeting Wednesday night, February 4, at the Eleven Mile House.

The St. Louis Lady Florists' Home Circle met this week, Wednesday afternoon, February 11, at the home of Mrs. Fred C. Weber, Jr.

The Retail Florists' Association of St. Louis will meet next Monday night, February 16, at Hotel Beers. Officers for the ensuing year are to be elected.

The St. Louis Florists Club's publicity committee met on Sunday afternoon, February 8, at the home of R. J. Windler. The attendance was good and the proceedings will be reported at the club meeting this week.

CLUB AND SOCIETY NOTES.

William J. Stewart of Boston lectured before the Bar Harbor (Me.) Horticultural Society on Friday evening, Feb. 6, his subject being "In Our Day and Generation." There was a large and enthusiastic audience.

A special course of lectures and demonstrations on Fruit Growing, will be given by the Massachusetts Horticultural Society in co-operation with the Extension Service of the Mass. Agricultural College, at Horticultural Hall, Boston, Feb. 24 to 28, inclusive, forenoons and afternoons.

The Cincinnati Florists' Club's meeting was well attended. Pres. Jas. Allen named a committee, consisting of R. Witterstaetter, chairman, Gus. Adrian, Max Rudolph, Frank Volz and Wm. Murphy, to solicit funds from local florists to aid in the fight on taxation of plants and flowers at Springfield, Ohio.

The midwinter meeting of the Texas State Horticultural Society, which is to be held in Dallas, Feb. 19 and 20 promises to be a very interesting event. The program of addresses and topics for discussion is very full and well selected to instruct, and a large attendance is expected. G. H. Blackmon, of College Station is asst. secy-treas. of the society.

To promote the planting of shade trees the Massachusetts Forestry Association is offering to plant with shade trees at least seven feet in height one mile of highway in the town or city of Massachusetts which properly plants on its streets this spring the greatest number of shade trees in proportion to its population based on the census of 1910.

The rules of the contest provide that at least 50 towns and cities must enter and by July 1, must have announced their intention to compete. The official count will be made Sept. 15.

J. Lewis Ellsworth, of Worcester, ex-secretary of the Massachusetts Board of Agriculture, gave an illustrated lecture on "Agriculture in Holland and Denmark" on Saturday, February 7, in the lecture course of the Massachusetts Horticultural Society at Horticultural Hall, Boston. Mr. Ellsworth recently returned from a study of the agricultural conditions in those countries and he gave a comparison of the methods of intensive cultivation there with the American method.

The newly elected vice-president of the American Carnation Society was born in Buffalo some forty years ago. After a public school education he was employed for a time in a dry goods store and in 1887 entered the employ of W. J. Palmer, the florist. In 1892, he purchased the business of Lawrence & Giddings and has been successful from the start owing to his up-to-date business methods. From a small space in a confectionery store, Mr. Anderson has now one of the largest flower stores in Buffalo, with

S. A. Anderson.

a branch on Elmwood avenue in connection with his greenhouses. Mr. Anderson is also State vice-president of the Society of American Florists.

Under the auspices of The Horticultural Society of New York, there will be a lecture in the East Assembly Hall, American Museum of Natural History, New York City, on Saturday, February 21, at 4 o'clock, by Alex Cumming, Jr., on "Roses." Mr. Cumming, who has had much to do with this popular flower, will undoubtedly give an interesting and practical talk on the subject. A good audience should greet him. On the same date will be held an exhibition of roses, carnations, orchids, etc., for which liberal prizes are offered.

A committee from the Holyoke and Northampton, Mass., Florists' and Gardeners' Association visited the members of the park board last Monday, requesting the reappointment of Thomas A. Bray as superintendent of parks, it being rumored that he is to be removed for political purposes. The committee represented that he had given the city excellent service and was better fitted to continue in the position than any candidate who had as yet been mentioned. It is understood that they will also have a conference with Mayor Woods over the matter later.

The Connecticut Nurserymen's Association held its annual business meeting at the Hotel Bond, Hartford, February 4. President Thomas E. Burroughs of Deep River presided. Dr. William E. Britton of New Haven, state pomologist, spoke on the desirability of uniform laws for the investigation and shipments of nursery stock between states. The following officers were elected:

President, Thomas E. Burroughs, Deep River; secretary, F. L. Thomas, Manchester; treasurer, W. W. Hunt, Hartford.

President Burroughs appointed the following committees: Legislative—E. F. Coe, New Haven; J. R. Barnes, Yalesville; Stephen Hoyt, New Canaan. Executive—C. H. Sierman, Hartford; W. W. McCartney, New Haven; Gustave Minge, Hartford. Entertainment—W. W. Hunt, Hartford; Charles Turner, Hartford; C. R. Burr, Manchester.

The next monthly exhibition of The Horticultural Society of New York will be held on Saturday, February 21st, at the American Museum of Natural History. Entries should be in the hands of the secretary not later than the morning of the 20th. Schedules are now ready, offering prizes for roses, carnations and orchids. The exhibition committee, however, is authorized to award special prizes for exhibits not provided for in the regular schedule. All are invited therefore to bring in any interesting plant or flower they may have, thus adding variety to the exhibition. Schedules will be sent upon application to the secretary, George V. Nash, New York Botanical Garden, Bronx Park, N. Y. City. A meeting of the society will be held on the same day at the same place at 3.45, followed at 4 by a lecture on "Roses," by Alex Cumming, Jr.

George V. Nash, Sec.

At the annual convention of the Tennessee State Nurserymen's Association Thursday, January 29, in the Maxwell House, Nashville, the following officers were elected:

President, Harvey M. Templeton, Winchester; vice-president-at-large, A. J. Fletcher, Jr., Cleveland; secretary-treasurer, Prof. G. M. Bentley, Knoxville; vice-president for East Tennessee, A. I. Smith, Knoxville; vice-president for Middle Tennessee, W. H. Davis, Smithville; vice-president for West Tennessee, H. Stallings, Humboldt.

Resolutions were adopted condemning the McKellar cold storage bill, now pending in Congress, as detrimental to the fruit-growing industry in Tennessee.

S. W. Crowell, who has large rose

The Service Bureau
OF THE
National Association Of Gardeners

Is maintained for the purpose of providing opportunities for efficient and ambitious men engaged in the profession of gardening. This department of the Association is at the disposal of those who may require the services of capable superintendents, gardeners or assistant gardeners. Address

NATIONAL ASSOCIATION OF GARDENERS

CANNAS

It is an acknowledged fact, by the largest handlers of Cannas in the Country, that our divisions are of a superior grade, that they are the standard by which others are judged. Packed 250 in a box which goes at thousand rates; 10 per cent. discount on lots of 5,000 and over. Every variety we list is so distinct that we cannot fill orders for several kinds from the same bin.

	100	1000
Alphonse Bouvier. Crimson, 5 ft	$2.00	$15.00
Doctor Buddinger. Brilliant scarlet, of large size, bronze foliage, 4 ft.	3.00	25.00
Egandale. Bronze foliage, currant red flowers, 4 ft.	2.00	15.00
Florence Vaughan. Green foliage, rich golden yellow, dotted red, 5 ft.	2.00	15.00
Feuermeer. A brilliant fiery scarlet of medium size, exceptionally free flowering, 4 ft.	3.00	25.00
Gladiator. Strong vigorous grower, with fine green foliage, large heads of flowers, color is yellow spotted with red, blooms early and late, always looks cheerful, 5 ft.	3.00	25.00
Hiawatha. Variegated foliage, large flowers with large crimpled petals, color delicate pink with border of clear cerise, 5 ft.	3.00	25.00
J. D. Eisele. Brilliant vermilion scarlet, 3½ ft.	2.00	15.00
Jean Tissot. Intense brilliant vermilion, with orange shading, 3½ ft	$2.00	$15.00
Mont Blanc Improved. Almost pure white	5.00	30.00
King Humbert. In this we have the highest type of orange scarlet flowers, combined with the finest type of bronze foliage	3.00	25.00
Louisiana. Large vivid scarlet flowers, glossy green foliage.	2.00	15.00
Mme. Berat. Pink flowers, green foliage, 4 ft.	2.00	15.00
Mme. Crozy. Popular and valuable, rich orange scarlet flowers, edged with bright golden yellow, 4 ft.	2.00	15.00
Mrs. Alfred F. Conard. Exquisite salmon pink flowers, of largest size, erect and abundantly produced, rich green foliage, 4 ft.	10.00	
Niagara. Rich deep crimson, with a wide irregular border of deep golden yellow, dwarf grower	3.00	20.00
Patria. Intense light crimson, good for massing, 4 ft.	2.00	15.00
Pennsylvania. Rich bright vermilion scarlet, strong robust grower, 6 ft.	2.00	15.00
President Myers. Rich cherry carmine, bronze foliage, 4 ft..	2.00	15.00
Queen Charlotte. Rich pomegranate red, bordered with bright golden yellow, 3½ ft..	$3.00	$20.00
Richard Wallace. Canary yellow, large flower, 4½ ft.	2.00	15.00
Rubin. Bright scarlet flowers, dark foliage, 4 ft.	3.00	25.00
Rosea Gigantea. Rich rose pink flowers of giant size.	5.00	40.00
Souv. de Antoine Crozy. Beautiful red bordered with golden yellow, 3½ ft.	3.00	20.00
Venus. The color is a gay rosy pink with mottled border of creamy yellow.	3.00	20.00
Wm. Saunders. Bright scarlet, produced in great clusters, often a foot across and each on branching stems, about 4 feet, strong vigorous grower.	5.00	40.00
Uncle Sam. Clear, deep orange flowers, borne in large clusters, handsome luxuriant rich green foliage, 6 ft.	3.00	25.00
Mrs. Kate Gray. Flowers 6 in. across, color a splendid shade of rich orange scarlet, finely flaked and streaked with golden yellow tints, 5 ft.	3.00	20.00
Wyoming. Orange scarlet flowers, dark foliage, 4½ ft.	3.00	20.00

R. VINCENT, Jr., & SONS CO., WHITE MARSH, MD.

New Red Rose
"FRANCIS SCOTT KEY"

A Seedling of Cardinal Crossed with an Unnamed Red Seedling

Flowers large to very large with sixty and more petals opening to a high centre. Averages longer and stiffer stems than any Hybrid Tea Rose I know of under glass, A hardy and easy grower. Every florist can grow it.

It does not need coaxing or boosting. Stock limited. Plants Ready for Delivery from now on

Strong plants, own root, 2 1-2 in. pots, $30 per 100; $7 for 12 plants; $12 for 25 plants. Cash with order

JOHN COOK 318 N. CHARLES STREET BALTIMORE, MD.

gardens at Roseacres, Miss., urged a beautifying of the home grounds, with flowers and ornamental plants, pointing out that it was the lack of beautiful decorations in the home grounds which drove many to the larger cities. With the conclusion of the afternoon session, at 4 o'clock, seventy-five of the members and their wives visited the gardens of the Joy Floral Company, in Northeast Nashville. Much interest was manifested in the greenhouses and heating plants, and the horticultural methods in vogue at the Joy gardens.

A committee of three was appointed at the meeting of the Springfield, Mass., Amateur Horticultural Society last evening, to confer with similar committees from the Hampden County Improvement League and the Hampden County Horticultural Society with a view of forming one association of these three and possible other horticultural and agricultural societies. Edward J. Canning, formerly superintendent of grounds of Smith college for many years, was present and in the course of an address on "Good taste in the planning and planting of home grounds" urged that the projected association include societies of all Western Massachusetts, so that the interests represented by those societies may have a stronger and more efficient organization. He did not advocate the complete disorganization of the small societies, but urged that they meet in general conventions two or three times a year. He also urged that an arboretum be established in Forest Park. J. Alden Davis, city forester, who as president presided at the meeting, said that there is ample room in Forest Park for such an arboretum, and that he thought the city would establish one in time. He said that labels have already been ordered for such trees and shrubbery as are already in the park.

BURPEE'S BLUE LIST FOR 1914

The most complete catalogue published for **Market Gardeners, Truckers and Florists.** For the planter who "knows" it contains complete lists of all that is best in vegetables and flowers, while the grower who is uncertain as to the best varieties suited for his purpose may be guided by the bull's eye ⊙ placed after what is known to be best. In addition full descriptions are given many new and most valuable varieties.

BURPEE'S BLUE LIST FOR 1914 contains **148** pages with hundreds of halftone and engraved illustrations. Within the pages of this catalogue we have condensed an experience of thirty-five years both in handling and the actual growing of seeds.

If you garden for profit (that is, sell your products in the market) you are entitled to a copy of this complete and easily understood catalogue, but if you are a private planter please do not ask for a copy, as we must protect the Market Gardener, Trucker and Florist.

W. Atlee Burpee & Co. "Seeds That Grow" **Philadelphia, Pa.**

The "SPENCER" Type of Sweet Peas

REGISTERED VAB TRADE MARK
"The Seal of Quality"

Burpee's Unequaled List for 1914. Arranged Alphabetically. Choicest Re-selected Stocks Grown on "Floradale Farm."

SPENCER SWEET PEAS are a great specialty with us. We were the first to grow the seed in America, the stock having been entrusted to us before sent out here, even in England, of the original **Countess Spencer**. We have grown "The original Bertie" and its many "sporting" children with painstaking care each season since. There are but few Sweet Pea growers, either in England or America who can supply an equal assortment of **True** RE-SELECTED "SPENCERS" that are uniformly of such choice quality. Seedsmen and planters generally can see how superior our stocks now are by the trials at **FORDHOOK FARMS** next June or July, while those who may be in California are invited also to inspect the growing crops at our **FLORADALE FARM** in the beautiful Lompoc Valley. Every planter's garden, however, is really a trial ground and we shall be quite content if any "Doubting Thomas" will send us only a portion of his order, and **note the difference** in character of flowers produced!

		Per pkt.	Per oz.	Per ¼ lb.	Per lb.

"SEEDS THAT GROW"

PHILADELPHIA, PA.

BRITISH HORTICULTURE.

The National Chrysanthemum Society.

The committee of the National Chrysanthemum Society, London, have decided to offer during 1914 a special prize for the best anemone-centered single, subject to certain conditions. The following definition of a spray has been adopted: "A spray is the last flowering growth, consisting of one stem with a central flower or bud, and with its surrounding flowers or buds." Three exhibitions are to be held, as usual, this year, and a conference on single varieties.

Sweet Pea Novelties.

Judging from the large amount of attention which is being given to sweet peas by the seedsmen in their trade announcements, there is no slackening in the interest being taken in this charming flower. Phyllis is an improved Mrs. W. J. Unwin, an orange scarlet-flake variety; Zillah Smith is a pleasing tint of primrose, edged with rose; Constance Hinton is an acceptable addition to the white varieties, whilst King White is in the same category. Illuminator is an exquisite salmon-cerise variety. Queen Wilhelmina is likely to be very popular, owing to its charming coral shade. Other excellent kinds are: Cynthia, buff pink; Mrs. R. P. Ward, bluish mauve; Papilio, red maroon; Gustav Hamel, rosy salmon; Charles Foster, pink, slightly shaded with lavender, and Radiant, rich pink.

A New Society.

At a meeting held at Moseley, it was decided to form a National Viola and Pansy Society. W. Waters Butlers was elected president, and J. Bastock, honorary secretary. Monthly meetings will be held, and conferences have been arranged for the summer, when certificates will be awarded to new varieties. An exhibition will take place in June, for which the president has offered a challenge cup for competition.

W. H. ADSET.

LILIUM SPECIOSUM MAGNIFICUM.

This extraordinary specimen appeared in the greenhouse of Mrs. J. B. Trevor, Glenview, Yonkers, N. Y., Gardener Howard Nichols.

Improved
Golden Chadwick
(*Pollworth*)

The Chadwick family of Chrysanthemums are the highest type of the commercial varieties, and any sport of Chadwick that is an improvement will be welcomed. This new variety has its origin in the West. We have taken part of the stock and will distribute the variety the coming season. It is described as identical with the parent in all respects except form and color of the bloom. It is a perfectly formed flower and a deeper golden yellow in color.

It is a variety that will be found all that the name implies. It means better late mums, and you need it.

UNFAIR PARCEL POST RATES.

After writing to the Postmaster General regarding the extending of the Parcel Post rules so as to apply to "seeds, bulbs, cuttings, scions, roots and plants," we have had in reply from the Third Assistant Postmaster General a letter which reads in part:

"In answer to your letter of the 2nd instant, which the Postmaster General has referred to me, I have to inform you that the Act of July 24th, 1888, fixes the special rate of postage of one cent for each two ounces or fraction thereof on parcels of seeds, cuttings, bulbs, roots, scions, and plants and the parcels post law provides that it shall not in any way affect such special rate. It is understood that this provision was inserted in the parcel post law at the instance of the seedsmen of the country."

Now why these items should carry a higher rate of postage than other merchandise, at the instance of the seedsmen of the country we are unable to understand.

Why consideration should be given to all these items, simply upon the recommendation of the seedsmen, when they only handle seeds, is another thing which looks "queer" at least to the writer's way of thinking. There undoubtedly must be a misunderstanding somewhere as to the seedsmen generally having recommended that the rate of postage be held higher on these items than on other merchandise, and the very thought of the thing is convincing that it is not right, inasmuch as a pound of seeds mailed at the office of any one in the trade costs as much to mail at his post office to be handed out to a customer one block away, as it does to send them over various lines or ways of carriage to the most distant parts of the country.

We wish to ask every seedsman, nurseryman and florist to write immediately to his Congressman and to the Postmaster General asking immediate legislation affecting the parcel post rates so as to apply to seeds, cuttings, bulbs, roots, scions and plants. This is certainly important and in justice to both the seller and buyer of such items, an urgent request should be made upon these officials that this error be given prompt legislation and correction.

VALDESIAN NURSERIES,
By Geo. W. Jones.

Little Ads Bring Big Returns

Little ads. in our Classified Columns bring big returns to both advertiser and purchaser.

Anything that can be sold to florists, gardeners, park and cemetery superintendents, etc., can be sold through this medium in this department, and at very small cost.

THE CANNERS' CONVENTION.

The Canners' Convention of 1914 is now a matter of history and a pleasant memory. The attendance far exceeded that of any previous convention, many estimating it to be from 1000 to 1500 larger than ever before. The people of Baltimore certainly did themselves proud in the matter of entertaining, especially for the ladies. It is needless to say that Baltimore now ranks very high with the ladies who attended the convention, and its hospitality will be a standard by which that of other cities will be measured for a considerable time to come. Too much praise cannot be given the local Canners' Exchange for their untiring efforts to insure to everyone a good time. Among these may be especially mentioned, D. H. Stevenson, Secretary and F. A. Torsch, President of the Exchange. Many others devoted a great deal of time and all deserve the warmest thanks of every person who attended the Convention.

The opening session was dignified by the presence of Cardinal Gibbons, who offered prayer. This was followed by a very scholarly address by Governor Goldsborough, his text being "Maryland my Maryland." After him came his Honor Mayor Preston who fully lived up to his reputation as a gifted speaker; then the addresses of the Presidents of the National Canners' Machinery and Supplies and National Canned Foods Association. The meeting was presided over by F. A. Torsch until the chair was taken by former Governor Fernald of Maine, President of the Canners' Association.

The Exhibition.

The Machinery Hall, which was the Fifth Regiment Armory, was filled to its capacity by the exhibits of the machinery and supplies of various kinds used by the canners. For the first time the Association used the uniform, or universal booth, and the result fully justified the action of the officers and directors of the Canning Machinery and Supplies in adopting it.

Seedsmen versus Canners.

More seedsmen were represented than at any previous conventions and with one or two exceptions, they had booths. As a business convention, with the exception of the seedsmen and seed-growers, it probably was the most satisfactory ever held. Owing to a conjestion of peas in the hands of the canners, and large surpluses held by the growers, orders were smaller than usual and the canners were very independent in their attitude; and well they might be, as the seed-growers were making a very hard fight for business and cutting prices to figures unknown for a number of years. It is very doubtful if they did any more business than they would have done, ultimately, had they held for reasonable prices, but as it was coming rather slowly to suit many, they decided that a cut would help matters. As soon as they quoted the lower price to the canner, he immediately advised their competitors of the fact that he had been quoted a lower price, and demanded to know what they were going to do about it. In fact, the canners simply played one seed grower against the other, to their own benefit, and the seed growers were, with a very few exceptions, easy marks. Two or three of the largest growers stood pat for the prices they thought were reasonable and deliberately rejected business at lower figures.

It may be recalled that we stated in these columns some weeks ago, that

FOR FULL DESCRIPTIONS SEE OUR CATALOGUE—MAILED FREE.

We are the largest handlers of Cannas in the world. Our prices on Cannas will bear comparison with any house in the Canna business.

Our Cannas are true to name—two and three and sometimes four eyes—are sound, dormant, and are packed 250 in a box. Two can be "cleated" together and shipped as one. One box of 250 sold at thousand rate; it is cheaper for you to buy a box of 250 than 200 at 100 rate. Write for special prices on quantities.

If any Cannas are not found here, it may be understood that they are superseded by the foregoing. If selection is left to us we will substitute or send only the best for all purposes.

Chicago and Western Agents for our Cannas, ONLY—
WINTERSON'S SEED STORE, 166 N. Wabash Avenue, Chicago

ARTHUR T. BODDINGTON

SEEDSMAN 342 West 14th Street, NEW YORK CITY

in our humble opinion, the prices named by many of the seed growers at that time were too high. Since then, most of these prices have been materially reduced and are now on what would seem to be a fair and reasonable basis. And it was for these prices that a few of the more conservative growers stood. As already stated, they could have booked considerable business, had they been willing to meet the figures of their more excitable and panicky competitors. They refused to do this, however, and probably will lose nothing worth having, in the long run. Many of the canners seem to be obsessed with the idea of buying cheaply, and did not hesitate to break ties of many years standing for a matter of 10 or 15 cents per bushel. Many may have good reason to regret this ere the finish of another pack.

Officers Elected.

The new officers of the various associations were elected on Wednesday of the Convention week. W. C. Leitsch, of Columbus, Wis., being elected President of the Canners' Association, while the Canning Machinery and Supplies Association and the Canned Goods Brokers' Association re-elected the same officers who served the past year —Richard Dallam for the Brokers, and W. C. Langbridge for the Canning Machinery and Supplies Association.

Place for Next Convention.

The place for the next Convention is just now engaging the very serious consideration of the three Presidents, and it is understood that a referendum vote of their various associations is being taken with a view to ascertaining the sentiments of their members regarding this matter. It may here be said that California is making a very strenuous bid for the 1915 Convention, and that a very strong sentiment in favor of California exists in the three associations. It will, no doubt, be several weeks before the matter is finally determined.

Report of the Seed Harvest, 1913.

By L. Dachnfeldt, Odense, Denmark

Rutabagas have given only a poor crop; White Turnips only about 25 per cent of a normal crop and Yellow Turnips a tolerable average crop. Carrots promise a good crop. Peas has given about average and of Dill only a short average crop can be expected. Kale has yielded very good, but only small areas have been cultivated this year. Cauliflower crops look very satisfactory. Brussels Sprouts and Red Cabbage have given a good crop. The late varieties of Cabbage have yielded well, but the early strains have on the contrary given a very small crop. Parsley curled will hardly give an average crop. Parsley rooted is very late and the crop will be poor. Radishes will probably give below average harvest, and the varieties for forcing only a very small crop. Beets yield well, but are somewhat late. With Salsify there were only small areas laid out, and the crop has been far below expectation. Only small areas are planted with Celery, and the crop is, owing to the continual dryness, rather short. Spinach is also partly below expectation in Denmark, but the harvested seed is very fine.

Regarding flower seeds the most open ground varieties are giving a good crop, especially calendula, chrysanthemum, clarkia, cynoglossum, larkspur, eschscholtzia, godetia, gypsophila, candytuft, lupinus, popies and mignonette. A few varieties of sweet peas give a good crop, but the main part of them yield below the average. Asters looked very good during the summer; however, the plants are late, and there can only be expected a small crop, especially of the dwarf varieties. Snapdragons and mignonette will give an average crop. Pansy mixed and in varieties are very good harvested, only a few sorts having suffered in winter. Helichrysum have suffered somewhat owing to the rain, but the harvest will be an average.

Chicago Seed Notes.

Sales of onion sets for January and February delivery have been brisk and only a moderate supply is left for the two months still in the season. The slight shortage in the crop and the excellent quality of the sets have left no chance of a surplus in this market and market gardeners are laying in their supplies early. M. Kirkeby & Co., who have a large place at 5225 Norwood Park avenue and make onion sets their specialty, say the supply will be sold out early. They give the market quotations now as $1.50 per bushel of 32 lbs. on reds and $2.00 on yellows and whites, in small lots. Some discount from this is made on large lots. They grew 150 car loads this year.

CHICAGO NOTES.

Glass Prices and Building Outlook.

Prices on glass in this market continue firm and are practically the same as they have been during the past year. Sharp, Partridge & Co., specialists in greenhouse glass, and well-known all over the country, are of the opinion that there will be an unusual amount of building this spring, and that there will be no decline in prices on glass, which now are a little higher than the average of the last five years, but lower than the average of the last twelve years.

Manager Phil. McKee of The John C. Moninger Co., thinks the chances good for an advance in the price of glass, which just now is quoted in Chicago as 90 per cent and 15 per cent on single and 90 per cent and 20 per cent on double strength for window glass and a little less on greenhouse sizes. Mr. McKee says the prospects are good for an unusual amount of greenhouse building this spring and that among their orders now booked is that of P. Cudahy for four houses, 57 by 320, at Cudahy, a suburb of Milwaukee, Wis.

Trade Notes.

Frank Oechslin, who has had a serious attack of grippe is now able to be about again.

Another retail store in the "loop" at 7 W. Monroe St., was opened last week. K. Panakos, who has a store also on 125th St., New York, is proprietor.

Announcements have been received here of the change of address of the Los Angeles Flower Market, of which Frederick Sperry is secretary. For many years he was connected with the trade here.

The machinery is humming now at the new Foley Greenhouse Manufacturing Co.'s plant. A handsome order recently booked is for a large dome roofed palm house and two greenhouses, at Notre Dame, Ind.

C. Loveridge of Peoria, J. F. Ammann of Edwardsville, Ill., and Albert T. Hey of Maywood, Ill., met in Chicago last week to plan for the meeting of the Illinois State Florists' Association, at Danville, Ill., March 10-11.

H. M. Frank and F. C. Moore of the Heiss Co., Dayton, O., spent a few days in Chicago visiting the large greenhouse establishments, getting pointers on greenhouse construction. They are planning to build in the near future.

Mrs. Julia A. Wratkowsky, who has conducted the retail store at 27 N. Dearborn St., for a number of years, under the name of Jegen, filed a petition in bankruptcy and notices have been sent to the creditors. The liabilities are said to be $3000 and an effort will be made to settle without the expense of a receiver.

Many of the wholesale florists regret that so much of the efforts to push St. Valentine's Day to the advantage of the trade, should be limited almost exclusively to the sale of violets. When the only special box for that day was a heart-shaped one, there was more excuse for pushing the violets but now when there are specially designed long boxes, roses, carnations and other flowers can be used to just as good advantage.

The thermometers registered 14° below zero early Suday morning at some of the greenhouse establishments within the city limits, and a high wind prevailed all day, making the work of keeping the temperature right, one of much difficulty. It was a case of practical demonstration of the difference between the old-fashioned helter-skelter -way of building and the compact modern way, when it comes to keeping the house warm, when the piercing winds blow across the prairies.

A. T. Pyfer, for many years manager of the Chicago Carnation Co., and Peter Olsem, supt. of the plant at Joliet, Ill., are now launched into business for themselves, having purchased the Star Floral Co.'s place at Wilmette, Ill., Feb. 3rd. Mr. Olsem moved his family there immediately and will give the place his personal supervision. Mr. Pyfer will retain his connection with the Chicago Carnation Co. for the present and the stock of the new place will be handled with the other at 30 E. Randolph street. Frank Fisher is in charge at Joliet.

WASHINGTON NOTES.

Gude Bros. Company are about to begin the rebuilding of the houses at their Northeast plant on Bladensburg Road, at a cost of about $2,000, and are also rebuilding two houses in Anacostia at an estimated cost of $4,000.

William E. McKissick, now of the Leo Niesson Company, Baltimore, Md., visited Washington and his many friends here. Mr. McKissick states that some of the growers who are marketing their production through the Niesson Company will shortly extend their operations and build new houses.

Elmer C. Mayberry, formerly of Mayberry & Hoover, with John C. Walker and Earl S. Kump, has incorporated the Du Pont Flower Shop with a capital stock of $10,000 divided into one hundred shares at $100 each. The shop is to be located at 6 Du Pont Circle and will be opened for business about March 1.

M. J. McCabe, of Good Hope Road, Anacostia, is about to materially increase his production with a view to entering the wholesale end of the business. Mr. McCabe is producing some very fine carnations at the present time and some of his snapdragon (Victoria) with nine-inch heads and five-foot stems is without a peer. He also is showing some very good gardenias of which he has one house.

There is considerable agitation in Congress at present looking to the removal of the National Botanic Gardens from its present site on the east end of the Mall to a tract of 400 acres to be allotted for that purpose in Rock Creek Park. Should the removal take place, the gardens would be increased to take in trees that would grow in this climate. Representative Slayden has introduced a bill in the House of Representatives for that purpose.

The work of decorating the executive mansion at Richmond on the occasion of the inauguration of the Governor of Virginia, fell to George H. Cooke. Fully 300 American Beauty, 600 Killarney, 600 carnations, many gardenias and a large quantity of Farleyence ferns, potted ferns and palms, etc., were required to complete it. A novel feature was the covering of a buff-colored wall with bronze galax leaves, the use of garlands of galax leaves and the decorating of the dinner tables to match the color of the ices, creams, etc., furnished by the caterer. Salmon pink cyclamen, primroses, and Spencer sweet peas, garlanded with Farleyence fern were used to good advantage in designs on the tables. The entire decoration was one of the handsomest seen in this section for some time and is to be repeated at an early date when the Governor will give another brilliant reception.

A CORDIAL INVITATION

During Recess

Westchester and Fairfield Horticultural Society.

The annual entertainment held at Mechanics Hall, Stamford, Conn., on Wednesday evening, Feb. 4th, was a decided success with a large number of the gardeners with their families and friends present, together with numerous seedsmen's representatives and nurserymen, filling the hall to overflowing. The vocal and instrumental selections were all very fine and greatly enjoyed, as well as the minstrel features and sleight of hand tricks and the colored views of travel in the British Isles.

John M. Brown of Stamford was presented a beautiful silver loving cup suitably engraved, as a token of esteem and appreciation of the exhibitors at the recent fall show, the success of which was largely due to Mr. Brown's able management. The presentation speech was made by President Williamson. Mr. Brown responded feelingly and assured the members of his continued hearty support. A buffet lunch was served and the floor was cleared for dancing. The fine combination of good music, excellent floor and able floor management by James Johnston, gave all present an opportunity to indulge in all the old dances as well as some of the latest. The party dispersed about 1 o'clock, with everybody satisfied that they had spent a very pleasant and enjoyable evening.

P. W. Popp.

New Jersey Floricultural Society.

The 19th annual dinner of the above society was held at the Plaza Hotel, Orange, N. J., on Monday, Feb. 2nd, at 8 P. M. The tables were beautifully decorated with the exhibits for the monthly competition and produced a striking effect. The toastmaster was J. Austin Shaw, who introduced the various speakers in his own inimitable way. W. A. Manda responded to the toast of "Our American Friends Across the Sea"; Frederick W. Kelsey to the "Nurserymen;" John E. Lager to the "N. Y. Florists' Club;" Frank Drear, the former president, to the "Park and Shady Tree Commissioners;" Edwin Thomas (president) to the "Good Fellowship of the Society;" J. J. Wilson to the "Seedsmen;" and Geo. W. Strange to the "Ladies." Pianoforte selections were rendered by Geo. C. Lindermann and vocal numbers from J. Finnegan.

Prize winners were: 1st, Jos. A. Manda; 2nd, Max Schneider; 3rd, Wm. Reid.

The sixth annual dinner of the New York and New Jersey Association of Plant Growers will be held on Monday evening, February 23, 1914, at 6.30 P. M. in the Green Room at the Hotel McAlpin, Broadway and 34th street, New York. There will be a first class entertainment for which the best music and vaudeville acts have been engaged. After the dinner, the floor will be cleared for dancing.

BUSINESS TROUBLES.

Grand Forks, N. D.—J. V. Wickler, proprietor of the Wickler Floral Co., assets, $1,850; liabilities, $6,122.

STUNG.

Waterbury, Feb. 4.—It was learned today that Frank Miller, who recently escaped from the Cheshire Reformatory, where he had been confined on a charge of forgery, had taken refuge in the greenhouses of Alexander Dallas, on the evening of his escape and that he was found there by one of the greenhouse employees, James Kornofsky, who mistook him for the new fireman who was supposed to come Monday and treated him in a hospitable manner. He helped him dry his wet clothes and did what else he could to make Miller as comfortable as possible. In the morning when the employees returned to the greenhouse, they found everything upset, and several articles of wearing apparel belonging to some of the men gone. Miller is still at liberty.

Flower Market Reports

BOSTON The market this week is devoid of activity, although there is no very heavy overproduction excepting on some of the bulbous material, particularly tulips and yellow narcissi. Both of the latter have been dragging badly and the same may be said of violets and cattleyas. On the other hand, carnations have moved up a peg and all that come in find a ready demand at good prices. Roses are holding their own very steadily and are of excellent quality generally. American Beauty still brings the $9 a dozen price for special stock and there is no surplus. Sweet peas are moving very satisfactorily, especially the Spencers, which bring three to four times as much as the old type realizes.

BUFFALO Trade continues quite satisfactory though there are some days during the week that things are not as bright as looked for. Spring flowers have taken well up to a few days ago and now the market is rapidly filling up and prices have declined somewhat. There has been enough of everything and carnations of poor quality in particular, which are carried along, but select stock finds ready sales and there are some good Beacon, Enchantress, White Wonder, White Perfection, Melody and Ideal coming in, the latter having fine color and stem though the bloom is somewhat smaller than Enchantress. Short roses are not coming on in any quantity, but there are enough selects in Killarney and the Sunburst. Lily of the valley is plentiful, also violets and gardenias and the demand light. Orchids are good and reasonable in price. The supply of lilies equals the demand. Peas, mignonette, stocks, narcissus, Roman hyacinths and freesia are also in good supply.

CHICAGO A complete change in weather has brought more or less change in market conditions. With several days of sunshine, flowers have had more light than for many weeks previous and have responded accordingly. While it will take some time to put the plants in a strictly normal condition, the increase in cut of roses is already perceptible and quality is improved also. The market is almost too well supplied with violets, home-grown singles coming in in quantity and New York doubles are being rushed to this market. Sales for St. Valentine's Day are expected to be very large in all lines and especially in violets, though no great number of advance orders are reported. Tulips are coming more freely and prices on good stock are holding up well to the advantage of the growers, while the short-stemmed small tulips are left unsold or moved at a loss. American Beauties are gaining in color and in stiffness of stem as the result of colder weather and sunshine. Common ferns are now selling at $3.00 per 1000.

CINCINNATI Real wintry weather prevails for the first time this year. Of course weather such as this is no particular incentive to business and on Monday, the general replenishing day for the florists, the buyers seemed to buy only that which they were certain they needed. The average demand last week just about took up all stock that was worth while. Prices from a buyer's point of view were fair. Roses are still in a very limited supply and the receipts are hardly sufficient for average requirements. Carnations, on the other hand, are fine and come in in good quantities. Excellent sweet peas are offered in liberal quantities. The violet market has been rather poor but a good market is expected for both kinds at the end of the week. Everything else in good supply.

NEW YORK The viciously cold weather with which this week has started out has taken about all the remaining life out of the flower trade, eating up the coal on the one end and freezing up the buyers at the other—a case of "burning the candle at both ends"—which pleases nobody. Valentine's Day may start up something, but at present writing it is not particularly encouraging as to outlook. Bulbous stock of all kinds is very abundant and is accumulating in wholesalers' hands, awaiting the arrival of the bargain hunter who unfortunately is a scarce commodity in the wholesale district. Carnations are moving fairly well, everything considered. Roses are fine, but they move with exasperating slowness. Violets are unloaded with difficulty and cattleyas keep them company. Many "odds and ends" of pretty things, such as wallflowers, dasies, cornflowers, calendulas, primroses, etc., are at the disposal of the buyers at present. These, as well as Spencer sweet peas are easily disposed of.

Flower Market Reports

(Continued from page 241)

PHILADELPHIA

Stock continues to arrive in large quantities and there has been some recession in price here and there. The downward tendency is especially noticeable in sweet peas and carnations. Violets, also continue too plentiful as they have been for several weeks back. American Beauty roses are largely neglected, consequently on short supply and high price. There is always a limit. If they go too high there are other good things to fall back on. A feature of the week was the large amount of memorial work. This had a marked effect on white flowers—white roses, lilies, lily of the valley, etc. Prices on roses generally are in most cases rather easier. As St. Valentine's Day approaches a pulse beat for advance can be heard by the iron-faced and stone-deaf buyers. To ordinary people these mild pulse beats are very noticeable. By ordinary people we mean the mild-faced growers with ears attuned to spiritualistic forces. Orchids are shortening up and hope dawns. The market of their dreams—like smiling morn whose rosy fingers already gilds the hills with joy. Cattleya Trianæ, Phalænopsis Schilleriana and Oncidium splendidum are the most conspicuous at present.

ST. LOUIS

The market has been good in supply and demand, although the recent cold weather made things somewhat dull in retail circles and this of course, affected the wholesale market somewhat. Prices have been stationary, but are expected to go up a few cents for St. Valentine's Day. Sweetpeas, violets and carnations are most plentiful, with prices low all week. Roses are looking up somewhat now, and in another week all will be in crop. Other regular market staples are equal to all demands.

WASHINGTON

The supply of flowers of all varieties shortened up materially the latter part of the week due to a sudden drop in the temperature. The month opened up with the mercury reaching the 70 degree mark and above; flowers began to bloom in the public parks and it was feared that the azaleas, held back for the Easter business, would bloom prematurely. some of the growers being forced to whitewash their houses to deaden the rays of the sun. As a result, there is a grave possibility of a shortage of locally grown azaleas for Easter. The lily crop will be exceptionally good from all reports. With the temperature below freezing, the sale of violets and sweet peas on the streets has decreased to a marked extent. The latter flowers could be bought at as low a figure as $5 per thousand, but the price has since advanced. Spencer type is bringing $1.50 to $2.00 per hundred. The majority of the jonquils and narcissi offered in the local market are being shipped in from other places. The growers hereabouts have come to the conclusion that the production of these flowers can only be accomplished at a loss and are devoting their houses and labor to other purposes. Gardenias are still holding their price of $3 per dozen. American Beauty roses are poor in quality and are meeting with but a very nominal demand. Carnations brought $5 per hundred the earlier part of the week and it is expected that $4 will be the bottom price for some time to come.

NEW YORK QUOTATIONS PER 100. To Dealers Only

MISCELLANEOUS	Last Half of Week ending Feb. 7 1914	First Half of Week beginning Feb. 9 1914

Visitors in St. Louis—G. M. Thost, De Soto, Mo.; E. J. Fancourt, representing S. S. Pennock-Meehan Co., Phila. Pa.

Visitors in Chicago—A. Schutz, Hammond, Ind.; H. M. Frank, Dayton, O.; F. C. Moore, Dayton, O.; C. Loveridge, Peoria, Ill.; J. F. Ammann, Edwardsville, Ill.; Geo. Taglaar, Holland.

Visitors in Buffalo—Prof. E. A. White of Cornell University, Ithaca, N. Y.; George Vanzyverden, Lisse, Holland; Bob Schock, of Rice & Co., Philadelphia, Pa.; F. Alberts of Rochester, N. Y.; John Von Zonneveld and wife; Enos B. Sage and wife of Bradford, E. C. Campbell of Rochester; Emil Thoman of Rochester; S. J. Goddard, President of the Carnation Society; Mr. Grullerman of Holland; W. J. Stewart, Boston.

OBITUARY.

W. A. Daggett.

W. A. Daggett, a life member of the S. A. F., died at his home in Boston, Mass., on February 9, aged 73 years. While not directly engaged in horticultural work Mr. Daggett was in close touch with the florist trade and an intimate associate of the late Edmund M. Wood of Natick, through whose influence he became a life member of the S. A. F. The cause of his death was pneumonia.

CATALOGUES RECEIVED.

Fraser Nursery Co., Huntsville, Ala.—Surplus List No. 1, for Nurserymen and Dealers only.

Valdesian Nurseries, Bostic, N. C.—Wholesale Price List for Spring, 1914. Shade Trees, Shrubbery, etc.

Henry Youell, Syracuse, N. Y.—Descriptive Price List, Helpful Hints and Early History of the Gladiolus.

Hosea Waterer, Philadelphia, Pa.—"The Lawn Beautiful." An instructive pamphlet with price list of lawn mixtures.

Bobbink & Atkins, Rutherford, N. J.—Heart Cypress Tubs, Rustic Work and English Garden Furniture. Illustrated.

William Tricker, Arlington, N. J.—Catalogue of Water Lilies, Roses, Garden Perennials. A choice selection. Illustrated.

Currie Bros. Co., Milwaukee, Wis.—Farm and Garden Annual. Fully illustrated. A plate of brilliant sweet peas adorns the cover page.

Ross Brothers, Wichita, Kansas—Seed Book for 1914. Farm and Garden Seeds, Flower Seeds, Implements, etc., A neat attractive catalogue with handsome cover.

Vaughan's Seed Store, Chicago, New York—General Seed Catalogue. Covers in colors, gladioli forming the subject of back page. A compact book of 160 pages.

J. L. Moore, Northboro, Mass.—Catalogue and Price List for 1914 of the Northboro Dahlia and Gladiolus Gardens. Cover plate in natural colors. A good select list.

W. E. Dalwig, Milwaukee, Wis.—General Illustrated Catalogue of Seeds, Plants and Implements. Covers cream tinted with simple inscription in embossed gold and brown.

Thornton Bros., Lawrence, Mass.—Illustrated General Catalogue of "Sure Crop" seeds. A very creditable publication by this old established firm of seedsmen and florists.

W. W. Wilmore, Denver, Colo.—"Dahlias—1914." A very attractive illustrated catalogue. Gladioli and some hardy herbaceous specialties are included. Also Trade List of Dahlias, etc., for 1914.

David Herbert & Son.—Atco, N. J.—Descriptive Catalogue of New Dahlias, Cannas, Gladioli and other Summer Flowering Bulbs, for 1914. Finely illustrated. Three full page dahlia portraits in natural colors.

J. Chas. McCullough Seed Co., Cincinnati, O.—1914 Seed Catalogue. Cover pages shows exterior and interior views of the "Modern Seed Store." Contents comprehensive and especially strong on vegetable seeds.

Conard & Jones Co., West Grove, Pa.—New Floral Guide for 1914. Richly illustrated with portraits of choice roses, cannas, etc.; several full page pictures in natural coloring. A catalogue that will make customers.

Fottler, Fiske, Rawson Co., Boston, Mass.—Seed Annual. A characteristically comprehensive catalogue, 186 pages, well filled with text matter and profuse illustrations. Covers in quiet tints with gold embossed inscription.

C. Keur & Sons, Hillegom, near Haarlem, Holland. Wholesale Catalogue of Bulbs and Plants. American Edition, 1914 and 1915. Accompanying this very complete list is a fine life size colored plate of Gladiolus Glory of Holland.

H. A. Dreer, Philadelphia, Pa.—Special Dahlia Catalogue. A beautiful publication superbly illustrated, and listing the choicest of the novelties in all classes. Also special catalogue of Old-fashioned Hardy Plants. On same order and general style as the foregoing. High-class illustrations throughout.

Cleans a building of Rats and Mice in short time, keeps it cleaned, for it is always ready for use. Made of galvanized iron, can't get out of order, lasts for years. Large number can be caught daily. Go to Catcher mornings, remove device inside, which only takes few seconds, take out dead rats and mice, replace device, it is ready for another catch. Small piece cheese is used, doing away with poisons. Catcher is 18 inches high, 10 inches diameter. When rats pass device they die, no marks left on them. Catcher is always clean. One of these Catchers set in a livery stable in Scranton, Pa., caught over 100 rats in a month. One sent prepaid to any place in United States upon receipt of $3. Catcher, 8 in. high, for mice only, prepaid $1. On account of shipping charges being prepaid, remittance is requested with order.

MISCELLANEOUS

BUSINESS OPPORTUNITY.

A correspondent near Philadelphia, whose good standing is well known to us, writes: "I have about thirty acres of very fine land, suitable for nursery business, and am anxious to get hold of a good, live, young fellow, one who is up in this line of work and a hustler, to go into the nursery stock with me. I do not think there will be any trouble in giving him a nice line of trade, but would not consider anyone unless he had some capital and thoroughly understood how to run it.

"Have frequent inquiries for the laying out and fixing of grounds, furnishing material, etc., for the work. This could be bandled as a nice profitable investment for the right man."

Address in confidence: GEORGE E. MEYER, care George C. Watson, Dobson Bldg., 9th and Market Sts., Philadelphia, Pa.

SPECIAL GREENHOUSE FERTILIZERS

FOR FLORISTS AND GARDENERS

Formulated and Manufactured by men who have made a life study of

FLOWERS—FRUITS—VEGETABLES

UNDER GLASS

In this Country and Abroad

Proper fertilization under glass is more important than fertilization out of doors—and

Fertilization is Our Specialty

Why pay ocean freight and dealers' commissions on Imported General Fertilizers when you can buy Fertilizer Direct from the Manufacturer especially prepared to meet *your individual requirements.*

We are also manufacturers of MAK-GRO Odorless Plant Food put up in one pound tins and five pound bags—a splendid side line for Florists operating their own stores.

We are at your service on all matters relating to Greenhouse Fertilization. Write us for further particulars

EASTERN CHEMICAL CO., BOSTON

DO YOU KNOW VERMINE?

John Lewis Childs, Flowerfield, N. Y., writes:—
"I suppose you will be glad to know that **VERMINE** is giving excellent satisfaction. Our greenhouse foreman says that it is the only thing that he has ever used that will kill white ants in the benches."

Valentine Burgevin's Sons, Kingston, N. Y., writes:—
"We wish to say that we find **VERMINE** an excellent thing. We used it on a bench planted with Smilax to kill root lice or maggots, which ate the roots, and after two applications our Smilax is taking on new life and has started off to grow."

The Gardner Nursery Company, Osage, Iowa, writes:—
"We will use **VERMINE** on our out-of-door fields of strawberry plants if the inside test continues as satisfactory as it now seems."

W. N. Craig, Brookline, Mass, writes:—
"I have used **VERMINE** and found it effective against root maggots, cut worms, earth worms, ants and other ground pests."

VERMINE is applied one part to four hundred parts of water by thoroughly soaking the soil. It will protect your crops from the ravages of vermin under ground without the slightest injury to vegetation.

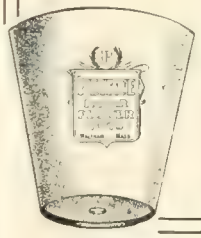
PEIRCE PAPER FLOWER POT

A water proof paper pot.



Does not fold up or come apart.

Plants in transit retain moisture within the plant ball instead of its being absorbed by the packing, insuring them traveling long distances in perfect condition.

Received a Certificate of Merit from the Society of American Florists and Ornamental Horticulturists, Minneapolis, August, 1913.

Only paper pot ever so recognized.

Ask your seedsman or supply house. If they do not keep them, send direct.

Made in Standard sizes, 2 inch to 6 inch inclusive.

Samples furnished free.

Our President's First Ad.

AS President of this company, I prefer to keep in the background, but our ad man has been doing too much talking that's over people's heads; and too little about the things we have to sell.

We have had several talks together and finally he suggested my trying a hand at it. So that's exactly what I am going to do.

First, there's the question of getting started right — half the troubles are because trouble enough isn't taken about that.

If we are willing to spend our good money coming to talk over with you the various problems of your proposition and explain to you just how we can meet your wants, it does seem to me that you are turning down a good thing when you don't write us whenever the building bee is buzzing in your head.

Heating, for instance — think of the costly "fix-overs" and trouble that a little trouble, in starting right, would have saved.

If you have a regular twister of a problem, I'll take a hand in it myself. "We go anywhere for business."

IT'S THE REPEAT ORDERS THAT COUNT

ALONG last summer we wrote to our Chicago office, asking if there was anything of particular interest about the orders they had recently been booking.

The reply was so to the point that we will now hand it on to you:

"The most interesting order we have received this month is for three houses for Walter B. Davis Company, at Aurora, Ill.

"They will be 64 feet wide and 325 feet long, The eave line is 10 feet high and the rafters spaced about 11 feet to centers. They will be duplicates of the iron frame house we erected for Mr. Davis last year.

On the three houses 7,500 lbs. or 3¾ tons of putty were used on the 18 miles of bars—36 miles of glass held in place by 300,000 glazing brads—239 gallons of white paint or pretty close to a ton—90,600 screws, which, if placed end to end, would reach considerably over a mile.

"A repeat order like this, we believe, says more all by itself than any amount of anvil pounding we can do regarding the merits of our greenhouses."

These Davis houses were completed some time ago. Mr. Davis's opinion is given in that four page ad. in the *Exchange and Review* of January 31st, 1914.

LAWN GRASS

"The Right Seed in The Right Place"

We furnish grass mixtures for dooryards, terraces, lawns, athletic and polo fields, cemeteries, parks, country clubs, country estates.

Repeated laboratory tests on individual mixtures assure superiority of quality and growth.

Experience of over fifty years of successful seed business assures you of correct proportions.

Experiment has shown us that a mixture of the proper grasses is more satisfactory than an individual grass. Why waste your time and money experimenting? Let us furnish what you need.

NOTES ON CULTURE OF FLORISTS' STOCK

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Azaleas

Do not be in too much of a hurry in giving azaleas a high temperature for the present at least. Azaleas can be easily timed as they take from five to seven weeks in a temperature of about 55 degrees at night. If those wanted for Easter are in a moderately cool house they will not require much forcing. They are much better when grown in this way and the flowers possess more substance. Give ventilation on all good days; see that none are allowed to become dry at the roots; give plenty of room between the plants and give a good syringing on bright days. The azaleas should show color about three weeks before Easter so they can be hardened off in a lower temperature. Do not let any of them break into leaf growth which would only be at the cost of producing good flowers. Carefully pinch out any leaf growth that may be showing around the swelling of the flower buds.

Dracaenas

While we have plenty of heat in the pipes is a good time to increase our stock of fine foliaged dracaenas. Leggy plants can be increased by "mossing"—cutting the stem about half through, just below the leaves and placing something between to keep the cut open. A small handful of wet moss placed around the cut, and secured by a few twists of raffia, answers the purpose. The moss is kept constantly wet and when white roots are seen pushing through, the stem is severed beneath, and the moss and roots are buried to the lowest leaf in a well-drained pot of soil. Having disposed of the top, let us turn our attention to the old stem. With a sharp knife we will now cut up the stem into portions one inch long, and if we want as many plants as possible we will split each section down the middle. Every section, split or unsplit, forms a new plant. Place these in a compost of equal parts of loam, leaf-mold and coarse sand, and then sprinkle a layer of sand over all. Place in a propagating case and in a very short time, provided plenty of heat and water are given, they show roots and growth. When this stage is reached potting singly in 2½ inch pots should follow, with careful watering, plenty of warmth and syringing.

Euphorbia fulgens

This makes a very beautiful plant, when well grown. Plants that have flowered during the winter will carry plenty of wood to propagate from. By heading back some of these plants now and giving them a temperature of 65 degrees at night they will soon break into young growth that will make fine cuttings. If these cuttings are taken off with a heel and placed where they can have bottom heat about 75 degrees they will root without much trouble. During this stage they will want careful watering and shading. When they have made roots of about half an inch they should be potted up in a compost of two parts fibrous loam, one part leaf mold, one part well decayed cow manure and a little sand. Keep shaded until they have taken root. They will want a warm and rather moist house that never goes lower than 60 degrees at night, but 65 degrees would be better as they are heat loving subjects. Give careful ventilation at all times.

Orchids

During the last of February and through March the resting of orchids comes to an end. With the strong sun and increased length of day they will start into growth. So just before they make too much growth is the best time for repotting or top-dressing most orchids. The best material is either fibrous peat or fern fiber and sphagnum moss, with charcoal and crocks for good drainage. After being potted they should be frequently syringed and have abundance of moisture about the house; in fact, the benches and floors should never be dry. With new growth and root action will necessitate lots of attention from this out in the way of watering, but it must be borne in mind that over-watering is very injurious to all orchids. Now that we have stronger sun, the one thing to be remembered is to ventilate on all possible occasions, but not so as to cause any cold draughts. Make it a rule that when the proper temperature has been reached ventilation will be in line.

Tuberous Begonias

When these begonias are given half a chance they are truly superb both in flower and foliage. If started now and grown on you can have fine flowering plants by Decoration Day. Flats that are well crocked and filled with a mixture of leaf mold and sand in equal parts is the best way to start the tubers. Place about an inch of the compost on sphagnum and crocks and on this place the tubers fairly close together, just allowing about half an inch of room between them. They will want some bottom heat, so give them a place where they can have at least 70 degrees and 75 would be better. Give just enough water to keep the compost moist. In four or five weeks the young leaves should be showing. At this stage they will do better in a house that stands from 55 to 58 degrees at night. When they have made growth to the extent of crowding they should be potted up in 4 or 5-inch pots, using a rich compost.

Starting Lemon Verbenas

Old plants of lemon verbenas that have been resting should now be brought into more heat. Give them a place where they can have a temperature of about 50 degrees night temperature. When thus treated they will soon produce any number of fine cuttings. Place in a moderately warm propagating bed, keep watered and shaded and they will soon root. Potted into 2½ inch, in rich compost they soon grow into fine stock.

Mr. Farrell's next notes will be on the following: Bedding Geraniums; Begonias [illegible] and Cincinnati; [illegible] the Valley for Easter; Propagating Violets; Shading [illegible] and Ferns.

Statice

The name Statice will bring back into the memory of those of my readers whose European training took place from 20 to 25 years ago, drying rows of bundles of tiny blue and lavender blossoms, used for the customary funeral design work of immortelles in vogue at that time. Fashions and material have changed and most of us have nearly forgotten the "Sea Lavender" with its tufts of long, smooth, leathery foliage and its graceful panicles. Confronted anew with this old-time garden perennial, we realize the thoughtlessness of discarding plant species as soon as they give less promise for wholesale cash returns. Certainly, there seems to be little call for dried statice at present, but when I beheld the handsome specimen of Statice latifolia in the rockery of Henry A. Dreer at Riverton, depicted in our illustration, the conviction dawned upon me that it is time to give the sea lavenders our renewed attention. The number of midsummer-flowering rock garden inmates is not overabundant. Statice intelligently employed can be easily made one of the most effective July and August features, particularly as all are known to do very well in an open sunny exposure and rarely suffer seriously by occasional drought.

STATICE LATIFOLIA.

All the varieties in cultivation are natives of eastern Europe and Asia. Statice eximia produces panicles of decidedly handsome pale lilac blossoms. Statice Gmelini is distinguished by violet blue flowers of marked ornamentality. The stateliest species of the sea lavenders, the well known Statice latifolia, also adapted for the herbaceous border, shows freely branching heads in deep blue; while Statice tartarica, syn. S. incana, as the lowest growing garden variety, adorns itself with purplish pink panicles. All sea lavenders require a well-manured and deeply dug sandy loam and may be raised from seed or propagated by root cuttings and division. Their value for cutting is self-evident.

Richard Rothe

Riverton, N. J.

Cattleya Percivalliana

(See Cover Illustration)

This is a very good species of the ever-popular cattleya and no collection would be complete without at least a few specimens of it. While the flowers are not as large as those of the other cattleyas of the labiata group, they are of better color than most of the larger flowering species. The sepals and petals are usually deep rose; the front lobe of the lip is a lovely shade of deep crimson, paler toward the margin and becoming a rich carmine at the entrance to the throat which latter is deep orange penciled with crimson toward the base. The flowers on the plant illustrated measure 4 inches across (not stretched out); the petals are 2¾ in. long and 1¾ in. wide; which is not a very small flower at that. Cattleya Percivalliana will succeed under the same treatment given to other cattleyas of the labiata section. For my part I prefer to grow them in baskets or pans, suspended from the roof of the cattleya house where they can get all the available light and where the temperature is usually a few degrees higher than it is on the bench or stage. As a compost I use a good grade of osmunda fibre, using the same very sparingly in order to keep it from getting sour. After the bulbs are made up in the fall very little water will be needed until new growth starts again.

For the commercial florist this cattleya is especially useful as it flowers at a time when other cattleyas are scarce. As a rule it is at its best during the latter part of November and December, thus filling in the gap between C. labiata and C. Trianæ.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Grading Cut Roses

There is very little in poor grading of roses, for any grade that does not come up to its standard will soon be detected by buyers, and the price will rule accordingly. What is more, as soon as any grower gets a reputation for poor grading, his stuff will not sell as well, even when it does arrive well graded and otherwise in good condition. Weak stems may prevail here and there, and it is poor policy to stretch these stems to their full length and then put them in to the highest grade. All weak stems, poor buds, and in fact all cut roses having some defect should be put into the short or inferior classes. Avoid putting any overblown roses among the good grades, also see that the buds are cut at the proper stage, not too tight as they sometimes are this cold weather.

The Coal Bin

The weather that we have had the last week or more ought to teach a lesson for anyone who will allow his coal bin to become empty before even attempting to refill it. When a blizzard comes along, and it is impossible to secure coal on short notice, then the trouble comes in. We cannot expect everyone to get out and hustle in all kinds of weather, when a little thoughtfulness on our part might have avoided it all. Keep the cellar full, and if it is small, have the coal heaped up outside somewhere, where it will be real handy. Coal will decrease in value if exposed to the weather for more than a year, but it is better to be on the safe side and have a car or two in reserve in case of emergency.

Snow

Light is something that all plants must have, and roses are among those that cannot have too much of it. Therefore after a snowstorm it is well to see that any snow that may stick to the glass sides of the houses here and there is removed as soon as the storm stops and clear weather sets in once more. This is not always possible, and does not have to be done, but every ray of light will help, as we all know, so let us try to give the plants all the light we can. The new modern houses with the galvanized eave plates will usually clear all snow and ice as soon as the first rays of the sun hits them. Where the snow is piled up to the eaves on the outside, remove it if necessary, and the eave will then be able to drop its load. Where the houses are joined together with a gutter between them, see that the heating pipe directly under this is kept hot while the snow is falling. The heat thus rising will usually melt the snow as fast as it accumulates and there will be little trouble in keeping the gutters clean. Right here is where precaution will avoid a good deal of trouble. See that all openings in the gutter leading to the sewer are screened by wire so as to keep all leaves and such out of the drains. A good time to do this is in the summer, when the houses are being painted, or other work on them being done.

Potting Soil

Growers that made provision for their potting soil will have it real handy and any one who has to dig with picks to loosen a few frozen lumps of sod, will no doubt have some heaps covered the coming year. At any rate have plenty of soil brought in so that it will dry out sufficiently to mix freely with whatever you may wish to add to it. Poorly mixed soil goes a good ways to make the plants grow unevenly, and there is enough to contend with even when all goes right, without having the plants misbehave in this way. Have all the soil well screened, too, as it is very important to have it as fine as possible and absolutely free from stones, pebbles, glass and other useless junk often found in soil where the sod is taken off old fields.

HOLLAND AT THE PANAMA-PACIFIC EXPOSITION.

It is promised that the floral display at San Francisco by Holland will be the most extensive, varied and beautiful of any ever made by a foreign country at any exposition. While the bringing of an acre or two of bulbs and blooming plants to California may seem like "carrying coal to Newcastle," since the Golden State is the land of flowers, it must be remembered that the low, moist lands of Holland are the principal source of most of the spring flowering bulbs for the whole world; and the fact demonstrated within the past few years in the redwood sections of California that this state has every qualification for competing with the Dutch bulb product, will make this foreign exhibit one of exceptional interest.

That the landscape gardening effects attained by the Holland floral exhibits will be things of artistic beauty, unique in design, is certain. The laying out of these gardens, so that there will be a rotation of plants and a constant blooming period throughout the ten months of the exposition as well as the arrangement of the special display in the Horticultural Palace, is in the hands of a Dutch landscape expert, A. Van Vliet. He is the artist who planned the wonderland of gardens surrounding the Peace Palace at the Hague. Accompanying the Netherlands commissioners are two other noted color artists, Herman Rosser and Mrs. Rosser. The latter, known to the world of art as Suz Laut, was one of the landscape architects of the Hague Peace Palace.

NOTES FROM BRITAIN.

As one of the principal objects of the Anglo-American Exposition, which will be held in London during the coming summer, is to celebrate the one hundred years of peace between Great Britain and the United States and to further insure the continuance of that peace by affording means for the people to become better acquainted, and to increase the commerce between the people of the two countries, a Commercial Club, composed of American and British manufacturers will be organized in connection with the Exposition. The meeting place of this club will be a headquarters for trade information and the interchange of ideas relating to commercial matters.

The wrecked greenhouses

In our editorial notes of last week we made comment upon the great advantages enjoyed by flower growers equipped with modern type greenhouses. As compared with the little structures of former days with their clumsy woodwork and often primitive heating apparatus these great steel-ribbed glass palaces, "a little lighter that out-of-doors," have brought to rose and carnation growing a perfection of system and exactness of detail which has practically revolutionized these cultures. But the happenings of the past week, the storm disasters which have befallen at least two of the most extensive modern greenhouse structures in this country—furnish a lesson and a warning. To so plan and adjust these vast expanses of glass for successful resistance against wind and snowfall will demand the exercise of scientific knowledge and mechanical skill of the highest order. Whatever of structural defects or weakness these regrettable misfortunes may have exposed will undoubtedly be guarded against as far as possible in future construction and thus one lesson of the winter of 1913-14 will not have been profitless.

Legislation worth watching

Two very important bills are before the Committee on Agriculture at the State House, Boston, this week. One of these, House Bill No. 1741, is a petition by E. Allan Peirce and others relating to the assessment on private lands of the costs of destroying the eggs, caterpillars, pupae and nests of moths. The amendment asked for would make the assessment, to the tax-payer, on the land value alone instead of the present which is one-half of one per cent on the valuation of the land including all buildings. Concerning this bill and its objects Mr. Peirce says:

"This has been a very unjust tax in the past; for instance, on a lot of land that I own, the assessed valuation of which was $500 in 1912, the city tax was $8.50 and the gypsy moth tax $29. On another piece of property, valued at $8,600, the city tax was $136.74, and the same year the gypsy moth tax was $149.60. This more than doubles our tax on the land valuation because we are owners of greenhouses and other buildings on adjoining land."

HORTICULTURE recognizes the justice of this proposed legislation and would like to see the bill enacted. The other bill in question should be opposed vigorously and defeated. It is House Bill No. 1255. It provides for the extension of the scope of those in charge of the suppression of the gypsy moth to the suppression of the tent-caterpillar, elm-beetle, leopard moth and *other insect pests*. If this bill should become a law there is no end to the amount that could be taxed a land-owner there being no restriction as to how far a city forester or superintendent in charge, might go.

Saving the wild flowers

Every lover of the wild flowers should feel grateful to the Society for the Protection of Native Plants and other organizations with a kindred purpose for their work and influence on behalf of our native flora. The Society for the Protection of Native Plants, which is located in Boston, works in co-operation with and has the endorsement of the New England Botanical Club, Wild Flower Preservation Society of America, Seal Harbor Improvement Society and sister organizations in various parts of the United States. Leaflets are issued from time to time, many of them for the particular use of children and intended to foster a sentiment of conservation rather than destruction and to educate all, old and young, as to the imminent danger of extermination of many interesting and beautiful wild flowers through thoughtless and indiscriminate picking. Warning is given as well about the alarming extent to which the cutting of laurel and other native material is being carried on for commercial use and in this HORTICULTURE is also in accord. Those of our readers who wish to lend their aid to this work can co-operate by addressing the secretary Miss M. E. Carter, Boston Society of Natural History. The Wild Flower Preservation Society is located in New York, with charters in Philadelphia and Chicago. This Society is also doing some good missionary work. Correspondence should be addressed to Mrs. N. L. Britton, New York Botanical Garden.

FLOWER EXHIBIT AT CORNELL UNIVERSITY.

The flower show at the College of Agriculture which was held in connection with Farmers' Week was unusually successful. The hall was attractively decorated with southern smilax and artificial pink roses by one of the short-course classes.

A large number of potted plants and cut flowers were contributed by various commercial growers and this made a very valuable feature of the week. The hearty co-operation of the commercial people is very gratifying to the department of floriculture, for Ithaca is considerably outside the area of the flower-producing section of the state and it is difficult to acquaint the students with the newer varieties of cut flowers and with the materials used by retailers. The exhibit made by the Pennock-Meehan Co. was of special educational value. Following is a list of the exhibitors and the materials shown.

United States Cut Flower Co., Elmira, N. Y.—Carnations: Gloriosa, Enchantress, Pink Delight, White Enchantress, Benora, White Wonder, Beacon, Eureka and Rose Pink Enchantress.

W. J. Palmer & Son, Buffalo, N. Y.—Carnation White Wonder; roses: Sweetheart and Fireflame; freesias.

Cottage Gardens, Queens, N. Y.—Carnation Matchless.

Anton Schultheis, College Point, N. Y.—Potted plants of Tulips, Narcissi, Hyacinths, Malus, Tausendschoen Roses, Azaleas, Lilacs, Camellias, Ericas and Chorizemas.

William H. Siebrecht, Astoria, N. Y.—Collection of Tulips and Narcissi.

E. G. Hill Co., Richmond, Ind.—Carnations: Beacon, Gloriosa, Mrs. C. W. Ward, Yellow Prince, Commodore, Benora, Pocahontas and White Wonder.

Pittsburg Cut Flower Co., Pittsburg, Pa.—Carnations: White Enchantress and Mrs. C. W. Ward; roses: Pink Killarney, Richmond and My Maryland; Cattleya Trianae; Narcissi and Tulips.

S. S. Skidelsky & Co., Philadelphia, Pa.—Carnation Philadelphia.

E. C. Ludwig, Pittsburg, Pa.—Collection of Tulips and Narcissi.

S. S. Pennock-Meehan Co., Philadelphia, Pa.—Large collection of florists' ribbons, pins and other retail supplies; cut flowers of Narcissi, Sweet Peas, Tulips, Freesias and Mignonette.

Montgomery Co., Hadley, Mass.—Rose Hadley.

Peter Fisher, Ellis, Mass.—Carnation Georgeous.

Patten & Co., Tewksbury, Mass.—Carnation Princess Dagmar.

A. Roper, Tewksbury, Mass.—Carnation Alice Coombs.

Butler & Ullmann, Northampton, Mass.—Carnation Gloria.

J. H. Leach & Son, North Easton, Mass.—Carnation Pink Supreme.

S. J. Goddard, Framingham, Mass.—Carnations: Rosette, Benora, Pink Delight, Beacon, White Perfection and Yellow Prince.

C. S. Strout, Biddeford, Maine—Carnations: White Wonder and Pink Delight.

MASSACHUSETTS AGRICULTURAL COLLEGE.

A very interesting and instructive program has been arranged for Floricultural Day, March 18th, by the Floricultural Department of the College. The men on the program are all specialists and men of prominence. Florists and gardeners from all parts of the state have expressed a willingness to attend these lectures. Following is the program:

Morning Session.

9.10. Opportunities in Floriculture. Prof. Arno H. Nehrling, Department of Floriculture, Massachusetts Agricultural College.

10.10. Professional Horticulture. Harry A. Bunyard, Secretary of the American Sweet Pea Society, New York City.

11.10. Raising Plants from Seeds. Especially trees and shrubs, and in particular ericaceous and coniferous plants. T. D. Hatfield, Hunnewell Estate, Wellesley, Mass.

Afternoon Session.

1.30. Commercial Rose Culture. W. H. Elliott, rose-grower, Brighton, Mass.

Some Phases of Out-door Rose Culture. Eber Holmes, Author of "Commercial Rose Culture," Montrose, Mass.

2.30. Methods Used in Improving Plants. Edward J. Canning, until recently, curator of the Botanic Gardens, Smith College, Northampton, Mass.

3.30. Glass Houses in the Middle West. Illustrated. Prof. Arno H. Nehrling, Department of Floriculture, Massachusetts Agricultural College.

VIEWS IN WASHINGTON GREENHOUSES.

A House of Carnations.

The two greenhouses here depicted, one devoted to carnations and the other to gardenias are a part of the range of Gude Bros., Anacostia, D. C. We might take up space to tell how healthy and promising they look, but the pictures speak for themselves "The dollars are sticking out all over them."

A House of Gardenias.

CLUBS AND SOCIETIES

AMERICAN ASSOCIATION OF NURSERYMEN.

The thirty-ninth annual convention of the American Association of Nurserymen will this year be held at Cleveland, Ohio, June 24-26. A communication from the secretary says that it is as yet somewhat early to furnish much that is definite in regard to the arrangements for what is hoped will prove to be one of the largest and most interesting gatherings of the Association. The central location of the convention city will make it comparatively easy for the majority of the membership to attend. The time of meeting will also operate favorably to that end.

Reports from the committees responsible for the general arrangements, such as hotel, program, exhibits and local entertainment indicate that good progress is being made. From the favorable comments heard regarding the selection of The Hollenden as convention headquarters it is evident that no mistake has been made.

From Mr. W. B. Cole, of the entertainment committee, we learn that Mayor Baker, of Cleveland, has consented to extend the welcome to the Association. Mr. Baker, as is known, is a national character, and anything he has to say will interest the nurserymen. At the meeting of the Ohio Nurserymen, January 21st, the following tentative program of entertainment was adopted: One evening moonlight ride on the lake; one evening a banquet and other entertainment; and there will also be a theatre or matinee party for the ladies. The city forester and the city department will arrange for a trip through the public parks and boulevards.

President Pilkington, as chairman of committee on membership, the latter being composed of the state vice-presidents, is hopeful of encouraging results. The secretary will soon be able to announce particulars of railroad facilities, and is now engaged in preparing the annual appeal for early renewal of memberships and reservation of badge book spaces. Those seeking information should address John Hall, secretary, 204 Granite Building, Rochester, N. Y.

NEW ENGLAND NURSERYMEN'S ASSOCIATION.

The second annual convention of the New England Nurserymen's Association will be held at Hotel Bond, Hartford, Connecticut, Tuesday and Wednesday, February 24th and 25th. Following is the program:

Tuesday, February 24th, 1 P. M.—Organization; president's address; reports; appointment of committees.

The Bug Question—The chief inspectors of the New England States and Department of Agriculture, Washington, have been invited to lead a general conference and discussion on this most vital subject.

Forestry and Its Relation to the Nurserymen—Professor J. W. Toomey, Yale Forestry School; W. O. Filley, Connecticut State Forester.

Local Retail Nursery and Sales Grounds—E. F. Coe, New Haven, Conn.

6.30 P. M., Dinner—Given by the Connecticut Nurserymen's Association.

Wednesday, February 25th, 9.30 A. M.—Election of Officers.

10.00 A. M., The Nurserymen and Public Parks.—George A. Parker, Superintendent of Parks, Hartford, Conn.

Evergreens for New England—Henry Kelly, New Canaan, Conn.

1.30 P. M., Proper Methods of Growing Herbaceous Stock in the Nursery.—A. E. Robinson, Daniel A. Clarke, Julius Heurlin, George C. Thurlow, John Kirkegaard.

Imported Nursery Stock.—W. H. Wyman, North Abington, Mass.

Early History of the Nursery Business.—F. E. Burroughs, President, Connecticut Nurserymen's Association.

J. H. Hale, "The Peach King."—His talks are always of interest to Nurserymen.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

The regular monthly meeting of the above named society was held in Greenwich, Ct., Friday evening, Feb. 13th. Owing to severe weather there was a somewhat reduced attendance and the exhibits were fewer, but up to the usual high quality. The judges made the following awards:

Phalaenopsis Schilleriana, from Adam Patterson, cultural certificate; Killarney roses, from Carl Hankansen, honorable mention; Primula malacoides alba, from P. W. Popp, vote of thanks; Winter-flowering orchid sweet peas, from P. W. Popp, honorable mention.

This being the first time that this new type of winter flowering sweet peas was exhibited here they attracted considerable attention. The question of summer and fall exhibitions was discussed, and the executive committee was authorized to meet the Board of Managers of the Portchester Hospital and to arrange, if practicable, for a show in June in connection with the hospital management. A communication was then read from the National Association of Gardeners urging the need of greater co-operation of the local societies with the National body. The question is one deserving serious consideration by the gardening fraternity and there is no doubt that the movement will take concrete form after the various local societies have had a chance to discuss the matter. There was quite a little discussion on the subject, the sense of which seemed to be that if the local societies could have adequate representation on the governing board and a voice in shaping its policies the Westchester and Fairfield Horticultural Society would heartily cooperate with the national body in any movement to further the advancement of horticulture.

P. W. Popp, Cor. Sec'y.

AMERICAN ROSE SOCIETY.

Mrs. Hubbard's Gold Medal.

The executive committee of the American Rose Society met last Monday and took up various important questions relative to the coming exhibition. The list of judges were chosen subject to their acceptance. The Mrs. Gertrude M. Hubbard gold medal will be awarded on Monday, March 23rd. This gold medal is a special prize provided for in perpetuity by the late Mrs. Gertrude M. Hubbard of Washington, and the provisions are that it is to be given once in five years to the raiser or originator of the best rose introduced in the five years previous to the award, the rose to be of American origin, and this will be the first occasion on which it is awarded. A special prize was offered by Treasurer Harry O. May, for the best 25 blooms of any undisseminated variety of roses, $25.00. The Waban Rose Conservatories offer a prize of $25.00 for the best 50 Russell Roses, and a special prize is also offered by the executive committee of the American Rose Society, the particular object to be determined later.

The annual business meeting of the society will be held on Monday evening, March 23rd, subject to adjournment. Last year the attractions at the Grand Central Palace were so great that it was difficult to get anything to counterbalance and it was deemed advisable to omit everything in the way of papers. The society will have a special booth where any business of the American Rose Society may be transacted; this will be an improvement over conditions existing in that respect last year.

Entries for all the rose classes should be forwarded to reach the secretary at Beacon, Dutchess Co., N. Y., not later than March 10, 1914. Robert Simpson of Clifton, N. J., has accepted the position of manager for the Rose Exhibition. Treasurer Harry O. May, will be assistant to the secretary during the exhibition week.

President Wallace R. Pierson is sparing no time or expense personally to interest everyone, large or small, who grows roses, to become a part of the exhibition and force of the American Rose Society. S. S. Pennock of Philadelphia, is in charge of the executive committee's prize.

Benjamin Hammond, Sec.

ILLINOIS AND INDIANA STATE FLORISTS.

For the Danville meeting, March 10-11, the transportation committee of the Chicago Florists' Club has arranged to leave on the Chicago & Eastern Illinois, Dearborn station, Dearborn and Polk streets, at 11:10 A. M. (Dixie Limited) March 10, due Danville 2:25 P. M. An earlier train leaves at 7:43 A. M., due Danville at noon, and a later train leaves 12:30 P. M., due Danville 3:45 P. M. The 11:10 A. M. and 12:30 P. M. trains carry dining cars with meals a la carte. The fare one way is $2.46.

J. B. Deamud,
Chairman Transportation Com.

GARDENERS' AND FLORISTS' CLUB OF BOSTON

There was a very good attendance at the February meeting of this club last Tuesday evening, but a disappointment awaited them in the announcement that Mr. Tuthill who had been scheduled to talk on "Advertising, the Gasolene of Business," would not be able to appear. Between the summer convention preparations, discussion of the exhibits and the relationship of the club to the National Society, the members found plenty to talk about until almost eleven o'clock. Vice-president Welch of the S. A. F. and ex-president J. K. M. L. Farquhar gave details of what is being done in the way of early preparations for the entertainment of the S. A. F. visitors, next August and for the proposed outdoor garden exhibition, which is planned as a feature of that occasion. In accordance with procedure as outlined by the executive committee President Kennedy appointed W. N. Craig, Wm. Sim, Duncan Finlayson, Peter Fisher, Geo. M. Anderson, Wm. Downs, H. H. Bartsch, and J. Duguid as his colleagues on the Club's representation on the general committee of fifty.

On the exhibition table were the following exhibits: Hadley rose from A. N. Pierson, acknowledged by all to be one of the loveliest forcing roses ever introduced; Ed. Winkler, carnation Morning Glow and yellow marguerites; S. J. Goddard, four standard varieties of carnations; Peter Fisher, carnations Gorgeous and No. 44, the latter a very handsome mottled flower, somewhat on the order of Prosperity, but color much deeper than that variety; E. H. Borowski, some superb cyclamen plants; W. R. Thornhill, gardener for Mrs. Augustus Hemenway, Euphorbia Jacquinæflora, and Leptosyne maritima; Thos Roland, winter-flowering Spencer sweet peas; Wm. Sim, sweet peas; Patten & Co., carnation Princess Dagmar. A report of merit was awarded to Hadley rose and a cultural report of merit to Mr. Borowski's cyclamen. Vote of thanks for all the other exhibits. Carnations Matchless from Cottage Gardens Co., Philadelphia Pink from S. S. Skidelsky & Co., and Champion from F. Dorner & Sons Co., which were expected did not arrive, the delay being, no doubt, due to the rough weather.

In the discussion of the exhibits quite a debate was had on the methods of getting yellow marguerites to bloom in mid-winter. Many cultural points were brought out by the different speakers, but that this subject is a refractory one under forcing conditions was evidently the conviction of all. That it has a demand during the winter season far beyond the available product was agreed. The successful carrying of the plants through the summer seems to be one of the chief difficulties in the way.

Quite a lively discussion on the suggested plans for co-operation with the S. A. F. In a broad way the sentiment prevailing among the members seemed to be very friendly and a motion offered by F. E. Palmer expressing sympathy with the work of the National Society and a desire to know what its wishes are in this matter was passed unanimously.

ST. LOUIS FLORIST CLUB.

The monthly meeting of the St. Louis Florist Club took place on Thursday, Feb. 12th, with 35 members in attendance. The Publicity Committee responded through its chairman R. J. Windler, who after reading the workings of his committee since its appointment, requested that the committee be discharged owing to the little interest displayed by the local florists in this work. After a general discussion it was voted that the committee be discharged with a vote of thanks. The trustees made a report as to their plans on the anniversary banquet. It was voted to hold said banquet in June. The fall flower show came up next and the matter was finally laid over for the March meeting. R. J. Windler, State vice-president of the S. A. F. read a letter from President Wirth as to the club's affiliation with the National Society. This after a discussion was highly recommended.

John Steidel showed a fine vase of a pleasing pink seedling carnation and promised to show a vase later on to be judged. Mr. Jaenicke was down for a lecture on City Gardens but the late hour caused it to be laid over until the March meeting.

According to Treas. Smith's report the club is well off financially. His report made a great hit with the members.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The regular monthly meeting of the P. H. S. was held on the 17th inst. Very little outside of routine matters took place; and nothing worth reporting except, perhaps, the following new prize for the spring show, offered by Lord & Burnham Co.: Best display of flowering plants, not less than four or more than ten plants; no restriction as to size of pots; prize, twenty-year guaranteed gold watch. There were a number of keen exhibitors present at the meeting and it was significant of their feelings when their right hand went unconsciously to their left hand pocket. One of them took his watch out and looked at it. It did seem a little worn and shabby—so of course he immediately made up his mind that the prize was his and of a consequence must belong to him by hook or by crook. Lord & Burnham Co. has made a timely and welcome offering and whoever wins it will deserve it.

AMEICAN CARNATION SOCIETY.

In reference to the medal awarded at Cleveland, Ohio, to Peter Fisher for having originated the variety Beacon, Secretary Baur of the American Carnation Society writes as follows:

"The conditions under which the medal is awarded are as follows:—

"Whenever a seedling variety shall manifest superiority, commercially, and maintain such superiority for three or more years, the directors may recommend that the originator be given a special gold medal, to be called the 'Medal of Merit.'

"This medal is considered the very highest honor that could be paid an originator and is supposed to be awarded only in very exceptional cases. This is the first medal awarded under this provision, although it was adopted at the 1908 convention in Washington, D. C."

CLUB AND SOCIETY NOTES.

The eighth annual dinner of the Nassau County Horticultural Society, was held at the Oriental Hotel, Glen Cove, ½. Y., on Thursday evening, February 19. Particulars in next issue.

J. B. Norton, physiologist of the United States Department of Agriculture at Washington, delivered the lecture before the Massachusetts Horticultural Society Saturday afternoon, February 14. His subject was "Making a New Kind of Asparagus."

Problems of soil fertility in greenhouses and other matters of interest to florists were discussed by Acting Superintendent F. J. Sievers and C. V. Holsinger, Milwaukee County Agricultural school, before the Milwaukee Florists' club. Feb. 5.

At the last meeting of the North Shore, Mass. Horticultural Society, held Feb. 6, F. J. Elder, of the Lord & Burnham Co., gave the members a very interesting and instructive lecture on Greenhouse Construction and Heating. There was a good attendance.

The annual report of the proceedings of the Society of American Florists and Ornamental Horticulturists, for the year 1913 has been received from secretary John Young. It is a volume of 316 pages very comprehensive in its contents and bearing unmistakable evidence that this organization, now in its thirtieth year is rapidly growing in membership, strength and usefulness.

The New London Horticultural Society held its monthly meeting on the 12th inst. A fine exhibit of carnations was the chief feature. Among those shown were Princess Dagmar from Patten & Co., Tewksbury, Mass., and Benora from Edward Smith, New London; other varieties were shown by different gardeners from the Pequot

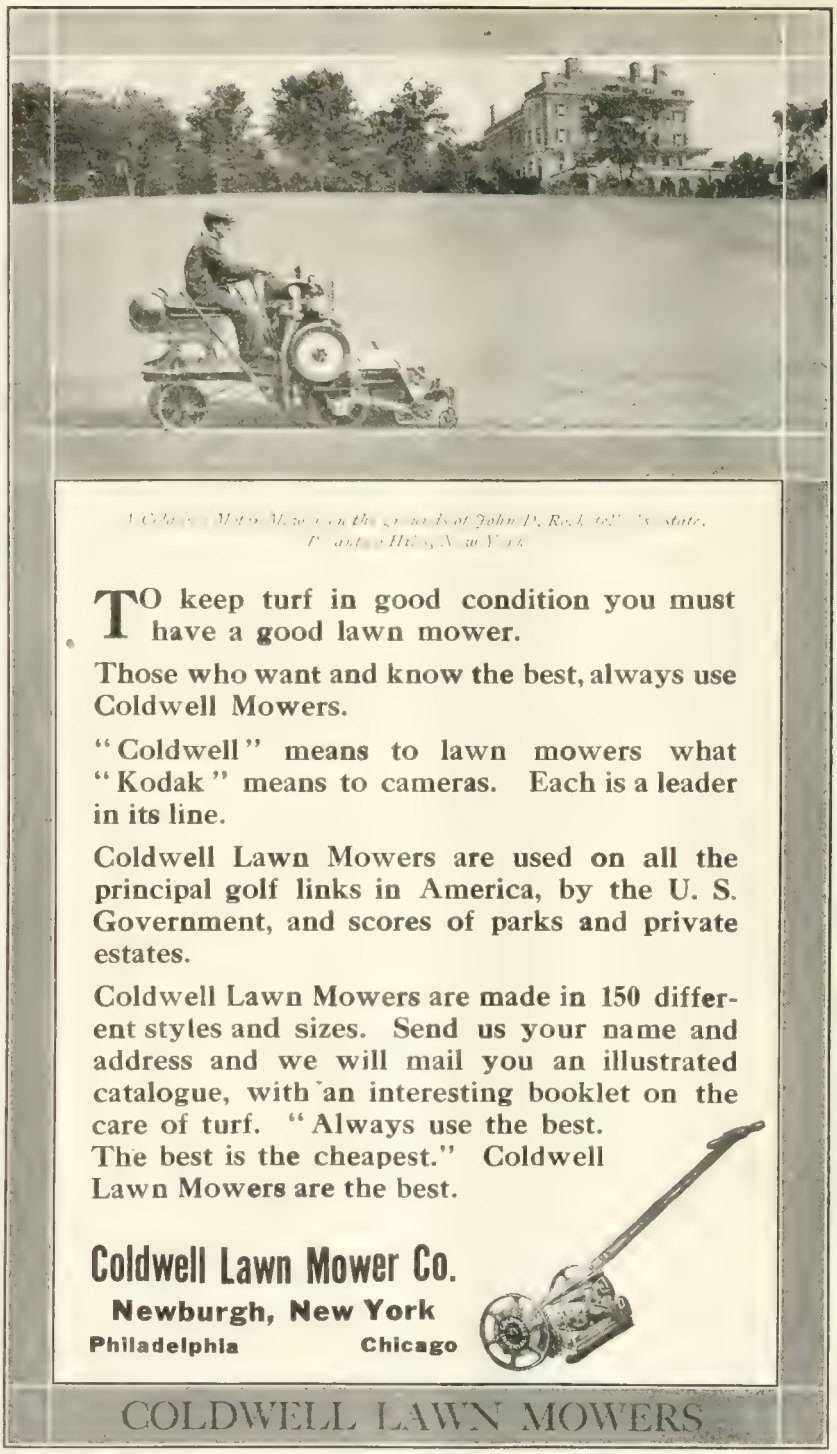
NATIONAL ASSOCIATION OF GARDENERS

section, also a collection of vegetables. The next meeting is March 12th which will be "Question Night."



A meeting of the Monmouth County Horticultural Society, was held Jan. 15, at Red Bank, N. J. There was a good attendance, election of officers resulted as follows: William Metzdorf, president; Philip Bonner, vice-president; Harry A. Kettel, recording secretary; Percy Hicks, financial secretary; Philip Bonner, corresponding secretary; George H. Hale, treasurer; Philip Bonner, William Dowlen and John A. Kennedy, executive committee. The annual exhibition will be held Wednesday and Thursday, Oct. 28 and 29. The annual dinner was held Wednesday evening, Feb. 18, 1914, limited to members and their lady friends only.

The Holyoke and Northampton (Mass.) Florists' and Gardeners' Club met Feb. 12 at Gallivan Bros.' greenhouses in Smith's Ferry. It was voted to hold the second annual flower show in Northampton in the fall. The annual banquet will be held in Boyden's Inn, Northampton, March 1. The committee in charge of the preliminary arrangements for the show is as follows: James Whiting, Amherst, R. S. Carey, South Hadley Falls, George H. Sinclair and George Strugnell of this city, and Frank Barnard of Northampton. The committee in charge of the banquet is composed of R. S. Carey of South Hadley Falls, Ned Hennessey of Northampton and James Whiting of Amherst. The club awarded Charles E. Mackintosh of "Bonnie Brae," a certificate of merit for a fine display of cyclamens.

The seventh annual meeting and dinner of the American Society of Landscape Architects at Hotel Victoria, New York City, was attended by thirty. Warren H. Manning, president was toastmaster and chairman. Harold A. Caparn of New York, just returned from Washington, where he attended the hearing on the proposition of Federal control of Niagara Falls, which the society strongly advocates, spoke on that topic. Harris A. Reynolds, secretary of the Massachusetts Forestry Association, in his address on "State Forests for Massachusetts," urged State prohibition of the ruthless and harmful stripping of its forests. Forests, he pointed out, were so closely allied with other natural resources that the present wasteful method of clearing them was costing millions. An attempt should be made, he said, to preserve them; or, lacking this, to compel owners to cultivate the soil after their removal.

The meeting of the Connecticut Horticultural Society on February 13th was given up to the consideration of cyclamen, and Mr. George W. Fraser, of the Connecticut Agricultural College, who was the principal speaker showed one cyclamen plant and a vase of carnations, which he named "A. G. Gulley" and blooms of a rose crossed between Belle Seibrecht and Kaiserin Augusta Victoria. He gave a complete history of the cyclamen. He stated in part that the cyclamen originated in Italy, and in the year 1731 they were introduced into England, but were not favorably received. and their value as flowering plants was not discovered until about fifty years ago. The temperature for cyclamen should be kept at about 60 degrees. The meeting was well attended, and the members extended to Mr. Fraser a hearty vote of thanks.

ALFRED DIXON, Sec.
Weathersfield, Conn.

Feb. 13, 1914.

Dear Sir:

Enclosed find a postal money order for $1 for one year's subscription for your valuable paper. "Rose Growing Under Glass," as practical information, is alone worth that money.

Yours very truly,

Mass. M. B.

NEWS NOTES.

Springdale, Conn.—Lilian Lund has leased her greenhouses in Glenbrook to Hugh P. Campbell, who expects to start in the florist business. The houses were formerly used by florist LePage.

Chicago, Ill.—George Willens, formerly in the employ of John C. Moninger Company has opened an office at 1527 Spaulding avenue, under the name of the Willens Construction Company, and is prepared to erect greenhouses on contract.

DON'T MISS

The Annual Banquet of the Gardeners' and Florists' Club of Boston, Horticultural Hall, Tuesday Evening, February 24 at six P. M.

GREENHOUSE CONSTRUCTION AND HEATING.

The Beginnings.

(A paper read before the North Shore (Mass.) Horticultural Society by F. J. Elder.)

It is impossible to do more than touch briefly on the various features of construction and heating in a short essay. A history of the subject would trace the various methods of construction, the methods of heating and ventilating, the reasons for these and the relationships of the different factors and methods to each other. Such a history could not overlook the old-fashioned pits with their roofs of flat pitch and benches up near to the glass and the roofs constructed of heavy sash with small lights. The poor plants struggling up to the light in these dark houses were accused of having an affinity for the glass. It was thought that the glass "drew" the plants, and it was also thought that it was necessary to have the plants near the glass. Now we know that the further the sash bars and other roof members are from the plants, the more broken up are the shadows and the light is much better.

Lean-to Houses.

Later came the lean-to greenhouses, which are still in vogue. These houses, facing south and placed against masonry walls, were economical from the heating standpoint, as the rear walls absorbed the heat of the sun. In the pits and lean-tos of former days, the heating was first accomplished by means of stoves or bricked-in furnaces. The furnaces were connected to the chimney, which was at the opposite end of the house, by means of horizontal flues which were built of brick or pipe, and were placed under the benches. Such methods were primitive, not always cheap in first cost, and decidedly wasteful. Sometimes these flues leaked and then the contents of the houses were killed by gas. The ventilation of these old-time small greenhouses was generally obtained by lifting the sash, of which the roofs were constructed, by means of a pulley, and held open by notched sticks; or by sliding the sash up and down by means of ropes and pulleys.

I do not mean to recite the history or describe the evolution of the modern greenhouse. I wish merely to tell briefly of the methods of construction of the best modern private and commercial greenhouses, and of the methods of heating, ventilating and benching these houses.

Advent of the Iron Frame.

The first iron-frame greenhouses were erected for Mr. Jay Gould at Irvington on the Hudson, N. Y. In this range, erected nearly thirty-five years ago, and still one of the notable private plants, the houses were constructed with cast-iron sills, iron rafters and purlins capped with wood. The range was designed and erected by Mr. F. A. Lord, and the principle of the construction of these greenhouses is still used in all iron and steel frame houses. Many details are different, of course, but the principal feature is the same—that of having the iron and steel frame work inside, and the wood members which received the glass on the outside. This construc-

Improved Golden Chadwick

(*Pollworth*)

The Chadwick family of Chrysanthemums are the highest type of the commercial varieties, and any sport of Chadwick that is an improvement will be welcomed. This new variety has its origin in the West. We have taken part of the stock and will distribute the variety the coming season. It is described as identical with the parent in all respects except form and color of the bloom. It is a perfectly formed flower and a deeper golden yellow in color.

It is a variety that will be found all that the name implies. It means better late mums, and you need it.

JOHN COOK 318 N. CHARLES STREET BALTIMORE, MD.

tion has proven most durable, and the best suited to our variable climate.

The Greenhouse a Factory.

The modern greenhouse has been developed through constant effort to obtain durability and light. These may be considered the two most important requirements. The day of the very cheap greenhouse has passed because both the owner of private greenhouses, and the florist, realize today that the first cost is not so important as the final cost. When we build private greenhouses for pleasure and enjoyment, what pleasure will we derive from the houses if their ridges sink, their roofs and sides become warped, and the glass slides out of place? From the florists' point of view, is not the greenhouse but a factory, and is it not as reasonable to build well a flower factory as it is a factory for the production of any other article of commerce? Build well, and your maintenance cost is low. Depreciation percentage is low. Equip your factory or green house with proper facilities, and the producing cost will be low.

We must have light if we have nothing else. In general, plants grown in the dark are not hardy. Light is required to develop firm resistant tissue, and we are given as an instance potatoes sprouted in a cellar. The sprouts will wilt when exposed to normal conditions of light and heat. Because of our better understanding now of the absolute necessity for light, the greenhouse with small panes is a thing of the past too.

I stated that I would not attempt to give the history of construction and methods. I will only deal with the best modern iron-frame greenhouses. These must be divided into two classes, — private and commercial greenhouses.

The Modern Private Greenhouse.

The modern private iron frame greenhouse is erected on walls of masonry, stone, brick, or concrete. Heavy cast-iron sills are set in mortar on top of the walls, and in large buildings are anchored by heavy bolts which are built into the walls. Rafters are made of one-half inch flat iron of from three inches to five inches in width. These rafters are bolted to the sills, and are either bent, welded or spliced at the eaves line to give shape to the roof. The rafters are brought together at the ridge and secured by means of ridge plates. Rafters are set on the sills eight feet four inches apart, center to center, and the space between two adjacent rafters is called a section, so there are three sections to 25 feet, and 12 sections to 100 feet. In other words, these houses are built in multiples of eight feet four inches. The rafters are held parallel to each other by angle iron purlins, which are placed lengthwise of the house, and are double lugged and bolted to the rafters.

Three Ways.

At the eaves the house may be built in any one of three ways. First, is the galvanized angle-iron eaves plates, which are much stronger and much more durable than the cumbersome old-time wooden plates, and which cast very little shade. Also one of the flanges of the angle eaves plate is inside of the house and subject to the heated interior. Hence, icicles do not grow very well on these plates, and the plate has been called the "ice-clearing eaves plate." The angle-iron plate is fitted with metal clasps which receive the ends of the sash bars. This plate when made with metal clasps as described, is protected by letters patent. Angle-iron eaves plates are more adaptable to commercial houses than for houses on private estates.

The second method of arrangement at the eaves is the sectional cast-iron gutter, which is bolted to the rafters. One side of the gutter (the inside), is provided with a flange, to which clasps are bolted to receive the sash bars. The inner side of the gutter is exposed to the inside temperature of the greenhouse, so that icicles and snow will not usually last very long in such gutters as they will in the old-time non-conductiong wooden gutters.

The third arrangement or detail is the curved eave. In this case a combined sill and gutter is used to cap the

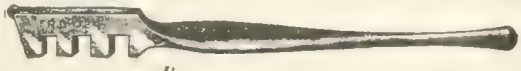
FARQUHAR'S FLOWER SEEDS

FOR THE FLORIST

Write for our Wholesale Catalogue

R. & J. FARQUHAR & CO., BOSTON MASS.

masonry wall. The rafters are bent at the eaves to an easy and graceful curve. Curved glass is used at the eaves, giving a very pleasing effect and a house of the maximum light, because there is neither eaves plate nor gutter at the eaves to obstruct light. The majority of private greenhouses are now being built with curved eaves.



Concrete Walls.

Occasionally a private house is built without foundation walls. These houses are built then with foot pieces for the purpose of saving masonry sub-walls or foundations. This method is used now exclusively in the best commercial iron-frame houses.

I stated that the rafters are placed eight feet four inches apart, and the foot pieces of these rafters are extended into the ground about two feet six inches. Holes are first dug to hard pan, or the bottom is thoroughly tamped. Concrete footings are made for the foot pieces to rest on. The foot pieces are then firmly set in concrete piers. Concrete panel or curtain walls four inches to nine inches thick are built between the flat iron posts or rafter feet. These walls need not be more than four inches thick. They only extend three inches to six inches below grade and the ends rest on the concrete piers. The outside faces are finished in various ways;

FOR FULL DESCRIPTIONS SEE OUR CATALOGUE—MAILED FREE.

We are the largest handlers of Cannas in the world. Our prices on Cannas will bear comparison with any house in the Canna business.

Our Cannas are true to name—two and three and sometimes four eyes—are sound, dormant, and are packed 250 in a box. Two can be "cleated" together and shipped as one. One box of 250 sold at thousand rate; it is cheaper for you to buy a box of 250 than 200 at 100 rate. Write for special prices on quantities.

If any Cannas are not found here, it may be understood that they are superseded by the foregoing. If selection is left to us we will substitute or send only the best for all purposes.

ARTHUR T. BODDINGTON

SEEDSMAN 342 West 14th Street, NEW YORK CITY

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

Weeding Out the Offenders.

New Brunswick, N. J.—J. P. Helyar, seed analyst of the New Jersey State Department Station, has started a campaign to rid the State of seed salesmen who are defrauding farmers by selling inferior seed under false pretenses. He has caused the arrest of O. P. Rice, a seed salesman, who has operated in various parts of the State.

The man was arrested at Lambertville on a warrant issued by Justice of the Peace Charles A. Sedan, of this city, on complaint of Harvey Dey, a farmer of Plainsboro. The charge is that Rice sold two bushels of seed, guaranteed to be red clover, to Mr. Dey, and that analysis of the seed at the experiment station showed it to be composed of 56.03 per cent. German millet, and 42 per cent. clover, the rest being weed. The mixture cost Rice $4.29 a bushel, Mr. Helyar says, and he sold it for $9.

The seed analysis says that Rice represented that he was connected with the Rice Seed Company, of Cambridge, N. Y., a reputable concern with which he has no connection. He also offered the farmer seed he called Australian clover at 30 cents a pound which Mr. Helyar says is really crimson clover, worth ten cents a pound.

Trenton Evening Times.

NEWS NOTES.

Akron, O.—J. J. Waaland has purchased the Imperial Greenhouses, 557 South Bowery street.

Providence, R. I.—Eric A. Bonevier has purchased the greenhouse range of Mrs. Fanny Butcher.

Claremont, Cal.—The Claremont Nurseries have increased their capital stock from $40,000 to $75,000.

Berlin, Wis.—J. Howard Smith has purchased the nursery of George Jorgenson & Son, known as the Lake View Nurseries.

Cleveland, O.—Mrs. Mary Connors has bought out Miss Julia Ehrhar's interest in the Ohio Floral Company, 1698 West 25th street.

Baltimore, Md.—John Harman has bought the greenhouses on the Alexander Brown estate, and will shortly erect some Hitchings houses, 20x100.

Memphis, Tenn.—The Aberdeen Floral Company, of Aberdeen, Miss., has leased the plant of the Hernando Floral Co. and will supply the Memphis market with potted plants and cut flowers.

Minneapolis, Minn.—Gerald Reed Martin and Jessaline Northrup, daughter of Jesse E. Northrup, were married on February 7th.

WALTER MOTT'S NOTES BY THE WAY.

Beverly.

Noting the excellent stock grown by A. A. Pembroke, one of the brightest things seen was a bed of Calendula Orange King, which I understand has sold in the market for $1.50 per dozen blooms. As soon as 'tis past, its place will be filled with tomatoes. Here one sees Carnation Gloriosa with stems actually measuring 5 feet; not many 'tis true, but it conveys an idea of the splendid vigor and freedom of this variety which vies with Pink Delight as the most profitable in its class. The Godfrey calla is superior to the parent but is not considered very profitable unless grown in an old house unfit for much else and there are but few of this kind now. Growers realize the importance of being up to the minute in these days of competition when the best is none too good.

NEW CORPORATIONS.

Dover, Pa.—Oliver Floral Company, Inc., capital, $125,000; W. I. N. Lofland, Dover.

Omaha, Neb.—Morgan-Shawler Company, florists, capital stock $10,000. Incorporators, James W. Shawler and Howard R. Morgan.

Hugo, Okla.—Elberta Fruit & Nursery Company, capital stock, $10,000. Directors, J. M. McConnell, W. P. Stewart and H. A. McDonald.

Providence, R. I.—Everett Forestry Company, capital stock, $50,000. Incorporators, Charles J. Everett, Hugh F. Cameron and Arthur A. Thomas.

Of Interest to Retail Florists

ST. VALENTINE'S DAY IN CHICAGO STORES.

St. Valentine's Day proved worthy of recognition as a "special" for all in the florists' business and well repaid those who had made an extra effort this year to have the day stand for flowers in general and not for violets only. Special window displays were made by the retailers showing the flowers in attractive arrangements in the new Valentine boxes and baskets and the public showed a practical appreciation. The past custom of limiting purchases to violets seems to have given way and both wholesalers and retailers recognize the advantages of a broader range.

At Wm. J. Smyth's the demand for corsage bouquets led, preferably of violets, lily of the valley and orchids, with a very satisfactory quantity of the last. Spring flowers were in demand and were preferred growing in pans or boxes rather than as cut flowers. At the Fleischman Floral Co.'s store, Manager Wienhoeber reports St. Valentine's Day to far surpass the sales of previous years, fifty thousand violets and one thousand orchids having been sold besides hampers of all kinds. At A. Lange's, violets led in sales on St. Valentine's Day and blooming plants of azaleas, primroses, hyacinths and pans of tulips, jonquils, etc., came second. Mr. McAllister states that the store used one hundred thousand doubles and half that amount of single violets. Boxes of cut flowers also were a special feature of the day.

WASHINGTON NOTES.

Customs collectors and other officials connected with that service have been instructed to notify the Department of Agriculture or its local representatives when nursery stock imported from abroad is unclaimed in order that proper examination and inspection thereof may be made. If the proper officer of the Department of Agriculture shall certify that such unclaimed nursery stock was imported in full compliance with the Plant Quarantine Act and the regulations thereunder, it may be sold at public auction like other unclaimed merchandise. If certified to be imported in violation of this act and regulations, it may be destroyed under customs supervision.

A dozen or more bills have been introduced into the House of Representatives by the members of that body looking to an amendment of the present postal laws to allow of the admission of seeds, cuttings, bulbs, roots, scions and plants in the mails under the parcel post laws and regulations. That one of these bills will be adopted is expected but those interested in the matter should not "take a chance," but should get busy and write to their representatives in Congress. These petitions will, no doubt, be presented by their recipients to the Senate and House as a whole, and the missives will then be turned over to the proper committee for consideration. The various bills are being referred to the Committee on Post Office and Post Roads.

The snowstorm which visited Washington on Friday, the thirteenth, was the first real storm in several years, and was an exact duplicate of the one which hit the city fifteen years ago to a day. Some little damage has been reported from the nearby houses where quantities of glass were broken by snow slides. However, none of these are serious enough to at all effect business. Excellent reports are being received regarding the Easter crop. Lilies are coming along fine and the possibility is of an over-supply. Although many of the growers had the misfortune during the recent warm spell of having their azaleas come in bloom prematurely, regardless of the efforts made to prevent this by the whitewashing of the glass, it is hardly believed that there will be a shortage at the proper time.

The House of Representatives last week passed a bill prohibiting the employment of females for more than eight hours in any one day nor more than six days per week. Under no conditions can the female employees work overtime. A number of the stores here employ women but these as yet have made no move to do other than comply strictly with the requirements of the law. Stores in other lines of trade requiring the attendance of females for more than eight hours per day are contemplating the cutting down of wages where more girls must be employed to do a given amount of work, in proportion to the time thus lost, while others figure on cutting out female help wherever possible—and the girls did not want the bill passed. The bill was passed last year by the Senate so that it merely requires the signature of the president to become a law.

PHILADELPHIA NOTES.

The Carribean and the Sunny South has vouchsafed us the safe return of our much esteemed and well beloved J. Otto Thilow; brown as a berry and almost fat.

Fred Michell, Jr., is back from a three weeks' trip through Pennsylvania well heeled with orders and is now like Alexander the Great, contemplating new worlds to conquer.

Komada Bros. report brisk business in florists' supplies this season. Their new show room at 1008 Vine street has proved a great attraction and a fine convenience for "hurry up" customers.

As the new improvements at the Dreer addition at 716 Chestnut street approach completion the casual visitor gets a better conception of the added facilities, and the comprehensive plans for future developments. Four new floors and basement are now in use, altered, renovated and strengthened, from top to bottom. Much of the main floor will be devoted to show purposes, and during summer and fall frequent flower exhibits will be held. A special department devoted solely to plants will be a permanent feature.

A meeting of the executive committee of the American Rose Society, was held in Philadelphia at the offices of the Pennock-Meehan Co., on the 17th inst. Robert Simpson, Wallace R. Pierson, Robert Pyle and Samuel S. Pennock were among those who took active part in the proceedings. Matters in the making were discussed and none of these have progressed as yet to the point where they demand chronicle or comment. At least, so your scribe was informed—and he can say nothing at all with as much nonchalance as the next one. Remanded without bail.

CHICAGO NOTES.

Preparations for St. Patrick's Day are well under way by those who would make sure of their stock. The little shamrock plants, growing in their tiny pots, are a recent innovation for this day but the business has grown by leaps and bounds. One of the department stores placed an advance order for fifty thousand a year ago and has since added to it.

Fred Lautenschlager, sales manager for Kroeschell Bros., returning from a business trip following the Cleveland convention, says he found florists at Toledo, Springfield, Dayton, Ashtabula, Indianapolis, St. Louis and all along the way optimistic on the outlook for good business the coming spring. Mr. Lautenschlager's friends know, too, that while his report has the true ring to it, no pessimist could face that smile and remain one.

Blooming plants, which have been very scarce since the holidays, are now picking up again. The variety is not large; azaleas, primroses, hyacinths, tulips and daffodils constitute the offerings. Genistas are showing a little color and will soon be ready. Some most beautiful windows showing these plants in dark green baskets tied with yellow ribbons were seen last year and made the handsomest yellow and green windows of the season. Roses of the Baby Rambler type are looking fine but will not be in for some time. Boston ferns are scarce, especially in the large sizes.

A CORDIAL INVITATION
Is extended to the trade to visit and inspect our new establishment, Fifth Avenue at 46th Street, New York City.

ST. LOUIS NOTES.

Dave Geddes of the Vaudevoort's Floral Store, left for Pittsburgh, Pa., on Friday, Feb. 13, on receipt of a telegram of the death of his father.

A. S. Carny, well known grower at Kirkwood, was badly damaged by fire early Monday, Feb. 9th. His brother florists in the neighborhood came to his rescue and repaired the damage in short order.

When Fred C. Weber, Jr., returned home on Saturday night, Feb. 14th, he found that his home on Waterman avenue had been broken into by burglars and everything of value had been carried away. He says the loss will be heavy unless the police recover the stolen property .

A Florist's Necessity **HART'S HANDY HANDLE**

Fits securely on any standard pot and by the use of a little chiffon or ribbon gives you a Basket effect at a very small additional expense, increasing the price of your plants 100 per cent.

Obituary

Jefferson Doremus.

Jeff. Doremus, a well-known rose grower of Madison, N. J., until recently when his health became impaired, died on February 7, aged 65 years.

Henry Copas.

Henry Copas, of Copas Bros., died at his home in Elyria, O., on February 2, aged 34 years. Mr. Copas was born in England, coming to this country with his parents when a child.

David Wirth.

David Wirth, of the firm of Wirth & Gaupp, Springfield, Ill., died at his home Feb. 3d. He was 48 years of age and a lifelong resident of Springfield. He is survived by his wife and two daughters.

George D. Cooley.

George D. Cooley, of Mittineague, Mass., died last week from the result of a paralytic stroke, at the age of 74. Mr. Cooley had been engaged in the florist business in Mittineague for many years and was highly respected. He leaves a widow and four children.

Mrs. H. B. Beatty.

A telegram from Richmond, Va., under date of February 17, tells us of the death of the wife of H. B. Beatty, former treasurer of the Society of American Florists. Funeral services at Oil City, Pa., on Friday afternoon, February 20. This bereavement will fall very hard on Mr. Beatty who was affectionately devoted to his wife and HORTICULTURE joins in the heartfelt sympathy which will now go out from the hundreds of S. A. F. members in the irreparable loss sustained by our friend of many years.

Helen Frances Amrhyn.

After a long illness, Miss Helen Frances Amrhyn, the nineteen-year-old daughter of Mr. and Mrs. Gustave X. Amrhyn, died on February 15 at her parents' home, Whitneyville, Conn. The deceased's father is superintendent of parks in New Haven, and her death brings intense sorrow to relatives and numerous friends. The late Miss Amrhyn is survived by her father and two sisters, the Misses Elsie and Jeanette Amrhyn. The funeral was held Wednesday morning from St. Joseph's R. C. church, New Haven.

Grand Rapids, Mich.—Edwin Fallas of Lowell has commenced suit against Eli Cross, florist, for $2,500 for his alleged failure to keep a contract for 200,000 tomato plants.

THE Florists' Supply House of America

H. BAYERSDORFER & CO.
1129 Arch St., Philadelphia, Pa.

GREENHOUSES CRUSHED BY SNOW.

Since the heavy storm of last Saturday, many reports of damage to greenhouse establishments have come in, only two of them thus far, however, being serious. These were at North Wales, Penna., where a section of the roof 75x300 feet in the big house of the Florex Gardens, 170 ft. wide and 750 ft. long, collapsed, burying many thousands of roses under snow and broken glass; and at Madbury, N. H., where about 400 running feet of the extensive house of W. H. Elliott was crushed in bringing destruction to about 600 running feet planted with carnations. We are very sorry to learn of these heavy losses to two of the leading establishments in floricultural enterprise.

NEWS NOTES.

Pittsburgh, Pa.—George Howard, an expert horticulturist was indicted by the grand jury yesterday, on a charge of extortion. He is accused of attempting to secure $5,000 from Mrs. F. M. Ferguson, of Morewood and Fifth avenues, where he was formerly employed as a gardener. Howard is said to have sent a letter to Mrs. Ferguson last Wednesday demanding money, and threatening that if she failed to give it to him he would blow up her residence. *Pittsburgh Leader.*

Boston—E. J. MacMulkin, florist, 194 Boylston street, has filed a voluntary petition in bankruptcy in the United States District Court. He states that he owes $83,937.27 and that his assets are of an uncertain amount. To unsecured creditors he owes $56,861.34 and $9,340 to secured creditors. The remainder of the liabilities consists of taxes, $302.09; wages, $482.25, and notes and bills, $16,951.59. There are about 150 unsecured creditors. Among them are the Federal Trust Company, $6588; C. H. Worster, Boston, $9184.05; George R. White, Boston, $3352; Waban Rose Conservatories, Boston, $2797. Francis J. Carney of Boston, with a claim of $5000, is the largest of the three secured creditors. Acting upon a petition of creditors, Referee Olmstead in the United States Bankruptcy Court has appointed John C. Heyer, receiver.

During Recess

The Greek Florists' Ball.

This affair, one of the greatest events in the calendar of the New York floral fraternity, was this year the biggest yet. The hall was crowded to the doors, leaving little room for moving about. The costumes of the Greek ladies were very beautiful. There was a splendid vaudeville show, with some of the Greek talent as well as the professional performers. Master William George Polykranas made a big hit with his violin playing. Most of the prominent florists of the city, wholesalers and growers attended and all are enthusiastic over the courteous treatment extended by the officers and committees. The decorations under the careful direction of George Nicholas, George Polykranas and Peter Velotas were the best seen in the hall in its history.

Bar Harbor Horticultural Society.

The Bar Harbor Horticultural society held its annual ball on the night of Feb. 11, and a very successful occasion it was. The mercury was 15 to 20 below zero, and this prevented the moving of plants and shrubs and palms for decorative purpose. Usually the winter decorations of this ball have been surpassingly beautiful and elaborate.

NEW YORK FLOWER SHOW.

Flower show matters are apparently progressing in great shape. The intervening weeks will be a time of great activity in all departments of this big enterprise. J. H. Pepper has been appointed chairman of the publicity committee. Trade tickets will be sold in blocks of 25 to 100 at the rate of 25c. each; in blocks of 100 or more at $20 per hundred. There will be no rebate for unsold tickets and the tickets must be paid for when delivered to the purchaser.

Flower Market Reports

BOSTON We have to report a rather weak market this week, due as much as anything to the stormy weather and the embargo on the shipping trade thus occasioned. The condition of the railroads and express service is very irregular and unreliable. As to the various standard stocks, we note that in a general way, roses have weakened considerably since last week, but American Beauty continues scarce; carnations have braced up and bring better prices than last week. Cattleyas continue to hang fire and move very slowly. Violets are low and neither they nor any other flower got much encouragement out of Valentine's Day, which was very stormy and left the retail stores deserted. All bulbous material is very abundant, the only exception being lily of the valley, which is only in fair supply for daily needs and single trumpet narcissi which are coming in reduced quantities as compared with the past few weeks. Quality of tulips is rapidly improving. Sweet peas of the Spencer type sell better than any other of the small flower specialties. The old type of peas has a hard struggle for recognition and must soon give up the game.

BUFFALO Zero weather, lots of snow and everything to make up a good winter and these days the growers are reducing the contents of the coal bin. The sun is rarely seen in this section and the production of roses is light; in fact, the supply has been shorter than in the week previous. The bulbous stock is coming on heavier each day and prices are reasonable. Some choice Yellow Prince and Le Reine tulips are had, also freesias and poeticus narcissi. Lily of the valley, too, has been plentiful and carnations have accumulated somewhat, though the select stock has easily found an outlet. Lilies are more abundant and there are plenty of yellow narcissi, campernelles, daisies, violets and other stock. Nothing at a scarcity except American Beauties and other roses. Saturday brought on a little extra business in the violet line, though on Friday all shipments from Rhinebeck were frozen. The wholesaler is having his troubles in trains being late and the arrival of frozen stock. It is hoped the weather will moderate at an early day.

CHICAGO The principal feature of the past week is the splendid St. Valentine's Day trade, which exceeded any previous records. Orders were not generally placed far in advance so there was the added strain of uncertainty and Friday and Saturday were very busy days. Hudson River violets were shipped into this market in immense quantities, probably a million would not be an overestimate, many of them more or less unsaleable from frost and from being too old when picked. Prices ranged from 30c. up, according to quality and size of order. Add to these the hundreds of thousands of home-grown singles and it would seem there was little room for other stock. Such was not the case, however, and carnations, spring flowers, lily of the valley, orchids and Beauties all sold in quantities, while rose sales were only limited by the scarcity of stock. American Beauties have had a way all winter of being either long or short and the customer for medium lengths has to buy the long ones or do without.

NEW YORK All things considered, stormy weather and so on, the cut flower market continues remarkably good. We are more than pleased to report this as it has been too often the reverse since this erratic season came in. Roses are still on the scarce side and this fact has benefited other lines of cut flower stock to a very great extent. Bulbous material is still very abundant, but is of exceptionally good quality, and selling well with the exception of trumpet narcissi, golden spurs included, which in large quantities sell very low. Narcissus poeticus brings a better figure as a rule. Lily of the valley is in plentiful supply and selling well. Carnations are inclined to stiffen up; so are cattleyas which a few days ago were very druggy, but now are bringing normal values. There is a very large supply of Acacia pubescens—in fact, a little too much for the demand at the price demanded for it. Gardenias are selling well and greens, such as asparagus and adiantum are also in good call. The situation is really quite cheerful from the standpoint of the wholesale dealer.

PHILADELPHIA St. Valentine's week turned out all right with the exception of Friday and Saturday, which were cold and stormy and hurt sales a good deal especially on violets. The rose market was in good healthy condition. Some very [illegible] stock

(Continued on p. 2[illegible])

ACACIA

With its beautiful long sprays of soft yellow flowers and delicate green foliage, artistic and beautiful, attracting the buyer looking for something unusual.

Flower Market Reports

(Continued from page 277)

Radiance, Killarney Queen and Double White Killarney, were available and crops generally were large and better. There was a slight increase in arrivals of American Beauty, but nothing enough to make any marked effect. The carnation market also in excellent shape. Demand keeps up with supply very satisfactorily and the quality is very high. Orchids are holding their new pace very well and there are none now to be had at sacrifice prices. Sweet peas plentiful and good. Daffodils have dropped a notch in price and at present are very reasonable indeed for greehouse grown stock. There are not so many Roman hyacinths around but tulips, freesias and other bulbous items are very much in evidence.

ST. LOUIS The business done the last week, which included St. Valentine's day was quite large. The demand was large and especially on first grade stock for which the wholesalers had no trouble in cleaning up every day. Roses are not too many yet and there is some trouble in filling orders. Carnations are plentiful. All the leading varieties have advanced a little in price. Violets had one great demand all during last week and the supply was short by several thousand. Sweet peas also came in for an extra demand, as well as bulb stock. In this the market had a good supply. There was a good demand for fancy tulips, lily of the valley and lilies.

WASHINGTON The St. Valentine Day's business this year was exceptionally good and very welcome in view of the slow business which has prevailed for several weeks. Considerable difficulty was experienced, however, in making deliveries because of the heavy snow storm. A marked change in the temperature was instrumental in shortening up the supply of stock of all varieties, especially red flowers, with the result that prices in many instances soared to lofty heights. Roses that had previously sold at $4 per hundred reached as high as $10. American Beauty roses were practically off the market and those to be had were poor in quality. Red carnations sold out quickly bringing $6, while the other colors moved very well at $4 and $4.50. Gardenias were good in quantity but not overplentiful and orchids were about the reverse, scarce and quality poor. The bulk of the business was done in violets and sweet peas which cleaned up well. Monday found the market a bit draggy as far as sales were concerned although there was no overstock of flowers except of the bulbous type.

NEW YORK QUOTATIONS PER 100. To Dealers Only

PERSONAL.

L. J. Kervan, Sr., of New York, left last week for his annual visit to Florida, where he will remain until May.

Thomas Sakelos, proprietor of "The Olympia Florist" in the Bronx district of New York, a prosperous Greek florist, is boomed as a wrestler of unusual ability. The wrestling instructor at the O. A. C. declares him to be practically invincible.

Robert A. Mitchell, Manchester, Mass., has accepted a position as instructor at the Essex County, Mass., Agricultural School. This being a vocational school it is their practice to select practical men as teachers in preference to college men.

Harry F. Smith, formerly on the Ames estate, North Easton, Mass., under W. N. Craig, and for the past two years foreman on the estate of Mr. Percival Roberts at Narberth, Pa., succeeds Sabin Bolton as superintendent of that place. Mr. Bolton, who has filled that position for the past three years now goes as superintendent on the Heinze estate at Pittsburgh, Pa.

Police of Waltham, Mass., are trying to find the home and relatives of George Pulsifer, aged 50, a traveling salesman for a New York nursery concern, who was stricken with heart failure and died while running to catch a street car, February 14. For some days Pulsifer had been staying with Nathaniel Stearns on Trapelo road. He left the house at 8 o'clock to take a Lexington and Boston car. Seeing the car approaching the stop, he started to run. Before he had gone 50 feet he fell and was dead when bystanders reached him. Beyond the fact that he came from Maine no one knows anything of his history.

COCOANUT FIBRE SOIL

20th Century Plant Food Co., Beverly, Mass.
For page see List of Advertisers.

CYCLAMENS

200,000 GIANT FLOWERING CYCLAMEN. For the last 16 years we have selected three-fourths of our seed-bearing cyclamen stock before Xmas, to assure early blooming plants, and claim the finest commercial strain in this country; no fizzle of many so-called English varieties. Our aim is strong growers that don't have to be petted to be grown into a choice salable plant—a well built, five-petaled flower (many of them at one time), with well marked foliage; every plant an ideal, a prize winner. Received first prize at the Cleveland show and first and second at Toledo, early November, when blooming cyclamen were scarce.

STRONG AUGUST SOWN SEEDLINGS, once transplanted, $3.50 per 100; $30.00 per 1000. Cash with order. Cultural directions with all orders. C. WINTERICH, Cyclamen Specialist, Defiance, O.

Thomas Roland, Nahant, Mass.
For page see List of Advertisers.

DAHLIAS

Dahlias at greatly reduced prices for 1914. Send for wholesale list. Order early. J. L. MOORE, Northboro, Mass.

Dahlias. 800,000 Clumps to offer. Send your list of wants to the Largest Dahlia Grower in the World. J. K. ALEXANDER, "The Dahlia King," East Bridgewater, Mass.

Dahlias—2500 field clumps, latest varieties, cheap for cash; or what have you to exchange? GEO. H. WALKER, Dahlia Expert, North Dighton, Mass.

NEW PAEONY DAHLIA
John Wanamaker, Newest Handsomest, Best. New color, new form and new habit of growth. Big stock of best cut-flower varieties. Send list of wants to

GREENHOUSE CONSTRUCTION AND HEATING.

(Continued from page 208)

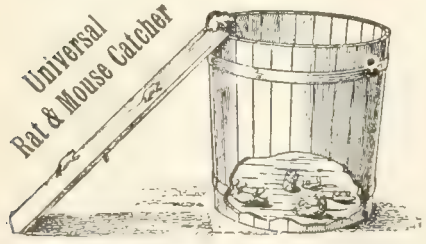
that is, they are plastered and smooth finished, or pebbled, dashed or rough cast, as desired. This wall is neat and durable when properly built. The proper mixture for such walls is about 1:3:6. This is called by cement workers an ordinary mixture, that is in the proportion of one barrel of cement, three barrels of sand, and six barrels of gravel or broken stone. The cost of such walls, not including the cost of sand and gravel, which is often obtainable at the site, and usually at very little cost near the site, is about the same as the cost of double boarding with paper between. The concrete walls, of course, do not require to be painted three coats when erected, nor extra coats every two or three years thereafter. Concrete walls will not burn nor rot as wooden walls do. The best commercial houses are built with one-half inch flat iron foot pieces, one-half inch steel rafters, galvanized angle iron eaves plates, angle iron purlins, and light cypress sash bars.

The strength of this house is in the iron members, not in the wooden bars, and they are therefore not any heavier than is necessary for a good setting for the glass. 16 inches by 24 inches, glass of "A" and "B" qualities is used, and in large houses with high roofs, "B" quality is generally satisfactory.

Advantages of Large Houses.

The superstructure of iron frame greenhouses for private use and for commercial purposes is essentially the same, and the larger houses cost less per square foot to build and provide a larger cubic contents than smaller houses. It is therefore advisable for both classes that the houses be larger, and it is just as incumbent on the superintendent or gardener to convince his employer that better results can be obtained in large houses at lower cost than in small houses, as it is for the commercial man to build large for the same reason.

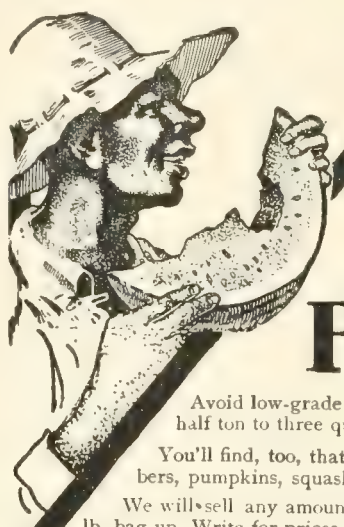
For private purposes where no gardener is employed, a 10 foot, 12 foot, or 16 foot house will afford considerable pleasure to the owner who has the time to work it, but such a house is only a toy to a gardener. No house should be built for a gardener's use that is of less width than 18 feet. 20 feet is better, and 25 feet and 30 feet still better. The increase in cost of these larger houses and in cost of maintenance is very little comparatively, or to put in another way, the cost for the increased floor and bench surface and increased producing ability, is much less than in smaller houses. Greenhouses 50, 60 and 80 feet wide are now being built daily all over this country for commercial purposes because our growers have at last learned that if they would compete with the leaders, they must build large.



Large houses are the cheapest per square foot of surface covered and per square foot of glass. They are the lightest, and enclose the greatest volume per square foot of glass, which means better air, stability of temperature, and better growing conditions generally. In addition to this, the first cost and the operating cost of the heating system is less, and the labor of working the house less than with small greenhouses.

The Heating Apparatus.

The most important part of the greenhouse equipment is no doubt the heating apparatus. The success of the greenhouse depends much on its heating. I will, however, treat the subject but briefly.



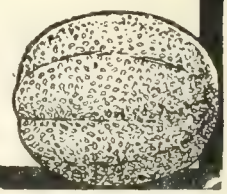
Greenhouses are warmed by radiation from hot water pipes or steam pipes. Each system has its advantages and its disadvantages. Neither system is best for all purposes, and such conditions as size of the plant and geographical location, conditions of atmosphere, etc., must be considered before a dicision is made in favor of either method. There are many types of both hot water and steam systems, but in both, the piping is constructed into coils and single lines which are hung or supported on the sides of the house under raised benches, on the sides of solid beds, or on posts or columns supporting the roof. The major portion of the radiation should be on the side walls.

(To be continued)

Cleans a building of Rats and Mice in short time, keeps it cleaned, for it is always ready for use. Made of galvanized iron, can't get out of order, lasts for years. Large number can be caught daily. Go to Catcher mornings, remove device inside, which only takes few seconds, take out dead rats and mice, replace device, it is ready for another catch. Small piece cheese is used, doing away with poisons. Catcher is 18 inches high, 10 inches diameter. When rats pass device they die, no marks left on them. Catcher is always clean. One of these Catchers set in a livery stable in Scranton, Pa., caught over 100 rats in a month. One sent prepaid to any place in United States upon receipt of $3. Catcher, 8 in. high, for mice only, prepaid $1. On account of shipping charges being prepaid, remittance is requested with order.

H. D. SWARTS,
Inventor and Manufacturer, Scranton, Pa.

To Get Profit from Melons



feed the soil what melons need for normal growth, prompt ripening, full sugar formation and rich flavor. These cannot be had without plenty of available

POTASH

Avoid low-grade mixtures. Supplement the compost with a half ton to three quarters of a ton, per acre, of 5-6-10 goods.

You'll find, too, that Potash Pays, when used as above on cucumbers, pumpkins, squashes.

We will sell any amount of Potash from one 200-lb. bag up. Write for prices and free books of formulas.

DO YOU KNOW VERMINE?

John Lewis Childs, Flowerfield, N. Y., writes:—

"I suppose you will be glad to know that **VERMINE** is giving excellent satisfaction. Our greenhouse foreman says that it is the only thing that he has ever used that will kill white ants in the benches."

Valentine Burgevin's Sons, Kingston, N. Y., writes:—

"We wish to say that we find **VERMINE** an excellent thing. We used it on a bench planted with Smilax to kill root lice or maggots, which ate the roots, and after two applications our Smilax is taking on new life and has started off to grow."

The Gardner Nursery Company, Osage, Iowa, writes:—

"We will use **VERMINE** on our out-of-door fields of strawberry plants if the inside test continues as satisfactory as it now seems."

W. N. Craig, Brookline, Mass, writes:—

"I have used **VERMINE** and found it effective against root maggots, cut worms, earth worms, ants and other ground pests."

VERMINE is applied one part to four hundred parts of water by thoroughly soaking the soil. It will protect your crops from the ravages of vermin under ground without the slightest injury to vegetation.

ASK YOUR DEALER FOR IT.

Guaranteed under the Insecticide Act of 1910, U. S. No. 46.

NICOTINE MFG. CO. . . . . ST. LOUIS, MO.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

$2.75 per 112 lbs.; $12.50 per 560 lbs.

Stumpp & Walter Co.

30-32 Barclay Street, NEW YORK

OUR SPECIALTY—Long Distance and TradeExport

Side View of Sod showing four inches of roots. Note the vigor of the grass blades.

Bottom View of Sod showing how compact and fibrous the roots grew.

ALPHANO HUMUS
Made This Sod in Eight Weeks

BUT the fact that such thick sod was grown in eight weeks is only half the story. The other half is that it was grown on regular white sea sand soil made by mixing half such sand with half Alphano Humus. It was a test case made by the management of one of the biggest Golf Clubs in the country. Various mixtures of fertilizers, wood soils, top soils and animal manures were used in an endeavor to put Alphano Humus out of the running. Alphano Humus not only grew the best grass and grew it quickest; but it continued to keep thick and green long after the others had yellowed up and grown spindley. Based on this result several carloads were ordered.

If Alphano Humus will give results like this when mixed with absolutely sterile white sand, think what it will do for that lawn of yours with its half way good soil.

Furthermore, if it is good for grass, it's equally good for all kinds of gardening uses, as well as for shrubs and trees.

Being odorless and absolutely sanitary you can put it on any part of your lawn at any time. Being in powdered form, it can easily and quickly be mixed with your garden soil or dug around your shrubs and trees.

Not only does Alphano Humus give tonic to the soil but its effects last for years. It does not leach away. It absorbs fourteen times its weight in moisture. Think what that means when the dry, hot winds of summer come. Besides being a plant food you see it also acts as an internal mulch.

Send for the Humus Book, it tells about Humus in general and Alphano Humus in particular.

5 BAGS for $5

$12 a ton—$8 by the carload. F. O. B. Alphano, N. J.

Getting On to the Curve

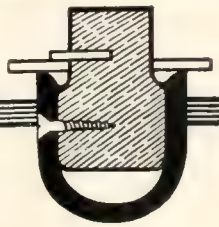
CHRISTIE MATHEWSON has written article after article on how to throw a Mathewson curve.

He has shown his friends how to do it, still no one can pitch a curve like Mathewson's curve; simply because it takes a Christie Mathewson to pitch a Mathewson curve.

Other curves look like Mathewson's—but oh what a difference when it comes to hitting them.

Other greenhouse constructions endeavor to make a curved eave house like the U-Bar. They may look like it, when you are going by on the run, but oh what a difference when you come to examine them.

No curved eave house made, can be like the U-Bar, because there's only one U-Bar curved eave construction; and that's the one constructed with U-Bars.



To secure in the one curved eave construction; attractiveness, lightness and durability; all three in the highest degree; is what you get, when you get the U-Bar construction.

No other construction is like it; for no other can construct with U-Bars.

The printer has promised us that our new catalog will be ready, Wednesday of coming week. It's called "A Few U-Bar Greenhouses." Send for it. Or send for us. Or both.

NOTES ON CULTURE OF FLORISTS' STOCK

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Bedding Geraniums

Any spare moments and available bench space can now be used in getting geraniums potted up. Geraniums from now until May do a great deal of growing and plants of most varieties seemingly small and puny, may yet be grown into acceptable size and vigor by proper treatment. Some thoroughly decomposed manure, or that from a spent hotbed, may form one-third of the compost used. Add a 4-inch potful of fine bone to three bushels of compost. Use clean pots. Any winter batches of cuttings in need of potting should be attended to before they become potbound. Give these a raised bench where they can enjoy a little bottom heat and they will quickly take hold. When first potted they can stand pot to pot, but they will soon need some spacing, as growth is now rapid. Do not leave the flower trusses on the plants for a while yet. Allow a month before sales time for the trusses to develop. The plants cannot have too light a house. Give plenty of ventilation on every possible opportunity. They should dry out well between waterings.

Begonias, Lorraine and Cincinnati

The first two or three lots of leaf cuttings are now in 2½-inch pots; those placed in the sand after the New Year are nearly all ready to be potted. All young begonias of this time in common need shade against bright sunlight. While they must never dry out, yet they are most easily destroyed by over watering. The average temperature for the newly-rooted or potted small plants should not be below 65 degrees at night, a trifle higher being better. When established, 5 degrees lower will do nicely. No manure should be used in the soil in the first two transplantings; a very sandy and porous soil, loam, sod or leaf mold suits rooted cuttings the best. In the soil, for later shifts, some old, well rotted manure is intermixed, in greatest quantity at the last transplanting in August or September. But the one point most important of all is care in watering, especially during periods of prolonged rainy, misty or gloomy weather. To insure bushiness and symmetrical shape of plants judicious pinching in is resorted to and begins before the second shift becomes necessary. Give them some spacing every little while to let the air around the plants.

Bouvardias

Now is a good time to put in a batch of bouvardia cuttings. Root cuttings can be used instead of young top growth. Some or all of the strong roots of old plants are cut up into small pieces of about half an inch in length. These are strewn upon the propagating sand and slightly covered with sand, kept moist, and a trifle close. A light sandy soil, instead of clean sand may be used with equally good success if only kept warm and moist. After the appearance of the growth, top sashes, or anything used in covering the bed are not necessary if steady heat can be maintained without them. It must be removed and no shading is needed while the cuttings are in the sand. When they have made requisite size for being potted up, which should be a good half-finger's length in height, they are then carefully taken out, planted singly into 2½-inch pots or several together in 3-inch pots if extra good and bushy specimens are wanted for next season's pot plant trade. They remain in these pots until planted out in a favorable spot in the garden at the close of May. The bouvardia roots very slowly and unsatisfactory from the young top growth and in ordinary practice that is not considered a practical method of propagating this plant. By giving the plants a warm house, light in plenty and frequent cutting back, they will have grown into fine, nicely branched plants with rootballs firm enough for lifting and final potting up from the open ground in the early fall.

Lily of the Valley for Easter

There is always fine demand for either pots or pans of lily of the valley at Easter. So select some of the very best Berlin pips from cold storage and plant in pans, any size from a 5-inch pan up to an 8-inch pan or pot. A good potting mixture is equal parts of soil, sand and moss. Put as many pips as can comfortably go into each receptacle. Place these pans where there is a temperature of from 55 to 58 at night and about 20 degrees higher during bright days. When they have drawn up enough they can have more light. It generally takes from 5 to 6 weeks in the above temperature to bring them into full flower. Do not let them become dry and give ventilation with care as they do not like cold draughts. Should it appear that they are going to flower a little too early they can be retarded in a cool and shaded house.

Propagating Violets

Violets will now be showing abundance of side growth which makes fine thrifty material for propagation. None but the healthiest and sturdiest cuttings should be taken for the future stock. Propagate in the coolest end of the propagation bench and they can be boxed up when rooted or placed in flats with some crock on the bottom covered with about an inch of soil and then filled up with clean sand. Given some shade and any necessary watering and moisture they will soon root, when they can be pricked out into other flats, using a compost of fibrous loam two parts, leaf mold two parts, rotted cow manure one part, and same sand. In order to keep them sturdy they should have plenty of ventilation. Be very careful when watering not to let them get in a soaked condition. Give an overhead sprinkling on bright days, now and then a spraying with tobacco water and a syringing with it from underneath so as to reach the lower surface of the leaves. Keep them in a temperature not higher than 45 degrees during the night.

Shading Palms and Ferns

Palms and ferns will now require some shading to protect them from getting burnt and faded. Do not have it too heavy for the present, but just enough to break the direct rays of the sun. A good shading can be made with naphtha and white lead.

Mr. Farrell's next notes will be on the following: Dahlias; Carnations; Gardenias; Lilies for Easter; Orchids. Seeds

Bug catching

"News Letter No. 1" is the first issue of a monthly series to be issued by the Federal Horticultural Board on topics connected with the enforcement of the Federal Plant Quarantine Act. This issue concerns itself with the records of the insect pests and fungous diseases intercepted during the past year on imported nursery and florists' stock, as reported by State Inspectors or the Inspection Service of the Board. The lists as given in this first issue are in two separate series, one arranged as reported by States and the other by countries of origin of the pests enumerated. It would seem from this document that certain of the States are much more diligent than others in detecting objectionable insects on stock received within their borders. For instance, the District of Columbia intercepted 52 instances of infestation, California 44 and Massachusetts 27, whereas all the other States stand very low on the list, New York reporting only 3, one of which, however, was the dreaded gypsy moth—the only case of its importation reported for the year. Belgium and Holland furnished the greater number of infested plants.

Problems in finance and credit

Should our clubs and societies—especially those in which the commercial element is well represented—take up the matter of business credits as an issue, and is there a practical way in which these organizations can help to promote and bring about a higher standard of business ethics than now prevails? This query will be variously answered, no doubt, but as to the need for improvement in this direction there can be but one conclusion. An approximate summing up of the business reverses as reported from time to time in the columns of the florist trade papers would seem to show that, despite the greater precautions said to be exercised and the variously devised restrictions on reckless credit giving, the sum total of losses through failures is today fully as large as it has been at any time in the past and the amount of uncertain and uncollectable accounts on the books of the average dealer shows no shrinkage as the seasons pass along. Whether the crash comes in a concern whose unreliability has long been common talk or from one of reputed financial ability and unsuspected until the bolt has fallen, when the facts come out we often find listed with the heavy losers parties who have been among the most vehement remonstrants against the extending of unguarded credit.

Conditions to be reckoned with

It is readily realized that this fact as above stated may be in a large measure due to the great inherent weakness of the plant and flower growers' business—the perishable nature and ephemeral value of its products which repeatedly brings the producer or dealer face to face with conditions that impel even the most conservative, either openly or covertly to ignore all rules of prudence and jump into the game of chance, unloading goods on a doubtful customer, as an alternative preferable to seeing the stock go to waste. Like the man "on the water wagon" it is, as often as otherwise, simply a question of being confronted with a temptation sufficiently great which decides when he shall tumble off the wagon. And the same fleeting value of the goods which makes him anxious to unload must again be reckoned with when the seller seeks to enforce payment of his account and finds that there is nothing of any value on which to levy. In a business so beset with pitfalls into which the wary as well as the unwary tumble and retumble "The best laid schemes o' mice and men, Gang aft agley," and it is plain that the rules and methods which make for safety and financial assurance in other forms of mercantile enterprise will here often fall short of accomplishing their purpose. The remedy which will effectually safeguard the interests of the horticultural trades cannot be devised in an hour or a day and, as before said, there may be divergent views as to whether the trade organizations as at present constituted are capable of giving any practical assistance. Yet the subject is a vital one and well worthy of a place among the serious problems awaiting thoughtful attention.

A. M. HERR'S REFLECTIONS ON THE RECENT CARNATION MEETING.

President Brown, like those who preceded him, spent a great deal of time and gray matter to bring before the Society, through his address, some suggestions for improvement of both the Society and the flower it represents, and like those of all of his predecessors, his suggestions were reported good and at some time and some day they will be acted upon and worked out. There is this consolation for our presidents past and future, and that is, "A good thought never dies." It may lie dormant for a number of years, but eventually it will bear fruit. Take our own Club, for an example; we have always been good florists, but we lay dormant until we organized and now we are up and doing.

His remarks on packing carnations are right up to date, and it is up to us as carnation growers to produce blooms that will warrant this extra care and expense in packing, and then it will only be a matter of time until the carnation is pushed forward as a cut flower in a manner that we scarcely dream of today. Having good flowers to pack, handle them the same as roses, laying them in the box individually, so that they do not crush or bruise, and pack 50 to 100 to a box. Eighty per cent of the cut of The Cottage Gardens is handled in this way; the name of the variety is placed on the box, also the number the box contains and the name of the firm. These boxes are sent into the wholesale houses and never unpacked there. The retailer comes in, selects what he wants from the label on the box and takes them direct to his store, where they are unpacked with the care a good flower deserves. The consequence is that the flowers reach the consumer in first-class condition and give value for value received, a thing impossible where the flowers are consigned in bunches, thrown around like old shoes, as they often are, both in the wholesale and retail establishments. Of course when the grower gets $2 per 1,000 for them and the consumer gets a bunch of 25 for a quarter, they are giving value for value received, but who of us wants this condition to represent the carnation trade?

Joe Hill's paper, boiled down, gives us an average cut fifteen flowers to a plant and the cost of producing those fifteen flowers, from the cutting to the plant thrown out in the following summer, as 23 cts. per plant and the space occupied by that plant as ¾ of a square foot, this space allowing for walks and all unused room in the house. These figures are very valuable for comparison on your own place, but you must remember that the Hill establishment is right up to date with expense in the way of construction and maintenance that most of us do not have. Some of us might cut the cost per plant into two and the most of us can cut the number of blooms produced per plant into two and the quality of bloom into three when compared with the Hill establishment.

Pyfer's paper on carrying carnations over into the second year does not apply to this neck of the woods. It applies to some sections fairly well, but taking a series of five years the man who tries it here is going to lose out every time.

President Brown brought out another point in Philadelphia a week after the Cleveland meeting and that was that the average price for carnations for a period of seven years from The Cottage Gardens was 3¼ cents per flower, which certainly is not a high figure when we consider the kind of flowers they produce. In England the varieties we grow for forcing do not go below six cents and often reach fifteen. There is no reason why we should not do as well.

The Exhibition.—Right here is where neither the trade papers nor myself can give you any information, you simply have to be on the ground and see for yourself.

In the reds or scarlets there was nothing could anywhere near touch Beacon. In the light pink tint Alice seemed to be one to keep watching, although the others averaged up good. In the Gloriosa type Alice Coombs looked a winner. In the dark pink, Georgeous overtopped them all. In the whites there was, of course, nothing but Matchless, in crimson Princess Dagmar and in yellow Yellow Prince. The two pinks deserve a little more mention as they are badly needed. Philadelphia took all the laurels and deservedly so. Mr. Brown, the originator, and Mr. Breitmeyer, the grower of this variety, both are very enthusiastic over it and Mr. Breitmeyer is the last man to get enthusiastic over anything that is not up to the mark.

Mrs. C. E. Akehurst I happen to know from its babyhood up to its present debutante age and feel safe in predicting that it is going to be the commercial pink in its class, which is enough different in color from Philadelphia so that the two do not conflict very much. Another thing I am going to predict for Mrs. Akehurst is that it will pretty nearly double the Hill estimate of blooms per plant in the hands of any ordinary good grower.

As previously said the only way to get an idea of a flower is to see it and the only way to see the real good ones is to go to Buffalo next January.

The Meeting.—This was representative of the carnation world, most all the prominent growers being there, and I want to say right here that you men who make your living from carnations could not have expended $50 of your money to any better advantage than to have attended this Cleveland show and meeting. You may think that you get the benefit through the trade papers without the expense. They do their part nobly, but let me tell you that for your own welfare you had better loosen up a bit, join the society that represents the flower you grow and attend its meetings. It is being there, going over and over the show, mingling with the men who grow these show flowers, that fills your subconscious mind with carnation knowledge which it is impossible to obtain through any second-hand manner such as the trade papers or a talk like this one.

Next year it is in Buffalo. Make up your mind right now to go and then for your own sake don't say at the last minute "I can not go," "I have too much to do." If you do not stop this habit of having so much to do that you can never go anywhere you will turn into a perpetual grind until you lie down to die and then you will worry as to how the work will get done without you and have no rest even on your death bed.

THE BEST TREE FOR THE WEST.

Editor HORTICULTURE:

We are often asked which are the best trees for the country west of the Missouri river. As we note that your paper now has quite a circulation in this region, I send these notes. The Norway Poplar never saw Norway but was found growing among the Norway farmers of central Minnesota. That prince of horticulturists, Prof. Green, first called my attention to it. I got some cuttings and the first year from them I got quite a lot of trees eight and nine feet tall which I exhibited before the Nebraska and Minnesota Horticulturist Societies. For the first year or two it resembles the Carolina. Its origin, like that of the latter, is shrouded in mystery. It seems to belong to the great cottonwood family. If so it is of the male species for it sheds no cotton. It is hardy in Manitoba where the Carolina cannot live. Even here the Carolina can only live to be fifteen or twenty years old. When it begins to die it has a very ragged appearance. No one knows how long the Norway will live. One man in southern Minnesota sawed over 200,000 feet of lumber from it. I have purposely left one of each kind on a very rich ground about 10 feet apart. The Carolina has a very rough bark. The Norway has a smooth bark, something like the wild woods poplar. The Norway is two years younger than the other, and is a third larger. There is a growing demand for it for excelsior and lumber. It is a beautiful tree; the leaves are very large and the trunk is straight. It does not waste itself in side branches. It is a ravenous breeder. It is well adapted to rich grounds subject to overflow, though it does well on high ground.

C. S. HARRISON, Pres.,
Nebraska Park and Forest Society.

COVER ILLUSTRATION.

The beautiful seaside estate of Col. H. E. Converse at Marion, Mass., presided over by Superintendent D. F. Roy, is rich in fine specimen hollies, one of which is portrayed in the accompanying picture. At the time the photograph was taken it measured 2 feet 4 inches in circumference, two feet from the base. A number of its limbs are 2 feet in circumference. The tree's spread is 30 feet and its height 28 feet. It is estimated to have long passed the century mark in age. There are several other holly trees in the group that will measure up to 3 feet circumference of trunk, but they do not have a spread of over 22 feet.

"I enjoy HORTICULTURE very much. It contains valuable information to the profession."

Clubs and Societies

ILLINOIS STATE FLORISTS' ASSOCIATION.

The time for our Annual Meeting this year is March 10-11, only about two weeks from now, at Danville, Ill., which city is centrally located, and easy of access. Being so near the Indiana line, we have invited the Indiana State Florists' Society to meet with us and they have accepted. So we expect a large and interesting meeting. Ship exhibits to W. J. Anker, Danville, Ill., and they will be properly staged.

Following is the program:

Opening Session, Tuesday, March 10 (2 o'clock)—Introductory Remarks, H. E. Smith, President Danville Florists' Club; Address of Welcome, Mayor Lewman; Response and Welcome to the Indiana Florists' Society, A. C. Kohlbrand, Chicago; Response, W. W. Coles, Kokomo, Ind.; President's Address, Chas. Loveridge, Peoria, Ill.; Report of Secretary, J. F. Ammann, Edwardsville, Ill.; Report of Treasurer, F. L. Washburn, Bloomington, Ill.; Unfinished Business; New Business; Public Exhibition; Remarks by Visiting Indiana Florists; General Discussion; Nomination and Election of Officers; Adjournment.

The annual banquet will be served at the Plaza Hotel, Danville, at 8 p. m.

Wednesday, March 11, 1914—All aboard at 10 a. m. for the special cars to visit the experimental station at Urbana. By courtesy of the Danville Florists' Club.

Public Exhibition—The exhibition of Cut Flowers and Plants will be open to the citizens of Danville, and all are invited to attend same in the Armory, from 7 p. m. to 10 p. m., Tuesday, March 10, and from 2 p. m. to 10 p. m., Wednesday, March 11.

Official Badge for this meeting, The Bacon Carnation.

J. F. AMMANN, Secy.

Edwardsville, Ind.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The monthly meeting of the Nassau County Horticultural Society was held at Glen Cove, Wednesday, Feb. 11. It was voted to withdraw from the New York State Federation of Floral Clubs. Chas. H. Totty was a visitor and spoke on the Spring Flower Show to be held in New York, and also offered the Wells-Totty gold, silver and bronze medals for competition at the Glen Cove Fall Show for two blooms of the new pink chrysanthemum, "Neudon." Andrew Wilson, of Millburn, N. J., also offered a special prize of $25 for the Fall Show.

Awards were made as follows: Primula malacoides, F. Honeyman; Gardenias, V. Cleres; Freesias, H. Jones.

Exhibits for the March meeting will be antirrhinums, gladioli and violets. Mr. Wilkinson, of the New York State Department of Agriculture, will lecture on "Home Gardens."

HARRY JONES, Cor. Secy.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Plant Registration.

Public notice is hereby given that George Giatras, 463 Summit street, West Hoboken, N. J., offers for registration the fern described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Raiser's description: Originated as a sport of Nephrolepis Giatrasii, resembling this variety in its light green color, but with long, gracefully-recurving fronds. In habit of growth like Bostoniensis, but far more graceful. Name, "New York."

Public notice is hereby given that as no objection has been received or filed to the registration of the Begonia. "Melior," by Julius A. Peterson & Sons, of Cincinnati, Ohio, same becomes complete.

JOHN YOUNG, Secretary.

Feb. 21, 1914.

LANCASTER COUNTY (PA.) FLORISTS' CLUB.

The February meeting of this lively aggregation found four-fifths of the membership on hand, also a goodly number of visitors. The new president presided and the first blood of the evening was shed over The Co-operative Buying. Some firms who have been sending inferior goods into this section were handled without gloves and after a great deal of discussion pro and con the committee offered a recommendation that the members throw their trade as much as possible to the firms who have offered us inducements to get it, that we use our membership sticker in sending in orders to any and every one, and our card for the local dealers who have offered us a discount on certain lines.

This was followed by a paper on the Cleveland meeting and carnation show by A. M. Herr. The president had too much business for the meeting to allow any discussion so he called for a report from the committee to arrange with our local traction company to carry cut flowers on their regular passenger cars instead of being compelled to wait for express cars. This committee reported progress and anticipated favorable results. A committee was appointed to arrange for a fall flower show.

The visiting committee reported a trip to Manheim for March 19th, 2.30 P. M., from Lancaster, and the program committee reported having secured the lantern slides from J. Horace McFarland with a speaker to supplement them. The ladies will be invited to attend this lecture which is very fine.

The flowers shown were all good. Chas. S. Herr had a vase of Beacon that would have won any or all of the medals at Cleveland. B. F. Barr & Co. a vase of Alma Ward extra well done. W. B. Girvin had Pink Delight, Mrs. C. W. Ward, White Wonder, Gloriosa and Beacon, all in fine shape. H. D. Rohrer had a vase of his Scarlet Wonder which is proving to be a very good commercial sort. Rudolph Nagle had a very fine vase of Silver-Pink snapdragons, but the attraction of the evening was, of course, the vase of Mrs. C. E. Akehurst which is keeping up the standard it established at the Cleveland show.

Previous to the meeting an afternoon visit was made to the establishment of W. B. Girvin at Leola. Mr. Girvin's carnations are top-notchers and he contemplates erecting several additional houses this summer to make room for more. A. M. HERR.

CLUB AND SOCIETY NOTES.

The St. Louis County Growers' Club will hold its regular monthly meeting on Wednesday, March 4th, at 8 o'clock at the Eleven Mile House.

Sacramento, Cal.—The florists of this city have organized a horticultural society, with Mark Ebel as president and W. J. Meldrum, secretary.

The New York Spring Show Committee had a busy and enthusiastic meeting at the office of John Young, 53 West 28th street on Tuesday, February 24.

Brooklyn, N. Y.—The annual meeting of the Greater New York Florists' Association was held on Feb. 10th and a dividend of 10 per cent was declared.

Syracuse, N. Y.—At the annual meeting of the Syracuse Rose Society, Wallace R. Pierson addressed the members, his subject being, "What Americans have done for Roses."

At the next meeting of the Gardeners' & Florists' Club of Boston, March 17th, Ray Pierce, of the U. S. Dept. of Agriculture, will lecture on the "Chestnut Tree Blight," illustrated by numerous specimens.

San Francisco, Cal.—The officers of the Pacific Coast Horticultural Society were installed Feb. 7th as follows: President, H. Plath; vice-president, Thomas Taylor; corresponding secretary, Walter A. Hofinghoff; financial secretary, B. Meyer; treasurer, Daniel McLaren.

The Retail Florists' Association of St. Louis, met on Monday night, Feb. 16, and elected officers for the year: Harry Young, president; Theo. Miller, vice-president; Alex Geranions, secretary, and F. H. Weber, treasurer. The annual banquet took place Tuesday night, Feb. 24th.

The Houston (Texas) Florists' Club has found it necessary to postpone the banquet which was to have been held Friday night, Feb. 13, on account of numerous conflicting dates and engagements coming at this time. Planting week as inaugurated by the club, however, started Monday, February 16.

At the recent two-day meeting of the Michigan Horticultural Society at Benton Harbor, Representative J. J. Jakway told the fruit men Michigan's fruit laws were inadequate. He said it was not frosts or pests that were the fruit men's enemies, but the dishonest growers who resort to sharp tricks to cheat the consumer.

At the regular meeting of the Cook County Florists' Association, Feb. 19, there were thirty-one members present. The chief business was the election of officers, which resulted as follows: president, N. P. Miller; vice-president, A. Henderson; secretary, A. T. Pyfer; treasurer, J. Zech; sergeant-at-arms, M. Fink; trustees—A. C. Kohlbrand, A. J. Zech, J. L. Raske, Peter Olsem, Jas. Novak. A communication was read from the Grand Trunk railway, offering special rates to the east with the Boston convention in view. The club voted to take the matter up later. A collection of the Zvolanek sweet peas, grown by Henry Wehrman at Maywood, Ill., was exhibited.

During Recess

Rochester-Buffalo Bowling.

On Feb. 20 was the day set for the much-talked-of bowling match, Rochester vs. Buffalo. On reaching Rochester the Buffalo party of about 35 was met by a delegation and some time was spent in inspecting Rochester greenhouses and stores and then going to the Rochester Club for refreshments. At 7 p. m. the florists of the two cities sat down at the Hotel Eggleston. The able toastmaster Bates called upon President Dunbar, of the Rochester Club who answered—"We have on exhibition the bowling trophy donated by Lord & Burnham Co., and we are going to do our best to keep it in Rochester. It's for the best team to win, and may the contest be keen." William Legg, President of the Buffalo Florists' Club made a few brief remarks, also S. A. Anderson, J. H. Rebstock, Louis Neubeck, Jos. Streit and many Rochester representatives, among them M. Keller, J. B. Keller, George Hart, Al. Salter and others. A giant "shuper" purchased in Cleveland, recently by George Hart and J. B. Keller, and called the "Keller-Hart Trophy" was filled with wine and passed among the diners.

At 8.30 p. m. the game was called at the Odenbach Hof Brau alleys and after a practice game the great match was on.

The following notes depict the excitement in the first few frames. The author of the notes, being a Buffalo rooter, couldn't restrain his pen, so we let him have the floor just for once as, "it was a famous victory."

Salter and Sandiford first men up, and Rochester made four pins while Buffalo made a spare. A good cheer went up from the Buffalo rooters. Mike Keller was in fighting trim and not over anxious, a cool head, a fine ball rolled and the result a strike. Cheers by the Rochesterites. The striking continued with Speidel and the game was on in good earnest. Al Vick made nine and an easy spare. Edward Walther followed with a strike and it meant a real warm contest was on. Al Salter was cheered when his roll was on, but hard luck struck him and the result was a "Katz." Condolence was offered him and Rebstock was willing to bet (but was not permitted) that Buffalo would win first game. Hard luck followed for a few frames when Bowland made a strike and was carried off the alley by the Rochester boys.

After a few 7, 8 and 9 pins knocked down by the two clubs and things running a little quiet, Al Salter was again on hand and this time it brought the Rochesterites to their feet; a strike had been made and Al had more confidence. The Buffalo crowd showed the effect of too much good treatment at the banquet and therefore was much on the weak side and it looked as if the game was gone. Dull faces were seen for a while; Buffalo was weakening. In the sixth Rochester was getting stronger at each frame and every ball that went down counted and Charlie Vick remarked: "We have them going, keep it up boys." A strike was the result, the noise was terrific for a time and the excitement grew more intense as the game went on. Sandiford looked at his score and he was not up to his frame in the sixth and this caused a worried look in Charlie's face, though, through the efforts of L. Neubeck he was given a "refresher" and finally new life appeared.

The seventh frame found the Rochester boys going some and the Buffalo bunch somewhat worried. The rooters had also weakened and were called to another room where refreshments were served and Felix Alberts looked after their wants, as you know Felix is to become one of the Buffalo boys at an early date and therefore much encouragement was shown. The tenth frame was on and being soon ended showed that the Buffalo's had gained, total showing Rochester score to be 759, and Buffalo 773, winning by a small margin of 14 pins.

The second game run more evenly until the eighth when Rochester again weakened and Buffalo gained and the game ended with scores as follows: Rochester 744, and Buffalo 860, a margin of 116, Buffalo winning by 130.

The Buffalonians were taken to their train at midnight rejoicing over their victory. On March 4th the return match will be bowled in Buffalo, though arrangements have not been fully completed.

Nassau County Horticultural Society.

The eighth annual dinner of this society, held on Thursday night, Feb. 19, at the Oriental Hotel, Glen Cove, was as usual a great success. Although it was a stormy evening, about seventy members and their friends, including a number from New York and elsewhere, sat down to the excellent repast provided. In the absence of President H. Gaut, the chair was ably filled by ex-President J. W. Everitt. After the dinner, Mr. Everitt called upon the treasurer, E. J. Brown, and presented him with a diamond scarf pin as a mark of appreciation of the manner in which he filled the office of president during the past year.

Mr. Brown suitably responded and thanked the members for their loyal support during his term.

Mr. Everitt then presented as toastmaster Frank Bowne, of Glen Cove, who ably took the wheel and steered from speaker to speaker until there was hardly a topic under the sun which had not been alluded to, from the first gardener and his assistant up to the present time of horticultural and agricultural colleges and experiment stations.

Letters of regret were read from Messrs. A. Mackenzie, W. J. Stewart, of HORTICULTURE, Boston, and others. Mr. Everitt was presented with the Wells-Totty gold medal, won at the last fall show, and responded in a few words. The silver medal, which was won by Alexander Mackenzie, Highland Falls, N. Y., will be forwarded to him.

The speakers' list included Messrs. J. A. Shaw, of Florists' Review; J. H. Sperry, of Florists' Exchange; W. Sperling, and C. McTaggart, all of New York; Rev. J. W. Gammack, J. W. Everitt, J. H. Cocks, W. R. Kinnear, L. F. Underhill, J. F. Johnson, C. T. McCarthy, Dr. Connelley, and Mr. Partridge, of Glen Cove; A. Herrington, L. E. Ortiz, and A. Wilson, of New Jersey; James Duthie, Oyster Bay; R. Angus, Tarrytown, and Jas. Stuart, Westchester. Songs were rendered by T. Twigg, C. Plumb and A. Wilson. The singing of "Auld Lang Syne" brought to a close a very enjoyable evening.

HARRY JONES, Cor. Secy.

Gardeners' and Florists' Club of Boston.

The lecture hall in Horticultural Building, Boston, presented a scene of rare loveliness on the occasion of the annual banquet and dance of the Gerdeners' and Florists' Club. The tables were set for 250 and practically every seat was occupied. The decorations were most beautiful. The walls and tables were resplendent with plants and flowers generously contributed by the members. It would be unfair to mention one donor without naming all, but we shall make the exception of mentioning the superb Darwin tulips, Pride of Haarlem, brought by W. C. Rust, several vases of which were placed in different parts of the hall and overtopped and outshone all else. This is the first time we have seen these late flowering tulips forced at so early a date, and our readers will be interested to know it is possible to so bring them in. After the banquet, which was a most excellent one, there were a few brief speeches and some fine vocal and instrumental music. President Kennedy started the talking with some words of welcome and a hopeful reference to the coming affiliation for cooperative action of all the florists' and gardeners' associations in the country. President Farquhar of the Massachusetts Horticultural Society followed with happy felicitation on the occasion and expressing the pleasure it gave his society to see their hall used for such an inspiriting occasion, making reference also to the approaching S. A. F. Convention which will be the great horticultural event of the year in Boston. Vice-President Welch of the S. A. F. followed with a few words about the club's part in the entertainment of the 2000 or more visitors expected next August. Secretary W. N. Craig was enthusiastic about the harmonious relations existing between the gardeners and the commercial florists and spoke of the gardeners' work as an ennobling and elevating calling. President Sam. J. Goddard of the American Carnation Society spoke briefly and to the point. Interspersed between the speeches, songs were rendered by Miss Margaret K. Alexander and Mr. James Singer and piano solo by Miss Katherine Singer. These talented entertainers are no strangers to the Boston Club and their splendid

NATIONAL ASSOCIATION OF GARDENERS

work was greeted with unbounded appreciation.

W. J. Collins, floor director and W. J. Patterson, assistant floor director, with their staff of young aides, then took possession of the proceedings and dancing was in order until the midnight hour.

The annual banquet of the New Bedford (Mass.) Horticultural Society was held at the Parker House on Thursday, February 19, and proved a marked success. The largest attendance in the history of these festive occasions praised the delightful way in which the dinner was served and did full justice to Vermont's noted product. The hall was tastefully decorated with palms and flowering plants adorned the tables and mantles, while vases of carnations, lilies and narcissi added largely to the beauty of the scene. After the address of welcome by President Roy an interesting musical program pleasantly filled the evening until a few well-chosen words from the former president, F. C. Barrows, reminded the banqueters that the closing time had arrived.

We Want To Send You This Book On Canna Information

THOSE who saw the advance sheets say there has nothing equal to it ever been published, containing such a collection of valuable, dependable Canna information. It's not alone informative—it's decidedly readable, without being a lot of floriated gush.

It stands for the Canna where Vincent's book does for the Geranium. Antoine Wintzer, you will agree, comes pretty close to being the leading Canna authority of this country, and he has put his stamp of approval on every word in the book. This means the book is an authority.

COLOR CHART

This is the first time to our knowledge that so complete a color chart has been published. Those of you who know Cannas, fully appreciate what a difficult task it has been to compile this chart, and how invaluable it will be. We will send you this book at our own expense. There are no strings to our offer. Simply let us know you want it, and one of the very first copies coming from the press will be sent you.

CLUB AND SOCIETY NOTES.

The Bayside Grill Room, Bayside, N. Y., is the place, and Saturday evening, Feb. 28, is the time for one of those jovial social occasions which Charlie Millang knows so well how to inaugurate and carry through to success. The affair this time is a "Killarney" beefsteak dinner. A cabaret show and dancing are included in the program, and two hundred or more ladies and gentlemen, including many prominent in the business and social life of Bayside, are expected to be present.

The regular monthly meeting of the Lenox Horticultural Society was held in the Town Hall, Lenox, Mass., on Saturday evening, Feb. 7th. The attendance was hardly up to the usual standard. The schedules for the exhibitions were submitted and accepted. At the next meeting there will be a lecture on Silos. The twentieth annual ball of the society was a decided success and reflected great credit on Jas. Clifford, G. Ferguson, F. H. Butler, L. C. Peters, G. H. Thompson, who acted as committee on that occasion.

SOME FINE MELONS.

The melons shown in the accompanying picture were grown by C. W. Smith, gardener at the Lewis estate,

Ridgefield, Conn. The one on the scales in the center weighed 10¼ pounds, and the others slightly less. The variety is Read's Scarlet.

GREENHOUSES BUILDING OR CONTEMPLATED.

Manheim, Pa.—M. H. Hostetter, addition.

North Hero, Minn.—F. Keith, range of houses.

Louisville, Ky.—Nanz & Neuner Co., house 27 x 160.

WILLIAM SAUNDERS. 3½ feet. 60 cts. per doz.; $4.75 per 100; $45.00 per 1000.

FOR FULL DESCRIPTIONS SEE OUR CATALOGUE—MAILED FREE.

We are the largest handlers of Cannas in the world. Our prices on Cannas will bear comparison with any house in the Canna business.

Our Cannas are true to name—two and three and sometimes four eyes are sound, dormant, and are packed 250 in a box. Two can be "cleated" together and shipped as one. One box of 250 sold at thousand rate; it is cheaper for you to buy a box of 250 than 200 at 100 rate. Write for special prices on quantities.

If any Cannas are not found here, it may be understood that they are superseded by the foregoing. If selection is left to us we will substitute or send only the best for all purposes.

Chicago Seed Notes.

The Holland-grown gladioli are not regarded here with much favor. The bulbs are large but are not firm and often are of a spongy texture. The supply of Lilium formosum is decidedly short, the increased demand for them for cut flowers becoming greater each season.

Chicago seed houses are having a good winter business in their wholesale trade. They have done a very satisfactory shipping business in caladiums, cannas, tuberoses and bulbous stock generally and in flower seeds, particularly asters. A general scarcity of European flower seeds is noted, especially Centaurea candidissima. Some of the California sweet peas are also scarce. Catalogues are now out and a very optimistic outlook is maintained for a lively business as soon as spring opens. The cold weather and the snow are regarded as favorable rather than otherwise to a good season. Among vegetable seeds some varieties of peas are not up to normal in quantity, noticeably the wrinkled sorts.

Notes.

New Haven, Ct.—Mrs. Platt, wife of Frank S. Platt, the well-known seedsman, died at her home, 1149 Chapel street, on Feb. 16th.

The Stokes Seed Store at 217 Market St., Philadelphia, is altering and improving their retail department. An entire new front will be one of the features.

NEW CORPORATION.

Los Angeles, Cal.—Dorman-Shaw Seed Co., capital stock, $10,000; incorporators, Robert H. Dorman, Charles Shaw and A. J. Mitchell.

NEWS NOTES.

Whittford, Pa.—John Stanley has leased the greenhouses of J. C. Maull, consisting of about 50,000 sq. ft. of glass.

Council Bluffs, Ia.—The F. W. Menary Nursery Co., which has been in the receiver's hands for nearly two years, has been purchased by the First National Bank for $31,000. The bank holds a judgment against the company for $58,168.12.

To the creditors of Edward J. MacMulkin, of Boston, in the County of Suffolk, and district aforesaid, bankrupt:

Notice is hereby given that on the thirteenth day of February, A. D. 1914, the said Edward J. MacMulkin was duly adjudicated bankrupt; and that the first meeting of his creditors will be held at a Court of Bankruptcy, at Rooms 121-122, Post Office Building, in said Boston, on the sixth day of March, A. D. 1914, at ten o'clock in the forenoon, at which time and place the said creditors may attend, prove their claims, appoint a trustee, examine the bankrupt and transact such other business as may properly come before said meeting.

JAMES M. OLMSTEAD,
Referee in Bankruptcy.
Boston, Feb. 24, 1914.

PHILADELPHIA NOTES.

The West Philadelphia Rod and Gun Club, of which Mark Mills and W. K. Harris, Jr., are among the ruling elders, gave a theatre party on the 17th inst., which was largely attended by members of the craft. We are informed that the affair netted the club two hundred dollars.

The sympathy of the trade goes out to George W. Kerr of the Burpee staff, whose mother passed away on the 18th inst. She made her home with her son at Doylestown, Pa., and for a number of years was his housekeeper in Wolverhampton, England, where Mr. Kerr was in business previous to coming to America. The Kerr family have been established for many generations in the seed and nursery business in Dumfries, Scotland.

H. Bayersdorfer & Co. report the largest mid-winter movement of baskets and other standard florists' material in their experience. Two to three hundred cases are now due on three steamers, much of which will be forwarded at once to fill urgent orders. Rattan vases with glass receptacles are having a tremendous run. These and much of the basket stock are now received in natural color and are finished up to order in various tints and duocolors by the color spray process, as required by customers.

"A valuable etching of a distinguished face" is the way H. H. Battles sends his customers a little leather case about the size of a railroad ticket. When opened it's a mirror, and the pleasant joke is on the customer. The latter swallows it of course—that is, he puts it in his pocket. Good advertising. It takes H. H. of Phila. and Penn of Boston to show them the way. We understand, however, the "Blackboard Association" intend to do something some day that will vindicate their standing and prove an alibi.

Any one who has novelties to show the trade should not forget the excellent opportunity furnished by the monthly meetings of the Florists' Club—first Tuesday every month. No matter whether you are or are not a member. Come along and show what you have. If you are not careful you might sell some of it— and at no cost for advertising. Just think of the joy of beating out those trade paper people and getting space for nothing! The feature at the next monthly meeting will be an illustrated lecture on geraniums by R. A. Vincent, of White Marsh, Maryland, Tuesday evening, March 3rd.

ST. LOUIS NOTES.

Vandevoort's department store will on March 1st open a department for nursery stock of all kinds. W. S. Wells will have charge of this department.

Chas. Beyer had a narrow escape from freezing out last week when their boiler burst. Several dozen coal oil stoves were employed at once and a new boiler was soon installed. Some of the stock suffered greatly but from reports the loss was only small.

New Orleans has been luxuriating, so the press dispatches state, in her first snow storm in ten years.

WASHINGTON NOTES.

The sympathy of the entire trade is with Mr. and Mrs. Adolph Bowdler on the loss of their little daughter, Janet L. Bowdler. The little girl was nine months old.

At the meeting of the Florists' Club Tuesday evening, March 3, the annual election of officers will take place. At this meeting also the proposed Smith Memorial will be taken up as will other matters of equal importance.

The Retail Merchants' Association, of which a number of local florists are members, held their third annual get-together dinner at the Shoreham Hotel. William F. Gude, William Marche, Frank Miller and S. D. Blackistone were among those present.

William F. and Adolphus Gude have conveyed their individual holdings in thirty-seven acres of property in Anacostia and in this city, improved by about 350,000 square feet of glass, dwellings and other buildings, to Gude Bros., Inc. While the consideration is not named in the deed, it is said that the corporation has given them a mortgage for part payment on the property of about $120,000.

Members of the House of Representatives are continuing to introduce bills looking to the inclusion of seeds, bulbs, scions and cuttings into the parcel post system and all such bills are going the same route—to the Committee on Post Offices and Post Roads. If it is the desire of those who use the mails for the transmission of such merchandise that a bill of this nature be enacted into law, they should inform their Congressmen of the fact.

The eight-hour law for women came into being on Tuesday afternoon last, when President Wilson placed his signature on the Congressional Act. The stores have all prepared to meet the requirements of the law. Under its provisions records must be kept of the hours at which all female employees report for duty, go and return from lunch, and of their dismissal at the end of the day, as well as of salaries paid and other information. Three inspectors are to be employed to see to the enforcement of the law.

CHICAGO NOTES.

John Steinmetz of 1643 N. Halsted street is acting as local salesman for R. M. Ward & Co., New York.

Mrs. Chas. McKellar was brought home from the Henrotin hospital last Thursday and is slowly recovering from a severe operation.

Guy French, who recently broke his shoulder, is getting about again. Mr. French is manager of the carnation ranges of the Poehlmann Bros.

Fritz Bahr who has been in California most of the winter is back to his home at Highland Park, Ill., where his four children are ill with diphtheria and scarlet fever.

The Foley Greenhouse Co. has delivered its first carload of wood work to Morton Grove, for the new Poehlmann range. The rest is being turned out rapidly and the new factory is proving in some ways superior to the old one in facilitating rapid work and convenient handling.

The outlook here is favorable to a large attendance at the joint meeting of the State Florists' Associations of Illinois and Indiana, at Danville, Ill., March 10-11. A. Kohlbrandt, who is interested in its promotion, says the success of the Illinois meeting last year is waking up all connected with the trade to its possibilities as a place to exhibit their flowers and to meet prospective customers. This territory is very desirable to the shippers in the Chicago market.

Obituary

Henry Meyn.

Henry Meyn, a retail florist of 2045 Germantown road, Philadelphia, died on Thursday, Feb. 19th.

Truxton Craven.

Truxton Craven, a well-known landscape gardener of Manhasset, N. Y., died on Feb. 10th from injuries received in an automobile accident. He is survived by his father, a prominent civil engineer of New York.

Stephen McHale.

Stephen McHale, foreman for John Condon, florist, Brooklyn, N. Y., died February 18 from pneumonia at his home, 33 Nineteenth street. He was born in Castle Bar, County Mayo, Ireland, thirty-four years ago, and is survived by one son, a brother and five sisters.

S. H. Warren.

Samuel H. Warren died on Feb. 20th at his home in Weston, Mass., aged 77 years. Mr. Warren was an expert cultivator of strawberries and a frequent prize winner at the strawberry exhibitions of the Massachusetts Horticultural Society. He has been in failing health for over a year. He is survived by a sister, with whom he lived.

WIRE DESIGNS and FLORISTS SUPPLIES
1008 Vine St., PHILADELPHIA, PA.

ESTABLISHMENT OF A PROSPEROUS LADY FLORIST.

The accompanying illustration shows the place of Mrs. A. I. Colburn, florist, 68 Graham street, Gardner, Mass. There are two greenhouses, one 30x160, the other 20x100. The evidences of scrupulous care and neatness and consequent prosperity are apparent. There will never be too many such places in Massachusetts or anywhere else.

FIRES.

Kirkwood, Mo.—A. S. Cerny's greenhouses were badly damaged by fire on Feb. 10th.

Lowell, Mass.—The greenhouses owned by Mrs. P. J. Riley, on Fairmount street, were destroyed by fire on the morning of Saturday, Feb. 21. This place was for many years conducted by the late Edwin Sheppard.

Brockton, Mass.—Fire starting from an overheated furnace in the greenhouse of W. J. Marshall at 517 Copeland street today destroyed structures, plants and blooms valued at $15,000, on Wednesday, February 25. The fire spread quickly and most of the growing things shrivelled up under the intense heat. What escaped the heat was frost-bitten, as practically every light of glass was melted or broken. All of the horse-drawn apparatus was stalled at the foot of the big hill in Capeland street, 200 yards from the fire, and the automobile combination apparatus had to fight the fire unassisted.

As an Advertising Medium Horticulture has NO superior. Because they ALL read it and they read it ALL.

Flower Market Reports

BOSTON With the incoming of Lent we have, very appropriately, an amelioration of weather with sunny skies and a spring like atmosphere. The generous quantity of snow now on the ground, however, effectually precludes any thought of spring operations out of doors but cannot prevent luxuriant development under glass and there are unmistakable signs that the flower market is about to experience a big drop in values—the first of any consequence since Christmas. Prices at present writing are not much affected but, judging by the accumulation already started in the wholesale markets it is only a question of days or probably hours, when the deluge will get in its work and the bargain hunter will resume his position of importance which he had to abdicate months ago. American Beauty roses are still scarce but other standard varieties are in satisfactory supply, with quality very good. Carnations are also coming in freely and of excellent quality. Bulbous stock is exceedingly plentiful and selling low. Of cattleyas there are enough, with dendrobiums elbowing them a bit in decorative work. Sweet peas, if of Spencer type are making a record; otherwise they drag far behind. Violets swarming everywhere.

BUFFALO No warm weather in sight but the mercury holding around the zero mark for another week. It really has been too cold for the good of the flower business. The merchants' windows are beautifully decorated with spring plants, such as azaleas, lilacs, cyclamen, hyacinths, tulips and daffodils, and making an effective attraction for the buyers. There have been no bargain sale signs displayed, though the time is near, as the market is gradually filling up, especially on bulbous stock, and as the Lenten days are drawing near it is hoped that milder weather will also come with it. Carnations are plentiful in the ordinary quality, and roses are coming in more plentifully. Lily of the valley, violets, Roman hyacinths, and practically everything along the line are had in good supply.

CHICAGO The tone of the market is very good. With the exception of violets, which are arriving in almost unlimited quantities, all good stock sells out each day. The Hudson River district seems to have an inexhaustible supply of violets which are being shipped here in larger quantities that can be sold to advantage, while on the other hand, local growers of singles are now cutting heavy crops for the first time this season. There is really no quotable price on violets in large lots. Growers of fancy sweet peas are reaping a harvest now. The large butterfly varieties bring $2.00 and $2.50 per 100 and sell more readily than the small common ones at one-third the price. There is such a difference between the old and the new that growers have only to visit the market now to know how to plan for next season. Short roses are short in supply. Long ones are more plentiful but not in sufficient quantity to reduce the price, which holds steady as it has done ever since the holidays. There are enough American Beauties to meet the demand and quality is fair. There is very poor sale for poor carnations of which there are many. Good ones sell well at a fair price. There is a good call for lilies and a fair demand for orchids and lily of the valley.

NEW YORK The snow embargo and low temperatures of late have played the mischief with flower receipts, causing uncertainty and exasperating delays in delivery and much loss from freezing, the latter often due to unskilful packing. The same causes have operated to greatly curtail the outgo, so that even under stress of inclement weather much stock has accumulated in wholesale hands and the street men have been unable to take advantage of this so far. But if all indications are considered, the opportunity for the street man is about to present itself and then will come a six weeks' sparring tournament between wholesalers and speculators such as only New York can furnish. Bulbous stock occupies the major portion of the sales tables at the present time. Tulips are in the lead as to quantity and variety and they certainly are fine. Violets cannot seem to escape the "hoodoo" which has followed them all through the season. There is no hoodoo on sweet peas, however, although they must be Winter Spencer to realiz

(Continued on p.)

DOUBLE WHITE KILLARNEY

The best White Rose on the market today, splendid large heavy buds, unusual value.

Special ..... $10.00 per 100

Flower Market Reports

(Continued from page 309)

anything like a normal price. Of the exceptional things snapdragons and calendulas are making a fine record. Quantities of cattleyas of inferior quality are unloaded at unquotable prices and find their outlet through bargain sale advertisements in the daily papers. For anything really fine in the line of cattleyas quoted prices are usually maintained.

PHILADELPHIA As was to be expected, the prelenten week proved to be a brisk and profitable one for the flower business. All stock sold well, the leaders probably being carnations which were in lively demand and just a little ahead of supply—which kept prices firm—with no bargains for old "Iron-Face" the cold-blooded waiting buyer. That gentleman's strong point is his ability to hang around and wear out the opposition, and he wins out all right, too, unless the market is very strong. Pink roses sold well—also American Beauties. The latter were in larger supply but did not weaken in price here so much as we hear they did in New York, from which point some of our buyers picked up some good stock at considerably less than local quotations. Prices on orchids hold firm and there are enough to meet requirements. The gardenia market continues rather sluggish and good stock can be had at very reasonable figures. There is no improvement in the violet situation. Lily of the valley remains normal both as to supply and demand. Large quantities of daffodils, both single and double, are arriving and selling moderately well although at rather law prices. Roman hyacinths and paper whites are scarce. The Easter lily supply has increased with the advancing season and prices have dropped a notch.

ST. LOUIS There has been considerable business for the retailers during the last week. Surpluses at the wholesale markets were well taken up and this pleased the wholesalers greatly, as stock was plentiful in all grades except extra fancy roses, for which there is always a good call. Prices are below the last quotations on almost everything. All flowers are on crop and quite a large amount of stock from now on is expected. In greens the market affords anything the trade demands.

WASHINGTON Business during the month of February can only be considered as "fair." The exceptionally cold weather caused a marked shortening of the supply and at times it was hard to get flowers on order. Roses have been very scarce for some time and are bringing good prices. Carnations are still in good demand at $4 and $5 per hundred. American Beauty roses are very scarce and bringing up to $10 per dozen. The St. Valentine and Washington's Birthday business was very good and caused the movement of all the stock that came into the market. As previously reported, deliveries are still poor, not only within the city, which on Monday was covered with more than six inches of snow, but to and from adjoining cities and towns. The extreme cold is keeping many of the flower vendors off the streets with the result that the stores are doing an increased business in violets and sweet peas. It is said that an effort will again be made at an early date looking to curb the activities of these street men.

NEW YORK QUOTATIONS PER 100. To Dealers Only

PERSONAL.

John Haury and Miss Annie Shouse, of Nashville, Tenn., were married Feb. 15th.

Louis Morel, of Morel Bros., Scranton, Pa., has gone south on account of ill health.

Henry Cliff is the successor of the late Chas. E. Keith as superintendent of the parks of Bridgeport, Conn.

John Walker, of Youngstown, Ohio, is in Cuba, recuperating his health. He will go to Panama before returning home.

S. J. Reuter, wife and daughter, of Westerly, R. I., will sail for an European visit on the steamer Potsdam, leaving New York, March 24.

E. W. Fengar, of Irvington, N. J., has been seriously ill with pneumonia for the past three weeks, but is reported now as convalescing rapidly.

H. Bayersdorfer, of Philadelphia, has been on the sick list recently and has been at his place of business only intermittently, but is now improving rapidly.

Raymond Kulm, for sixteen years with M. Lyons, florist, South Orange, N. J., has accepted a position as landscape gardener with Mrs. W. Halsey, S. Orange.

M. C. Ebel, of Madison, N. J., of the Aphine Mfg. Co., had the misfortune to fall and fracture his knee cap on Wednesday, February 18. He is recovering nicely.

Robert E. Berry has given up his commercial rose-growing establishment at Chatham, N. J., and will take charge of the Shrewsbury Nurseries, Eatontown, N. J.

Miss Florence M. Wyman, daughter of W. H. Wyman, proprietor of the Bay State Nurseries, North Abington, Mass., and Arthur W. Calkins, were married on Feb. 10th.

George Barton has been appointed manager of the 1100-acre estate of Emerson McMillan at Darlington, N. Y., and will assume charge March 1st. Mr. Barton was formerly superintendent of the Glen Cove estate of Henry W. J. Buckingham.

John D. Ramaley, proprietor of the St. Peter street floral exchange and a resident of St. Paul, Minn. for thirty-five years, celebrated his 80th birthday anniversary on February 14 by giving flowers to his friends and customers, in accordance with a custom he inaugurated a year ago.

NEW WHOLESALE HOUSES.

Baltimore, Md.—The Walter R. Siebrecht Company have opened a branch wholesale store at 200 W. Mulberry street.

Brooklyn, N. Y.—The Manhattan Cut Flower Co., A. Hanig, proprietor, have opened a wholesale store at 11 Court square.

CYCLAMENS

200,000 GIANT FLOWERING CYCLAMEN. For the last 16 years we have selected three-fourths of our seed-bearing cyclamen stock before Xmas, to assure early blooming plants, and claim the finest commercial strain in this country; no fizzle of many so-called English varieties. Our aim is strong growers that don't have to be petted to be grown into a choice salable plant—a well built, five-petaled flower (many of them at one time), with well marked foliage; every plant an ideal, a prize winner. Received first prize at the Cleveland show and first and second at Toledo, early November, when blooming cyclamen were scarce.

STRONG AUGUST SOWN SEEDLINGS, once transplanted, $3.50 per 100; $30.00 per 1000. Cash with order. Cultural directions with all orders. C. WINTERICH, Cyclamen Specialist, Defiance, O.

Thomas Roland, Nahant, Mass.
For page see List of Advertisers.

(*Continued from page 284.*)

GREENHOUSE CONSTRUCTION AND HEATING.

(A paper read before the North Shore (Mass.) Horticultural Society by F. J. Elder.)

Hot water heating was used before steam heating, and while the use of steam is increasing rapidly, it may still be stated that hot water heat is better *in most cases* than steam heat. It is not so intense and more like natural or sun heat. It permits of more even distribution, especially so in small or, medium sized houses. Plants will thrive better generally in water heated houses than they will in the superheated near steam piping.

The increasing use of steam is due to two causes. The first cost of an ordinary steam plant is considerably less than the cost of a corresponding hot water system, and the adaptability of steam to long houses, which are also increasing in number. Steam circulation is much move positive even in a low-pressure gravity system, than is a gravity water circulation. With steam there is pressure, and steam may be carried long distances without difficulty; whereas gravity water systems are really not adapted to long houses, nor to large ranges.

Advantages of Hot Water Heating.

On the other hand, hot water heating is much better and much more economical than steam for small and medium sized plants. In mild weather light fires only are necessary, just enough to keep up a circulation; while with steam we must have fire sufficient to boil the water in order to get any circulation whatever. A night fireman is not necessary with a water heated plant. The boiler should have an ample surplus of capacity. It should have a deep fire pot to provide for a deep and slow fire. It should have a long flue travel and much indirect surface so that the products of combustion will give up most of their heat before passing up the chimney. The boiler should be easy to fire and easy to clean..

The Best Boilers.

For all small and medium-sized plants cast iron sectional boilers are best for water and for steam. They are easier and cheaper to install than tubular boilers, require no bricking in, and they resist corrosion much longer than any wrought boiler can. Two or three such sectional boilers properly valved, may be used with good results. Economy is obtained by using one boiler only in mild weather, and others as needed. Tubular boilers should be used for large plants, and while these boilers are not so well adapted to deep slow fires, large greenhouse plants require night firemen who may give such boilers the more frequent attention they require.

Piping.

In private greenhouses three and one-half inch cast-iron piping is used almost exclusively. Each lineal foot of this pipe contains approximately one square foot of surface, 1.05 feet to be exact.

Cast iron pipe is of course much more enduring than wrought pipe of any grade, but the greatest virtue of this piping is that because of the large quantity of water contained, three and one-half inch piping will take much longer to cool than piping of smaller calibre, and this is decidedly an advantage where no night fireman is kept. In commercial plants with hot water heating two inch piping is generally used. The circulation by gravity is not generally much more rapid in two inch piping than in three and one-half inch piping, for while it takes longer to heat and to cool the water in three and one-half inch pipe, friction is greater in the smaller sized pipe. One lineal foot of two inch pipe contains .62 square feet of surface, and it takes 1.68 lineal feet of two inch pipe to equal in surface one lineal foot of three and one-half inch pipe. 1.68 lineal feet of two

SPECIAL GREENHOUSE FERTILIZERS

FOR FLORISTS AND GARDENERS

Formulated and Manufactured by men who have made a life study of

FLOWERS—FRUITS—VEGETABLES

UNDER GLASS

In this Country and Abroad

Proper fertilization under glass is more important than fertilization out of doors—and

Fertilization is Our Specialty

Why pay ocean freight and dealers' commissions on Imported General Fertilizers when you can buy Fertilizer Direct from the Manufacturer especially prepared to meet *your individual requirements.*

We are also manufacturers of MAK-GRO Odorless Plant Food put up in one pound tins and five pound bags—a splendid side line for Florists operating their own stores.

We are at your service on all matters relating to Greenhouse Fertilization. Write us for farther particulars

Why ALPHANO HUMUS is Superior to Animal Fertilizers and More Lasting than Others

A mulch of Alphano Humus dug in, produced in one season that top story of roots. Nature built where building was best.

ALPHANO HUMUS is a soil builder and plant food combined.
It makes light soils heavier and heavy soils lighter.
It is nature's balanced ration. Read on and prove it to yourself.
It has a distinct advantage over animal manures in being perfectly sanitary and entirely odorless. It is much the richest in nitrogen and the several other elements so essential for vigorous plant growth. Being in powdered form it can be easily and thoroughly mixed with the soil. No lugging and tugging with a fork—no task breaking up chunks and lumps as with animal manures. No laborious spreading on and then invariably raking part off.
Alphano can be spread on evenly and easily. **All of it can be left on.** Think of the advantage of its use on your lawn where manures are both offensive and unsightly, and eventually have to be raked off, taking much of their fertilizing value with them.
Manures are laden with weed seeds. Alphano is guaranteed to be free from them. Top soil taken from the woods, everybody knows, is particularly valuable for building up old soils or making new ones.
Wood soil is simply soil rich with humus. But humus is apt to be acid and inert. The difference between it and Alphano Humus is: Alphano is richer, extremely active and more thoroughly decomposed and more readily available than wood soil.
Wood humus is mixed with a large proportion of soil; but Alphano Humus is practically **all humus**—every part of it contributes to the upbuilding of the soil it is mixed with.
In one season you can convert a practically worthless soil to one of surprising productivity. Being so reasonable in price you can use it freely. Spread it on your lawn and rake in (not off).
Put it on your garden and spade in. Sow it in your garden seed drills or trenches. Dig it around your shrubs and trees. Use it as a mulch for your Rhododendrons. Boost along your flowers with it. From start to finish garden this spring with Alphano.

5 BAGS for $5

$12 a ton—$8 by the carload.
F. O. B. Alphano, N. J.

Send for our Humus Book. It tells about humus in general and Alphano Humus in particular.

950 Whitehall Building, New York City

DO YOU KNOW VERMINE?

John Lewis Childs, Flowerfield, N. Y., writes:—
"I suppose you will be glad to know that **VERMINE** is giving excellent satisfaction. Our greenhouse foreman says that it is the only thing that he has ever used that will kill white ants in the benches."

Valentine Burgevin's Sons, Kingston, N. Y., writes:—
"We wish to say that we find **VERMINE** an excellent thing. We used it on a bench planted with Smilax to kill root lice or maggots, which ate the roots, and after two applications our Smilax is taking on new life and has started off to grow."

The Gardner Nursery Company, Osage, Iowa, writes:—
"We will use **VERMINE** on our out-of-door fields of strawberry plants if the inside test continues as satisfactory as it now seems."

W. N. Craig, Brookline, Mass. writes:—
"I have used **VERMINE** and found it effective against root maggots, cut worms, earth worms, ants and other ground pests."

VERMINE is applied one part to four hundred parts of water by thoroughly soaking the soil. It will protect your crops from the ravages of vermin under ground without the slightest injury to vegetation.

$1.00 Per Quart **$3.00 Per Gallon**
(Special prices on large quantities).

31 Union Stock Yards, Chicago

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
$2.75 per 112 lbs.; $12.50 per 560 lbs.

Stumpp & Walter Co.
30-32 Barclay Street, NEW YORK

inch pipe contains 2.44 lbs, of water. One lineal foot of three and one-half inch pipe contains 4.28 lbs. of water, or slightly more than 2 quarts. Therefore one square foot of surface in two inch pipe contains very little more than one-half as much water as one square foot of surface of three and one-half inch pipe. One square foot of three and one-half inch cast-iron pipe surface costs 24¾ cents. One square foot of two inch guaranteed wrought iron pipe surface costs 22½ cents.

With all kinds of houses and for nearly all purposes, the piping should be as near the floor as practicable. There should be no overhead pipes. Hot-water coils should be made up of an equal number of flows and returns. These pipes should be parallel to each other, and should be graded to rise about three-eighths of an inch in 10 feet toward the far end of the coil. The flows should be set on top of the returns, and the accumulating air should be taken out by means of automatic headers, air cocks, or open air pipes at the far end of the coils.

Air traps must be avoided. For control, one valve only is needed for each hot-water coil. This valve should be on the flow connection. In very short coils, however, it is sometimes found necessary to valve both connections, flow and return, to prevent the coils from warming up through the return connection. In steam fitting it is essential to grade the pipes so there will be no water pockets.

Good drainage is required absolutely. The current of entrained water should be with the current of steam and not against it. Piping should be so fitted that expansion may be taken up when possible by a springing pipe. Expansion joints should never be used when expansion may be compensated for in another way. Steam coils are generally constructed of one and one-quarter inch pipe, which size gives .43 square feet of surface per lineal foot.

The Chimney.

One of the most neglected parts of the greenhouse equipment is the chimney. Chimneys of greenhouses are frequently much lower than they should be to produce proper velocity or intensity of draft, and the flues are often smaller than necessary. Height is necessary for velocity of draft and large area of cross section to produce volume or quantity. Intensity of draft alone is not sufficient.

It is possible to consume coal and produce ashes without having accomplished complete combustion in the boiler. The greater part of the coal's value takes the form of gas. If the supply of oxygen induced under the grates is insufficient, the gas formed passes up the chimney unconsumed and is lost.

Do not be misled by the appearance of your fire, your ash pile, and the apparent velocity or intensity of your draft. Many heating boilers are condemned and thrown out, and many systems of piping are blamed for the misdoings of chimneys. The best flue is round. If the flue is square, the effective area is only that of a circle whose diameter is equal to one side of the square. Rectangular flues should not be used.

PEIRCE PAPER FLOWER POT

Replaces clay pot for transferring and delivery of plants without damage.

Under ordinary growing conditions will last two months or more in a greenhouse, making them available for growing many small plants.

Received a Certificate of Merit from the Society of American Florists and Ornamental Horticulturists, Minneapolis, August, 1913.

Only paper pot ever so recognized.

Ask your seedsman or supply house. If they do not keep them, send direct.

Made in Standard sizes, 2 inch to 6 inch inclusive.

Samples furnished free.

The President Talks About Estimates

AN estimate for your house means absolutely nothing unless accompanied by a ***complete detail*** specification, You wouldn't think of buying a pile of coal that was estimated to be ***so many*** tons —you want to know exactly ***how many.*** Buy your greenhouse the same way. Demand that you know absolutely.

Compare specifications. ***Compare*** the firms back of each. Make sure you are getting what you think you are getting. Give our specifications and our price the severest kind of comparison —then you will be ready to talk business. When you are ready, let us know. "We go anywhere for business."

LAWN GRASS

"The Right Seed in The Right Place"

We furnish grass mixtures for dooryards, terraces, lawns, athletic and polo fields, cemeteries, parks, country clubs, country estates.

Repeated laboratory tests on individual mixtures assure superiority of quality and growth.

Experience of over fifty years of successful seed business assures you of correct proportions.

Experiment has shown us that a mixture of the proper grasses is more satisfactory than an individual grass. Why waste your time and money experimenting? Let us furnish what you need.

NOTES ON CULTURE OF FLORISTS' STOCK

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Dahlias

Nearly all the newer varieties that are worth raising grow amazingly fast after being once started in any ordinary greenhouse. In working up a stock of good dahlias from cuttings, the roots should be started into growth from the first week in March and cuttings should not go into the sand before March 25 or after April 15. The roots are started in a bench, or, if there is only a limited number of them, in boxes, planting them somewhat closely together in rich soil. Give them the fullest light and a temperature of not lower than 55 degrees. Of the new growth put forth only the stoutest and brightest looking shoots should be taken for cuttings. Placed in a few inches of well firmed sand with but little bottom heat, afforded good care as to spraying, shading and ventilation, these cuttings will be ready for pots in from two to three weeks. A dahlia cutting well-calloused and beginning to emit roots will make better headway than when left longer in the sand. A cool, light and amply ventilated house will be the place for them after that with plenty of room between the plants. Keep well watered and give them some room from time to time.

Carnations

Much of the success of the carnation grower depends upon proper care being given to the young stock in the earliest stages. The experienced propagator can usually tell almost to a day when his cuttings are fit to be taken out of the sand and potted. The beginner will probably have to lift a plant or two and examine them before commencing to pot. When half an inch, or even less, of root, has been made from the callous, the plants are ready to pot. When possible, have soil and pots near the propagating bench, so as to prevent the drying out of the roots. The dry, cool air and drafty conditions of the ordinary potting shed are not good for the tender young rootlets. For a compost use that which you cut last fall and mixed with manure at the rate of three loads of sod to one of cow manure. In potting, make the soil tolerably firm by pressure of the thumbs, and finish just below the rim of the pot. Coming, as they do, from the shade of the propagating bench, the young plants cannot at first stand full exposure to the sun, so, if the weather is bright, they should be lightly shaded. Newspapers answer the purpose, though a line of muslin about a foot or so above the plants is better. Keep at about 50 degrees at night. Watering is a subject upon which no definite instructions can be given. As a general rule, I like to be able to water the young plants once daily.

Gardenias

To successfully flower gardenias now requires considerable skill. It is at this season more than at any other when gardenias, well forward and full of promise, are very ready to drop their buds on the slightest provocation. There will be little of this trouble where the plants are in a house by themselves and under the close surveillance of an experienced grower. The loss in buds will be small in any house where the maintenance of 65 degrees of heat, with little or no deviation either way, presents no difficulty. A temperature uniform and steadily held, even if a trifle lower or higher than the normal means everything in the perfect development of gardenia blooms. A daily light spraying of foliage and buds serves the two-fold purpose of keeping the plants bright and clean and the atmosphere from becoming too dry. Tempered water, if possible, should be used. This is also the season when injudicious and careless watering has the most telling effect on gardenias. Where the plants are growing in thoroughly drained benches or pots, and where the planting has been done in a correct manner, insuring a stand just right as to base of stem merely touching the soil, there will be less danger from overwatering than from insufficiency of water, either excess being the immediate cause of the dreaded "yellows," the principal bugbear in gardenia culture.

Lilies for Easter

It is usually calculated that it takes six weeks for a lily flower to develop from the time the bud first shows. It can be done in less. I would prefer to have six weeks, yet it can be done in four. To have them right for Easter they should show their buds by the first week in March which will give you plenty of time in which to finish up in a cooler temperature. Where lilies are thus far advanced they will need but little pushing, 60 degrees being high enough for the present. But those that do not show their buds by this time should be given 65 degrees and then gradually raise it to 70 by the end of March. There is no plant that loves syringing more than does a lily, yet no plant resents more quickly an over supply of water at the roots. On a bright day syringe two or three times. Where liquid food is applied with caution it proves of benefit while buds are swelling.

Orchids

Calanthes make a superb orchid for the florist. They produce an abundance of showy flowers that last a long time in perfection. Prepare flats with plenty of crocks over the bottom and on this spread a layer of moss, then fill with sharp sand. The bulbs can be placed in these flats quite close together in a temperature of 65 to 70 degrees at night. When they have made root and top growth they can be potted, one bulb to a 5 or 6-inch pan or three bulbs to an 8 or 9-inch pan. Fill pans one-third full of crocks. A compost of fibrous soil and well dried and decayed cow manure in equal parts, to which may be added some peat and silver sand will grow them well. Pot them firmly, tying the bulbs to short stakes to keep them steady. In their growing season they require a pot and moist house of about 65 degrees and when growth is complete a cooler house will be more beneficial. They are subject to thrips, which must be continually searched for and destroyed by sponging the plants over often.

Mr. Farrell's next notes will be on the following: Care of Chrysanthemums; Young Carnations; Bulbous Stock for [illegible] beds; Fancy-Leaved Caladiums; Starting Cosmos.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur C. Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

The Snow

It may have seemed quite commonplace to mention the snow in these columns, some time back, yet there were some houses that met with disaster just because the snow could not be removed in time. They were mostly very wide houses, houses too wide in fact to suit our taste. We are of the opinion that the wide houses remain handy and easier to work only when the width and length are not carried to extremes. A house 72 ft. wide is as wide as we want any house to be, and we think that any house wider than that cannot be handled without more expense per square foot than the narrower houses. Of course where other flowers or vegetables are grown this may be different, but, with roses, give us houses from 30 to 72 ft. wide. It is very unfortunate that some growers met with heavy losses during the recent heavy fall of snow, and we hope that just such misfortunes will help to keep us prepared to meet any blizzard or heavy snow with the proper equipment to battle with it. Many growers will make the mistake and build their houses too close together. Where space is very limited this may be all right but where there is plenty of ground we would much rather keep the houses far enough apart to allow all the snow that may slide off the roof to fall to the ground instead of piling in between the houses, and gradually climbing up to the ridge, and causing the house to carry a very heavy load. Whenever necessary, shovel all the snow away from the eaves, even though this has to be done at night. It is labor well spent, and may save several thousands of dollars. Where it is not possible to do that, and the houses appear to be sagging under the weight of the snow try and brace them up from the inside, and run the thermometer a few degrees warmer than is customary. This will help melt some of the snow, and will greatly relieve the pressure. Start this as soon as it starts snowing hard so as to keep the glass clear if at all possible.

Shifting the Young Plants

The young plants that had been potted up early in February will now be starting to grow very nicely, and it is best not to wait until they are somewhat pot-bound before shifting them into larger pots, and richer soil. A little more bone meal can be added to this soil, as the plants have the roots now, and they are able to stand a little more feed. A larger portion of manure can also be mixed into the soil, as the days will now be longer and let us hope a little more sunny, and there will be little danger of getting the plants too wet. In repotting make sure that all the space between the ball of the plant and the pot is securely filled with earth so that there will not be any chance of its being left empty. Tip a plant out of a pot once in a while to see how the potting is being done, and note carefully how the soil is firmed. If the plants are potted as they should be the soil will be well packed in the bottom of the pot, and gradually become more loose toward the top. Then note the plant potted wrong where the soil is loosely thrown into the bottom of the pot, and is firmed well at the top, so well in fact that the water applied has a hard time of it getting through to the bottom of the pot. The soil on the surface will always pack down with the watering that the plants will get. Needless to say all soil used for the repotting should be well screened, and never be in lumps. It should also be moist, with no dry spots in it, also free from dry lumps. If the soil becomes too dry before potting, it should be turned over after being sprinkled, and then sprinkled and mixed until it is wet enough to moisten all the way through when it is allowed to lie in a heap a while. After a few hours thus, it will be in excellent shape for potting.

Setting the Plants on the Benches

There are various ways of setting plants on the benches after repotting. The most ordinary way is to set the plants on the bench just as they come. This is very far from being the proper way, as experience will teach us, and a much better way to do is to set the smaller plants to the front of the bench, nearer the glass, setting all the taller and more vigorous plants to the other side, or the north side where the houses run east and west. This will help in more ways than one, as the smaller plants will have the benefit of the additional light, and will have all the show to make something out of themselves, where if they were mixed in among the other plants they would be unable to make any headway. The taller plants will also take more water, so they will make up for what will dry out with the plants along the edge of the bench. It is a pleasure to see a house full of young plants, especially Beauty, that have been well-graded and are growing so that the tops of them all slant like the roof of the house toward the south. Plants set in this way are much easier to handle, and they will be stronger, even though some may be higher than others.

Preparing the Benches

As soon as the old plants are taken from the house, remove some of the soil, say two inches or so. Then scatter plenty of air-slacked lime over the soil and apply a good coat of screened ashes. The object of having the lime in the bench is to keep the worms that may be in the soil from crawling through the ashes into the soil in the pots. This is very important as the plants will not thrive where there are earth worms in the pots. These will soon make the pots sticky, so that the soil they hold will not drain real good, and of course that spells trouble. If you have some plants that seem to be bothered with this, give them some lime water as we have advised in these columns before. This will either kill the worms or it will drive them out of the pots. Sometimes you may wish to remove all the soil from the benches, then it will be necessary to lay some newspapers on the bench before applying the ashes. These papers may seem very thin, but they will hold the ashes well, and keep them from sifting through if they are not disturbed. Of course, if after watering the papers should be disturbed they will all go to pieces, and be of very little account.

Dictamnus

One of the characteristics of the plant material of the herbaceous garden is the marked diversity in specific treatment. Generalization in regard to culture is simply out of question. The absence of rules to go by necessitates close study and the growing intimacy with our subjects deepens our interest. Phlox paniculata, if left longer than three years without enriching the soil, dividing and transplanting, begins deteriorating; the flowers become smaller and the color lacks the original brightness. It is much the same with heleniums, helianthus and rudbeckias. An attempt to treat peonies, funkias, oriental poppies or yuccas in a similar way would result in the opposite. We would never be able to enjoy the stately specimens in which many old gardens take pride. Spirea aruncus, as a rule, is twice as beautiful in its eighth year as a four-year-old plant and I shall never forget the wonderful sight of a gigantic specimen of Heracleum barbatum, about 20 years old, bearing its immense white umbrella-shaped flowers on thick stalks nearly 6 feet high.

The subject of today's notes, Dictamnus fraxinella, also belongs to those species improving with age. Habitual growth as well as the ornamental character of foliage and flower spikes are shown by our illustration, a reproduction of a photograph taken by your correspondent in the hardy plant section of Henry A. Dreer, in ,Riverton, N. J. The specimen, I judge is at least 10 years old. Dictamnus fraxinella is in bloom during June and July. The blossoms are of a very desirable rosy pink, while those of the variety fraxinella alba appear in clear white. Dictamnus fraxinella caucasicus is a form of considerable larger dimension but in color similar to the well known fraxinella; average height from 2½ to 3 feet. As a curious peculiarity, we notice the foliage and flowers during hot weather giving off a fragrant volatile oil, which ignites when a match is applied to it, hence the popular name, "gas plant."

DICTAMNUS FRAXINELLA.

Being highly ornamental border perennials the reason for the present comparative rarity of strong specimens in gardens, I fear, is attributable to frequent transplanting or other detrimental disturbing of their development. The value of matured specimen plants of species distinguished by longevity is self-evident, for they represent treasures well worthy to take pride in. For permanent position the dictamnus varieties require a rich and rather heavy soil and an open sunny exposure. They may be raised from seed or propagated by divisions. For winter protection I have used leaves, the thickness of covering being governed by the climatic conditions.

Richard Rothe

Riverton, N. J.

MASSACHUSETTS AGRICULTURAL COLLEGE.

The short course in floriculture at the Massachusetts Agricultural College has been in progress since the first week in January. Twenty-three students are enrolled, this being the largest registration since the establishment of the course. Other states as well as Massachusetts are represented, two of the students coming from Vermont and one from Ohio. Several members of the class have had considerable experience in greenhouse work while others are beginners. Clark L. Thayer, a graduate of M. A. C., and assistant in the Department of Floriculture, is in charge of the work. Particular attention is given to the chief florists' crops such as roses, carnations, violets, and chrysanthemums. Other subjects which are taken up are greenhouse construction, heating, glazing, and as far as possible practical work is given along with the lectures, including propagation by cuttings, rose grafting, etc. Field trips which are taken to commercial greenhouse establishments of which there are so many in the vicinity of Amherst form one of the features of the course; a few of the ranges which have been visited are those of A. N. Pierson Company of Cromwell, Conn.; Butler & Ullman of Northampton, Mass., and the Montgomery Brothers of Hadley. An annual trip is also taken to Boston to visit markets, stores, commercial ranges, and private estates in that vicinity.

INJURIOUS MULCHING.

Referring to the communication on page 143, in our Jan. 31 issue, wherein a grower admits having top-dressed his roses with a mixture of wood ashes and Clay's fertilizer, and Mr. Ruzicka's comments thereon, Gustav Olson writes as follows:

"It ought to be apparent to anyone qualified to answer such a question that wood ashes (caustic potash) or lime (caustic lime), with any organic fertilizer or manure, as that liberates the ammonia and turns it into gas that burns the roots and if applied as a top-dressing will even burn the foliage."

In a recent issue of the Rural New Yorker, Charles E. Thorne, of the Ohio Experiment Station, writes as follows:

"If manure and lime are mixed and at once plowed under the earth will probably arrest most of the ammonia that may be formed; but if the mixture of manure and lime is exposed to the air there will be considerable escape of ammonia into the atmosphere.

"In the case of ashes, the lime is first in the form of oxide or quicklime, which reverts to the carbonate form on exposure to the atmosphere, so that fresh ashes would have the same effect as quicklime in liberating ammonia. Ground limestone would have less tendency in this direction, but we think the safest plan is to apply all kinds of lime or limestone separately from manure or fertilizers."

BOSTON PARK DEPARTMENT.

One of the first acts of Boston's new executive, Mayor Curley, was to dismiss D. Henry Sullivan, as chairman of the Boston Park and Recreation Commission, and appoint John M. Minton to fill the office until a permanent successor should be appointed and confirmed. The mayor has now named John H. Dillon for the position. Mr. Dillon has been long connected with the department as foreman of the Public Garden. Confirmation by the Civil Service Board is required before Mr. Dillon can assume his position as Chairman of the Commission.

O March that blusters and M[illegible] blows
What color under your foots[illegible]
Beauty you summon from [illegible]
And you are the pathway [illegible]
the rose. —[illegible]

Unionizing the florists?

Organizers of the "Florists' Union of America" have been at work among the florists, gardeners, designers and flower salesmen of New York City, seeking to form a local union and enroll members. We are informed that a meeting has been called for March 9. Just how this new movement will be received by the interests named we do not pretend to foresee. But it is our opinion that there are organizations enough already and what is needed is to bring what we have up to the highest possible efficiency and to promote the welfare of all by a closer co-operation between the existing representative bodies throughout the country. The intrusion of the union organizers will hardly be welcomed by the profession and the proposition will be found a very difficult one to handle according to union methods.

They're at it again

A versatile correspondent of the Philadelphia Public Ledger, philosophizing on the vast difference between the profit on mining coal, which the census says is seven cents per ton gross, and the profit made by the florist on his goods, states that "a big Philadelphia florist" told him that "when he sells the retail man $1.00 worth of flowers the latter charges an average of $3.00 to his customers for them." Every little while this spook continues to be dragged out for scare-crow use on the public. When will our florists learn not to feed the newspaper correspondents with this sort of stupid misrepresentation which is invariably used for the purpose of discrediting the florist business and to make it in the estimation of the public a synonym for reprehensible extortion?

Flowers real and artificial

As the date for the big New York Flower Show draws near, we hear again the customary protests against the displaying of artificial flowers. In connection with the trade exhibitions at the S. A. F. conventions we have been disposed to favor the florist supply dealers, who include much of this material in their general displays, our contention being that these trade exhibitors are of financial value to the Society, being among the largest buyers of space, and that, paying for the privilege as supply dealers, they should be permitted to show any material which they are accustomed to sell to florists, many of whom attend the conventions for the express purpose of seeing the goods that the supply dealers have to offer. But in the case of a public flower show we can see a decided incongruity in exploiting imitation flowers for popular scrutiny and we are heartily in accord with the sentiment that would keep these things out of sight of the public. Artificial flowers have their legitimate uses, and it is no discredit to a supply dealer that they are a material factor in his business, but it is never one of their legitimate uses to take the place of fresh flowers where these can properly be used. In exploiting his business before the public, every florist must, of course, be his own judge as to whether or not he will use these goods in his usual course of business and deck his place with imitation finery and tinselled trash or degrade an undefiled carnation with a coat of paint and then lie to his customers as to the origin of its tawdry green tint, but all this can and should be debarred from the public flower show. The supply dealer will not suffer by the restriction for he has a wealth of beautiful baskets, vases, jardinieres and other flower and plant receptacles and no end of dainty and useful accessories to give a pleasing and graceful finish to floral work, and it is our belief, after a heart-to-heart talk with the most eminent florist supply dealers, that they fully appreciate the situation and are ready to accept the restrictions proposed. In the long run the supply man will lose nothing by thus helping the florist to hold his position with the public as a florist and not as a dealer in cheap imitations and gimcracks.

ROSE GROWERS, ATTENTION.

The American Rose Society, through their committee in conjunction with a committee appointed by the Society of American Florists, now feel ready to launch the establishment of two Experimental Rose Gardens, one in connection with the Department of Agriculture at Washington, D. C., and one at the College of Agriculture at Cornell University, Ithaca, New York; and in this connection they ask the co-operation of rose growers throughout America. In conjunction with this invitation will be found statements from both these institutions, indicating their readiness to proceed with this proposition.

It is proposed that credit shall be given in each garden to all firms contributing to its success, but it is not proposed to make public any statement showing which varieties were contributed by any firm. In this way it is hoped that all rose growers in America may be placed on the same footing without favoritism being shown to any one, or any group of growers.

Rose growers everywhere will be quick to see the advantages likely to spring from these Experimental Gardens. We are fortunate to have one in a district representative of the colder sections while results in the other may be taken as a criterion for the warmer sections of our country. We are fortunate in each case to have the backing of institutional care that shall be impartial in its co-operation and ensure the continuity of effort so essential to an enterprise in which real success can be measured only after a term of years. Furthermore, both institutions are in position to issue bulletins and, for the benefit of all concerned, spread dependable information regarding Roses.

Therefore, the American Rose Society and the Society of American Florists, through their Committees, hereby appeal to the rose growers of America for contributions of all such varieties as they are willing to present for these two gardens. The Committee ask that they be furnished by each firm, with a list of such varieties as can be supplied this spring, such list to be in the hands of the first name here undersigned, not later than March 15. The Committee require good, strong dormant stock where available, otherwise stock well established in not less than 4-inch pots. Dormant stock must be in Washington not later than April 1, and at Ithaca April 15. Roses from pots, not later than May 1 at Washington, May 15 at Cornell. There will be required eighteen each of the bedding types of roses, including the H. Ps., Ts., H. Ts., Bourbons, Chinas, Polyanthas, etc. and of the Rugosas, Sweet Briars, or any of the climbing types, five each.

Delivery instructions will be issued later. It is the earnest desire of the Committee, if possible, to have every firm of rose growers in America represented by plants in these Gardens.

ALEX CUMMING, JR., Chairman Committee American Rose Society, WM. F. GUDE, Chairman Committee Society of American Florists.

UNITED STATES DEPARTMENT OF AGRICULTURE.
Bureau of Plant Industry.
Office of Assistant Chief of Bureau.
Washington, D. C., February 14, 1914.

Mr Alexander Cumming, Jr., Chairman, Committee, American Rose Society.
W. F. Gude, Chairman, Committee, Society American Florists and Ornamental Hortículturists

Dear Sirs: With further reference to the letter of the Acting Secretary to your Committee addressed to Mr. W. F. Gude, under date of August 16, 1913, the ground proposed to be devoted to a rose garden at Arlington Farm in conjunction with your societies, is now available for that purpose and the Bureau of Plant Industry stands ready to push the work of planting as soon as the stock arrives and the weather is suitable.

The objects to be gained from the Department's standpoint are the possibility of researches in the heredity of cultivated roses, and also the adaptability of roses to climatic conditions similar to those of Washington.

Very truly yours,
(Signed) L. C. CORBETT,
Assistant Chief of Bureau.

(Copy.)

NEW YORK STATE COLLEGE OF AGRICULTURE.
Department of Floriculture.
Ithaca, N. Y., February 19, 1914.

Mr. Alexander Cumming, Jr., Chairman, Committee, American Rose Society.
W. F. Gude, Chairman, Committee, Society of American Florists.

Gentlemen: The rose garden area on the grounds of the Department of Floriculture at Cornell is in excellent condition to receive the plants this spring. The Department has the facilities to properly care for the stock immediately upon arrival and to plant as soon as weather conditions permit. The undersigned will give his personal attention to the details of the rose trials. An investigation of the botany, evolution, breeding, etc., of the hybrid Wichuraiana and rambler roses is already in progress. It is proposed to make similar studies as to the adaptability of all classes of roses suitable to the climate of central New York. Particular attention will be given hybrid perpetual, hybrid teas, polyanthas, rugosas, and the hardy climbing types.

Yours truly,
(Signed) A. C. BEAL,
Professor in Charge of Floricultural Investigations.

FRENCH SEEDLINGS INFESTED WITH BROWN-TAIL MOTH NESTS.

Editor HORTICULTURE:

Dear Sir—We are advised, through the office of the Department of Agriculture of the State of New York, of the finding of considerable infestation with brown-tail moth nests containing living larvae in shipments of seedling stock from France, notably from the Angers District, several of these shipments coming from The Franco-American Seedling Company and others through Irving Rouse. A single box has contained as many as seven brown-tail moth nests. This indicates very careless inspection of the material from this quarter of France, and action has been taken to remedy this state of affairs.

All inspectors are strongly urged to make a thorough examination of all seedling stock from France, for it must be true that if such infestation is found in shipments coming to New York, similar infestation is likely to occur wherever such seedling stock is received.

C. L. MARLA
Chairman of Federal Horti

CLUBS AND SOCIETIES

FLORISTS' CLUB OF PHILADELPHIA.

Richard A. Vincent's talk on geraniums was the main feature of the regular monthly meeting. An eloquent discourse of fine interest and beautifully illustrated on the screen, with all the newest and best in the "Flower of the Masses." As Mr. Vincent said, we cannot get away from this good old standby, and in all cottage gardening and village improvement work we must not forget the A. B. C. for the beginner in gardening.

At the next meeting there will be a talk on fertilizers by an expert. A letter of thanks was read from the "seceders." They will now meet at the Poor Richard Club—and thus shake off all affiliation. We are sorry we did not have the Apostle of Affiliation with us to hear this. We can imagine how he would have made the welkin ring out with "E Pluribus Unum."

A splendid chance neglected right at his own door, instead of that far off rainbow he is chasing! The time to say "United we stand," is before we part company. Franklin's words are as true now as they ever were:

"If we don't hang together, we are liable to hang separately."

CONNECTICUT HORTICULTURAL SOCIETY.

Our February 27th meeting was assigned to the carnation. Peter Fisher, of Ellis, Mass., exhibited about fifty blooms of Gorgeous. Patten & Company, of Tewksbury, Mass., showed a vase of their magnificent Princess Dagmar. Theodore Staudt, of Rockville, also exhibited a number of carnations, viz., Dorothy Gordon, Mrs. C. W. Ward, Beacon, Enchantress, White Enchantress, White Wonder, etc. The judges awarded first-class certificates to Gorgeous and Princess Dagmar, and a cultural certificate to the mixed varieties. During the evening Alexander Cumming, Jr., brought in a vase of the new Hadley rose from the Pierson Greenhouses of Cromwell, Conn. The fragrance of these blooms was indescribably sweet. Mr. Cumming also exhibited two vases of carnations from the Pierson Greenhouses which received a cultural certificate. The secretary was instructed to write a letter, extending to the out-of-town exhibitors a most hearty vote of thanks for their excellent display of carnations. The meeting was largely attended and greatly enjoyed by all present.

ALFRED DIXON, Secretary.
Wethersfield, Conn.

OYSTER BAY (N. Y.) HORTICULTURAL SOCIETY.

The regular meeting of the Oyster Bay (N. Y.), Horticultural Society was held on Wed., Feb. 25. A letter was read from the Country Life Permanent Exposition inviting the members to attend the flower show, also stating that Friday, March 6 would be Gardeners' day. All those who were inclined to show were advised to enter at once. The judges made award as follows: J. Duthie, first for cyclamen; John Sororsie, first for narcissus; Frank Petroecia, first for Whitlof chicory. James Duthie received honorable mention for a fine exhibit of Primula malacoides a great improvement on the ordinary type, also for a collection of pink freesia. James Duckham received honorable mention for an excellent pot of Lilium Harrisii, which showed skilful growing and John Sorosie, for some very fine petunias.

James Duthie gave a very interesting talk on cyclamen growing and answered several questions in respect to the cyclamen grub. James Duckham spoke on Lilium growing and John Sorosie spoke on narcissus forcing. John Ingram and Joseph Robinson were accorded a hearty vote of thanks for their work at the dinner. The secretary was also instructed to write to Burnett Bros. and thank them for the music they rendered at the dinner. The executive committee was instructed to arrange for a euchre and dance to be held Easter Monday. President John Ingram gave a very interesting lecture on orchids which was greatly enjoyed. He also exhibited a very interesting collection of cattleyas.

A vote of sympathy was accorded to Mr. and Mrs. Walker on account of the sickness they have had in the family.

James Duthie will give us a lecture on dahlias at the next meeting. Exhibits will be 100 single violets; 12 iris; 1 pot cineraria.

F. KURKMAN, Sec.

NEW BEDFORD HORTICULTURAL SOCIETY.

The regular monthly meeting of the New Bedford Horticultural Society was held Monday evening, March 2. The schedules for the season's shows were completed and referred to the executive committee. The committee plans to have schedules ready for intending exhibitors early in April. An interesting discussion followed concerning the merits and demerits of the freezing process for keeping cut flowers. One member told of having a bunch of paper white narcissus frozen solid into a pitcher of water and when thawed found they were absolutely unharmed, except for the absence of odor, and the flowers kept in fine condition for ten days.

H. A. Jahn exhibited a vase of a seedling carnation from plants which had been absolutely frozen for six days. At the time of a cold snap in January the roof of his carnation house was blown off and the plants exposed to the rigors of a high wind and a temperature of 2 degrees below zero for several hours. The plants remained in a frozen condition for six days and when finally thawed all were black except this one variety. Snow was used in the thawing process. The flowers exhibited were in fine condition, foliage good and stems rigid.

WM. F. TURNER.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

President Theodore Wirth directs me to call a meeting of the Board of Directors of the above society at the Parker House, Boston, March 17. The first session will be called to order promptly at nine o'clock Tuesday morning, the 17th.

President Wirth also directs me to request all State Vice-Presidents and Secretaries of the different Florists' Clubs to communicate with this office at once, stating any business that they would like to have acted upon at the meeting ,of the Board of Directors. President Wirth is especially desirous that all Florists' Clubs make a report to me at once as to what their respective organizations are doing in regard to affiliation.

JOHN YOUNG, Secretary.

TEXAS STATE FLORISTS ORGANIZE.

A call has been issued for the organization of a State Florists' Association for Texas. The call as issued follows:

"We, a representative committee of the Texas florists, hereby issue a call for a meeting at Waco, Texas, Monday and Tuesday, May 4 and 5. All florists, landscape architects and others interested in floriculture commercially are invited and urged to attend this meeting. This organization means a great deal for the florists of the state and it no doubt will be the greatest gathering of florists ever held in the South. Be present and help organize the largest state florists' association in the United States.

"The above action is the result of a thorough canvass by letter of the florists of the state, all of whom are heartily in favor of and urge a state organization. This organization is entirely independent of any local organization that may exist in any of the cities.

"You will be kept posted through the press regarding the details of the meeting. Respectfully yours,

"State Organizing Committee of Texas Florists' Association.
"Robert C. Kerr, State Chairman."

MASSACHUSETTS HORTICULTURAL SOCIETY.

The Spring Flower Show of the Massachusetts Horticultural Society, will be held at Horticultural Hall, Boston, Thursday to Sunday, March 12 to 15 inclusive.

Notable features of this exhibition will be a magnificent display of spring flowering bulbs and Easter plants, together with Indian azaleas, heaths, roses, carnations, and sweet peas.

Many rare and beautiful tropical plants from the private greenhouses of Boston and vicinity will be exhibited and there will be in addition collections of fruit and vegetables.

The interest in dinner table floral decorations warrants the continuance of this feature of the exhibitions of

CLUB AND SOCIETY NOTES.

The next meeting of the Essex Co. (N. J.) Florist Club, March 19th, will be Ladies' Night, with a banquet.

The St. Louis Florists' Club will meet on Thursday, March 12th, in Odd Fellows' Hall. It is going to be an important meeting and Secretary Beneke's notices request all members to be present at 2 o'clock prompt.

The New Haven (Conn.) Horticultural Society has appointed John H. Murray, J. Kydd and R. Paton a committee to prepare plans for biweekly exhibits in competition for a gold medal which has been offered by Lord & Burnham Co.

At the annual meeting of the New England Nurserymen's association held in Hartford, Wednesday, Feb. 25, John R. Barnes of North Main street and junior member of the firm of Barnes Bros., of this place, was elected president of the organization for the ensuing year.

At the recent meeting of the North Shore Horticultural Society, at Manchester, Mass., after the talk on Greenhouse Building by Fred Elder, there was an interesting discussion on the acceleration of circulation in hot-water heating system, etc., by the Castle Circulator, pumps, etc.

The meeting of the New Jersey Floricultural Society at Orange on Monday evening Mar. 2, had a very poor attendance on account of the storm. Vice-president Henry Halbig occupied the chair in the absence of the president. We had quite an interesting meeting, and proceedings were taken on the Annual Dahlia, Fruit and Vegetable Show to be held in October. A prize of $5 was awarded to Max Schneider for a fine specimen of Begonia Glory of Cincinnati and $3 to John Hoffman for a splendid vase of sweet peas.

GEO W. STRANGE, Secy.

The combined meeting of the State Florist Associations of Illinois and Indiana will take place at Danville, Ill., on Tuesday and Wednesday March 10 and 11. The Danville Florists' Club are making big preparations for the entertainment of the visitors. The program is as follows:

Introductory remarks, by H. E. Smith, president Danville Florists' Club.

Address of welcome, by Mayor Lewman.

Response and welcome to the Indiana State Florists' Association, by A. C. Kohlbrand, Chicago.

Response by W. W. Coles, Kokomo, Ind.

President's address, by Charles Loveridge, Peoria, Ill.

Report of secretary, by J. F. Ammann, Edwardsville, Ill.

Report of treasurer, by F. L. Washburn, Bloomington, Ill.

Unfinished business, new business, public exhibition, remarks by visiting Indiana florists, general discussion, nomination and election of officers, adjournment.

THE INTERNATIONAL FLOWER SHOW AT NEW YORK.

The perfecting of arrangements for the big Flower Show in New York, March 21st to 28th, in the New Grand Central Palace, proceeds apace, and the prospects are that the show will be like its predecessor, an immense success.

At the last meeting of the committee in charge, contributions of several special prizes were reported. Silver cups, valued at $75 each, have been offered by the following hotels in New York: The Ritz-Carlton, McAlpin, Biltmore, Vanderbilt, Plaza, Waldorf-Astoria, St. Regis, and Sherry's. Mrs. H. Clay Frick and Mrs. C. F. Seuff have contributed cups valued at $100 each. Mrs. Stuyvesant Fish and Mrs. C. F. Hoffman have offered cups valued at $50 each. The latter four cups were donated through the solicitation of Mrs. Hoffman and the International Garden Club. Samuel Thorne offers a cup valued at $50 and W. T. Carrington a cup valued at $75. An anonymous member of the Horticultural Society of New York offers a cup valued at $25, and H. H. Charles offers a cup valued at $50. Joseph A. Manda of West Orange, N. J., has been appointed manager of the show. George V. Nash, C. H. Totty, and W. A. Manda have been appointed a committee on lectures.

Among the important features of the show will be an orange grove in fruit, and a most complete Japanese garden, both staged by retailers. The Ladies' Orchestra, which was a feature of last year's show, has been engaged for the show this year.

To date upward of $12,000 worth of Trade Exhibition space has been sold, and about $3,000 worth of space has been taken up in the Souvenir Program. Intending exhibitors should lose no time in taking up locations as there are still a few choice positions available.

J. H. PEPPER
Chairman of Publicity Committee.

The Additional Preliminary Schedule in the Plant and Cut Flower Sections of the International Flower Show, which has just been received, tabulates a large number of tempting premiums for miscellaneous cut flowers, table decorations, winter flowering sweet peas, carnations, orchids, roses, as well as additional plant premiums, in separate classes for commercial and private growers. All who are interested can have a copy by writing to the secretary, John Young, 53 W. Twenty-eighth street, New York City. The prizes are very liberal and will be captured by somebody; why not you?

I wish to call attention to the terms and conditions by which trade tickets may be bought for the coming International Flower Show, to be held in New York, March 21-28, 1914.

Tickets in blocks of 25 to 100 may be purchased with the words "Compliments of" and then your firm name inserted, at the rate of twenty-five cents each. In blocks of 100 or more similarly worded, the price will be $20.00 per hundred. The sale becomes absolute; the price is net, and there will be no rebate for unused tickets; tickets are to be paid for when received by the purchaser.

As a great many orders are being received for these tickets, at the present time, we wish that all who desire such tickets would, to avoid any disappointment or delay, kindly let me know immediately how many tickets they want.

JOHN YOUNG, Sec.

PUBLICATIONS RECEIVED.

Success With Hens, by Robert Joos. Poultry raising is receiving a lot of attention these days, and deservedly; for this "billion dollar industry" is an important one, ranking next to corn in the United States census report of land products. This book, just published by Forbes & Co., Chicago, at the very liberal price of $1.00, will do much to assist anyone who wishes to undertake poultry raising in its various branches with a view to making it a success and profitable. The fifty-five chapters give full directions for the hatching and brooding of chickens, incubation, feeding and housing, increasing the egg supply, cure of diseases, the marketing of eggs and fowls and everything pertaining to the care of hens. Nothing is given but the best methods and only those which have been proved by the experience of successful poultry keepers. The small and large poultryman, the beginner and the experienced, will find this book indispensable. It will reduce losses and increase profits. It is inspiring, practical and up-to-date.

The Back Yard Farmer, by J. Willard Bolte. Published by Forbes & Co., Chicago, Ill. This is more than a "backyard" manual; it embraces in its contents the whys and wherefores, the ways and means of both front and back yards, the windows and the piazza. It is full of enticing informa-

The Service Bureau
OF THE
National Association Of Gardeners

Is maintained for the purpose of providing opportunities for efficient and ambitious men engaged in the profession of gardening.
This department of the Association is at the disposal of those who may require the services of capable superintendents, gardeners or assistant gardeners. Address

M. C. EBEL, Secretary - - - Madison, N. J.
NATIONAL ASSOCIATION OF GARDENERS

tion given in very concise and effective style. The seventy-five chapters of this useful book give complete and reliable directions for the best cultivation of vegetables, fruit and flowers, the management of poultry and pets, the proper care of the lawn, vines and shade trees, and discuss everything pertaining to the out-doors of the suburban, village or country home. This would be an excellent book to present as a premium at a local flower show or fair. In appreciative hands it would make business for florist, nurseryman or seedsman. The author, who is a practical gardener and an authority on the subject, was for several years a member of the faculty of two state agricultural colleges and possesses the ability to write in a clear and entertaining style. His book will be treasured by every person fortunate enough to possess a garden spot.

Alma's Junior Year, by Louise M. Breifenbach. Another addition to the popular Hadley Hall series, published by The Page Company, Boston. Not horticultural but redolent of country life and rural pastimes and well adapted as a gift for any girl in her 'teens and sure to be popular with such. Price, $1.50 net.

Miss Billy—Married; by Eleanor H. Porter, author of Pollyanna, the "Glad Book." Like the Glad Book, this new comer is destined to popularity from the start. "Miss Billy" is a character full of the "go" which makes heroines fascinating and very real. There is not one dull or weak page in the book. The Page Company, Boston. Price, $1.40, post paid.

"Tree Talk" for February, 1914, is a very interesting and useful number. This periodical, published by The Frost & Bartlett Co., Stamford, Conn., is devoted to the planting, care and treatment of trees, and landscape forestry in general.

The Rhode Island Experiment Station Extension Department has issued two bulletins—one on How to Build Hotbeds and Coldframes, the other on Sweet Pea Culture. Both are practical and will be appreciated by growers. Copies may be obtained free by addressing the Extension Department, R. I. State College, Kingston, R. I.

Bulletin No. 11, of the American Association of Park Superintendents, is a very useful issue, treating on Insects Injurious to Shade and Ornamental Trees. Two full-page color plates of the Gypsy and Brown Tail Moths, published by the New York State Department of Agriculture, are inserted. All the serious pests are listed, giving the time of their activity, their food, remedy, time of treatment, etc.

Botany, by E. Brucker. A useful addition to the "Threshold of Science" series, published by Doubleday, Page & Co., Garden City, N. Y.

Someone has said that "if we were occasional visitors to the earth, we would never come without a guidebook to the wonders and beauties of tree, and flower, and shrub." This book would meet such a demand, for its forty-two chapters unfold the fascinating story of plant life. There are 202 pages, 235 illustrations, a classified table, and an index. It is simply and non-technically written for the person who says: "I wish I knew." Price, 50c. net.

The "JOY" BLACKBERRY

brings joy to all who grow, sell, or eat it. It is immensely profitable to the market grower, and "a joy forever" to the amateur gardener. The canes are of ironclad hardihood and need no staking. They yield heavily, all the canes being literally loaded with fruit every year. I have tested this berry for several years, and am willing to stake my reputation upon it. In the winter of 1911-12 every Blackberry in my trial grounds was damaged more or less except the Joy which came through with every bud and terminal in perfect condition.

Grow This Berry. It is Hardy and Wonderfully Productive

JOY Blackberries are coal black, and large, almost as thick through as they are long. In luscious flavor they surpass by far all other Blackberries I have ever grown. In my long experience with this berry its canes have never been affected, even slightly, by orange rust or other fungus disease, and I believe it is immune to them.

A full assortment of Strawberries, Raspberries, Blackberries, Grapes, Currants, Gooseberries, Garden Roots, Hardy Perennial Plants, Shrubs and Vines, Evergreen and Shade Trees, Roses, Hedge Plants, etc. Illustrated descriptive catalog replete with cultural instructions, free to everybody. Established 1878. 200 acres. Quality unsurpassed. Prices low.

M. Herb, Naples, Italy.—Wholesale Catalogue of Seeds, 1913-14. Printed in three languages—English, German and French. Many promising novelties are presented in this catalogue.

Peacock Dahlia Farms, Berlin, N. J.—Illustrated Catalogue of "The World's Best Dahlias, New Creations and Old Friends. Handsomely illustrated and a very comprehensive list.

Holm & Olson, Inc., St. Paul, Minn.—Creating Your Landscape. A real live book, compiled and illustrated in a manner to inspire the home and garden enthusiast. Illustrations and type in two colors.

A. C. Kendel, Cleveland, Ohio.—Kendel's Seeds, Plants and Bulbs. A feature of this catalogue is the use exclusively of fine wood engravings as illustrations. The present is Kendel's 75th year in the seed business.

Framingham Nurseries, Framingham, Mass., W. B. Whittier & Co., Framingham, Mass.—1914 Trade Price List for Nurserymen, Dealers, Florists and Landscape Architects Only, Spring 1914. A business publication without frills.

Blue Hills Nurseries, W. W. Hunt & Co., props., Hartford, Conn.—General Spring Catalogue of Ornamental and Fruit Trees, Shrubs, Hardy Perennials, Greenhouse Plants, etc. A very tasteful catalogue handsomely illustrated, pocket style.

Frederick W. Ebele, Albany, N. Y.—Seed Annual for 1914. A model catalogue well arranged and well-printed. The cover in soft grey tint is adorned in front with a fine illustration of Sweet Scabious and on the back with a lawn and garden view.

Stumpp & Walter Co., New York City.—General Spring Catalogue for 1914. Asters and Shirley Poppies are shown in brilliant tints on front and back cover pages, respectively. A comprehensive publication, including a tempting list of novelties.

Chamberlain & Gage, Wellesley, Mass.—Catalogue of Gladiolus Bulbs for 1914. An interesting and instructive catalogue, with a list which represents the advanced gladiolus varieties strictly up-to-date. A reliable guide to the gladiolus lover.

Old Town Nurseries, M. P. Haendler, Proprietor, South Natick, Mass.—Spring Catalogue of Deciduous and Evergreen Trees and Shrubs, Hardy Perennials, etc. A very creditable presentation of the good things offered by this rising young establishment.

Peter Henderson & Co., New York City.—Henderson's Farmers' Manual, 1914. This is a very attractive special catalogue devoted to grass mixtures for pasture and hayfield, corn, root crops, potatoes, clover, oats and other farm seeds. Rural landscapes in colors adorn the cover pages.

Palisades Nurseries, Sparkill, N. Y.—A beautiful catalogue, all right, with inspiring cover pictures and lots of news inside about new, rare and meritorious hardy plants. This is one of the catalogues that talks direct to the people and makes enthusiastic customers for the progressive garden trade. Wholesale list accompanies it; send for a copy.

New England Nurseries Co., Bedford, Mass.—Wholesale Price List for Nurserymen, Florists and Dealers, 1914 Spring Edition. A fine selection of hardy ornamentals and fruit trees and herbaceous perennials. Also general catalogue of Bedford grown hardy material. A very useful manual freely illustrated and attractive. Among the special features of the contents are the following lists: Trees and plants furnishing food for birds; plants appropriate for rock gardens; suggestive planting schemes and planting plans for small grounds; the best trees and shrubs for seashore planting; plants useful for ground covering.

R. Vincent, Jr., & Sons Co., White Marsh, Md.—An unique production, the sensation of the year in catalogues. It is really a beautiful album. Each page displays one or several geranium portraits, life size and in colors strikingly natural, also many general garden views in realistic color effect. Printed on heavy coated paper, these pictures show up splendidly. As to varieties described Messrs. Vincent has certainly given us the last word in geranium improvement. The expense of this publication must have been very heavy but we have no doubt Messrs. Vincents' courage will be fully recompensed and their reputation as the premier geranium house on the American continent still further assured by the enterprise thus displayed.

FIRST AID TO CANNA SELECTION

There are so many different varieties of Cannas nowadays that it is no small thing to know what kind to order.
Here are a few of the better sorts that we recommend, in Pinks, Oranges and Yellow. Their arrangement in sizes will help you. **Quality Considered** no one can beat us in price.

(Height Varies with Climate and Care)

	SHADES OF PINK	10	100	1000

SEED TRADE

A Dubious Outlook.

Severe stormy weather extending over several weeks has had a very bad effect on the seed trade of the country, even in the South. It has undoubtedly greatly retarded counter trade and from information we have has been a severe blow to the mail order trade.

Somebody has described an optimist as a man at 12 o'clock at night who has dined and wined until he is in a very happy frame of mind; the pessimist is the same man the next morning. While we do not wish to be the pessimist, it is often best to face facts, and the trade as a rule has learned that business once lost through bad weather, or otherwise, is rarely recovered that season. For that reason we are inclined to believe that the total result of this year's seed business is very liable to be disappointing. Should it prove otherwise, we shall be among the first to congratulate the trade.

Troubles of the Pea Growers and Dealers.

In our last Seed Trade Notes we called attention to complaints of the seed growers, especially the growers of peas, because orders came very slowly, only after much strenuous effort, and in greatly reduced volume as compared to the last five or six years. Many believed at that time that as the season drew to a close, buyers would be more free in placing their orders, but such information as reaches us does not sustain this hope, and so far as we are able to estimate the situation, there has been very little increase in the business of the pea seed growers during the past few weeks. Both seedsmen and canners are heavily overstocked and will not be able to dispose of stocks on hand this year. Many are offering peas at prices from $1 to $1.50 per bushel, less than they cost, to unload, without any very satisfactory results. The fact is that nearly everybody has enough and more than enough, and under such circumstances price cutting is not a very effective means of securing business. People will not buy when they are already overstocked.

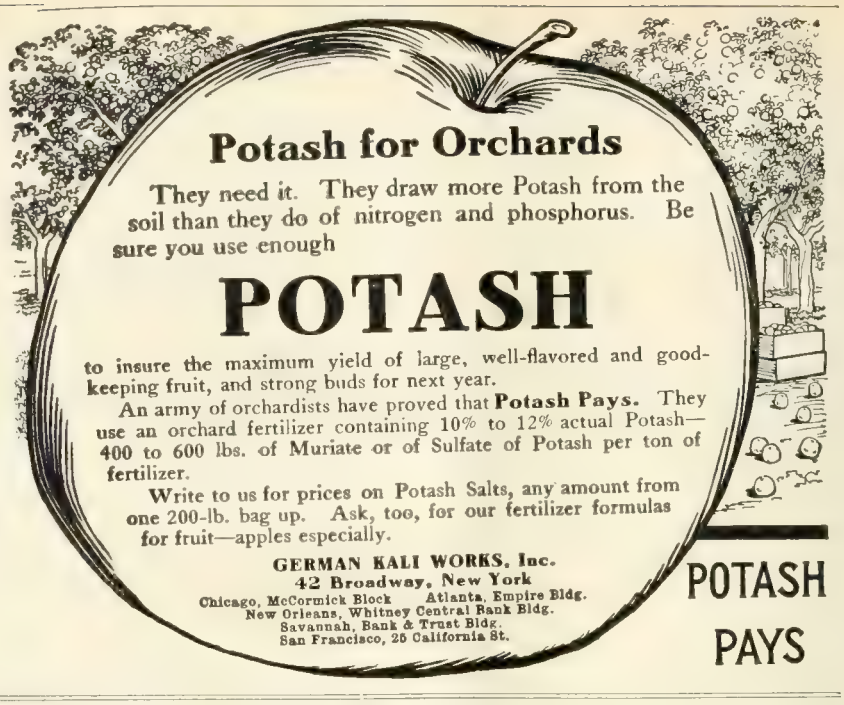
Price Cutting.

As pointed out in previous notes, many growers believed that the trouble could be overcome by cutting prices, and they proceeded forthwith to do so. While those who cut the deepest may have booked a small amount of business they would not otherwise have secured, they have certainly not done enough more to justify the losses that the lower prices will entail. We should judge by the information that reaches us that orders were booked at a great variety of prices—sometimes by the same grower, his chief aim being to get the business and if one price did not draw it, try another until they found a level that was satisfactory to the buyer. We are wondering if the lowest prices and the latest orders booked will be on the same terms and at the same figures as those booked early in the season, and if not, how the growers will square themselves with their early buyers.

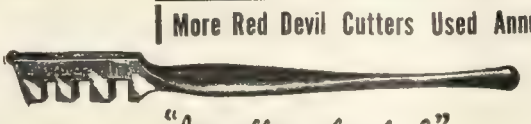
It is needless to say that the canners were not slow in appreciating the difficulties of the seed growers, and played them against each other to their own advantage. It seems to have been all around an unfortunate situation, but we are optimists enough to believe that like every other problem this will be solved in due time, altho' in the solution it is not unlikely that some of those in the business will find it congenial to seek some other occupation.

A Hot Place in June.

We hear from different correspondents that the third week in June is one of the warmest in the entire year in Washington, and those thoroughly familiar with the climate suggest that if the convention could be held a week earlier than usual, the seedsmen would escape this intensely warm weather. Anyone who has experienced the real hot weather in Washington need not be told what purgatory is like, as it is certainly a most excellent imitation, if a description of the real place is to be relied upon.



This is just a suggestion, which may or may not receive consideration by the officers of the American Seed Trade Association.



Bean Cunning.

Beans are still ruling very high, and many items are not procurable now at any price, yet we venture a prediction that by April 1 offers will begin to appear of varieties which now have disappeared from the map. There never has been a year when any item was so scarce that somebody did not have it to offer late in the season. Many of these offers, of course, come too late to be of any service, and generally are occasioned by the high prices ruling. If prices were normal, the quantities offered, being small, would be carried over, as holders would not take the trouble to offer. However, about the time that the ground hog emerges to take another look at his shadow, we may expect to find such varieties as Black Valentines, Burpee's Stringless, Horticultural Dwarf, Late Refugee, Round Pod Kidney Wax, Curries' Rust Proof and Wardwell's Kidney Wax on surplus lists, although quantities will undoubtedly be very small. Many will have an old stocking that they will dig up surpluses from and these will be quoted at varying prices, according to the desire of the dealer to dispose of them.

Next Canners' Convention.

The discussion as to the place for the next Canners' Convention is proceeding and a referendum vote has been ordered of the members of the three Associations which make up the annual Canners' Convention. Doubtless many have favored San Francisco, under the impression that they would be enabled to attend the convention and also see the exposition, all under one trip, and while the exposition officials have stated positively that the exposition would be open on Feb. 20 and that all exhibits would be in place at that date, it is a simple-minded person who will accept this statement at its face value; not that anyone doubts the good faith of the exposition officials and their intention to make good, but no exposition ever

A KUT IN KANNAS

KING HUMBERT, $1.75 per 100; $15.00 per 1000

WILLIAM SAUNDERS. 3½ feet. 60 cts. per doz.; $4.75 per 100; $45.00 per 1000.

FOR FULL DESCRIPTIONS SEE OUR CATALOGUE—MAILED FREE.

We are the largest handlers of Cannas in the world. Our prices on Cannas will bear comparison with any house in the Canna business.

Our Cannas are true to name—two and three and sometimes four eyes—are sound, dormant, and are packed 250 in a box. Two can be "cleated" together and shipped as one. One box of 250 sold at thousand rate; it is cheaper for you to buy a box of 250 than 200 at 100 rate. Write for special prices on quantities.

If any Cannas are not found here, it may be understood that they are superseded by the foregoing. If selection is left to us we will substitute or send only the best for all purposes.

THE MOST RELIABLE SEEDS.

53 Barclay St. (T-24) **New York, N. Y.**

has yet opened on time, and we are yet to be convinced that this one will be. Consequently, those who expect to see the exposition may as well decide to go at a later date, for it begins to look more and more improbable that the convention will go to California.

Chicago Seed Notes.

Chicago mail this week is bringing the inevitable free seed packages from the United States Department of Agriculture.

Some of the Chicago seed houses report delay in receiving imported and home-grown stock this week owing to the severe storms in the East.

The continued cold weather and the snow which still lingers prevents any marked change in local sales. Seed packets are about completed and retail seed stores are rapidly getting into readiness for the sudden change to spring, which usually occurs here, and which seldom finds our seedmen napping. Traveling salesmen are reporting good prospects for the coming season, backed up with substantial orders for their respective houses.

A Spencer Watts, president of Hillsdon, Watts, Ltd., Mascot, Sydney, Australia, wholesale seed growers and palm seed exporters, is in Chicago on his first trip to the United States. Mr. Watts has been as far as England twice before in the interest of his firm, and this time combined sight-seeing with business and with Mrs. Watts is making an extensive tour of this country. They use half a million young palms in their local trade in addition to those shipped to long distances, but so far none of the plants have been shipped to America, trade with this country being confined to the exporting of palm seeds.

Notes.

The Annual Convention of the Canadian Seed Growers' Association is being held on Thursday and Friday of this week at Ottawa, Ont.

George C. Watson's annual importation of grass seed for lawns and permanent pasture has arrived on the S. S. Zyldyk at Philadelphia. This is an important item for the dealers in imported grasses in this country, the majority of whom place their orders through Mr. Watson.

Of Interest to Retail Florists

The monthly meeting and dinner of the Retail Florists' Club of Boston was held at the Boston City Club, Tuesday night, March 3, 42 members being present. Pres. Thomas F. Galvin presided. "Efficiency as Applied to the Florist's Trade," was discussed by several members, including Pres. Galvin, Harry Quint, Julius A. Zinn, Samuel Wax, A. S. Caplan and Sec. B. H. Green.

The Chicago Retailers' Association held its regular monthly meeting March 2, at 170 W. Jackson Boul., with about fifty in attendance. This new association was organized for the general betterment of the retailers and the solving of the many difficult problems that confront them in their work. They welcome any of the wholesalers or any others connected with the trade, to exhibit any of their offerings, at any regular meeting. Allie Zeck showed some extra fine butterfly sweet peas, stems 18 inches long and in five shades, which called forth many favorable comments.

CHICAGO NOTES.

Joseph Klimes has opened a retail store to be known as the Crawford Floral Co., at 4227 W. 22nd St.

Although February was very cold a source of gratification to growers was the more than normal amount of sunshine. Precipitation was almost entirely in the form of snow.

The new firm for manufacturing greenhouse material, Ickes-Braun Mill Co., have bought a lot 125 by 243 feet, on Wabausia Ave., near Western Ave., and already have their plant under way. Effort is being made to complete it in six weeks so as to be ready to care for spring business.

At Poehlmann Bros.' department of florists' supplies, the new walking stick baskets are seen. They are, as their name indicates, flower baskets with sharply flaring sides and rather high handle. They are to be carried by wedding parties, etc., and when still the cane which is metal-tipped rests upon the ground, or they can actually be used as walking sticks.

One of the landmarks in Chicago's floral establishments changed hands this week and John F. Kidwell is now in possession of the valuable property at 3530 Michigan Boul., which has been for 31 years known as Muir's and which was purchased by Samuel Muir, one of the pioneers of Chicago.

The ground 100 by 200 feet, contains a store and conservatories. Samuel Muir passed away nine years ago and the business has been carried on by his son, who also has two other stores. Mr. Kidwell has another store, also a large range of greenhouses at Downer's Grove, Ill. When he was a very young man, he learned the flower business from Sam'l Muir, on the very place he has just purchased.

PHILADELPHIA NOTES.

Dr. Peter H. Lane of Chestnut Hill, a member of the Florists' Club of Philadelphia and well known to many members of the craft in other cities from his close intimacy with many of our leading men at Conventions and Vacations and Openings, had the misfortune to slip on the ice on the 2nd inst., during the great blizzard while returning from a professional call. Broken leg. Fracture above the ankle on both bones. Resting easily at the Chestnut Hill Hospital at this writing (the 3rd), and expects to be removed to his home on Bethlehem Pike, Chestnut Hill, on the 10th inst.

The big blizzard seems to have passed over this section without serious damage to glass. We have heard of nothing serious up to this writing (Tuesday). It was reported that Alfred Campbell, Collingdale, had a "cave-in". This proved to be unfounded. All the "cave-in" he had was a part of a boiler chamber which was quickly repaired and did no damage to stock. Robert Crawford, Secane, was also said to have suffered, but that, too, proved unfounded. Here and there some glass blown out at other places; but nothing worth talking about, apparently. More scared than hurt.

Temple, Texas—The Ferndale Greenhouses, formerly owned by Hugh Harris, have been purchased by H. Schroeder.

WASHINGTON NOTES.

G. E. Eckendorf, with Gude Bros. Co. for the past three years, has been given a position as draftsman at the District Building.

The enactment of the eight-hour law for women in the District of Columbia has caused those of the florists who employ female labor to divide up the force into shifts. In one store half the girls come to work at 8.30 and leave at 5.30, while the others come in at 9.15 and leave at 6.15, in each case taking the usual hour for lunch, forty-five minutes of which must be taken away from the premises.

George Cooke, of Connecticut avenue, is filling many demands for novelties. The society folks seem to be getting tired of seeing the same old story at the various functions in the way of floral decorations. It has always been roses and carnations—carnations and roses; the people want to see something else and are willing to pay for it. Mr. Cooke is bringing into vogue the use of cyclamen, orchid-flowering peas, primroses and other small flowers, and he is making good with these combinations.

The Treasury Department has forwarded the following letter to the Collector of Customs of the Port of New York: "The Department duly received your letter of the 26th ultimo, in regard to the method to be adopted for determining what flowering bulbs are entitled to admission free of duty under paragraph 210 of the Tariff Act of Oct. 3, 1913. It appears from an investigation of this matter that there are no means of determining what mother flowering bulbs are, as distinguished from bulbs imported for flowering, either in forcing houses or in the open air. You are accordingly directed to deny free entry under paragraph 210 to bulbs claimed to be mature mother flowering bulbs imported exclusively for propagating purposes unless the invoice specifically indicates which of the bulbs, comprised in any importation, are mature mother flowering bulbs, and unless an affidavit is submitted from the ultimate consignee, stating that the bulbs are imported for propagating purposes and are intended exclusively for such purposes."

Mrs. George H. Cooke, Mrs. Elmer C. Mayberry, Mrs. George C. Shaffer, Mrs. Simmons, Mrs. Edward Niedomanski and Mrs. Stauf, members of the ladies' auxiliary of the Florists' Club of Washington, were the guests last month of the ladies of Baltimore. The trip to Baltimore was made over the electric line on the 11 o'clock car. The day started with a luncheon at Baum's and then the entire party went to Poli's Theatre. Baum's was again visited after the performance. Here a special room had been reserved for the ladies and in their honor the tables were decorated with flowers, and at each plate was a corsage bouquet. The evening was devoted to a bowling match between the ladies of the two cities, with the members of the Florists' and Gardeners' Club of Baltimore sitting on the side lines or joining in the games. The day's entertainment, according to one of the ladies, was such as to cause all to regret that the homeward trip had to be made, and the courtesies of the Baltimoreans will be returned at an early date by the ladies of the National Capital.

Denver, Colo.—The Park Floral Company has won out in the legal fight with the State Land Board over the rental of the property occupied by them. The case has been in the courts for almost three years.

A CORDIAL INVITATION

Obituary

John M. Foss.

John M. Foss, engaged in the florist business in Sharpsburg, Pa., died on Feb. 15, aged 49 years.

James P. Copeland.

J. P. Copeland, proprietor of the Marion Greenhouses, Marion, Ill., died on Feb. 19, after a short illness with pneumonia. The business will be continued by his widow.

Wm. W. Bailey.

Prof. W. W. Bailey of the Botanical Department of Brown University died on Feb. 20, at Providence, R. I., aged 71 years. He was the author of a number of botanical books.

Abel S. Wolfe.

The funeral of Representative Abel S. Wolfe, of Auburn, Mass., was held at his home, Elmwood avenue, Auburn, on March 3. A delegation from the Legislature was present. Mr. Wolfe was president of the State Market Growers' Association.

William A. Sheldrick.

W. A. Sheldrick died at the home of his daughter in Camden, N. J., on Feb. 18, aged 78 years. Mr. Sheldrick has been a resident of the Roslindale section of East Camden for the past 45 years. He retired from the florist business some years ago.

John Hetherington.

John Hetherington, for over forty years identified with the trade in most of the largest cities of the United States, and known to many of the craft, passed away in his 57th year, at Montclair, N. J. Mr. Hetherington was also identified with the Pan American, St. Louis, and Lewis & Clark Expositions. He was buried on Saturday, the 28th of February, at Pequannock, N. J., from the home of his brother, Mr. R. Hetherington.

DUTCH AUCTION STUFF IN ENGLAND.

"Protest" touches a sore spot when he refers to the auction sales of Dutch grown roses, but as a matter of fact the auction sales of all Dutch produce are a source of heartburnings, for all such goods are assuredly grown for the direct purpose of cutting into the general nursery trade. The bulbs, shrubs and roses so sold, are not merely surplus stock, left over after the growers have supplied their wholesale customers in Great Britain, but must be deliberately grown for the purpose. One imagines that there is some sort of organization which collects such goods from the growers and distributes them to various centres.

No one knows where they actually come from. The auctioneer is not concerned as to what the goods really are. His orders are to sell, and sell he does, without in the least worrying whether such plants are true to name or whether they will grow.

Yet after all what can be done? If people will be fooled into buying the rubbish it is their own lookout. Despite the multitude of gardening papers, there are thousands of people who never read them, and who have not the least conception as to what a good plant is really worth. Even people in good circumstances will risk their money if they see a chance of getting plants at a fractional cost.

As a friend remarked, we spend millions on Dreadnoughts to protect our shores, and we leave our ports wide open so that any unscrupulous foreigner may fleece the people.

It is really absurd to think that people do buy these roses and expect something good. Quite recently I saw roses in bundles of six offered on a barrow in London, at 6d. the half dozen. Lady Hillingdon, Gen. McArthur, La Tosca, Melanie Soupert, etc., etc., were on the labels, and the plants were very fair budded stuff to look at. But on the face of it, is it not absurd to think that roses of this class could be offered by a London hawker at the price, unless he filched them, and this is unlikely. Indeed one marvels to think that any grower could work a stock with even the commonest varieties and ship them here to be sold at a penny to twopence each as they are at the sales up and down the country. Yet it is done. How and why is past all understanding. But thank the Lord, these sales will never succeed in squeezing our reliable and old established firms out of business. Some may be affected, but sooner or later, the man in the street will realize that he is making a bad bargain, and will shun the auction rooms and cheap-jack advertisers as he would a pestilence.—*W. A. T., in the Horticultural Trade Journal, London.*

Sheridan, Wyo.—M. E. Leland has leased the greenhouses belonging to the Best Floral Co. and will run them under the title of Glendale Floral Co.

Flower Market Reports

BOSTON The blizzard which visited cities south of us very accommodatingly went to sea without coming to see Boston. After a thrashing rain storm on Sunday, the snow has been disappearing rapidly and there is a springlike tone to the air. Flowers of all kinds are coming forward much more rapidly than the market demands and prices have fallen on everything except American Beauty roses, which still remain very scarce. The supply of Easter lilies is rather light, but there is an abundance of fine callas. Roses are very fine and lots of them, including the newer varieties. Carnations, violets and lily of the valley, plentiful and extra good. Violets are finding a better sale now and quantities of them are seen in corsage use in the shopping streets. Cattleyas are in plentiful supply, but the blooms generally run under size. All bulbous stock is in excessive quantity and selling very cheap. Sweet peas have improved greatly in quality, in the ordinary run and fine Blanche Ferry is extremely popular, holding its own well with the proud Spencers. Hardy ferns are in short supply and of rather poor quality.

BUFFALO Bright sunshine days are bringing in the heaviest supply of the season; there are roses galore, any grade and color, also carnations, lilies, peas, violets and practically every thing along the line and plenty of it. Lilies, which a week ago were a scarce thing at times are seen in regular Easter style. There has been a quietness throughout the whole week. Saturday the bargain sale day was only a slight relief to the wholesaler. Bulbous stock is too plentiful, peas are coming on too heavy and violets have to be forced to sell at any price. The scarcity of Beauties has passed and so has the demand, and this also relates to lily of the valley. Floral work has been light and the accumulation of so much stock has caused the prices to break. It is hoped that the coming week will brighten up things and put the market on a better basis.

CHICAGO The week has brought a decided change in the market. Beginning with the middle of the closing week in February, sales began to fall off and even the Saturday trade did not show a normal demand. March has had three days so far of very light business and stock is accumulating rapidly. The bright sunshine is increasing the supply which would have been extremely gratifying a short time ago, but which this week is only a burden. The change is felt more keenly in roses because the cut has been so small generally since the holidays. The first Spanish iris was seen this week at Poehlmann Bros., and was cut from their place. Rubrum lilies are also among the latest arrivals in this market. There is no marked change in the amount of bulb stock coming now is the complaints of growers of La Reine tulips, some of whom report only one-tenth of their bulbs as flowering. Formosum lilies, immense in size and carried on five-foot stems are offered. Carnations can be had at all prices and all qualities. Very long-stemmed Beauties remain about the same, but there are more of the medium lengths. White carnations, as has been their custom heretofore, are shortening in supply as the green dye season approaches. Perhaps it is a natural revolt from an unnatural color.

PHILADELPHIA Monday and Tuesday of last week were pretty good business days but with the advent of Ash Wednesday the buyers seemed to "get cold feet" and quit buying except for hand-to-mouth absolute wants. The natural consequence was an accumulation of flowers, a drop in prices all along the line and a poor clean-up Saturday. Today, Monday, as we write, a blizzard is raging and few deliveries have come in on account of stoppage of traffic on the railroads, so orders are being filled from Saturday's flowers—that is, what few orders there are. Monday is usually one of the best days of the week for business, but it is a negligible quantity today. Taking the situation as a whole things are not as good as they might be but everybody is trying to be cheerful and no doubt will pull through somehow. All flowers are now plentiful and of very fine quality, so that all we need now is better weather and forget about Lent, both of which desiderations are sure to happen very soon. "God rest ye, merry gentlemen; let nothing you dismay."

ST. LOUIS The market was in such a condition the last week that all the wholesalers were loaded up [illegible] guards with all seasonable [illegible] daily and at prices very low in all grades. Violets and sweet peas were so plentiful that not half of them were

(Continued [illegible])

KILLARNEY QUEEN

From our New York Store can be obtained some exceptionally choice Killarney Queen and Indiana at $6.00, $8.00, $10.00 and $12.00 per 100. A few extra long Queen at $15.00 per 100.

Plenty of other good Roses: Tafts, Sunbursts, Pink and White Killarneys, Wards, Beauties, etc.

Facilities for shipping from New York to Montreal are unusually good, and we would be very glad to have our Montreal Customers bear this in mind and order from our New York Store.

Flower Market Reports

(Continued from page 345)

disposed of. The same may be said of carnations; they, too, came in so plentifully that they sold as low as $10 in 1000 lots for good grades. Roses are now on crop and are bound to be a glut by the end of the week. All bulb stock is down in price as this, too, is more than the demand calls for. It looks as though the market will be even more glutted, as the week opened bright and cold. The first few days in Lent must have hurt some, as the leading retailers say that about the only thing doing is funeral work.

WASHINGTON Washington during the past week has been favored with various kinds of weather, which alternately increased and decreased the supply of flowers of all varieties. Prices have dropped considerably, especially in the case of carnations. The lower grades of roses fell in value, but the better grades have retained their price and are in good demand. American Beauty roses have been somewhat more plentiful, and the Richmonds have been stiffening up and coming along in much better condition. The price on bulbous stock has also dropped materially. Gardenias are in heavier supply and while A1 stock continues to bring as high as $3 per dozen, the other grades can be had for considerably less. The writer's attention was called to some exceedingly fine home-grown lilacs which, when placed beside the foreign grown article, made the latter look poor. Not only are the flowers and the foliage better, but the cost to produce them is much less.

PERSONAL.

E. S. Miller of Wading River, N. Y., has got home from an extended transcontinental trip.

N. F. McCarthy of Boston is in Bermuda eating strawberries and watching the iridescent fishes. Lucky Nick.

Charles Schroeder will dispose of his greenhouse porperty in Edinburg, N. Y., and locate in Florence, S. C., where he has secured a position.

NEW CORPORATIONS.

Charlotte, N. C.—Scholtz, The Florist, capital stock $50,000.

Chicago, Ill.—Henry W. Bruns, Inc., seedsmen. Capital stock, $10,000. Incorporators, H. W. Bruns, Daniel Zinser and Rudolph Bollinger.

Syracuse, N. Y.—The Pierce-Christian company, general florist business, $10,000; Harold S. Pierce, Syracuse; Harold H. Will and Thomas J. Christian, Syracuse.

A PIERSON U-BAR GREENHOUSE AT PITTSBURGH.

Our cover illustration this week shows an interior view of a greenhouse erected by the Pierson U-Bar Company for Mr. H. A. Heinz. Mr. Heinz started with a palm house and two wings arranged after the style here shown, and the results have been so pleasing that he has enlarged his range several times since.

As shown in the picture, the effect is that of an outdoor garden plot; the paths are grass and the lawn mower is in regular use. Efforts like this, where the gardener throws in a lot of individuality and puts his best into his work, are what help to place a gardener in the recognized front rank of his profession.

DURING RECESS.

The Monmouth County Horticultural Society held its tenth annual banquet at Red Bank, N. J., on Wednesday evening Feb. 25. The dinner was of the usual fine character served at such affairs, and was followed by an eloquent speech by Howard R. Cruse of Jersey City. Short addresses were also made by some of the guests. Songs were sung by Percy Hicks and William Dowlen and there were also piano selections. An innovation of the banquet was the presence of women among the diners. This will probably be made a permanent feature.

The Horticultural Club of Boston met at the Parker House on Wednesday evening, March 4. Guests were Chairman Minton, of the Boston Park Commission; Secretary Wheeler, of the Massachusetts Board of Agriculture, and Mr. Rogers, of the Gypsy Moth Commission. The moth problems and 1914 convention matters were subjects discussed.

VISITORS' REGISTER.

Philadelphia—Percy B. Rigby, Pennock-Meehan Co., N. Y. City; Henry Wild, Greenwich, Conn.; E. G. Hill, Richmond, Ind.

St. Louis—S. S. Skidelsky, Philadelphia; C. E. Pruner, representing Poehlmann Bros., Chicago; Mr. Lavine representing Lion & Co., New York.

Washington, D. C.—H. F. Michell, Joseph Goudy and D. T. Connor, Philadelphia; R. T. Beers, representing A. N. Pierson, Inc., Cromwell, Conn.; Adolph Farenwald, Roslyn, Pa.

Chicago—Mr. and Mrs A. Spencer Watts, Mascot, Sydney, Australia; Fred Burki & Son, Pittsburgh, Pa.; Wm. Dittman, Newcastle, Ind.; Sam. Seligman, New York; S. W. Pike, St. Charles, Ill.

Boston—Albert De Smet, Mont St. Armand, Gand, Belgium; G. S. Hay, representing H. A. Dreer, Phila., Pa.; Chas. Schwake, New York; Wm. Jurgens, Newport, R. I.; A. Kakuda, representing Yokohama Nursery Co., New York; O. D. Irwin, representing the Benedict Mfg. Co., New York; W. H. DeGraaf, Leiden, Holland.

The list of exhibitors for the Horticulture, Arboriculture and Forestry Section of the Anglo-American Exhibition includes the names of many of the foremost British firms. The only American participant thus far reported is W. A. Mande of South Orange, N. J., who will exhibit American specialties, including dahlias, cannas, roses and cacti.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

COCOANUT FIBRE SOIL

20th Century Plant Food Co., Beverly, Mass.
For page see List of Advertisers.

CYCLAMENS

200,000 GIANT FLOWERING CYCLAMEN. For the last 16 years we have selected three-fourths of our seed-bearing cyclamen stock before Xmas, to assure early blooming plants, and claim the finest commercial strain in this country; no fizzle of many so-called English varieties. Our aim is strong growers that don't have to be petted to be grown into a choice salable plant—a well built, five-petaled flower (many of them at one time), with well marked foliage; every plant an ideal, a prize winner. Received first prize at the Cleveland show and first and second at Toledo, early November, when blooming cyclamen were scarce.

STRONG AUGUST SOWN SEEDLINGS, once transplanted, $3.50 per 100; $30.00 per 1000. Cash with order. Cultural directions with all orders. C. WINTERICH, Cyclamen Specialist, Defiance, O.

Thomas Roland, Nahant, Mass.
For page see List of Advertisers.

DAHLIAS

Dahlias at greatly reduced prices for 1914. Send for wholesale list. Order early. J. L. MOORE, Northboro, Mass.

Dahlias. 800,000 Clumps to offer. Send your list of wants to the Largest Dahlia Grower in the World. J. K. ALEXANDER, "The Dahlia King," East Bridgewater, Mass.

Dahlias—2500 field clumps, latest varieties, cheap for cash; or what have you to exchange? GEO. H. WALKER, Dahlia Expert, North Dighton, Mass.

HOW TO CONTROL MOTH PESTS.

The depredations of the gypsy and the brown-tail moths on the fruit and shade trees of New England, have not been so serious during the past season as in previous years. Diseases and introduced parasites have attacked the caterpillars of these moths and have caused at least a temporary check on two most dangerous pests. However, certain new territory has been infested and the Department of Agriculture still considers it of vital importance that aggressive measures be continued to control these dangerous insects. It is therefore now issuing Farmers' Bulletin No. 564, entitled "The Gypsy Moth and the Brown-Tail Moth, With Suggestions for Their Control."

Each of the New England States and New York are carrying on work for the control of these insects. The organization varies, as between the States, owing to differences in local conditions, but the same general methods of work are employed. Particular information concerning local conditions may be obtained by communicating with the State officials in charge. Their addresses are as follows:

Maj. E. E. Philbrook, Portland, Me.
Prof. W. C. O'Kane, Durham, N. H.
Mr. E. S. Brigham, St. Albans, Vt.
Prof. F. W. Rane, 6 Beacon street, Boston, Mass.
Prof. A. E. Stene, Kingston, R. I.
Dr. W. E. Britton, New Haven, Conn.
Mr. Geo. G. Atwood, Albany, N. Y.

At recent pomological meetings samples of a new apple, the Virginia Beauty, have been exhibited and greatly admired by those fruit growers who are interested in finding a winter apple that is red in color and hardy enough to stand the northern winters. The new apple is about the size of the Jonathan, resembling it some in shape and color, but has a somewhat different, but fine, flavor. Its season is about two months later than the Jonathan.

IN THE GREENHOUSE
The best fertilizer for greenhouse or outdoor use, for carnations, roses, chrysanthemums and violets, or potted plants, is Sheep Manure, and to be certain of the best — full strength — get

SHEEP'S HEAD
SHEEP MANURE
Guaranteed high percentage of nitrogen, phosphoric acid and potash. Weed seeds killed. Will not cause black spot. Hasten maturity, quicken the budding and stiffen the stems. Write for booklet and prices.

FARMERS' WEEK AT AMHERST.

The Massachusetts Agricultural College will hold the Sixth Annual Farmers' Week, March 16 to 20, 1914. A very comprehensive bulletin has been issued giving full details. Floriculture is assigned to Wednesday, March 18. There will be addresses by A. H. Nehrling on "Opportunities in Floriculture" and on "Glass Houses in the Middle West"; Harry A. Bunyard on "Professional Horticulture"; T. D. Hatfield on "Raising Plants from Seed"; "Commercial Rose Culture" by Wm. H. Elliott; "Out-door Rose Culture," by Eber Holmes; "Methods of Improving Plants," by E. J. Canning. Forestry and market gardening are on the list for Thursday, March 19. Lectures on the latter subject will be given by A. H. Smith, G. W. Trull, J. C. Trull and David Lumsden.

Galva, Ia.—The green houses of A. G. Larson have been purchased by G. F. Pearce. Mr. Larson having decided to go into farming in Minnesota.

WHY ALPHANO HUMUS

Makes Lawns, Trees and Shrubs Thrive

BRIEFLY, because it's nature's natural balanced ration. It gives to the soil in ideal proportions just those elements most **helpful in inducing not only quick growth, but sturdy growth.**

For lawns, it has the advantage over barnyard fertilizers of being odorless, **entirely free from weed seeds.** It is stronger and lasts many times longer. Not only does Alphano build up the soil in a natural way, but keeps it moist because of its power to hold 14 times its own weight in water. For this reason, if for no other, you can at once see what the value of Alphano Humus would be in keeping your grass green during the hot dry months.

With your grass started up as it is in the early spring, it would be out of the question to put on stable manure. Not only would it make mowing impossible, but it would be decidedly unsightly and offensive at just the season when you want it to be spick and span.

With Alphano Humus, however you can put it on at any time because it is in a powdered odorless form and can be raked into the grass and **left there** to nourish the roots. Next year, you won't need to put any on, because it lasts longer than manures or chemical fertilizers. It's lasting qualities is one of the things strongly in its favor.

Before you take our recommendations, perhaps you would like to know more about just what this Alphano Humus is; where it comes from; and the way it is prepared ready for use.

Our Humus Book tells you just those things—and many more. It gives a detailed analysis of exactly what Alphano Humus contains. The illustrations tell their story and letters from users still further add convincement.

5 BAGS for $5

$12 a ton—$8 by the carload.
F. O. B. Alphano, N. J.

We want you to surely feel convinced that it has the merits we claim, before you spend a dollar for it.

Send for the Humus Book.

Alphano Humus Co.

Whitehall Building, New York City

DO YOU KNOW VERMINE?

John Lewis Childs, Flowerfield, N. Y., writes:—

"I suppose you will be glad to know that **VERMINE** is giving excellent satisfaction. Our greenhouse foreman says that it is the only thing that he has ever used that will kill white ants in the benches."

Valentine Burgevin's Sons, Kingston, N. Y., writes:—

"We wish to say that we find **VERMINE** an excellent thing. We used it on a bench planted with Smilax to kill root lice or maggots, which ate the roots, and after two applications our Smilax is taking on new life and has started off to grow."

The Gardner Nursery Company, Osage, Iowa, writes:—

"We will use **VERMINE** on our out-of-door fields of strawberry plants if the inside test continues as satisfactory as it now seems."

W. N. Craig, Brookline, Mass, writes:—

"I have used **VERMINE** and found it effective against root maggots, cut worms, earth worms, ants and other ground pests."

VERMINE is applied one part to four hundred parts of water by thoroughly soaking the soil. It will protect your crops from the ravages of vermin under ground without the slightest injury to vegetation.

$1.00 Per Quart $3.00 Per Gallon

NICOTICIDE

THE

INSECTICIDE

Manufactured by

P. R. Palethorpe Co., Inc.
CLARKSVILLE, TENN.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
$2.75 per 112 lbs.; $12.50 per 560 lbs.

Stumpp & Walter Co.

Athens, Ga.—Georgia State College of Agriculture, one house to cost $12,000 to $15,000.

Boston—The Boston office of Hitchings & Co., has recently closed a contract with John W. Beal, Hanover, Mass., to erect for him, one iron frame greenhouse 61 feet wide and 109 feet long including the erection of the greenhouse, installation of the steam heating system, benches and concrete work. Referring to our report in a recent issue regarding the house being erected for "Montrose Greenhouses,"—this addition is 60x250 and is being erected complete by Hitchings & Company.

FIRES.

Thoroughfare, N. J.—Clement Budd lost his hothouse by fire on the night of Wednesday, February 25.

Edinburg, Ind.—Thomas Woodard's greenhouses and contents were destroyed by fire on Feb. 16th, with a loss of about $4,000.

McKinley, Pa.—Fire from an exploding oil lamp in the greenhouse of Patrick Whalen, Montgomery county, destroyed that structure early on Thursday, February 26, and ruined $3500 worth of flowers being grown for the Easter season. The flames raged so fiercely that the Whalen family, who live on one side of the greenhouse, and the family of John Livesey, who reside on the other side, fled to the street in their night robes. They were cared for by neighbors.

The fire started about 2.30 o'clock and burned for more than an hour. Members of two fire companies, from McKinley and Jenkintown, a mile to the east, realizing the greenhouse could not be saved, worked in the zero weather to protect the Whalen and Livesey homes. One side of the Whalen house was badly scorched.

The greenhouse was 18 by 150 feet.

DREER'S "Riverton Special" Plant Tub

No.	Diam.	Ea.	Doz.	100
10	20 in.	$1.45	$16.00	$130.00
20	18 in.	1.30	14.00	115.00
30	16 in.	1.00	11.25	92.00
40	14 in.	.65	7.00	56.00
50	12 in.	.45	5.00	40.00
60	10 in.	.38	4.00	32.00
70	8 in.	.30	3.50	28.00

Manufactured for us exclusively. The best tub ever introduced. The neatest, lightest and cheapest. Painted green, with electric welded hoops. The four largest sizes have drop handles.
HENRY A. DREER, Seeds, Plants, Bulbs, and Supplies, 714 Chestnut Street, Philadelphia, Pa.

PEIRCE PAPER FLOWER POT
A waterproof paper pot.
Does not fold up or come apart.
Plants in transit retain moisture within the plant ball instead of its being absorbed by the packing, insuring their traveling long distances in perfect condition.
Received a Certificate of Merit from the Society of American Florists and Ornamental Horticulturists, Minneapolis, August, 1913.
Only paper pot ever so recognized.
Ask your seedsman or supply house. If they do not keep them, send direct.

Made in Standard sizes, 2 inch to 6 inch inclusive.
Samples furnished free.

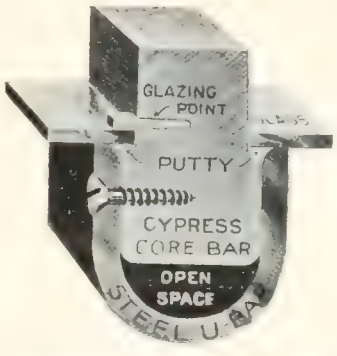
U-Bar Greenhouse Excelling Points

THE nearer your greenhouse comes to duplicating actual outside conditions of light and sunshine—the better will be your results and the easier it will be to secure them. This is just common, common sense. Under ordinary conditions the ordinary greenhouse seems light enough. But it is during the short days of winter that your roses have their hardest time and your vegetables are struggling up their steepest grade. Then it is that sunshine light mean so much to their success.

EXTREME LIGHTNESS is one of the main features that U-Bar houses excel in. Glance at the illustrations on the opposite page—they tell their own convincing story of airy lightness and freedom from heavy construction members.

DURABILITY is another U-Bar excelling point. When you consider the fact that every roof bar is a combination of a cypress core and a galvanized steel U-shaped bar you can at once appreciate how strong and enduring it must be.

The Core Bars are chemically treated against decay.



The Steel U-Bars are heavily galvanized against rust.

The U-Bar protects the core bar against the interior alternate moisture and dryness so destructive. Decay is thus prevented.

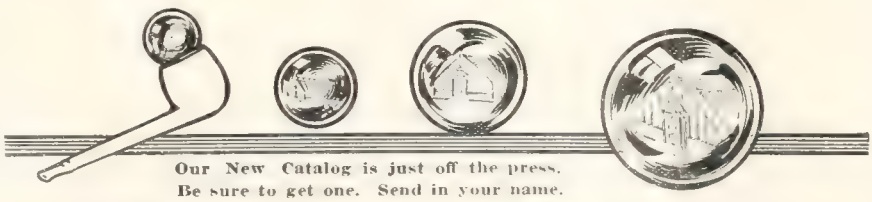
THE RIGITITY of the entire steel frame, combined with the special U-Bar method of securing the glass, reduces breakage to practically nil.

THE ALUMINUM FINISH of all steel parts gives a glistening effect as enduring as it is attractive.

THE CURVED EAVE originated with the U-Bar construction. Other curved eaves may look like it from the outside but from the inside it is quite another story. No other curved eave is built with a U-Bar. None have the freedom from heavy structural members. No other fully protects the wood portion of the bars from moisture and decay. No other so completely takes care of the condensation from dripping.

This is a reproduction of a small portion of the U-Bar, used in the average sized houses. It gives you a clear idea of the cypress core bar and its relation to the U-Bar itself. The glazing method is also plainly shown. The U-Bar construction is patented. We are its sole builders.

THE GARDENER'S SIDE: Ask any gardener what he thinks of the U-Bar construction and invariably he will acknowledge its being the highest type greenhouse built, and will generally say "that if a man cannot grow things successfully in a U-Bar house, he can't grow them in any house."



THE ARCHITECT'S SIDE: The U-Bar construction lends itself to most effective architectural treatment. If this were not so, so large a percentage of our business would not be coming direct from architects, both in this Country and Canada. This is strong endorsement coming as it does from a profession who are in a position to be unbaised judges.

YOUR SIDE: A construction that is so sweepingly endorsed by the gardeners, and recognized for its superiority by the architects, would seem then to meet all the requirements of practicalness and attractiveness.

Using the words of a recent customer, "the U-Bar construction stands in relation to other constructions, quite as the Steinway piano does to other pianos."

PLANS — SPECIFICATIONS — ESTIMATES: We will gladly furnish you with plans, specifications and estimates of any subject in this catalog. Should none of these subjects meet with your requirements, we always stand ready to make special plans to meet your particular needs and ideas. Unless otherwise arranged, such plans and specifications are made entirely without expense to you. So feel free to call upon us.

As a matter of convenience to you we have a simple question blank that calls for the information that we will need to advise you intelligently and to furnish you with plans, specifications and estimates. If we have neglected to send this blank, kindly let us know.

Our New Catalog is just off the press. Be sure to get one. Send in your name.

So much was one of our customers impressed with the extreme film-like construction of his U-Bar houses, that he referred to them as "Bubbles of Glass." It was so happily expressive that it has become "a nickname" for U-Bar greenhouses.

CHRYSANTHEMUMS

New Pompons

GOLDEN CLIMAX. On the order of Quinola, but with foliage that is hard and which will not be subject to mildew. Exhibited at Chicago under the name "Climax." Blooms November 10th to 20th. Extra fine variety for cutting in sprays.

GOLDEN HARVEST. A medium sized variety of the button type. Deep golden yellow, with a tinge of bronze; a color which when finished is similar to Souvenir d'Or when half developed. A color that is very pleasing.

GOLDEN WEST. A trifle larger than Baby, but of similar formation. Rather compact in growth, but an excellent variety for pot plants. When bench grown will produce excellent sprays for cutting.
From 2¼-inch pots: 30c. each, $3.00 per doz.
3 of a variety at the dozen rate.

CELCO. Bright yellow, shading to orange; similar to color of Quinola, but the sprays are not so compact and are ready to cut two weeks earlier, or about November 1st, when dark yellow Pompons are scarce. Medium height. C. S. A. Certificate.
Plants from 2¼-inch pots: 30c. each, $3.00 per doz.

LEOTA. Delicate pink with bright rose reverse, which gives the effective bright center in each bloom if cut a few days before fully developed. Dwarf habit; fine for pot plants. In season October 25th to November 5th. C. S. A. Certificate.
Plants from 2¼-inch pots: 30c. each, $3.00 per doz.

NESCO. Beautiful shade of old rose, flowers about the size of Iva, La Purite and Lodi. Medium height, maturing first week of November.
Plants from 2¼-inch pots: 30c. each, $3.00 per doz.

New Pompon Anemones

AZELDA. (E. D. Smith & Co.) Light pink, with a slight trace of lavender. Ray and disc floret same color, with the exception of the center of the cushion, which is cream color. Single row of lavender ray florets; produces exquisite sprays suitable for any sort of artistic arrangement.
Plants from 2¼ inch pots: 30c. each, $3.00 per doz.

DIANTHA. (E. D. Smith & Co., 1913.) A dwarf compact growing variety that is of the type so desirable for pot plants. It is also an excellent variety to grow for cutting in sprays. The guard petals are white and the center cream color.
Plants from 2¼ inch pots, 20c. each, $2.00 per doz.

LAURITA. (E. D. Smith & Co., 1913.) Bright yellow in color; of a compact dwarf habit. A valuable variety for pot plant culture as a small specimen.
Plants from 2¼-inch pots: 20c. each, $2.00 per doz.

PRINCESS. A seedling from Garza. Pure white, with ray petals, evenly spaced around a large Anemone center of quill petals, slightly touched with the pollen. In our observation, covering three seasons of bloom, it has never failed to show the Anemone center. The flower has good substance, giving a lasting quality as a cut flower. The habit of the plant is good, growing to a medium height and covered with flowers; it is thus an ideal pot plant. For effect in cutting it must be grown without disbudding when a single spray will produce from five to a dozen flowers. It is a midseason, blooming November 1st to 10th.
Plants from 2¼-inch pots: 25c. each, $2.50 per doz., $15.00 per 100.

LAWN GRASS

"The Right Seed in The Right Place"

We furnish grass mixtures for dooryards, terraces, lawns, athletic and polo fields, cemeteries, parks, country clubs, country estates.

Repeated laboratory tests on individual mixtures assure superiority of quality and growth.

Experience of over fifty years of successful seed business assures you of correct proportions.

Experiment has shown us that a mixture of the proper grasses is more satisfactory than an individual grass. Why waste your time and money experimenting? Let us furnish what you need.

NOTES ON CULTURE OF FLORISTS' STOCK

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Chrysantheums

Get in whatever cuttings you need at once if you have not yet done so and just as soon as the cuttings have roots half an inch long get them out into soil so that the future plant will not be handicapped at the start by being weakened in the cutting bench. In potting young stock from the cutting bench use no bone or artificial fertilizer whatever in the soil, as it will only sour it. Fresh loam with a third of rotted leaf mold will be an ideal compost for a first potting. If leaf-mold cannot be procured some decayed cow manure is perhaps the next best thing. We must remember in handling the young chrysanthemums that we are dealing with a plant that is almost hardy and that an abundance of air is very necessary as soon as the plants are sufficiently established. Many modern establishments have a house with side and top air where young chrysanthemums can be kept down to any temperature desired. Do not leave the cuttings in the sand a week after they should have been potted. Get them out just as soon as you can into the light and air.

Care of Young Carnations

Give attention to the propagating bench and see that the cuttings ripen while they are rooting which will make them stand lifting and potting better. This ripening period should begin as soon as they start to shove out the roots. Gradually give them a little more sun each day until by the time they are ready to be potted they will be able to stand full sun. Do not consider any good soil good enough for carnations, but secure the best, which is a fibrous sod from an old pasture that has been stacked up all winter in alternate layers of sod and cow manure in the proportion of one load of manure to four of sod for heavy sod, and one to three for light. If the soil is in any way sour, or deficient in lime, add a sprinkling to each layer, also a sprinkling of soot enough to make it black. As soon as the roots are one-half inch long transplant at once as sand has no nutriment. Pot into thumb pots or flat boxes. Press the soil firmly and do not fill the pot too full, but be sure there is a little loose soil on top to prevent baking. Give shade until they will stand the sun well.

Bulbous Stock for Easter

All bulbous stock intended for the Easter trade will by this time be furnished with abundant roots which will allow any necessary forcing to have them right for Easter. Much depends upon the weather. This class of stock is, of course, better grown in a cool house, but with a cold, dark spell, such as not infrequently occurs near Easter some additional heat may be necessary. It is not always easy to time the various species under this head so as to be just right for Easter. In forcing these bulbs at this season it is well to figure on from three to five weeks. Tulips need about 70 degrees until the bloom is developed and should then be gradually hardened off in a cool house. For hyacinths, narcissi, etc., from 55 to 60 degrees will be high enough, but these will be better for a moderate amount of bottom heat. Of course a spell of hot weather will send these plants on with a rush and it may be necessary to remove them to a cold cellar to retard them. On the other hand, with cold weather a removal to the greenhouse or a closing of the frames to bottle up a little sunheat may be required.

Hotbeds

A line of hotbeds, or a whole block of them, proves most serviceable on any place where small stock is to be raised in quantity, be this for the general spring trade or the replenishment of greenhouse and garden crops. A well-firmed layer of fresh horse manure about 18 inches high, extending a foot or more beyond the space enclosed by the frame; will generate enough heat to defy belated cold spells and to last until all danger is past. The later the hotbed is made the less fermenting material is needed, and the more straw, hay or tree leaves are mixed with the fresh manure the less intense will be the heat, but the longer it will last. Three or four inches of soil is enough for the raising of seedlings or cuttings, and less if potted plants are to be placed in the frame. This layer of earth should not be spread until the first rank heat has escaped; at least seeds or plants should not be put in until the heat has settled down to a steadily held agreeable point. Should severe cold set in right after the bed is set up, a covering of the tightly closed sashes with hay or straw mats and all around the frames will soon start the heat. This covering can then be dispensed with, unless very cold nights and a low degree of heat under the sashes render its use advisable. There are few kinds of seeds, bulbs, cuttings, roots or small potted plants that could not be successfully started and raised in well-working hotbeds.

Fancy-Leaved Caladiums

The florists who have a good trade and a call for something attractive in decorations should plant some of the fine leaved caladiums. It is well to sort the tubers into sizes first so each batch can be planted into separate boxes. A good way to start them is to place some crocks in flats and on this spread moss, on which the tubers are placed quite close and covered with about an inch of moss. These flats should be placed in a frame on a bench where they have from 75 to 80 degrees bottom heat. With careful attention as regards watering, etc., they will soon make roots. When potting give them a compost of fibrous loam, leaf mold, peat and sand. Use pots just large enough to hold the roots comfortably. Give them a night temperature of from 70 to 75 degrees and keep the atmosphere rather humid. Watch the ventilating so they will not get any cold draughts.

Sowing Cosmos

If nice plants are wanted in 7 or 8-inch pots by next fall sow cosmos seed now. To insure a crop of flowers they should be grown in pots or boxes as they are generally injured by early frosts. Sow the seed in flats and when they are large enough to handle, pot them into small pots and keep shifting as they may require until they are in their flowering size.

Mr. Farrell's next notes will be on the following: Azaleas; Cannas; Carnations; Smilax; Orchids; Pansies

A great flower center

The removal of the Boston Co-operative Growers' Market from Park street to Winthrop square practically assures the assembling of the entire wholesale flower trade of Boston in one location for many years to come. The Boston Flower Exchange has already been located there for some time and all the wholesale flower dealers and supply houses are in close proximity. When Welch Bros. made the first move to Winthrop square a few years ago it was looked upon as a bold venture, but time has demonstrated the far-sighted wisdom of that enterprising house. The existing rivalry between the two markets will probably be intensified for a time by this latest development, but the clustering of all the wholesale interests in one neighborhood will, no doubt, be to the general advantage of both buyer and seller and all will thus be benefited. From now on Winthrop square is destined to be the great centre of New England's flower and plant industry.

New York's grand effort

Only a week more and New York's big flower show will be a reality. This venture is quite a different proposition from that of last year in the same place. Last year's exploit was under the auspices of the S. A. F. and affiliated national organizations whereas the work and responsibility of the present enterprise falls upon local organizations almost exclusively. The confidence which makes this possible is a direct result of the successful outcome of last year's exhibition which emboldened horticultural New York to take the step that hitherto had looked too formidable a risk, for the people of the great metropolis have a surfeit of amusements and it takes skillful handling to get them to adequately support a flower show. We earnestly hope for the success of this enterprise. What is lost through the partial localizing of its support is, we believe, more than overbalanced by the advantage of last year's experience. We look to see the show much improved in arrangement and general effectiveness and feel quite safe in predicting that those of our readers who take opportunity to visit it will feel well repaid, no matter how far they have to travel to get there.

Some trade advertising facts

One of our contemporaries significantly remarks that "it is not where a paper is printed but where a paper is read is what determines its advertising value." We might say, in passing, that arguments on the comparative publicity value of the several florists' trade papers need not keep anybody awake nights worrying over the cost of the advertising. The horticultural interests are in their infancy as compared with many other industries in the amount of money expended for publicity and, as compared with trade journals in other lines, the price of advertising in the florists' trade papers is unprecedentedly low for the service rendered. Whatever may be the comparative gross results from advertising in the various florists' papers it can safely be asserted that every one of these mediums, including those that are not perpetually burning incense to themselves, is giving more than value received and the advertiser who leaves either one of them off his list loses just so much of the special field and special support each exclusively enjoys. Further, if it were possible to select a "best" and force all the rest of these publications out of business by deserting them, the advertiser would then find himself face to face with the usual result following the stoppage of competition—a rate much higher than he now pays. Again, it is not alone "where" a paper is read but *who* reads it that has a bearing upon its value as an advertising medium. Lastly, numerical supremacy in circulation is very much over-rated as a factor in the advertising value of a trade or technical journal.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

The Cellar Drains

Some growers no doubt had some trouble with the water that started to pour into the cellars when the recent thaw came all of a sudden, with heavy rains to go with it. Where good drainage was provided there was little trouble, although the drains could not carry away all the water in certain cases. Where this was the case there is nothing better to take the water out of a cellar than a little pump called the Kinney Pump which is operated by city water, or the water on the place, as long as there is enough pressure to force the water about. A hose is connected to one end of it and another hose to the other end, and this is then stretched out of the cellars to a place where the water will run away. The The other end is then fastened to a faucet and the water turned on, and the pump will do the rest. These pumps are very inexpensive compared to the work that they perform in times of emergency, and they may lay on the place several years and never be used, yet when the time comes they save many times their cost for they are cheaper than frozen greenhouses with the boiler rooms flooded and the fires put out. Keep a few of them on hand, and they will pay good returns one of these days.

Soot

As the dark weather passes away, the plants will no doubt be a little off color, and the same may be said of the flowers. To remedy this a little soot can be scattered along the benches, not too much of it, just enough to blacken the surface of the soil. This can be watered in when the plants are watered, and will be very little additional labor. Where you are feeding the plants some of this soot in liquid manure, so much the better, as the roots will have all the more chance to get at it. Do not mix too much of it into the water as it is quite strong and may do some damage. If the benches have been limed recently, do not apply the soot, and the same if you intend to lime the benches in the near future. The lime and the soot will not mix to be agreeable to plant growth, and in many cases burned foliage, and the least visible harm—burned roots—are the results. Once the plants are damaged in this way there is some work ahead for the grower to rectify the damage although this is not possible at once.

Nitrate of Soda

This is a very strong fertilizer, and must never be used except with the greatest caution. Even the well experienced growers will hesitate to use it in most cases. If the weather promises to remain clear, and your plants are strong and vigorous, growing well, and you wish to help them along, then a little nitrate mixed into the liquid manure will do the work very nicely.

Scraping Around the Potted Plants

Do not allow any green scum to form on the surface of the soil in the pots. As soon as there is any at all to be seen, go over the plants with a little iron scraper that can easily be made out of a piece of iron laying around the place. Take the plant off the bench, and then run this scraper around to remove all the undesirable scum, and throw the so-loosened old soil into a flat or something that has been provided for it. Then stir up a little more soil so as to leave the surface of the pot a little rough, so that it will take the water better, and also to keep it clean for a while to come. When replacing the plants on the benches set them as we advised last week and you will find that they will grow much more rapidly to say nothing of their more stocky growth.

Other Stock in the Rose House

With the rush of the spring bedding plants we may be tempted at times to put a good many other plants into the rose houses. It is well to do that where there are enough men to take care of both roses and the bedding plants. It is hard for one man to look after too many things, as there will be something that will go to the bad somewheres. We would rather tear out a house of roses if we were to grow the plants in numbers, and then we could grow real good plants, as there would be no crowding.

Odontoglossum Rossii majus

This pretty Mexican odontoglossum should prove a favorite with both private and commercial growers and wherever there are any orchids grown at all, this little gem should be given a place of honor. The plants are dwarf, hardly ever more than six inches high, and therefore take up but little room. The flowers last a long time in perfection both in a cut state and on the plant and the color is all that can be desired in a flower. The plant reproduced in the cover illustration is of the variety called rubescens; the petals and lip a delicate shade of rose, with reddish brown markings on the sepals and toward the base of the petals. The pale yellow crest adds to its beauty. In the type species the flowers are white with purplish brown markings on the segments.

This orchid will grow best in a cool airy house suspended in small baskets or pans from the roof. A night temperature of 50 to 55 degrees will be about right in winter and would also be good during the summer, if there was a way of keeping the temperature down to that point. As it is, one must make the best of it by the judicious use of the ventilators. However, these Mexican odontoglots do not suffer so much from the heat of our New England summers as do their Columbian cousins, the Odontoglossum crispum and its allies.

From now on a little shade will be required, but during the winter, when the days are short and as soon as the sun has lost its burning power in the fall, no shade will be needed. Osmunda fibre with a little live sphagnum makes a good compost, but it should be used sparingly to allow of its drying out quickly in order to prevent it from getting sour. During the time the plants are making up their new growth, plenty of water can be given and even in winter when the new pseudobulbs are made up, the plants should not be allowed to remain dry for more than three or four days at a time.

Naugatuck, Conn. M. J. Cole

GRAND SPRING FLOWER SHOW

MARCH 21 to 28, 1914, Under the Auspices of the

Horticultural Society of New York and New York Florists' Club

and in Co-operation with

THE AMERICAN CARNATION SOCIETY, THE AMERICAN ROSE SOCIETY and THE AMERICAN SWEET PEA SOCIETY

To be held in The New Grand Central Palace, 46th St. and Lexington Ave., New York

FLOWER SHOW COMMITTEE

F. R. PIERSON, Chairman.
JOHN YOUNG, Secretary.
FREDERIC R. NEWBOLD, Treasurer
THEODORE A. HAVEMEYER.
CHARLES H. TOTTY.
W. A. MANDA.
WILLIAM DUCKHAM.
FRANK H. TRAENDLY.
WALLACE R. PIERSON.
JULIUS ROEHRS, JR.
PATRICK O'MARA.
JOSEPH A. MANDA.
JAMES STUART.
GEORGE V. NASH.
DR. N. L. BRITTON.

For schedules, or information, apply to John Young, 53 West 28th St., New York. Telephone, Madison Sq. 7362.

GENERAL INFORMATION.

Final schedules and entry blanks for the Grand Flower Show, which opens in New York on Saturday, March 21, have been generally mailed and extra copies can be had upon application to Secretary John Young, 53 West Twenty-eighth street, New York City. All exhibitors should have their plants at the Grand Central Palace by Thursday afternoon or Friday night at the latest. This will avoid confusion and greatly facilitate the work of the manager.

Secretary Totty has consented to act as chairman of the Board of Jurors, and all those who are to serve as judges on Saturday, March 21, should report to him at 11 A. M. on Saturday, but not later than 11.30. Secretary Young reports many entries already coming in.

Trade tickets may be had at the Secretary's Office, 53 West Twenty-eighth street, in blocks of 25 to 100, at 25 cents each. One hundred or more, at 20 cents each, with the words "compliments of," followed by firm name, if so desired, without any extra charge. The souvenir program will go to press on Saturday, the 14th inst. It has been decided to abandon the proposed lectures during the time of the exhibition.

It seems that every one is enthused with the Flower Show fever in floricultural circles in and around New York. George E. M. Stumpp will exhibit a Japanese Garden, which is expected to cause a sensation. We understand that Mr. Stumpp has been working for over two months, sixteen hours a day, on his exhibit. It is said that nothing like it has ever been exhibited before. Max Schling also promises some rare surprises, but he is keeping "mum" on what he intends to do.

The Horticultural Society of New York will have a pavilion which will be one of the features of the show. Here the ladies and gentlemen of that society will have headquarters and meet visitors and give necessary information. Great credit must be given to Theodore Havemeyer and Frederic Newbold for the splendid work they have been doing and the flower management are to be congratulated on having on the committee such earnest and enthusiastic gentlemen.

EXTRACTS FROM RULES.

All exhibits are divided into two classes—private growers and commercial growers. Any private grower exhibiting any variety of flowers or plants which he may grow for profit or offer for sale, shall exhibit such flowers or plants in classes calling for commercial growers. This, however, shall not debar him from competing as

Entries must be in the Secretary's hands not later than three days previous to date plants or flowers are to be staged. A charge of $2.00 will be assessed for every entry made after this date and the management reserves the right to reject any and all entries received after that time.

Entries for the Rose, Carnation and Sweet Pea Societies' classes must be made in accordance with the regulations provided in this schedule by the said Societies, and sent direct to the secretaries of the different societies, and a duplicate copy of the entries must also be sent at the same time to Mr. John Young.

Exhibits must be ready for examination by the jurors at twelve o'clock noon the day they are staged. *Exhibitors should note very carefully the days the different classes will be staged.*

Plants or cut-flowers exhibited in one class cannot compete in another class and no exhibitor will receive more than one prize in any one class, except in classes for novelties.

In classes calling for specimens, made-up plants will positively not be permitted; the plant or plants must have been growing long enough to have become established in the pot or pots in which they are shown.

Exhibits sent from a distance should be shipped charges prepaid, and addressed:

Flower Show Manager,
c/o International Exposition Co.
New Grand Central Palace,
46th St., & Lexington Ave.,
New York.

Exhibitors, other than those in the trade section, will not be permitted to give away circulars, cards, catalogues or any advertising matter or to solicit business. Exhibitors in the trade section paying for their space may have circulars, cards and catalogues exposed on such space for distribution and may transact business at their respective booths, subject to rules and regulations provided in the contract for the trade sections.

SCHEDULE.

The Schedule complete contains some six hundred classes. The greater part of these have been already printed in our columns and, as a full and complete printed schedule is at the option of anyone sufficiently interested to request same from the secretary, we shall do no more here than to give space to a brief summary of the various sections.

SECTION A—Plants in Flower; Private Growers. To be staged Saturday, March 21st. This section includes Classes 51 to 88 inclusive. The schedule enumerates liberal cash prizes and, as in all the succeeding classes, a number of cups and other special premiums are included.

SECTION B—Plants in Flower; Commercial Growers. To be staged Saturday, March 21st. This includes Classes from 100 to 129 inclusive, the premier prize being $200 for first and $100 for second display of Acacias, covering 200 square feet. As an addenda to Section B, Classes 130 to 140 are for Flowering and Foliage Plants arranged for effect, 200 square feet, and for forced shrubs, herbaceous plants, etc., arranged for effect.

SECTION. C — Palms and Foliage Plants; Private Growers. To be staged Saturday, March 21st. This section comprises Classes 140 to 156.

SECTION D — Palms and Foliage Plants; Commercial Growers. To be staged Saturday, March 21st; comprising Classes 170 to 186 inclusive. Addenda to Section D, Miscellaneous Plants; Commercial Growers. To be staged Saturday, March 21st; including Bay Trees, Box Trees, Conifers

and Japanese Maples in Foliage; covering Classes 200 to 208.

SECTION E — Miscellaneous Plants; Private Growers. To be staged Saturday, March 21st. Class 220 is for Bay Trees and 221 for Strawberries in Pots.

SECTION F—Ferns; Private Growers; To be staged Saturday, March 21st; Classes 230 to 240.

SECTION G — Ferns; Commercial Growers. To be staged Saturday, March 21st; Classes 250 to 257.

SECTION H—Bulbous Plants. To be staged Saturday, March 21st, covers Hyacinths, Tulips, Narcissus, Lily of the Valley, etc.; Classes 270 to 288.

SECTION I—Bulbous Plants; Commercial Growers: To be staged Saturday, March 21st; Classes 289 to 296.

SECTION J—Orchid Plants; Private Growers. To be staged Saturday, March 21st; specimens and groups, comprising Classes 310 to 329.

SECTION K—Orchid Plants; Commercial Growers. To be staged Saturday, March 21st; comprising Classes 340 to 358, the premier prize being $350 and $150 second, for collection of 100 plants arranged for effect, Palms and Ferns permitted.

SECTION L—Orchids, Cut Flowers; Private Growers. To be staged Saturday, March 21st; Classes 370 to 379.

SECTION M—Orchids, Cut Flowers; Commercial Growers. To be staged Saturday, March 21st; Classes 390 to 400.

With the Co-operation and Under the Management of the American Rose Society.

SECTION N—Roses in Pots and in Tubs; Private Growers. To be staged Saturday, March 21st; Classes 410 to 418.

SECTION O—Roses in Pots and Tubs; Commercial Growers. To be staged Saturday, March 21st; Classes 430 to 441. The premier prize in this class is $250, second prize $150, for display to occupy 300 square feet, arranged for effect.

SECTION P — Cut Roses; Private Growers. To be staged Monday, March 23rd; Classes 450 to 470.

SECTION Q—Cut Roses; Commercial Growers. To be staged Monday, March 23rd; Classes 480 to 527. The second division of Section Q for Commercial Growers, is to be staged Thursday, March 26. It includes Class 528, first prize $200, second $150, third $100, for display of Cut Roses covering 200 square feet, arranged for effect, with decorative green of any kind including plants permitted. The Mrs. Gertrude M. Hubbard Gold Medal for the best American Rose introduced in the last five years, will be awarded on Monday, March 23rd. The American Rose Society medals and certificates will be awarded in due course.

With the Co-operation and Under the Management of the American Carnation Society.

SECTION R—Carnations; Commercial Growers. To be staged Tuesday, March 24th; Classes 1 to 24, including a silver and bronze medal sweepstakes prize for best 100 flowers shown.

SECTION S — Carnations; Private Growers. To be staged Tuesday, March 24th; Classes 25 to 34.

SECTION T—Carnations; Commercial Growers. To be staged Friday, March 27th; Classes 35 to 36. The premier prizes in this section are $200 first prize, second $100, third $50, for display of Carnation Blooms, covering 150 square feet, arranged for effect, decorative green including plants permitted. Class 37 in the same section is for Private Growers.

With the Co-operation and Under the Management of the American Sweet Pea Society.

SECTION U—Winter Flowering Sweet Peas; Commercial Growers. To be staged Wednesday, March 25; Classes 540 to 564.

SECTION V—Winter Flowering Sweet Peas; Private Growers. To be staged Wednesday, March 25th; Classes 570 to 571. Class 572 is for Table Decoration of Sweet Peas exclusively.

SECTION W—Miscellaneous Cut Flowers; Private Growers. To be staged Saturday, March 21st; Classes 580 to 599.

SECTION X—Miscellaneous Cut Flowers; Commercial Growers. To be staged Saturday, March 21st; Classes 610 to 625.

SECTION Y — Violets; Commercial Growers. To be staged Wednesday, March 25th; Classes 630 to 631.

SECTION Z—Table Decoration; Private Growers. To be staged Wednesday, March 25th.

In addition to the foregoing the Horticultural Society of New York offers its gold, silver and bronze medals for exhibits of unusual merit.

N. B. Exhibitors remember and note specially when and what dates different sections and divisions are to be staged. All staging must be completed by noon of the staging date.

THE LAST WORD.

Among the donors of additional special prizes are the following: Mrs. F. F. Thompson, Mr. J. P. Morgan, Mrs. Alfred M. Coates, Mr. McDougall Hawkes, Mrs. Delancey Kane, Mr. and Mrs. Adrian Iselin, Miss Georgine Iselin, Mrs. Jas. Roosevelt, Mrs. H. V. R. Kennedy, Mr. Chas. G. Thompson, Mr. Isaac N. Seligman, Mrs. Wm. Combe, F. W. Vanderbilt, Mrs. Richard Gamble, Mr. John J. Riker; Mrs. Archibald Rogers. Silver Cups: Hotel Woodstock, Hotel Astor, Manhattan Hotel.

The general committee has decided that there shall be no formal lectures at this show. The acoustic properties of the temporary lecture hall available at the show last year were anything but good, and the outside attractions were so great that, save for those who sought rest, the lectures had very little drawing power. This decision allows of the setting aside of some much needed space for the comfort of visitors. Plenty of seating room will be provided, and, in addition, there will be a rolling chair service.

The committee has made a very creditable division in the schedule, the various exhibits called for on different days assuring practically a daily change in the arrangement of the show. The orchestra will be stationed in the balcony of the second floor. This will tend to relieve the congestion on the main floor which was at times very apparent last year. The very excellent restaurant service, which was a feature of last year's arrangements will be prominent again this year.

There are still a few good locations available for exhibits, and a letter addressed to Secretary John Young, 53 W. 28th street, New York, will insure the receipt of all information in this respect. There was never, in New York, a better opportunity to bring anything in horticultural lines to the attention of the flower-loving public than that presented in the forthcoming show. J. H. PEPPER.

Chairman Publicity Committee.

THE FRED DORNER MEMORIAL MEDAL.

This medal is offered by the American Carnation Society, under the following conditions:

A gold medal will be awarded to the best 100 blooms of any undisseminated seedling carnation (sports not admissible).

The variety must have been in cultivation not less than three years and must score not less than 85 points, judged by the American Carnation Society's scale of points.

The medal to be awarded to the originator, who need not necessarily be the exhibitor, and can be awarded to the same variety only once.

To be eligible to compete for this medal, 50 blooms of the variety must have been shown at a previous exhibition of the American Carnation Society in a preliminary class and scored not less than 80 points.

"Matchless" by Cottage Gardens Co., Queens, N. Y., won the medal at Cleveland this year.

A preliminary competition will be conducted at each exhibition for eligibility to compete for the medal next year. Fifty blooms must be shown of any undisseminated seedling variety.

The medal is paid for each year with the interest from a fund which was raised by voluntary subscriptions among the members of the A. C. S.

CLUBS AND SOCIETIES

AMERICAN ROSE SOCIETY.

The Executive Committee of the American Rose Society met in New York City on March 9, and registered the following named roses:

By Dingee & Conard Co., of West Grove, Pa.—"Climbing My Maryland." In all except habit of growth a duplicate of My Maryland, from which it is a sport. A decided climber.

"West Grove" (Liberty × Kaiserin Augusta Victoria). In color cerise pink. Flower flat in form, full and double, cup shaped. Habit of growth vigorous.

By S. J. Reuter & Son, Inc., Westerly, R. I.—"Lady Ann Borodell." Light pink sport of My Maryland. Very pleasing salmon pink shade, deepening in center of bloom to a lively pink. Habit of growth distinct from My Maryland, being much more vigorous, with heavier foliage and heavier growth in every way. Plants without bloom can be easily distinguished from My Maryland.

There have been five entries already made for the New York exhibition, and among them some of the finest pot plants. Robert Simpson, of Clifton, N. J., is the manager of the Rose Division. The entry blanks and final prize schedule are now available and have been mailed to all probable exhibitors. Treasurer Harry O. May will be on hand to give all assistance possible. The gentlemen who are to act as judges are as follows: Messrs. Philip Breitmeyer, Peter Duff, William F. Gude, Frank H. Traendly, F. A. Danker, Leo Niessen, Joseph Heacock, Walter F. Sheridan, W. J. Palmer, George Burton and William Kleinheinz.

The gold medal for the best rose originated in America during the past five years will be passed upon on Monday, March 23. The entire committee, as well as the Executive Committee, will act as a body of judges.

All entries will be filed in duplicate, one with the secretary of the Society and the other with John Young, general secretary. The ruling is, that no rose shall be exhibited with more than two growths; that is, with one pinch, except in a class calling for special displays. These rules it is desired to have generally known.

More members have paid their dues so far this year than has been done in the same period in any year previous.

BENJAMIN HAMMOND, Sec.

NEW YORK FLORISTS' CLUB.

There was an enthusiastic attendance of about 150 at the club meeting, Monday night, March 9. Chairman John B. Nugent gave a detailed report for the dinner committee. Tickets will be $5.00 for each person, and the dinner will be held at the Hotel Astor, on the evening of Thursday, March 26th. Frank R. Pierson, chairman of the flower show committee, gave a detailed report of the progress already made in the affairs of the Grand Spring Exhibition. Everything pointed to an overwhelming success of this affair. William E. Marshall reported for the outing committee that it had been decided to go to Glen Island for the annual outing on July 1st. Joseph A. Manda, recently appointed manager of the Flower Show, gave a vigorous talk, urging every member to assist in getting exhibits, to make the show the overwhelming success it deserves to be. John H. Pepper, State Vice-President for Eastern New York introduced the question of affiliation with the National Society for discussion. Mr. Pepper presented the matter in an able manner, and the discussion was taken part in by many of the members. It was practically the unanimous opinion that our club could not approve or endorse the plan of affiliation as at present outlined.

The committee on awards made the following report:

M. Van Waveren & Sons, N. Y. City. Narcissus Van Waveren's Giant; Narcissus Victoria; Tulip DeWet. These novelties look very promising and the committee would like to see them again under more favorable conditions. Vote of thanks.

Herman Mammitsch, Englewood, N. J. Sweet peas and antirrhinums. Vote of thanks.

W. R. Seymour, West End. Seedling Carnation. Scored 85 points. The committee recommend a preliminary certificate.

Twelve names were handed in for membership and twelve more were elected to membership.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

Our attention has been called to the wording of the resolution passed at the Feb. meeting of the Gardeners' and Florists' Club of Boston, which was as follows:

"That this meeting is entirely in sympathy with the National Association of Gardeners in its efforts of co-operation; that it fully endorses the principle and hopes at some time to be able to join with them and others in the furtherance of this object."

The discussion was on a communication from the Secretary of the Gardeners' Association, deploring the ineffectiveness of the work of the various clubs as small unrelated bodies, and pointing out how much could be achieved by the organized co-operation of the different units and inviting an expression of approval, or otherwise, of its idea.

The author of the motion, F. E. Palmer, however, pressed the point as it appeared to him that, if we really wanted to get together there was one logical way of doing so, viz: To join the S. A. F., which was waiting with open arms to receive us and give us the advantages of its organization and experience. He pointed out to members the incongruity of a situation in which, although expressing a desire to co-operate, they refused to join the only available body on the grounds that its membership was too limited.

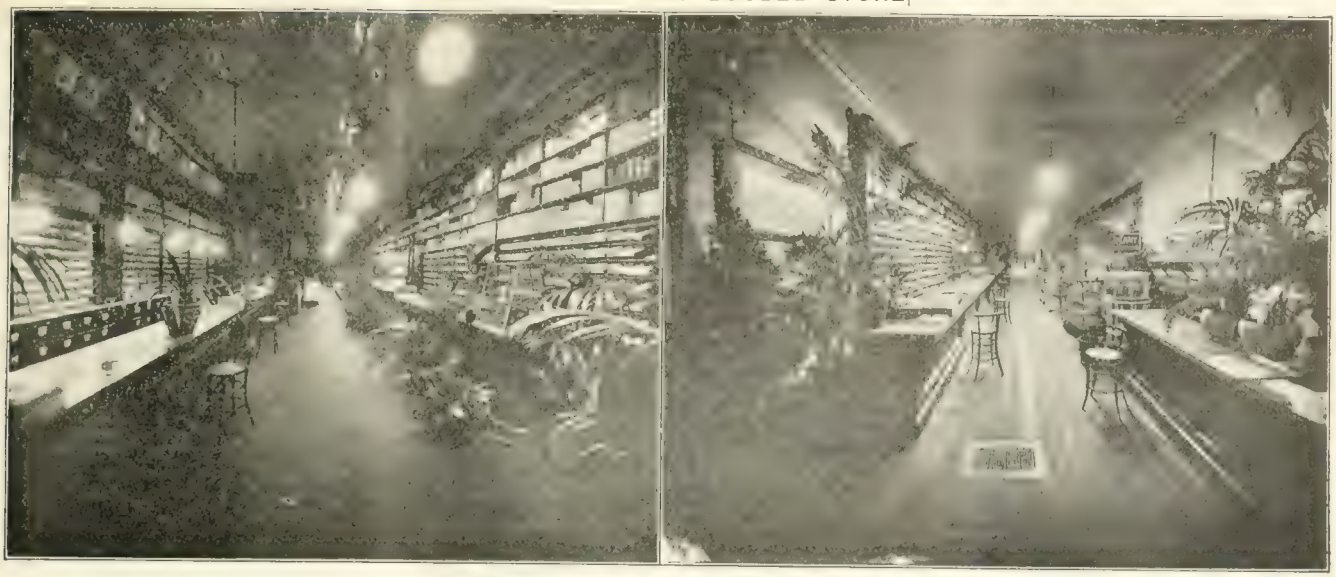
The result of this was some confusion in the minds of members as to what they were voting for hence the error in our previous mention of the occurence.

FLORISTS' CLUB OF WASHINGTON.

George H. Cooke will serve as president of the Florists' Club of Washington for the ensuing year as a result of the election held in connection with the March meeting of that organization. The other officers selected are R. S. Jenkins, vice-president; Elmer C. Mayberry, secretary; William F. Gude, treasurer, and Adolphus Gude and Theodore Diedrich, trustees.

Mr. Gude presented the suggestions of A Farenwald, of Roslyn, Pa., with respect to the affiliation of the various individual clubs throughout the country with the S. A. F. and O. H. As explained in a letter from Mr. Farenwald addressed to Mr. Gude, the large membership thus obtained would be advantageous in furthering the best interests of the craft with respect to nation-wide advertising, tariff and other legislation, express, parcel post and freight matters, etc. The following was then adopted: Moved, that it is the sense of the Florists' Club of Washington, D. C., that we affiliate with the S. A. F. and O. H. along the lines laid out by Mr. Farenwald, provided, that the national organization votes to admit local clubs as a whole.

Mr. Gude advised the club of his selection as a member of the Executive Board of the S. A. F. and O. H., stating that he would be present at the Board's next meeting in Boston on March 17, and that he would bring the matter of the William R. Smith Memorial before it. This led to a general discussion of that subject and many suggestions were offered as to what form this memorial could take. All of the speakers were in favor of a building to be the national home of the S. A. F. and O. H., its meeting place and that of any other organization of florists that might care to so make use of it, or the dedication of a room or suite of rooms in another memorial soon to be erected which would answer the same purpose.



Imke Wessel Staalman, of the firm of A. J. Van Der Vies & Co., of Oakton, Va.; George W. Hess, superintendent of the National Botanical Gardens; Frank P. Gaul, manager of the Washington branch of the S. S. Pennock-Meehan Co.; Henry Witt and C. H. Jenkins, were elected to membership in the club.

Following the completion of the regular business of the evening an informal discussion was had on various matters of interest to the local trade.

PITTSBURG FLORISTS' AND GARDENERS' CLUB.

The meeting of this club on the 3rd inst. was in the Fort Pitt Hotel. There was quite a good display of flowers, though nothing to what would have been shown had not the unprecedented storm in the east prevented shipments from that section. S. S. Pennock-Meehan Co., Philadelphia, managed to get through some fine specimens of Killarney Brilliant. The bright, lively color of this rose was

DREER OPENS NEW DOUBLE STORE

Last week was reception time at the Dreer stores in Philadelphia and a cordial invitation to the public to inspect their new double store, 714-716 Chestnut street, was extended through the daily newspapers. The new addition was opened on Monday, March 2nd, and a reception was held throughout the entire week, during which time many friends and customers availed themselves of the opportunity to inspect the new premises.

The two stores are connected through a large archway. Both have been renovated throughout and are provided with exceptional facilities for handling a large volume of business. The principal feature of the improvements is an entire duplication of the vegetable and farm seed departments, including lawn grass seeds, etc., thus giving double the counter space previously available for this purpose and permitting the employment of additional sales people.

Large space has been provided for displaying tools, implements, spraying machinery, poultry supplies and the numerous other merchandise to be found in an up-to-date seed store. A special plant department is another feature of the re-arrangement of the stores, where expert plantsmen will give correct information and attend to the wants of customers in this line. Provision has also been made for giving exhibitions of flowers at seasonable times, beginning in May and continuing until late in the fall. For this purpose a large room, with glass cover has been provided and exhibitions will consist of the new and leading varieties of flowers and should be a great aid to customers in making selections for their gardens. The shipping and delivery department has not been overlooked, but has been greatly enlarged and given ample space to permit of the quick and efficient service so much appreciated by purchasers of seeds, plants, etc., during the spring season.

For the occasion of the opening of this new addition to the Dreer establishment, both stores were tastefully decorated, large palms, bay trees and many other decorative plants being used with good effect.

---

much admired, and it was felt that there was a good place for it. It was awarded a certificate of merit.

T. Tyler, with Dr. Shafer, an orchid lover of Pittsburgh, showed Odontioda, Cattleya Trianae and Chorizema, and was awarded a cultural certificate.

Carl Becherer, gardener at Dixmont Hospital, Dixmont, Pa., showed a collection of hyacinths and tulips for which he received a cultural certificate. A similar award was given to Herman Rapp, gardener for D. T. Watson, Leetsdale, for cinerarias and to Wm. Thomson, Jr., gardener with W. P. Snyder, Sewickley, for Primula obconica.

It was voted that at the April meeting there should be an entertainment, refreshments would be served, the ladies invited, and a speaker secured to make an address.

A very entertaining and instructive address was given by A. B. Coggeshall of Carnegie Institute, on the Modern Scientific Methods of Finding, Preserving and Mounting Fossil Remains. The lecture was illustrated by lantern slides and though it did not have much to do with flowers was yet mighty interesting.

H. P. Joslin, Sec'y.

CHICAGO FLORISTS' CLUB.

The meeting on March 5th was "Novelty Night," and brought out the following interesting exhibits: A. N. Pierson, Inc., Cromwell, Conn.; New Rose Hadley. Bassett & Washburn; Mrs. George Shawyer, Cecile Brunner, Jonkeer, J. L. Mock in roses and Belle Washburn and Helen in carnations.

Wendland & Keimel, Elmhurst, Ill.; Milady, Sunburst, Killarney and Bulgarie roses.

Peter Reinberg; Mrs. Aaron Ward, Richmond and Sunburst roses.

S. S. Skidelsky & Co., Philadelphia, Pa.; New carnation Philadelphia Pink.

H. W. Wehrmann, Maywood, Ill.; sweet peas.

Poehlmann Bros. Co.; large exhibit of cattleyas, both plants and cut blooms.

A. T. Hey, Maywood, Ill.; cattleyas.

Carnation Philadelphia exhibited by Skidelsky scored 86 points and will be awarded a club certificate of merit. Hadley rose, exhibited by A. N. Pierson, will also receive a certificate of merit.

A communication from A. Farenwald, regarding affiliating with S. A. F. was read. The matter received considerable discussion by many prominent members. Motion was carried that the Chicago Florists' Club favors affiliation with the S. A. F., and recommends the payment of $1 per year dues for each member. The Lake Shore & Michigan Southern Ry. was selected as being the most desirable route to the S. A. F. Convention to be held in Boston in August, and the transportation committee will make arrangements accordingly.

David Lundin, Clarendon Hills, Ill.; Peter Schowbo, 5434 N. Seeley avenue, Chicago; James E. Jones, Richmond, Ind.; A. M. Sanders, 72 E. Randolph street, Chicago, and J. J. Grullemans, Lisse, Holland, made application for membership.

M. C. EBEL, Secretary - - - Madison, N. J.
NATIONAL ASSOCIATION OF GARDENERS

GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.

The annual election of officers of the Gardeners' and Florists' Club of Baltimore took place last Monday night and the following named were elected: Wm. J. Johnson, president; James Hamilton, vice-president; N. F. Flitton, secretary; George Talbot, financial secretary; F. G. Burger, treasurer; Charles M. Wagner, librarian. With the exception of the vice-president all were re-elected.

After the meeting was adjourned the members attended a banquet at Hotel Emerson. Ninety banqueters were seated in the banquet hall which was beautifully and bountifully decorated with drapings of Spanish Moss from Florida. There was also many fine foliage plants and each of the tables had a handsome bouquet of flowers. The long head table was simply burdened with Magna Charta and American Beauty roses, contributed by George Morrison. Isaac H. Moss was toastmaster and introduced each speaker by telling a good story that was apropos. President Johnson thanked the members for being re-elected and told of the fine condition the club was in. The next speaker, Wm. F. Gude, of Washington, proved to be the real orator of the evening. He paid a glowing tribute to the late Wm. R. Smith. He said Mr. Smith, as far as money was concerned, died a poor man, but he was, when good deeds and his usefulness and uplifting of the floral and gardening interests were concerned, one of the richest men the world has ever known. He outlined a proposed "Wm. R. Smith Memorial Hall," to be erected in Washington. Prof. H. J. Patterson, president of Maryland Agricultural College, made a very earnest address, showing how the college could and was always anxious to help the florists and gardeners. He thought there were great opportunities for growing vegetables under glass in winter in Maryland—the nearness to so many large cities affording most excellent opportunities to dispose of such products at good prices. Geo. Weems Williams followed with some entertaining stories, and spoke in high praise of two members of the club, Messrs. Flitton and Boone, whose services were of untold value to the parks. J. Otto Thilow of Philadelphia told how glad he was always to come over to the club's annual meetings and help experience the genial good will and "nearer to God" spirit the occasion produced, and when he referred in complimentary terms to John Cook, Maryland's "rose king," there was great applause. Prof. Thos. B. Symons, the next speaker, acknowledged that it was the work and exhibit made by the Baltimore Gardeners' and Florists' Club that made the last exhibition of the State Horticultural Society not only the greatest in its history, but brought with it the first financial success. He also gave his ideas of how the retail florists should advertise to increase a demand for flowers. David Rust, secretary of Pennsylvania Horticultural Society, also touched on the importance of advertising and mentioned how some advertised by filling their windows full of flowers.

Mr. Meehan, also of Philadelphia, made some brief remarks in similar vein. Richard Vincent, Jr., supplemented Mr. Gude's remarks in praise of the late Wm. R. Smith, whose great work had made him more famous than a dozen of the greatest generals in history. Mr. Vincent gave unstinted praise of the resources of the great state of Maryland, of which he felt proud to be a citizen. His address was warmly applauded.

SOCIETY OF AMERICAN FLORISTS

In order that all florists' clubs or other organizations may discuss the subject intelligently, President Theodore Wirth directs me to publish the recommendation made by the Board of Directors at the convention in Minneapolis last August. Action on this recommendation will be taken at the convention to be held in Boston.

"That the fee for members of any regular florists' clubs who wish to join the S. A. F. and O. H. as a body will be reduced to three dollars for the first year, and the annual dues thereafter to be two dollars per year for each member thereof. These dues must be paid to the S. A. F. and O. H. by the treasurer of each club and not by the members individually, and we further recommend that our constitution and by-laws be amended to comply with this recommendation."

Department of Plant Registration.

Public notice is hereby given that as no objection has been received or filed to the registration of Nephrolepis "New York," by George Giatras, 463 Summit street, West Hoboken, N. J., same becomes complete.

President Theodore Wirth has re-appointed W. F. Gude, Wallace R. Pierson, and F. R. Pierson as the committee having in charge the matter of making the arrangements for an experimental rose garden in Washington, D. C.

JOHN YOUNG, Sec'y.

SILVER PINK SNAPDRAGON

The accompanying cut shows a bench of our famous Silver Pink Snapdragon from seed, growing on our place last Memorial. It is a beautiful color and the

MOST PRODUCTIVE

variety in existence. A lot of fine plants, that will flower from Memorial throughout the summer, now ready at only $3.00 per 100; $25.00 per 1,000.

It is also a great bedding variety. Seed should be sown at once. Price, $1.00 per pkt.; 3 for $2.50; 7 for $5.00. Free cultural directions. All orders cash.

Remember—the MOST PRODUCTIVE variety in existence, and **productiveness** spells **profit.**

One of the Dreer Specialties

A Planting of Japanese Iris at Our Nurseries, at Riverton, N. J.

Dreer's Imperial Japanese Iris

These magnificent Iris are among the most beautiful of our hardy early-summer flowering plants and are destined to become as popular as the hardy Phlox and Paeonies. They are valuable not only as decorative flowering subjects for the garden, but are also very useful as cut flowers.

Our stock of Japanese Iris is very extensive in a splendid assortment of home-grown varieties and can be relied upon for being true to name and description. We supply these in strong liberal divisions of a most satisfactory planting size.

Six-Petaled Japanese Iris

No. Order by name or number.

4. **Yomo-no-umi.** A fine free-flowering early double white.
5. **Koki-no-iro.** Rich royal purple with white veinings.
9. **Oniga-shima.** Rich purple with many white veins.
10. **Shiga-no-ura-nami.** Violet-purple, veined with white.
22. **Sano-watashi.** White, with canary-yellow centre.
24. **Gosetsu-mai.** White veined and traced throughout with aniline-blue.
25. **Senjo-no-hora.** Beautifully mottled deep purple and white.
26. **Uchiu.** Bright purple with crimson sheen.
28. **Tsurugi-no-mai.** Rich, deep purple.
29. **Rish-no-toma.** Silvery white, densely veined and minutely dotted with violet blue.
44. **Yoshimo.** Creamy-white, delicately veined with purple.
47. **Renjo-no-toma.** Petals peculiarly fluted, light violet, with white halo and light veinings.
53. **Samidare.** Silvery white, suffused throughout with rich ultramarine blue.
60. **Kagaribi.** Ground color white beautifully traced and marbled with ultramarine blue.
69. **Waku-hotei.** Pure white veined with purple.
74. **Renkaku.** White, densely marbled and spotted with bright violet-purple.
94. **Komochi-guma.** Rich, velvety pansy-violet.
107. **Tokyo.** The finest pure double white.
108. **Shimosa.** White ground, minutely and densely spotted throughout with bright violet purple.
109. **Hosokawa.** Royal purple with white veinings.

Price: Any of the above. 15 cts. each; $1.25 per doz.; $8.00 per 100; $70.00 per 1000. The set of 20 sorts for $2.00.

Three Petaled Japanese Iris

No. Order by name or number.

11. **Hano-no-nishiki.** Bright violet-purple, veined with white.
12. **Shippo.** Light lilac, densely veined with purple.
14. **Shishi-ikari.** Light ground color, veined and mottled with dark violet-purple.
18. **Meiran.** White, densely marbled and veined with light violet.
23. **Yedo-Kagami.** Magenta-lilac, veined with white.
33. **Kakujakuro.** White ground, marked with violet-blue in such a manner that makes it appear as though the color was dusted on.
43. **Shi-un-ryo.** Grayish-white, deeply and densely veined and suffused with violet.
55. **Schuchiukwa.** A showy variety, crimson-purple with white veins and white halo.
62. **Misutmoshito.** Violet-purple, marbled with purple.
67. **Kigan-no-misao.** A late flowering pure white.
73. **Shirataki.** Silvery-white, border of petals suffused with light Parma-violet.
77. **Yayaura.** White, occasionally marbled with light violet.
82. **Ari-Ake.** Violet-purple, marbled with white.
85. **Ojochin.** Light violet-purple, the larger veins white.
86. **Sei-o-bo.** Large pure white, with faint violet-purple markings.
96. **Tebotan.** White ground, with prominent violet-blue veining.
97. **Shiro-fungen.** Light ground, suffused throughout with bluish violet.
100. **Yomo-zakuru.** Light ground color, densely veined and suffused reddish-purple.
102. **Shi-no-maki.** Rich royal purple.
106. **Sakata.** Light violet or lavender blue.

The Above Prices Are Intended for the Trade Only.

During Recess

Rochester-Buffalo Bowling Match.

Wednesday, March 5th, was the date set for the Rochester bowling team to visit Buffalo in the return match. A small delegation came on the morning train and were met by the Buffalo committee and taken in autos to the several local greenhouses and park conservatories and then to lunch at the Ellicott Club. The second section came at 5.30 and after visiting Buffalo's up-to-date flower shops they were taken to Messinger's Hof Brau for dinner at 7.30. The table decorations were under the management of S. A. Anderson and were carried out in Killarney roses, cattleyas, laelias and oncidiums. The room was banked with ferns and palms and southern smilax covered the walls. About 120 florists were present and a brief welcome address was given by the newly elected President of the Buffalo Florist Club, W. H. Eiss. S. A. Anderson was toastmaster and a number were called upon for a few remarks, including President Dunbar of Rochester, M. Keller, George B. Hart, Postmaster Kasting, W. J. Palmer, S. J. Mahoney, D. Seymour, Supt. of Buffalo Parks; H. E. Bates and others. In many of the speeches made by the visitors, the ending was on this order—"We will take the trophy with us tonight.

Arriving at the bowling alleys Announcer Neubeck fired the shot for the men to line up and laid down the rules of the game to the players. The judges were in their position and the rooters also. Below are a few notes depicting the excitement in a few frames and how Buffalo did not let that handsome Lord & Burnham trophy get away.

Salter up, a little nervous, but a spare resulted; Sandiford the old reliable, a strike; the club yell went up, strong and healthy. Keller brought down 9 and missed the 10th; Vick was doing good at 67 in the 3rd; Bowland was rolling nice and easy and indications pointed toward a high score; this was in the 7th. The rooting for Buffalo had some telling effect on the nerve of Salmon and Jenny, as they could not pick the last pin. The visitors were quiet until the awakening of the 9th, when strikes and spares were as easy to get as corrections during the Lenten season. Keller made a few "Gates Ajars," but managed to pick one often and [illegible] Brown Colonial. Four strikes in succession took the heart out of the last frame and the visitors were rapidly falling behind. The finish of the Buffalo team was Sandiford and the old reliable was [illegible] 211.

The Rochester announcer then had his little spell

"There is lunch in the rear
For every one here."

After a few minutes' intermission, the contest was again on. Buffalo weak, and for several frames the visitors strong from the beginning. The rooters were scattered about and not much life was shown. The Buffalos could not compete successfully and it looked as if the pin setters had been bribed. Some of the pins were glued and would not drop and Buffalo was getting weaker at every frame. Rochester going at a terrific clip; pins dropped like prices at the wholesaler's on a rainy day, and they could not be stopped. George Hart was all excited, Bates lost his voice, but Mike Keller had that everlasting smile and made strikes as easily as striking matches. The game went on and the visitors were leading by 120, a big margin in the 9th frame. The Buffalo rooters were called upon for the help-out, but too late, and the second game ended with a victory for Rochester by 66 pins.

The third game was on, and everybody was excited. Betting was not allowed. Up to the 4th the game ran pretty evenly. In the 6th, Rochester was leading, but in the 7th the Buffalos had the lead. In the 8th, many over-anxious to swell their scores and beat their man, broke with 7 and 8 pins. The 10th frame showed the score for Vick at 215, which helped out the [illegible] Speidel and the ending was a victory for Buffalo by [illegible] off of the [illegible] the last game totaling 961.

All in all it was a grand turnout; in fact much larger than had been expected but so much enthusiasm had been shown at the previous game that every member who attended certainly had an excellent evening's sport. The visitors were escorted to the train by the club's band in the early hours of the morning and all reached their destination safely as Capt. Salter had charge of the visiting crew.

Gardeners' Reunion.

The annual "Gardeners' Reunion" will take place at Thum's Alleys, Broadway and 31st street, New York, on Tuesday evening, March 24. The event will consist of bowling from 1 o'clock in the afternoon till 6.30 and dinner at 7 P. M. A number of valuable prizes have been donated by trade friends to be awarded for bowling. James Stuart of Mamaroneck is chairman of the committee of arrangements and tickets can be obtained from him by writing or in person at the Flower Show in Grand Central Palace. This reunion is a volunteer affair and not under the management of any organization.

"I enjoy your paper very much and find lots of helpful articles in it.
Rhode Island. A. T.

FOR FULL DESCRIPTIONS SEE OUR CATALOGUE—MAILED FREE.

We are the largest handlers of Cannas in the world. Our prices on Cannas will bear comparison with any house in the Canna business.

Our Cannas are true to name—two and three and sometimes four eyes—are sound, dormant, and are packed 250 in a box. Two can be "cleated" together and shipped as one. One box of 250 sold at thousand rate; it is cheaper for you to buy a box of 250 than 200 at 100 rate. Write for special prices on quantities.

If any Cannas are not found here, it may be understood that they are superseded by the foregoing. If selection is left to us we will substitute or send only the best for all purposes.
